Like chickens go for corn

Just like chickens go for corn, local merchants go for W-I-T-H in Baltimore. Smart retailers know that W-I-T-H produces low-cost results. Because W-I-T-H delivers more listeners-per-dollar than any other radio or TV station in town.

W-I-T-H can produce low-cost results for you, too. Ask your Forjoe man.

Go where there's GROWTH...

KENTUCKY

INDUSTRY FARMING

Transports and Tractors

Kentucky has five modern air terminals to meet the demand of travelers and shippers. And C.A.A. surveys show that Standiford Field, Kentucky's main airport, stands 18th in the nation in scheduled airline traffic ranking higher than the terminals in Cincinnati, Baltimore, and Minneapolis. In the last three years, in Louisville, combined air freight and express shipments rose 54% to 1,352,000 pounds; and 1952 passenger ticket sales will surpass 5 million dollars.

On the ground, trucks on Kentucky farms have increased more than 188% since 1942; while farm tractors increased a tremendous 500%.

Go where there's GROWTH...

GO WHAS!

No other station — or group of stations — in this market can match the audience delivered by WHAS seven days a week; morning, afternoon and night.

CLOSED CIRCUIT

SUGGESTION advanced that Al Hollender, who served as radio-TV head of Citizens for Eisenhower, become White House consultant on broadcast matters after Jan. 20. His status presumably would be similar to that held by J. Leonard Reinsch in early days of Truman administration. Mr. Hollender, well-known in packaging, is vice-president and stockholder in Gray Advertising Agency Inc. and is devoting virtually full time to that assignment. He wasn't interested in FCC commissionership, although proffer avowedly was made.

RE WHITE HOUSE set-up, Hollender suggestion isn't to be confused with known plan of James C. Hagerty Jr., who becomes White House press (news) secretary, to name an aide to handle radio-television. Importance of assignment presaged by report (see page 6) that Gen. Ike may abolish so-called news conferences as such, where questions are thrown at President by reporters, in favor of fortnightly broadcast from White House. Latter plan would bring wrath of press upon White House, since newsmen then would have to cover by remote control.

D. P. BROTHER & Co., Detroit agency, to open New York office early in January. Agency handles Oldsmobile division, General Motors Corp. C. H. Cottington, formerly executive director in charge of radio and television for Erwin, Wasey, will head Brother New York office. Oldsmobile currently sponsors CBS-TV news, three quarter-hours weekly.

NEWEST NAME to crop up for one of upcoming vacancies on FCC is Charles Garland, general manager of KOOL Phoenix and otherwise identified with Gene Autry interests. Strong GOP backing is claimed, including Gene Pulliam, owner of WIRE Indianapolis and Indiana and Arizona publisher, who is member of Republican National Committee. Mr. Garland is former Mayor of Des Plaines, Ill., and has been in radio for quarter-century, including last eight years in Phoenix. Garland's candidacy reportedly premised on understanding that new administration wants an experienced broadcaster on FCC.

NOW THAT Washington Post Co. has contracted to acquire WMBR-AM-FM-TV Jacksonville for $2,470,000 [B•T, Dec. 22, 1952] speculation has arisen whether it will seek to purchase *Florida Times-Union*, Jacksonville newspaper operated by three railroads under receivership agreement. Immediate prospects seen as remote, however, since railroads are embroiled in litigation including stockholder suit. Newspaper refuses airline advertising and features train arrivals and departures daily. It is one of two papers in town and has circulation of about 130,000 daily; 140,000 Sunday.

MEMBERS OF FCC last week received anonymous complaint against Mexican border TV stations, contending U. S. network or other program services for such stations will seriously undermine U. S. TV business in those areas. Allegations, from an attorney who did

(Continued on page 6)

HARD WORK, COOPERATION NEEDED, SAYS FRANK WHITE

FRANK K. WHITE, elected Friday as president of NBC (see story page 25), called for cooperation by network staff and affiliates, plus "a lot of plain hard work." After his election had been announced by Brig. Gen. David Sarnoff, RCA and NBC board chairman, Mr. White told B•T:

"It would be sheer presumption for me today even to attempt to give you a blueprint of what I hope we can do in the year ahead. There will be problems in both radio and television—perhaps more serious and more acute than those which have confronted us in the past. Their solution will require careful planning. It will require our best coordinated effort—both on the part of the staff here in New York and on the part of all of our affiliated station friends throughout the country. And above all, it will require a lot of plain hard work."

NCAA TO HEAR ABOUT PAY-AS-YOU-SEE TV

REPRESENTATIVES of subscription TV firms—Phonevision, Tele-meter, and Skiatron—have been invited to attend Thursday TV session during National Collegiate Athletic Assn.'s convention in Washington and make report on development in pay-as-you-see television (see story page 70). Asa S. Bushnell, NCAA TV program director, confirmed that invitations had been issued, but said he did not know whether any of the companies planned to put on demonstration of paid-television system.

MARTS TO TELERADIO

CARROLL H. MARTS, general manager of midwest operations for Mutual, named to same post for General Teleradio, General Tire & Rubber Co. subsidiary which owns Don Lee and Yankee networks, WOR-AM-TV New York, and controlling interest in Mutual. George Jeneson, midwest manager for WOR-AM-TV, also named midwest sales manager for KHJ-TV Los Angeles, another General Teleradio property.

ROY'S OTHER FOOT

FIRST ISSUE to confront Houston's new mayor, Roy Hofheinz, when he assumed office Friday was whether permission should be granted KPRC, *Houston Post* station which supported him, to record Houston City Council's meetings. Mr. Hofheinz, who controls KTHT Houston and other stations and who has established reputation as intrepid reporter who smuggled microphone into GOP National Convention caucus on seating of Texas delegation last July in Chicago, opposed authority on ground it would make city council members involuntary performers. "This is not a Chicago job," he said. Council upheld broadcaster-mayor and KPRC was excluded. Report still current, incidentally, that Mr. Hofheinz is selling 75% of KTHT to Houston group for $600,000 [CLOSED CIRCUIT, Dec. 29, 1952].

BUSINESS BRIEFLY

SIMONIZ SPONSORS ● Simoniz Co., Chicago (Simoniz Products) through Sullivan, Stauffer, Colwell & Bayles, N. Y., effective early in February to pick up sponsorship on alternate week of *Big Story*, NBC-TV, Fri., 9-9:30 p.m. Program has been sponsored weekly by American Cigarette & Cigar Co. (Pall Mall cigarettes), which will continue to sponsor show alternate weeks thus sharing budget with Simoniz.

WESTINGHOUSE SPONSORS ● Westinghouse Corp. to participate in sponsorship of new afternoon audience participation show on CBS-TV, effective early in March. Fuller & Smith & Ross, N. Y., is agency.

SHOE SPOTS ● J. P. Smith Shoe Co., Chicago, will release one-minute transcribed and filmed radio and TV spots to its dealers nationally Feb. 1 to advertise its spring line. Agency: Kuttner & Kuttner, Chicago.

PFAFF SPONSORS ● A. C. Weber & Co., Chicago, distributors of Pfaff sewing machines, signs to sponsor first quarter-hour of Wednesday broadcasts in Mutual's *Queen For A Day* series (Mon.-Fri., 11:30-12 noon), starting Jan. 21. Agency: Bozell & Jacobs, Chicago.

RADIO-TV SENATORS

NEW leaders of 83d Congress' Senate are connected, more or less directly, with broadcast station ownership. Sen. Robert A. Taft (R-Ohio), chosen majority leader, is associated through his family in ownership of WKRC-AM-FM-TV Cincinnati *(Cincinnati Times-Star)*. Licensee of WKRC also owns 20% of WBIR Knoxville, Tenn. Wife of Sen. Lyndon B. Johnson (D-Tex.), newly chosen minority leader, is owner of KTBC Austin, Tex. In addition, family of Sen. William F. Knowland (R-Calif.), chosen to be chairman of Senate GOP Policy Committee, owns KLX-AM-FM Oakland *(Oakland Tribune)*.

Other appointments made Friday during Republican and Democratic Party caucuses were: Senate—Sen. Styles Bridges (R-N.H.), president pro tempore; Sen. Leverett Saltonstall (R-Mass.), majority whip; Sen. Eugene D. Millikan (R-Col.), chairman of Republican caucus; Sen. Earle C. Clements (D-Ky.), minority whip. House—Rep. Joseph W. Martin Jr. (R-Mass.), Speaker; Rep. Charles A. Halleck (R-Ind.), floor leader; Rep. Clifford Hope (R-Kan.), chairman of GOP conference; Rep. Sam Rayburn (D-Tex.), minority leader; Rep. John W. McCormack (D-Mass.), minority whip; Rep. Wilbur Mills (D-Ark.), chairman of Democratic caucus.

PROTEST GRANT

PROTEST of FCC's unconditional grant to WTTV (TV) Bloomington, Ind., to switch from vhf Ch. 10 to Ch. 4 was filed Friday in U. S. Court of Appeals for District of Columbia by WSAL Logansport, Ind., which earlier in week appealed similar grant to WHAS-TV Louisville (see story page 57). WSAL contends grants prejudice station's appeal of Sixth Report allocations [B•T, Nov. 17, 1952].

'DOUBT' IKE WOULD END PRESS CONFERENCES

PRESIDENT-ELECT Dwight D. Eisenhower is being urged to discontinue regular press-radio news conferences and substitute periodic "Report to the Nation" broadcast, *Baltimore Sun's* Thomas O'Neill reported Friday.

In New York, James C. Hagerty, Gen. Eisenhower's press secretary, said President-elect had no comment to make on story. An Ike aide said, however, that he would "doubt very much" that Gen. Eisenhower was going to dispense with news conferences.

Group urging end of news conference quizzes stand good chance of impressing President-elect, Mr. O'Neill said. He referred to worsening relations between Ike and press and radio-TV correspondents shortly after election campaign began. He also said that since Nov. 4 newsmen have not had chance to question Gen. Eisenhower.

Periodic broadcasts, similar to late President Roosevelt's "Fireside Chats," would be about every two weeks, according to plan being urged on Gen. Eisenhower, Mr. O'Neill said.

HOUSE GROUP ENDORSES WALKER LIBEL PROPOSAL

PROPOSAL by FCC Charman Paul A. Walker that Sec. 315 of Communications Act be extended to cover authorized spokesmen for political candidates and that broadcasters be exempt from libelous statements uttered on air endorsed by House Campaign Expenditures Committee in report filed Saturday. Committee made no recommendations, however, explaining libel-censorship issue was not under its jurisdiction.

Committee, headed by Rep. Hale Boggs (D-La.), urged Congress to take "immediate action" on federal laws governing political expenditures. "Thorough revision is imperative," group said, favoring present $3 million ceiling by each political committee be "substantially raised." Committee also recommended federal laws apply to primaries and nominating conventions and felt that, while radio-TV campaigning is costly, it's impossible to regulate any expenditures under present law.

NEW ABC-TV AFFILIATES

SIGNING of three new affiliates by ABC-TV, bringing network's total to 76, announced by Alfred R. Beckman, national director of ABC Radio and TV Station Relations Departments. They are: KPTV (TV) Portland, Ore. (Channel 27), owned by Empire Coil Co., on air since Oct. 12, and headed by President Herb Mayer; KKTV Colorado Springs (Channel 11), owned by TV Colorado, on air since Dec. 7, and under general managership of James D. Russell; and WWLP Springfield, Mass. (Channel 61), owned by Springfield TV Broadcasting Co. with Alan C. Tindaw as vice president and expected to commence operations about Jan. 20.

BUSH RESIGNS CBS

SEN. PRESCOTT S. BUSH (R-Conn.) resigned from board of directors of CBS, post he has held for 21 years, as well as from boards of six other corporations, he announced last week. Sen. Bush, elected Nov. 4 to fill unexpired term of late Sen. Brien McMahon (D-Conn.), retained, however, his partnership in New York banking firm of Brown Bros., Harriman Co. and directorship in Rockbestos Products Co. of New Haven.

In this Issue—

What agencies are the biggest customers of radio and television? Here's a special report showing how the 30 biggest spenders, whose combined radio-TV billings are nearly $449 million, distributed their broadcast advertising in 1952. *Page 23.*

In sudden change of top command, Frank White becomes NBC president, replacing Joseph H. McConnell, who becomes president of Colgate-Palmolive-Peet; Sylvester L. Weaver Jr. moves up to assistant chairman of the NBC board, and John C. Herbert succeeds him as vice president in charge of radio and TV networks. *Page 25.*

Bing Crosby Enterprises demonstrates its system of recording television programming on magnetic tape. It's not perfected yet, but the company thinks it can be distributed commercially by the end of 1953 or early 1954. *Page 26.*

What will the 83rd Congress do about radio and television? Here's a list of broadcast matters that are destined for consideration on the Hill. The outlook is both good and bad for broadcasters. *Page 27.*

CBS calls on the industry and government to settle the color television question "as soon as possible," and "genuinely hopes" the NTSC can perfect the compatible system this year. So far, however, CBS thinks its own incompatible system is the only one that is practical, workable and inexpensive. *Page 57.*

RCA President Frank M. Folsom predicts that from 150 to 200 new TV stations will go on the air in 1953, and set circulation will be enlarged by 6,250,000. *Page 34.*

Dr. Allen B. DuMont, president of Allen B. DuMont Labs, forecasts "upwards of 75 new stations" for 1953 but, in general agreement with Mr. Folsom, thinks between 6 and 6.5 million TV receivers will be sold. *Page 34.*

Week-long AFTRA strike against WGN and WLS Chicago ends as management and union reach terms. *Page 38.*

Official U. S. Census figures of radio homes in Texas and Virginia. *Page 44.*

Upcoming

Jan. 6-10: National Collegiate Athletic Assn. convention, Mayflower Hotel,

Jan. 8: NARTB Convention TV Subcommittee, NARTB Hdqrs., Washington.

Jan. 9-10: South Carolina Broadcasters Assn. annual meeting, Francis Marion Hotel, Charleston, S. C.

(Other Upcomings on Page 74)

Closed Circuit

(Continued from page 5)

not identify his clients, were that border operations generally are controlled by Emilio Azcarraga, Romulo O'Farrill Jr., and Jorge I Rivera, at XETB-TV Tijuana, just below San Diego, Calif., and XELD-TV at Matamoros, Mexico, across from Brownsville, Tex. Doubted whether FCC will intercede since stations are not "outlaws" but are licensed outlets using allocations evolved in cooperation with U. S. Government.

WASHINGTON radio attorneys, resigned to interminable TV hearings, see two encouraging signs: (1) Once few decisions come out, lawyers can gauge what is considered significant, what minor. (2) When FCC Bar Assn.-Broadcast Bureau joint committee pins down details of new procedure—permitting one or two important concrete issues, not multiplicity of generalized ones as now—attorneys will hew to straight-line presentations, shortening hearings considerably.

FCC LAST week did its usual annual year-end clean-up on station sales, handling eight cases. That was to complete as many transactions as possible in calendar year. Among approvals (see page 25) was KMPC Los Angeles to Gene Autry and associates for $800,000 gross. Biggest deals still pending: ABC-United Paramount merger and related cases; Avco-Crosley acquisition of WLTV (TV) Atlanta for $1,500,000, and *Washington Post* purchase of WMBR-AM-FM-TV Jacksonville for $2,470,000 gross.

THESE senior appointments to FCC Broadcast Bureau or Law department under GOP rule are talked about: (1) Mary Jane Morris, now in litigation division, who has been an ardent Republican. Initially she was candidate for FCC itself. (2) Thomas P. Littlepage Jr., practitioner before FCC, whose father was one of the first specialized communications lawyers and was a staunch Republican from Indiana.

EXPANSION of Allied Public Relations Associates shortly will be announced. William F. Brooks, former NBC vice president, assumes charge of New York offices, with David B. Charnay taking over Washington headquarters in Cafritz Building.

CHICAGO AFTRA CLAIMS DRAW SCHREIBER REBUKE

STATEMENTS made by some union officials since settlement of Chicago AFTRA strike drew sharp reply Friday from Frank P. Schreiber, manager and treasurer of WGN Chicago (see story page 38). Mr. Schreiber said:

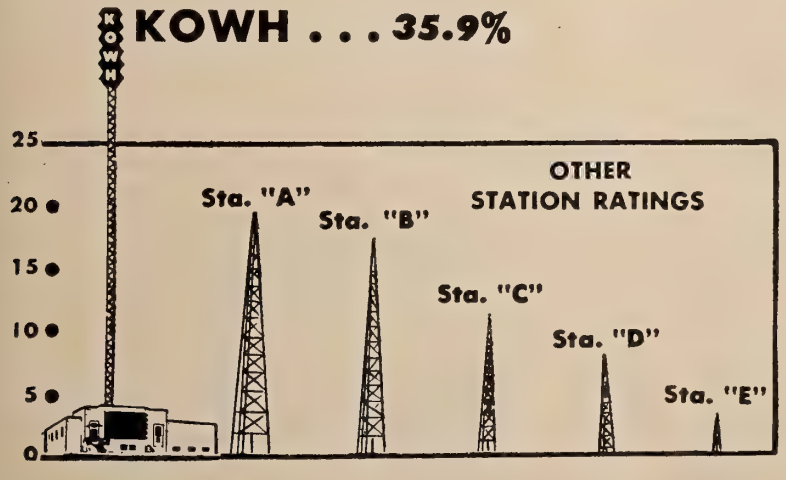
"The settlement of the dispute with AFTRA was made on the basis of all requests that WGN Inc. originally made to the union. The union conceded every point that WGN has requested in negotiations before the union called the strike.

"If Messrs. Jones and Wolff had conceded these points there never would have been a work stoppage. As a matter of fact, the union lost every issue on which it went on strike. I am amazed at some of the statements that have been issued by local union leaders to agencies, sponsors and the union members in view of the settlement which was made. WGN settled its dispute with the union with the national officers, George Heller and Henry Jaffe, without consulting with the local union management."

for more AT DEADLINE see page 90

The Proof of the Pudding . . .

. . . Is in the LEADING—or so the JELL-O-PUDDING and PIE FILLING box-top and 25-words-or-less contest indicates!



Conceived by Young & Rubicam for General Foods and aired in a spot campaign over 120 stations, the contest featured a slant that loaded the ether with sizzling pitches. To the disc-jockey that captured the greatest number of entries according to market size and time cost went an expenses-paid vacation in Paris for himself and wife. JELL-O PUDDING and PIE FILLING even picked up the tab for baby sitter fees!

T'aint fittin' to say, "We told you so," so we'll be content to hope KOWH's Hooper High Sandy Jackson and wife enjoy the trip.

Of course Sandy won—more proof that you can't do better than first place! And that's where the Hooper averaged below for the 14-month period from October, 1951, to November, 1952, puts KOWH—thanks to personalities like amiable Sandy.

C'est Magnifique!

- *Largest total audience* of any Omaha station, 8 A.M. to 6 P.M. Monday through Saturday! (Hooper, Oct., 1951, thru Nov., 1952.)
- *Largest share of audience,* in any individual time period, of any independent station in all America! (Nov., 1952.)

THE NATIONAL BOARD OF FIRE UNDERWRITERS
INVITES YOUR ENTRY FOR

Gold Medal Awards

For Outstanding Public Service in Fire Safety and Fire Prevention by Radio or TV Station in 1952

This is your invitation to enter the annual Gold Medal Awards of The National Board of Fire Underwriters. These AWARDS, or $500 in cash, are presented each year to a radio or television station—to a daily and weekly newspaper, too—which have conducted the best fire safety and fire prevention campaigns. Honor Award Citations are also made.

Your exhibit—composed of recordings, newspaper clippings, photographs, letters and other material—should be presented in scrap-book form. It need not be elaborate. Send in your exhibit to The National Board of Fire Underwriters, 85 John Street, New York 38, N. Y., *before February 16, 1953.*

Your local fire chief may submit an entry on your behalf. Exhibits will be judged by nationally-known representatives in your field. Awards will be based on the performance, effectiveness and worth to the community of the campaigns involved. All decisions are final. The National Board of Fire Underwriters takes no part in the judging.

Start Your Fire Safety Campaign For 1953 Now.

Winning campaigns are made by starting early, planning thoroughly and using every means to put your program across. Be sure to make a complete record of your campaign so your exhibit will be ready for entry for the 1953 Gold Medal Award.

GOLD MEDAL TIE IN 1951

Captain George Hood, right, of the Fort Wayne Fire Department Fire Prevention Bureau, with Franklin A. Tooke, Manager of STATION WOWO, Fort Wayne, Indiana, which participated in the first tie since the Gold Medal Awards were instituted in 1941.

Left to right: Chief Milton G. Brown, of Winston-Salem Fire Department, and Program Manager Robert Estes, Special Events Director John Comas and General Manager Harold Essex, of STATION WSJS, of Winston-Salem, North Carolina, which tied for Gold Medal Award.

Columbia Records, Inc. uses "Scotch" Magnetic Tape for its toughest recording jobs!

THE HIGHEST RECORDING STANDARDS in the industry call for the finest recording material available . . . that's why "Scotch" Brand Magnetic Tape is used by Columbia Records, Inc., for the exacting original recordings of famed Columbia Masterworks.

Music lovers everywhere look to these superb recordings for true, lifelike performances by the world's great artists. "Scotch" Magnetic Tape captures every note faultlessly, assures matchless quality of reproduction every time.

Here's why the nation's top recording engineers use more "Scotch" Magnetic Tape than all other brands combined

- Lower noise level than any other tape
- Greater output sensitivity than any other tape
- Better reel-to-reel uniformity than any other tape
- Erases cleaner than any other tape
- No curling or cupping—always lies flat on head
- Lubricated for longer head life

The term "SCOTCH" and the plaid design are registered trademarks for Sound Recording Tape made in U.S.A. by Minnesota Mining & Mfg. Co., St. Paul 6, Minn.—also makers of "Scotch" Brand Pressure-Sensitive Tapes, "Underseal" Rubberized Coating, "Scotchlite" Reflective Sheeting, "Safety-Walk" Non-Slip Surfacing, "3M" Abrasives, "3M" Adhesives. General Export: 122 E. 42nd St., New York 17, N.Y. In Canada: London, Ont., Can. *℗ The exclusive trade-mark of Columbia Long Playing Records—symbol of highest quality. on all accounts

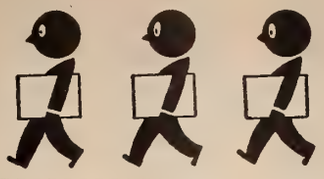
STEVE MUDGE, manager of the New York office of Ewell & Thurber Assoc., is a Willys-Overland man with a Ford in his future.

This apparent inconsistency comes from Willys' participation in the Ford Foundation's *Omnibus* show on CBS-TV.

Mr. Mudge, who is a newly-appointed vice president of the agency [B•T, Nov. 17], is the man responsible for the stellar radio - TV buys of Willys-Overland this year. Besides underwriting a portion of the *Omnibus* show and the New York Symphony on CBS Radio, the E & T manager also will direct his client's sponsorship on ABC radio and TV of the Inauguration this month of President-elect Eisenhower, and on CBS Radio and TV, the Coronation in June of Queen Elizabeth.

Born in Peru, Ill., Mr. Mudge attended the U. of Illinois and Lake Forest College. His first job was selling for a farm machinery firm. From there he went to th Webb Publishing organization, a salesman for a farm paper, then t *Photoplay Magazine*, Conde-Nas Publications in Chicago. His firs radio affiliation was with the Ed ward Petry representation firm a a salesman in the fall of 1938.

Next move was to Mutual where he was a networ salesman for fou years. He worke for ABC six month and helped mate rially to sell the *Spotlight Bands* show to Coca-Cola He later joined the Coca-Cola agency D'Arcy Adv., as supervisor of the *Spotlight Bands* program.



Mr. MUDGE

In 1947, he joined Ewell & Thurber to manage the New York office.

The Mudges—she is the former Constance Telling—have been married 15 years. They have a son, Jack. The family has a home in Bedford Village.

Mr. Mudge says his only hobby is "people" and that he drives an "Aero-Willys."

HERE'S A PLANT THAT GROWS ALL YEAR 'ROUND IN NEW ORLEANS!

- Way down yonder in the land of cotton . . . merchandising is not forgotten! With a sales climate that is favorable the whole year 'round, WDSU has developed a merchandising plan-t that covers our "Billion Dollar New Orleans Market".
- The formula for the healthy growth of our merchandising plan-t is no secret . . . it is a matter of year 'round attention. WDSU's merchandising knows *no* season! Week in, week out, our well-coordinated merchandising is working for our sponsors.
- Briefly, our plan-t includes:
  NEWSLETTERS
  ON-THE-AIR ANNOUNCEMENTS
  NEWSPAPER ADS
  JUMBO POST CARDS
  FRONT PAGE HIGHLIGHTS
  DEALER CALLS
  PUBLICITY
  and a 1953 addition
  OUTDOOR SPECTACULAR
- Why not let us put our merchandising plan-t to work for you?
- Phone, write or wire your JOHN BLAIR Man!

Here's Archer!

GENE ARCHER

WRC's Gene Archer, to be exact. With the individual music of the Cliff Quartette, plus Gene's own brilliant baritone style, "Here's Archer" is the only radio program in Washington regularly featuring live music.

Participation in this choice time period (1:45 - 2:15 PM, Monday through Friday) promises business in Washington. An impressive list of current national spots, including Cuticura, Sunbeam Bread, Hal's Beer simply supports Gene's selling story.

Audience loyalty of "Here's Archer" offers an immediate association with a "Name Performer" in the nation's Capital, for Gene is known about town not only as a radio artist but as a featured star in theatres and supper clubs.

There's a lot of SELL in a $22.50 participation on "Here's Archer" . . . Contact the WRC Sales Department or NBC Spot Sales for the few remaining availabilities.

feature of the week

FURTHER proof that daytime television packs a selling wallop is provided by KPRC-TV Houston with its program, *Coffee at 9*.

Originally, the show was designed primarily to make friends and only secondarily to sell. The institutional value is still of prime importance but the show's selling impact no longer is underestimated.

Mrs. Sue Jones, housewares buyer for Good Housekeeping Inc., of Texas, attests to month after month of sustained high level success from the two shows sponsored weekly by her firm (Tuesday-Thursday, 9-9:15 a.m.).

Mrs. Jones not only stars in the show but buys merchandise for Good Housekeeping's five Texas stores and is charged with the responsibility of getting it on the air and selling it. And she is thoroughly convinced that "in Houston, daytime television sells housewares."

Featured along with Mrs. Jones on the show is Ted Carr, announcer, who spices the commercials with humor but who also sells with conviction and enthusiasm.

Inasmuch as the audience for *Coffee at 9* is almost exclusively composed of non-working housewives, the sales pitch is tailored specifically for that group.

With that design in mind, *Coffee at 9* aims at softening any feelings of guilt the housewife might harbor over spending family money for products advertised or perhaps taking up time watching television.

This is accomplished by pointing up valuable housekeeping hints and offering products considered chiefly for the benefit of the family.

Proof of the sales impact of *Coffee at 9* is the volume of store traffic on Tuesdays and Thursdays and the large telephone business those days. Some of Good Housekeeping Inc.'s competitors report dramatic sales from *Coffee at 9*—a result that is not unwelcome because the program is heavily co-oped.

Mrs. Jones, executives of KPRC-TV and Gregory-Giezendanner Co., advertising agency which produces the show, all agree that there's only one possible reason for the success of *Coffee at 9*: Housewives like to sit at home and shop.

strictly business

ALTHOUGH O. R. (Jim) Bellamy, general manager, WPTR Albany, N. Y., has increased sales 200% at his station in the past six months, he feels that only the surface of the market has been scratched.

Despite strong competition, Mr. Bellamy also has, in six months of personal guidance, increased ratings 250%.

Mr. Bellamy believes radio is stronger today than ever, because of its spontaneity and adaptability.

Confidence in himself and the medium and cooperation with sponsors are the keys to success for this scrappy ex-marine.

The importance of doing a job well is placed ahead of financial gains in Mr. Bellamy's approach. His chief complaint is that the business day is too short.

Mr. Bellamy entered broadcasting in 1927 as an announcer for WPAY Portsmouth, Ohio. Moving on, Mr. Bellamy joined WSAZ Huntington, W. Va., as a singer. Then, as the urge to get into the selling end of the industry mounted, he became a time salesman for WFBE Cincinnati (now WCPO).

Impressed with his abilities as a

Faithful Readers

EDITOR:

Thanks . . . for the story in . . . your "Respects" column.

It is not surprising to me that I have had a number of letters and telephone calls from friends all over the United States as a result of this story.

They do as I do—read BROADCASTING • TELECASTING from "kiver to kiver."

Alex Keese
Manager
WFAA Dallas

* * *

Interim Affiliation

EDITOR:

. . . Your article on page 59 of the Dec. 22 issue erroneously reports that WSBA-TV is a DuMont affiliate. The arrangement between WSBA-TV and DuMont certainly does not constitute an affiliation. WNOW-TV is the signed DuMont affiliate for the York-Harrisburg-Lancaster area.

WSBA-TV will carry certain programs from DuMont as ordered by national advertisers. These and other programs from DuMont will be switched to WNOW-TV when the station begins operation with 100 kw (ERP) early in 1953. . . .

Edwin L. Jay
Television Coordinator
WNOW-TV York, Pa.

* * *

Far-Flung Audience

EDITOR:

In your Dec. 8 . . . "Open Mike" you carried a letter from a Mr. Ripple of WBKV, a 500 watter in West Bend, Wis., under the heading of "Distance Record?"

I think you can add another question mark to this. We have in our files . . . five letters from New Zealand. I've taken the trouble to list the name of one New Zealand listener who heard our station. His name is W. J. Marsh of 429 Elles Rd., S. Invercargill, N. Z., who heard WPTW during a test broadcast at 2:11 a.m. reporting an R4 QSA3 report on a nine tube Sky Challenger receiver. WPTW was also heard that same date at 265 Nelson St., also in S. Invercargill. The other three letters are from members of the New Zealand D.X. Club who have heard WPTW during early morning test broadcasts at various other dates.

WPTW is a 250w station. . . . This station operates non-directional. . . .

Norbert C. Poeppelman
Engineer
WPTW Piqua, Ohio

* * *

Promotion Pays

EDITOR:

. . . What I believe to be one of the finest promotions I have yet seen in the radio business . . . is the recent Ralston-Purina bowl promotion contest in which radio stations and Purina dealers were spurred on to a new degree of cooperation by a trip to a major bowl game as the bait.

Of course I am quite sold on their plan because we here in Pendleton won the contest for the North Pacific Sales Division of Purina . . . The advertising manager of the local Purina dealer, the Pendleton Grain Growers, his wife, myself and my wife leave for the Rose Bowl Dec. 28, all expenses paid by Purina.

More than the trip, however, is the lasting effect. During the contest the Pendleton Grain Growers spent additional money on radio, and now are completely sold on a planned-out promotion and its potential. Radio advertising is now tops on their list. . . .

Ted A. Smith
Station Manager
KWRC Pendleton, Ore.

Christmas & Choirs

EDITOR:

We recently completed our third annual Christmas program that we think is a great public service and interesting programming. . . .

The week before Christmas we visit the various churches in our city and record a Christmas song of their choosing, sung by their choir. We do this on the night of their regular choir practice. After we have the selections from the individual churches, we construct the program as a unit with narration to cover identification of choir, church, director, organist, etc. . . .

We do the same thing and program it a different night from the churches in our immediate area for [other] communities served by our station. . . .

Bud Suter
Program Director
KGLO Mason City, Ia.

in the public service . . .

NEARLY $6,000 was raised in December by WROL Knoxville in behalf of two public causes—a milk fund and a fight-polio drive. Station raised more than $3,100 for the *Knoxville Journal* Milk Fund, with appeals on Cas Walker's regular programs. The U. of Tennessee football team also bid for funds. Second project was WROL's "Give a Hand to Polio Campaign" which urged farmers to donate tobacco to the local polio chapter. Drive netted $2,546.07 in the first two weeks tobacco was sold and is being continued.

* * *

KHJ-TV's 'Milkathon'

SAINTS & SINNERS "Milkathon," telecast on KHJ-TV Hollywood Dec. 20-21, is expected to gross $45,000 of the $52,000 pledged, according to top producer Sam Mannis. An estimated $8,000 will go for talent fees.

Stopping Streamliner

THANKS in large measure to FCC's editorializing privileges, WEEB Southern Pines, N. C., has managed to stop a streamliner dead in its tracks. Jack Younts, WEEB president, waged a vigorous air campaign for a scheduled stop of the Seaboard Airline's Silver Comet in Southern Pines. The train now debarks passengers at the resort town. Concession was granted by the railroad after conferences with Mr. Younts and station had sent scripts and tape recordings of its editorials to Seaboard. Local newspaper, the *Pilot*, commended Mr. Younts for his efforts and welcomed the innovation in an editorial.

WARA Aids Boy

WARA Attleboro, Mass., reported last week that a seven-hour broadcast Dec. 21, and other repeated pleas, brought nearly $5,000 in contributions from listeners to aid a badly-burned boy. The marathon broadcast included appearances by Santa Claus, community entertainers, city officials and the boy's nurses and family. Volunteers, led by Jo Sherman, WARA women's director, were kept busy "on their day off" taking phone pledges.

* * *

Gas Emergency

KRES St. Joseph, Mo., played an important part in a gas emergency Dec. 20 and continuing for three days in that city. KRES cancelled all regularly scheduled programs devoting time to special bulletins. Station also made available to the city's Gas Service Co. the three phone lines to the station. Gas service employe aided by KRES staff answered listener queries.

* * *

KGAE Gets Toys

SATURATION spot campaign was used by KGAE Salem, Ore. to collect toys for the Exchange Club of that city. Drive netted four times as many items as in past years. Up to 15 announcements per day were aired by KGAE. No other medium was used.

Strictly Business

(Continued from page 16)

when the Airway Co. asked him to be branch manager. Mr. Bellamy led branches in Toledo and Cincinnati to top honors in sales. But Mr. Bellamy had never gotten broadcasting out of his blood.

He joined WKRC Cincinnati in the sales department. After a short period there, he joined WSAI Cincinnati. Then came World War II.

As an officer in the Marine Corps, Mr. Bellamy served with honors in the Pacific. He was honorably discharged in 1945 with combat awards and the Purple Heart.

As an account executive for the Frederic Ziv Co., he resumed association with broadcasting. Shortly thereafter, he became general manager of WWSO Springfield, Ohio. Later he accepted the general managership of WPGH Pittsburgh, Pa., where he increased business by 300%. He then moved to WPTR.

Mr. Bellamy is 44 years old, is married and has two sons: James, 24, a sergeant in the U. S. Air Force, and Joseph, 11. He is active in the Chamber of Commerce, the Masons, Shrine and the American Legion. Not the least of his prides —he was chosen to be scoutmaster of a local troop.

CHICAGO FAIR

Equipment Display Planned

AMERICAN and foreign high fidelity and audio-video equipment are expected to attract more than 20,000 visitors at the combined International Sight and Sound Exposition and Audio Fair in Chicago Sept. 1-3. The event, described as the only public show of its kind to be held in the Midwest in 1953, will take place at the Palmer House Hotel.

The three-day public and trade display will show new developments in "the three-quarter billion dollar blue ribbon hobby" which is winning a following of millions, in the opinion of Harry N. Reizes, manager of Audio Fairs. He is working on exposition plans with S. I. Neiman, president of the combined show.

Mr. Neiman is handling the show in Chicago, while Mr. Reizes is in charge of exhibit space sales and promotion in the east. His headquarters is in New York.

Sheet Music Courtesy of Leo Feist Inc.

DO YOU REMEMBER ?

25th ANNIVERSARY

When the strains of this catchy, heart-pulling melody was on everyone's lips. The "and baby makes three" touched young hearts everywhere . . . and thus a song was born that is still played and replayed . . . and will ever be. Yes . . . do you remember? We do . . . for that was the year WWNC was born. Just as the sweet notes of "My Blue Heaven" have echoed thru the years . . . the voice of Western Carolina has become an accepted member of our 12-county family of radio-listeners. When 84% of all radio listeners (50-100% BMB penetration) over this area prefer WWNC . . . the reason is simple. WWNC, with its experienced "know-how" provides entertainment, service and news. Twenty-five years of operation deserves—and gets—recognition.

BROADCASTING

Vol. 44, No. 1 JANUARY 5, 1953

30 LEADING AGENCIES IN RADIO-TV BILLING

a B•T SPECIAL

In 1952 these were the 30 most active agencies in radio-TV. Together they handled broadcast billings of $448.9 million, $182.9 million in radio and $266 million in TV.

By FLORENCE SMALL

BBDO, with broadcast billings of $40 million, in 1952 was the leading radio and television agency in the country, on the basis of a just-completed B•T survey directed at determining the nation's top 30 advertising agencies for the past year in radio and TV.

While BBDO also led in TV billings alone with $26.5 million, Dancer - Fitzgerald - Sample was the ranking agency for radio alone with $17.5 million expended in that medium.

Estimated total radio and TV billings among the leading 30 agencies came almost $449 million, with television accounting for about $266 million and radio $182.9 million.

Young & Rubicam ranked second to BBDO in combined radio and television outlay with expenditures of $36 million, followed by Benton & Bowles and the Biow Co., each with billings of $30 million.

The figures represent the expenditures for time and talent in both network and spot throughout the survey. In almost all cases they are based directly on informtion received from officials of the agency involved. Where agency sources did not supply their broadcast expenditure data, the figures were estimated by BROADCASTING • TELECASTING on the basis of the best information available.

The First Ten

Completing the list of 10 leaders were: William Esty, $28 million; J. Walter Thompson Co., $27 million; Dancer-Fitzgerald-Sample, $26 million; McCann-Erickson, $25 million; Foote, Cone & Belding, $20 million; and Leo Burnett, $18 million, all figures representing combined radio-TV billings.

The smallest among the remaining 20 billed more than $3.4 million in a year of rising advertising outlays attributable somewhat equally to the increasing cost of television and to the nonetheless growing appeal of that medium to advertisers.

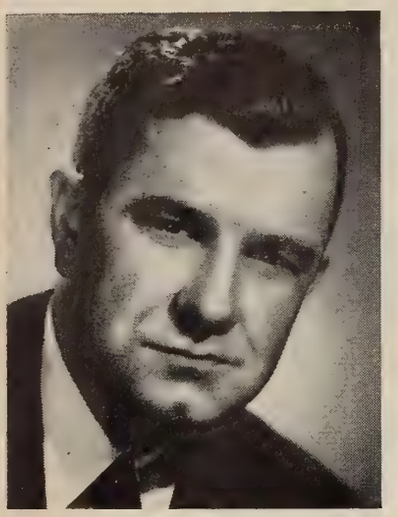
A significant development in 1952 was the trend toward merger of agencies with some emphasis on the alliance of smaller firms with their larger brethren, an effect of the increasingly onerous cost of doing business in a television era.

In the following complete listing of the top 30 AM-TV agencies in the order of their billing, B•T includes in each case a capsule profile of the agency drawn from the record of its activity over the past year. Recorded also in each instance is a breakdown of billings between radio and television as well as percentage expression of the agency's AM-TV total in relation to its overall billing for the year.

BATTEN, BARTON, DURSTINE AND OSBORN: Radio-TV billing, $40 million; $13.5 million in radio, $26.5 million in TV. Radio-TV share of agency's overall billing, 33%.

Leader among the agencies in the survey, BBDO has long been a champion of the medium responsible for its ascendancy, television. In 1952 the agency introduced DuPont to TV (*Cavalcade*, NBC-TV), enlisted the Hamilton Watch Co. with a regional alternate-week TV show, *Your Jewelers Showcase*, took over Fred Waring and the General Electric account, from Young & Rubicam, started the *Keep Posted* program on DuMont for Curtis Publishing, and for General Baking began sponsorship of the *Hopalong Cassidy* TV show on a regional basis.

Its radio additions, all on behalf of Wildroot and placed exclusively on Mutual, were: *Twenty Questions, Titus Moody,* and *The Shadow.* One BBDO account, American Tobacco Co., last year dropped its *Meet The Champ* show on ABC-TV but took on *Biff Baker —USA* on CBS-TV. Minnesota Mining and Mfg. cancelled *Juvenile Jury* on CBS-TV. The impressive outlay of BBDO in 1950 was due in no small measure to the high cost of the talent on the shows.



Its regular casts included, among

(Continued on page 28)

HOW LEADERS RANKED IN 1952

Position & Agency	AM-TV Billing (In Millions)	Radio Only (In Millions)	TV Only (In Millions)	AM-TV Share of Overall Billing

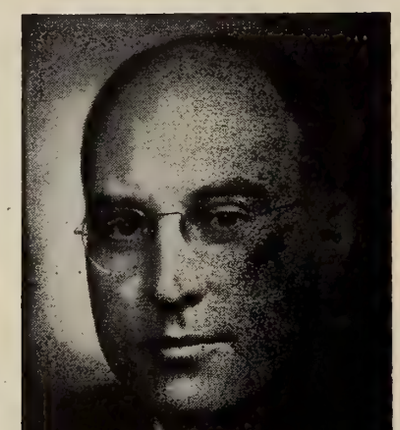
Key Figures Involved in NBC Reorganization

Mr. WHITE

Mr. WEAVER

Mr. HERBERT

FRANK WHITE who on Friday was elected NBC president to succeed Joseph H. McConnell, thereby gained the unique distinction of having been president of two nationwide networks—and within the span of less than a year. He joined NBC last summer, following his resignation as president of MBS on May 31, and has been vice president and general manager of NBC's radio and TV networks.



Born in Washington, where he attended George Washington U. but interrupted his schooling in 1918 for service in the Navy as an aviation cadet, he combined education and business until 1921, when he joined the accounting firm of Lybrand, Ross Brothers & Montgomery. In 1924 he became assistant to the president of Union News Co., leaving that post after five years to join the Literary Guild of America, which he served as treasurer for six years.

In 1937, after two years as treasurer of Stage Publishing Co., Mr. White moved into radio as treasurer of CBS, where in 1942 he was named vice president and director as well. Late in 1947 he was elected president and director of Columbia Records Inc., a CBS subsidiary. On May 1, 1949, he resigned this post to become president and board member of Mutual, serving in those capacities until last May.

* * *

SYLVESTER L. (PAT) WEAVER, just appointed to the newly created position of vice chairman of the NBC board, has been active in advertising and broadcasting ever since his graduation from Dartmouth in 1930, when he landed a copywriting job in his home city of Los Angeles.

During the early 30s he was a writer-actor-producer for the Don Lee Network and was program manager of Don Lee's KFRC San Francisco before moving to New York in 1935.

Mr. McCONNELL

Joining Young & Rubicam, where his initial assignment was producing the Fred Allen show, Mr. Weaver by 1936 had been made manager of the agency's radio department. In 1938, he moved to American Tobacco Co., subsequently becoming advertising manager of the company, one of the nation's largest advertisers. During the war he served with the office of the Coordinator of Inter-American Affairs and later as commander of an escort ship in the South Atlantic.

After the war, Mr. Weaver returned to American Tobacco but shortly thereafter he rejoined Young & Rubicam as vice president, playing a major part in getting the agency's clients started in television. In August 1949 he joined NBC as vice president in charge of television and last June was named vice president in charge of both the radio and TV networks. He also has been a member of the NBC board.

JOHN K. HERBERT, newly named NBC vice president in charge of the radio and TV networks, joined NBC in September 1950 as assistant to the president. In November he was appointed general sales manager of the NBC radio network and in January 1951 became vice president in charge of radio network sales. Last July, when NBC reintegrated its radio and TV sales activities, he was named vice president in charge of all network sales, both radio and TV.

A native of Winthrop, Mass., Mr. Herbert attended Holy Cross College before entering the business world with Socony Vacuum Oil Co. After a term as a cotton broker with Jones, Gardner & Beal, he broke into advertising in 1932 with *Esquire* magazine and six years later joined Hearst magazines, where he rose to the post of vice president and general advertising manager, which he left to join NBC.

During World War II, Mr. Herbert served in the Marine Corps from January 1943 to October 1945, when he left the corps with the rank of captain.

* * *

JOSEPH H. McCONNELL, born in South Carolina and reared in North Carolina, first won fame as a football star at Davidson College and, after his graduation in 1927, taught chemistry and coached football at Woodberry Forest School in Virginia for a year before entering the U. of Virginia Law School, where he won his law degree and a Phi Beta Kappa key in 1931.

After practicing law in West Palm Beach and Charlotte, Mr. McConnell joined the legal staff of the NRA in Washington, serving as director of one of the agency's three legal divisions until the NRA was dissolved in 1935. He then moved to New York with the firm of Cotton, Franklin, Wright & Gordon (now Cahill, Gordon, Zachry & Reindel) and, after working largely on RCA business, in 1941 became a member of the legal department of RCA Mfg. Co. (now RCA Victor Division).

The following year he was named general counsel and three years later was elected vice president and general attorney of RCA Victor. From April 1947 to January 1949 he served the division as vice president in charge of law and finance, then becoming vice president in charge of finance for the parent company, RCA. In July 1949 he was named RCA's executive vice president, and on Oct. 7 of that year he was elected president of NBC.

SACKS, STRAUSS

Elected to New Posts

ELECTION of Emanuel (Manie) Sacks, staff vice president of RCA, to the additional function of vice president and general manager of RCA Victor Record Dept. was announced last Friday as a sequel to top-level appointments to the NBC board at RCA and NBC board meetings.

Simultaneously announced was the election of Lewis L. Strauss, consultant and financial advisor to the Messrs. Rockefeller, as a member of both the RCA and NBC boards, filling vacancies created by the resignation Dec. 8 of Niles Trammell, who became president of Biscayne Television Corp. Mr. Strauss served from 1946 to 1950 as a member of the Atomic Energy Commission.

He succeeds Paul A. Barkmeier who was elected vice president and director of the regional offices of RCA Victor Div. Mr. Sacks joined RCA as director of artists relations for the Victor Div. and for NBC on Feb. 1, 1950. His background includes a quarter of a century of experience in music, recording and talent.

Mr. Barkmeier joined Victor in 1948 as general manager of the Record Dept. and in Jan. 1950 was

Mr. SACKS

WHITE NEW NBC PRESIDENT

McConnell Slated for C-P-P Slot; Weaver Moves Up; Herbert Succeeds

TOP-LEVEL realignment of the leadership of NBC was announced Friday, with Frank White elevated to the presidency as Joseph H. McConnell quit that post to become president of Colgate-Palmolive-Peet Co.

Sylvester L. (Pat) Weaver Jr., who has been vice president in charge of the radio and TV networks, with Mr. White serving as vice president and general manager, was elected vice chairman of the NBC Board of Directors, a new position, and John K. Herbert, vice president in charge of network sales, was advanced to the post vacated by Mr. Weaver.

Brig. Gen. David Sarnoff, RCA and NBC board chairman, announced the changes after a meeting of the board.

"We are fortunate in having within the NBC organization an executive so uniquely qualified to assume the presidency of NBC as is Mr. White," Gen. Sarnoff said. "He brings to his responsibility the practical experience of a long and distinguished career in broadcasting, and unusual executive ability, and a great talent for human relationships which is so important in any business, and particularly in the business of broadcasting. I know that the whole NBC organization, its affiliated stations and its advertisers and their agencies will share our pleasure and confidence in this new appointment.

"During the past three years in which Mr. McConnell has been president, the NBC has grown in stature and strength and has further enlarged the scope of its service to the American people. The great strides which NBC has made in speeding the development of television and maintaining the strength of radio are in themselves the greatest tributes to Mr. McConnell's leadership. Our appreciation for a job well done and our best wishes go with him as he leaves to assume his new responsibilities."

Unexpected Changes

The choice of executives for the key posts in the wake of Mr. McConnell's resignation, which came with a suddenness that stunned the industry, was looked upon by observers as evidence that NBC intends to put fundamental emphasis on business.

The 53-year-old Mr. White, who a year ago was president of Mutual and before that held key executive posts with CBS, has a reputation for getting things done. His choice of a chief lieutenant—Mr. Herbert, a salesman who grew up with the Hearst organization and other publishers—underscored the basic-business approach. The appointment of Mr. Herbert was President White's first in his new role.

Mr. McConnell's forthcoming affiliation with C-P-P—which was not announced officially but is expected to be after the company's board meets this week—similarly was startling, not only to the radio industry but to C-P-P personnel as well as its rivals.

E. H. Little, present president, issued a statement saying reports of "any change in the management" were "premature," that he had been president since 1938 and that it was contemplated he will "continue indefinitely as active head of the business."

Observers noted, however, that this would not preclude Mr. Little's advancement to the C-P-P board chairmanship, the post he is expected to take with Mr. McConnell's assumption of the presidency.

No Action Yet Says Little

Mr. Little conceded in his statement that "various changes have been under consideration" but noted that "no action has been taken by the board of directors." He said "an announcement will be made by the company if and when any changes are made."

NBC's announcement, so far as it concerned Mr. McConnell's plans, said only that he "has resigned from NBC to join a company in another industry, and his new position will be announced by that company in the near future."

It was reported that Mr. McConnell would take up his new duties about March 1, at a base salary estimated unofficially at about $150,000 a year, plus generous benefits.

Changes in the NBC-RCA executive lineups had been widely anticipated for some time—but not in the form they took. Mr. McConnell had been expected to return to a key role at RCA, where he was executive vice president before assuming the NBC presidency in October 1949. The original plan, it was understood, was for him to aid RCA President Frank Folsom.

Mr. White's successor as vice president and general manager of the radio and TV networks was not announced, and spokesmen declined to indicate whether the office will be continued. It was said that Edward D. Madden, vice president and assistant to the president, would remain in that post in Mr. White's administration.

Creation of the vice chairmanship of the board, which went to Mr. Weaver, was prompted by the expansion of NBC's activities, Gen. Sarnoff explained. He said:

"We believe that progress in broadcasting is never-ending, and that new ways of using the power of radio and television, new forms of programming, and new opportunities for the broadcast media can and must be developed. Under Mr. Weaver, NBC television had led the way in creating many of the new concepts which have become part of the pattern of television.

"In his new position as vice chairman, Mr. Weaver will be enabled to concentrate on the problems of long-range development, both in radio and television, and will fill a vital function in a rapidly expanding industry."

Lauds Herbert's Record

President White, in designating Mr. Herbert as vice president in charge of the radio and television networks, said: "As vice president in charge of radio sales and more recently as vice president in charge of sales for the radio and television networks, Mr. Herbert has demonstrated not only great sales leadership but a grasp of our overall network problems and an ability to deal effectively with them.

"I am delighted to announce his appointment as vice president in charge of both our networks. In this position, he will serve as the chief executive of the networks division of NBC and in addition will continue to exercise general supervision over our network sales department."

KMPC SALE OKAYED

FCC Also Grants KSWB

APPROVAL was granted by FCC last Wednesday to sale of KMPC Los Angeles by the Estate of the late G. A. (Dick) Richards and others for nearly $800,000 to cowboy star Gene Autry and associates, including Robert O. Reynolds, KMPC general manager [B•T, Nov. 24, 1952].

Concurrently, the Commission authorized assignment of the construction permit for KSWB Yuma, Ariz., from Henry C. Darwin and Robert Henry Armstrong doing business as Southwestern Broadcasting Co. to Maricopa Broadcasters Inc., licensee of KOOL Phoenix. Mr. Autry is 85% owner of Maricopa Broadcasters. Messrs. Darwin and Armstrong were reimbursed at cost, $26,000.

The KSWB grant clears allegations presented to FCC in a protest contending that Charles H. Garland, KOOL general manager, in behalf "of himself and others," had purchased KSWB without Commission approval.

Other station sales approved by the Commission Wednesday included KCHS Truth or Consequences, N. M., WOHP Bellefontaine, Ohio, and WMOD Moundsville, W. Va. (see FCC Roundup, page 87).

The actions were taken by Chairman Paul A. Walker and Comrs. Rosel H. Hyde, E. M. Webster, George E. Sterling, Robert T. Bartley and Eugene H. Merrill. Comr. Merrill dissented from the majority ruling in the KSWB case.

KMPC for several years was the initial subject of a controversial FCC investigation into the news policies of Mr. Richards and also involved the two other Richards' stations, WJR Detroit and WGAR Cleveland. Mr. Richards suffered a fatal heart attack during the pendency of the litigation which subsequently concluded in license renewal for all three outlets.

He had purchased KMPC in 1937 for $125,000 after managing the station for about a year, during which time he succeeded in transforming the property from a losing to a profitable operation. The Richards' estate now owns 25.95% of WJR and 40.5% of WGAR.

The license of KMPC in the instant action is transferred from KMPC, The Station of the Stars Inc. to KMPC Inc., a new corporation, for $799,986.19.

KMPC Inc. is owned 51% by Melody Ranch Enterprises Inc., wholly-owned by Mr. Autry. Mr. Autry is president of KMPC Inc. and will vote the Melody Ranch stock.

Mr. Reynolds, vice president and general manager of KMPC Inc., holds a 40% interest in the new licensee. He formerly was 7% owner of the station.

Other officers and stockholders in KMPC Inc. include Wesley L. Nutten Jr., secretary and 4% owner; Lloyd C. Sigmon, vice president and assistant general manager and 3⅓% owner, and Oren G. Mattison, treasurer and 1⅔% owner. Messrs. Nutten, Sigmon and Mattison in effect retain their previous holdings in KMPC, receiving an exchange of stock. Mr. Nutten is an attorney. Mr. Sigmon has been vice president-assistant manager as well as chief engineer and Mr. Mattison is KMPC's auditor.

KMPC's former licensee had outstanding 240,525 shares of $1.50 par value stock. The Richards' estate held 133,700 shares, for which it was paid a total of $444,-686.24.

Rozene Moore held 44,860 shares, purchased for $44,000 cash and 5% note for $105,204.36.

Frank E. Mullen, TV consultant and former NBC executive vice president, received $36,000 cash and 5% note for $85,482.15 for his 36,-525 shares while Harry L. (Bing) Crosby was paid $12,306.20 for his 3,700 shares in KMPC.

The notes given Rozene Moore and Mr. Mullen were personally

(Continued on page 32)

TAPE-RECORDED TV
BCE Shows Improvements

HAVING improved picture quality "more than 20 fold" since the first sight and sound magnetic tape recording system demonstration a year ago [B•T, Nov. 19, 1951], the electronics division of Bing Crosby Enterprises, as part of an "interim report," demonstrated Tuesday to the press its VTR (Video Tape Recorder) with showing of live telecasts and motion pictures taken off the air.

The demonstration was clear and sharp, except for occasional "ghost" images and an overriding diagonal weave. According to Executive Director Frank Healey, this represents a minor imperfection to be corrected with about another five months' work. Among subjects shown were an audio and video recording of the CBS-TV *Jack Benny Show* and *Carson's Cellar*, taken Dec. 28 from a monitor at BCE.

Reaction to the showing was varied. Press in general agreed with Mr. Healey that quality was "more than 20 fold" better than the first showing. Some compared it favorably with quick kinescopes.

John T. Mullin, chief engineer, and Wayne R. Johnson, TV project engineer of the company, who have been working on the system for approximately three years, have immediate technical answers to these imperfections or defects. Mr. Healey stated they will be incorporated in the next recorder, to be ready about May 1.

Work on the VTR system is now more than 80% completed and Mr. Healey expects that production models will be ready for the trade late this year or in early 1954. It is planned that Ampex Electric Corp., Redwood City, Calif. will handle production. The VTR equipment, including recorder and playback, will cost around $50,000, but it was pointed out that savings in time and tape will more than compensate.

Cost of the magnetic tape, made by Minnesota Mining & Manufacturing Co., is said to be approximately one-fourth that of motion picture film. Although one-inch wide tape was utilized in Tuesday's demonstration, a one-half inch wide tape is planned for final usage.

The VTR system will reproduce both sight and sound simultaneously with 100% fidelity in one-100th of a second following the live action. Besides eliminating need for motion picture film by recording electronic impulses directly on the magnetic type, the system further completely eliminates film processing and the separate sound track, it was explained.

Because the information which constitutes the picture is recorded magnetically on the tape, no image is visible on the tape itself, Mr. Healey said. "To our knowledge, this is the first time in history that motion pictures have ever been produced from a medium other than strip of film containing a series of actual photographs."

Details of the VTR system are being closely guarded because of the strong competition among electronic companies working on similar projects. They will be revealed after the first production recorder is in operation.

Engineers associated with Messrs. Mullin and Johnson on the project are Edward J. Corey, assistant TV project engineer, Dean DeMoss, Chester Shaw, Eugene Brown and Robert Phillips.

CBS RADIO GAINS
19 Sponsors in '52

CBS Radio registered a net gain of 19 sponsors of its network programs in 1952, reaching a total of 122, the network reported last week in a year-end review which said radio today is "bigger, more ubiquitous, more effective" than ever.

The number of CBS Radio affiliates went up during the year, gaining 10 for a total of 216 to start 1953. The review also noted CBS Radio newscasts reached a new peacetime high of 91 a week, and, with respect to programming generally, cited figures released in December (for the week of Oct. 19-25) to show the network "had 21 of the 29 most-listened-to programs." It also was stated 415 speakers were heard on CBS Radio during the year.

The report also called attention to figures showing that in New York, "the city that has had the most television the longest time," evening radio listening in TV homes increased 107% in the three years between October 1949 and October 1952.

MBS' 'Heatter' Sold

UNION Pharmaceutical Co., N. Y., (Saraka and Inhiston), to sponsor *Gabriel Heatter—News* on Mutual, Friday, 7:30-45 p.m. EST, effective Jan. 16. Grey Adv., N. Y., is agency. With addition of this sponsor, the Heatter show, five times weekly, is completely sold. Other sponsors are Noxzema Chemical Co., Beltone Hearing Aid Co., Motor Products Corp., and Credit Union National Assn.

Shulton Spot Drive

SHULTON INC., manufacturers of Early American Old Spice toiletries for women and Old Spice for men, New York, announced last week its 1953 advertising will include a heavy year-round campaign for Old Spice men's products. For the first time in its radio advertising, Shulton will use daily spot radio year-round in major markets for Old Spice men's line. Wesley Assoc., New York, is the agency.

Sealy Spot Campaign

SEALY Mattress Co., Chicago, will use scattered spots in Chicago, Indianapolis, Grand Rapids and Milwaukee during its two-week anniversary sale beginning Jan. 12. Agency is Olian & Bronner.

Drawn for BROADCASTING • TELECASTING by Bud Kling

Congratulations, Parsnip! . . . a whole New Year's Eve show . . . and you didn't miss one commercial!

Baby for a Day

THOUGH every child born in the U. S. on New Year's Day will not have a silver spoon in its mouth, MBS' *Queen for a Day* program (Mon.-Fri., 11:30 a.m.-12 noon EST) has come up with a solution. It is offering a silver fork and spoon set for all New Year's children. Last year m.c. Jack Bailey gave away about 300 such sets to families who had notified him of the event.

EUGENE KATZ
Heads Representative Firm

EUGENE KATZ, executive vice president of the Katz Agency Inc., national advertising representative firm, was elected president of the company at the annual stockholders meeting last week, succeeding his father, G. R. Katz, who was named chairman of the board.

Mr. Katz

The elder Mr. Katz had been president of the firm since 1912, assuming the post at the death of his father, E. Katz, who founded the company in 1888.

Eugene Katz joined the company in 1930 as a salesman and was elected secretary in 1944 and executive vice president several years ago. During World War II, he served with the Office of Facts and Figures, Office of War Information, and Office of Price Administration.

Other Katz Agency officers include: S. L. Katz, G. W. Brett, and G. H. Gunst, vice presidents; Abe Doris, vice president and secretary; M. J. Beck, treasurer, and J. J. Grenthot, assistant treasurer.

CITIES SERIES
Planned by NBC, 'Life'

NBC-TV and *Life* magazine will collaborate in launching a television series based on the economic idea of "more of everything for everybody," picturing the American cultural, social and economic way of life, on a number of stations (including the owned and operated NBC-TV stations). These will be available for sponsorship on a local basis.

Details of the programs still are being worked out by James Gaines, NBC vice president in charge of owned and operated stations, and Richard Krolik, director of television for *Life*.

Life will provide a researcher in each city, in addition to lending promotional and editorial support.

The series, to be produced locally in each city, will kick off in Cleveland with a dinner to be attended by 200 Cleveland leaders who will see the first program Jan. 26, Monday, 7-7:30 p.m., via NBC's WNBK (TV). Each station will provide its own staff for the program.

MARKETING MEET

Cone Hits Media 'Propaganda'

BUSINESSMEN should sell their ideas as well as their products with advertising, using paid advertising instead of propaganda, in the opinion of Fairfax M. Cone, board chairman of Foote, Cone and Belding, Chicago.

Mr. Cone, speaking Dec. 27 at the opening session of the American Marketing Assn. conference in Chicago's Palmer House, asserted that the function of newspapers and other mass communications media is to report events and developments rather than to "sell" a businessman's ideas for him.

Business firms wishing to put over their point of view should reach consumers via paid advertising rather than propaganda, Mr. Cone said, with an approach similar to that used in the sale of tangible products. The highest degree of integrity needs to be maintained in the "sale" of both ideas and products, he said.

Businessmen "have fallen into disfavor" in the past two decades because nobody told their approach to current problems, and they were "under constant attack from politicians," Mr. Cone charged.

The National Conference of the AMA, meeting for three days after Christmas, touched all phases of marketing, from the psychological to the statistical. On the financial side, Secretary of Commerce Charles Sawyer outlined prospects for a good business year in 1953, saying that capital investment plans by industry for the next three years are "much higher" than anticipated.

Commerce Survey

A U. S. Dept. of Commerce survey among 2,000 business firms shows that the 1953 investment program will cost $26.5 billion, compared with $27 billion in 1952. Another survey of 80 large companies covering a third of American industry showed that these business concerns are budgeting capital investment volume in 1954 and 1955 equal to that of 1950.

Mr. Sawyer said that, assuming maintenance of present tax rates and a minimum of economic fluctuation, the gross national production in 1955 could be $365 billion, an increase of 8% over 1951. If this figure were realized, usable personal income that year would be $240 billion, an increase of 7%, he said.

Imagination and aggressive personality are needed for marketing success, in the opinion of John E. Jeuck, dean of the School of Business at the U. of Chicago, who spoke at the concluding luncheon session. He said success in marketing depends more on these factors in a person who, "in the process of development, may make errors, than it does upon the careful collation of facts and the cautious investigation of alternatives that are the hallmark of research operations."

Researchers in concentrating on the direct influence of such media as radio and television on listeners and viewers, often overlook the fact that "people do not live in isolation," said Dr. Paul Lazarsfeld, professor of sociology at Columbia U., New York.

Dr. Lazarsfeld stressed the importance of personal influence on consumers by their friends and business associates. The extent and quality of this influence should be measured and correlated with listening and viewing habits, in an effort to determine how these personal pressures "might modify the effect of mass media in marketing and in other spheres of life."

A major problem in advertising is that most advertising material is one-way communication, said Harold J. Leavitt, vice president of Nejelski Co., management consultant firm, New York. Because "I don't think you can get much across without feed-back," Mr. Leavitt suggested there is a future in market research which looks like "advertising's feedback channel."

Cliff Samuelson, advertising manager of General Mills's grocery products division, discussed new products, saying that unless a new item does a better job, does the job easier or does the job cheaper, it should be reviewed before it is introduced.

Dr. Burleigh Gardner, executive director of Social Research, Chicago, outlined his mental images and word association tests that he said can be useful in advertising content. Noting that in advertising "we use symbols that have a common meaning to a selected group of people with a similar culture," Mr. Gardner pointed out the hazard of upper middle class advertising people talking to the same kind of consumers, to the exclusion of lower middle class consumers.

Gordon A. Hughes, AMA president and director of market analysis, General Mills, presided at the meetings.

TAYLOR GRANT (l), who Dec. 22 gave his 2,000th broadcast of *Headline Edition* on ABC, receives toast from R. J. Schaefer, president, F. & M. Schaefer Brewing Co., which is sponsoring the series on WJZ New York during 1953.

NEW CONGRESS

Sec. 315 High on Agenda

IF the 82nd Congress was known to broadcasters as the Congress which finally passed the McFarland Bill revising the Communications Act extensively for the first time since 1934, the 83d Congress which convened Saturday may become known to the radio-TV industry as the Congress which did something about Sec. 315 of the Communications Act.

This is the section which forbids broadcasters from censoring the speeches of political candidates—and which has put station operators between the devil of libel suits and the sea of law-breaking.

Recent election ordeal, which saw all House members and one third of the Senate use radio extensively and "meet up with" TV for the first time to any great extent, is believed certain to result in some activity on the subject during the next two years of the 83d Congress' life.

But Sec. 315 is not the only issue of broadcasting importance bound to come up in the new, GOP-dominated Congress.

Anti-Liquor Bills

Many observers also see a resurgence of anti-liquor bills, which reached their highest level—from a broadcasting viewpoint—early last year when the Case-Johnson Bill to prohibit the advertising of hard liquor on the air came within one vote of being reported out of the Senate Interstate & Foreign Commerce Committee.

In a Congress which is certain to see investigations of previous administration agencies and officials, the investigation of the FCC promised by Sen. Joseph R. McCarthy (R-Wis.), due to become chairman of the Senate Committee on Government Operations, is sure to loom large.

In the same vein, although he refuses to call it an investigation, is the meeting with all regulatory agency officials, proposed by Rep. Charles A. Wolverton (R-N. J.), due to become chairman of the House Interstate & Foreign Commerce Committee.

Undoubtedly, too, any reorganization of the Executive Office, which has been given a high place on the agenda of President-elect Eisenhower's administrative officials, will have an effect on the FCC.

The 83d Congress is not likely to see the recrudescence of former Sen. William Benton's (D-Conn.) campaign for a National Citizens Advisory Council on radio and TV programs. It is felt that this crusade has gone the way of Sen. Benton, who was defeated in the last election.

However, broadcasters should not be lulled by this favorable end to the ex-advertising executive's battle. Educational TV still remains on the agenda of some legislators, notably Sen. John W. Bricker (R-Ohio) and Rep. James I. Dolliver (R-Iowa). Both introduced bills to require the FCC to promote non-commercial TV during the last session of Congress.

Not so new to the agenda of Congress will be, it is presumed, the question of licensing of networks. This has been proferred by Rep. Harry R. Sheppard (D-Calif.) in previous Congresses, but this time it bears the endorsement of FCC Chairman Paul A. Walker. Mr. Walker recommended that action when he appeared before the House Commerce subcommittee investigating radio and TV programs [B•T, Dec. 8, 1952].

Still uncertain is the continuance of the program probe by the FCC subcommittee of the House Commerce Committee [B•T, Dec. 22, 1952]. Rep. Wolverton, the new chairman of the Commerce Committee, has not indicated what his attitude will be on this subject.

ABC-UPT Merger

Interest of congressmen in FCC and industry matters is due to continue, most observers believe. Sen. Edwin H. Johnson (D-Col.), when chairman of the Senate Commerce Committee, took a direct and partisan part in the FCC deliberations on color TV and uhf wavelengths. Chairman-to-be Charles A. Tobey (R-N. H.) already has injected himself in the pending ABC-United Paramount Theatres merger case [B•T, Dec. 8, 1952].

Another powerful Senate leader Sen. William Langer (R-N. D.), due to be chairman of the powerful Senate Judiciary Committee, [B•T Dec. 8, 1952] also interceded in the ABC-UPT merger case.

Both Sens. Tobey and Langer protested the examiner's initial decision proposing that the FCC approve the merger.

Another Congressman who has indicated he intends to play a part in FCC rule-making is Rep. Carl Hinshaw (R-Calif.). During the House debate on the McFarland Bill, Rep. Hinshaw stated he wanted to revise the definition of broadcasting to exclude subscription radio or TV. He said he would introduce a bill to make those services, commo

30 LEADING AGENCIES IN RADIO-TV BILLING

(Continued from Page 23)

others: Jack Benny, Robert Montgomery, Burns and Allen, Groucho Marx and Fred Waring. There were no client losses during the year. Total of 32% of the agency's AM and TV billing was in spot broadcasting.

* * *

YOUNG & RUBICAM: Radio-TV billing, $36 million; $12 million in radio, $24 million in TV. Radio-TV share of agency's overall agency billing: 35%.

In 1952 Y&R added Singer Sewing's sponsorship of the Kate Smith daytime show, alternate weeks; the Piel's beer's radio and TV budget, which includes *Dangerous Assignment*, placed on a regional basis, and Kent cigarettes with *The Web* on CBS-TV. The agency's casualties in radio and TV: Arrow Shirts dropped Herb Shriner on ABC-TV; Jello released the *Young Mr. Bobbin* show on NBC-TV; and the entire Schlitz account (half-hour TV show) was withdrawn, going to Lennen & Newell.

* * *

BENTON & BOWLES: Radio-TV billing, $30 million; $10.5 million in radio, $19.5 million in television. Radio-TV share of agency's overall billing, 60%.

Benton & Bowles in 1952 gained one new account, Camay, which sponsors *The Doctor*, half-hour on NBC-TV, in association with Cheer. Key account at this agency is Tide, another Procter & Gamble product, whose radio-TV business is estimated at $8 million a year. The agency experienced no client casualties in 1952. It achieved additional billing with the placement for General Foods of *Luigi* on CBS-TV and *Pepper Young's Family* on NBC radio.

* * *

BIOW Co.: Radio-TV billing, $30 million; $10.5 million in radio, $19.5 million in TV. Radio-TV share of agency's overall billing, 50%.

In addition to handling its established network and spot activities for Philip Morris, Bulova, Procter & Gamble and Pepsi-Cola, this agency in 1952 also placed the TV and radio campaign for Dunhill cigarettes. There were no significant defections during the year.

* * *

WILLIAM ESTY: Radio-TV billing, $28 million; $10 million in radio, $18 million in TV. Radio-TV share of agency's overall billing, 50%.

In this agency, Camels continued its extensive radio and TV coverage and added yet another program to its list with *My Friend Irma* on CBS-TV. Another agency addition was sponsorship of *M & M Candy Carnival* on CBS-TV by the M & M Candy Co. Esty also held firmly to its sizeable portion of the Colgate-Palmolive-Peet business. Shows being placed for the account are *The Big Payoff* on CBS-TV, part of the *Comedy Hour* on NBC-TV, and *Strike It Rich* on CBS-AM-TV. Another client, Coca-Cola bottlers, also is sponsoring local TV strips. No client desertions.

* * *

J. WALTER THOMPSON Co.: Radio-TV billing, $27 million; $13.5 million in radio, $13.5 million in TV. Radio-TV share of agency's overall billing, 24%.

JWT in 1952 proceeded solidly with its solid duo in television, Lux and Kraft. It also gained Scott Tissue as sponsor of the Patti Page show, twice a week on CBS-TV. Other important clients include: Ford Dealers, Ford Motor Co., RCA Victor, Florida Citrus Commission, Ford Motor Co., Johns-Manville, Swift & Co. and Libby, McNeill & Libby.

* * *

DANCER - FITZGERALD - SAMPLE: Radio-TV billing, $26 million; $17.5 million in radio, $8.5 million in TV. Radio-TV share of agency's overall billing, 55%.

DF&S held its traditional lead in radio during 1952. The agency secured three new accounts during the year: Bab-O, a heavy spot advertiser, from William Weintraub; Army and Air Force Recruiting from Grant Adv., and American Chicle from SSC&B. Principal advertisers are General Mills, Procter & Gamble, Nestle and Sterling Drug.

* * *

McCANN - ERICKSON: Radio-TV billing, $25 million; $8.7 million in radio, $16.3 million in TV; Radio-TV share of agency's overall billing, 40%.

The agency last year serviced a part of the Republican Party campaign and also handled its usual Westinghouse sponsorship of special events, plus Westinghouse's *Studio One* on CBS-TV. In addition, Chesebrough's Borax in 1952 brought its *20 Mule Team* to television on a regional basis. The remainder of the agency's accounts, which include principally National Biscuit Co., Westinghouse, Gruen Watch, Chesebrough, Lever Brothers and SOS continued much as previously.

* * *

FOOTE, CONE & BELDING: Radio-TV billing, $20 million; $10 million in radio $10 million in TV. Radio-TV share of agency's overall billing, 30%.

The history of FC&B in 1952 is this: Rheingold increased its radio-

TV budget, and Hallmark continued to sponsor it's NBC-TV show; the agency lost the Prom Home permanent account *(Fun For All* on CBS Radio) to Weiss & Geller, and additionally, a few weeks ago, it resigned the entire Toni business. The latter, however, would not affect the 1952 billing since the agency continued to service the account through the end of the year.

* * *

LEO BURNETT Co.: Radio-TV billing, $18 million; $9 million in radio, $9 million in TV. Radio-TV share of agency's overall billing, 50%.

Burnett in 1952 took over from Kenyon & Eckhardt the balance of the Kellogg account and Prom Shampoo from FC&B. It also placed Pillsbury as a new starter on the Arthur Godfrey early morning simulcast on the CBS networks. Other major accounts: Pure Oil, Bauer & Black, Brown Shoes, Durkee Foods and Green Giant products. No client losses in 1952.

* * *

LENNEN & NEWELL: Radio-TV billing, $15 million; $3 million in radio and $12 million in TV. Radio-TV share of agency's overall billing, 50%.

This new agency is the result of one of the important mergers of the year. H. W. Newell resigned from Geyer, Newell & Ganger to join forces with Phil Lennen, head of what was formerly Lennen & Mitchell. Besides increasing in 1952 its radio-TV business, the agency, as a result of the merger, gained the Embassy cigarette account and its sponsorship of *The Web* on CBS-TV. L & N also acquired from Young & Rubicam the Schlitz TV business for the last six months of the year. No losses in 1952.

* * *

TED BATES: Radio-TV billing, $15 million; $6 million in radio, $9 million in TV. Radio-TV share of agency's overall billing, 50%.

Bellwether business at this agency is its heavy allotment of the Colgate - Palmolive - Peet accounts. Shows placed for that company include a portion of *Colgate Comedy Hour* and *Howdy Doody* on NBC-TV and *Strike It Rich* and *Our Miss Brooks* on CBS-TV. In addition, for Carter Products, it placed the Drew Pearson show on ABC-TV (later on DuMont) and ABC radio and part of *City Hospital* on CBS-TV. No losses last year.

* * *

KENYON & ECKHARDT: Radio-TV billing, $14.5 million; $5.5 million in radio, $9 million in TV. Radio-TV share of agency's overall billing, 27%.

K & E suffered two major reverses in 1952 with the loss of the Kellogg and Piels accounts. However, as a consequence of its absorption of the Chappell & Owen agency it retrieved a measure of its losses, though little of the gain was reflected in radio and TV. The agency continued in 1952 to place the Lincoln - Mercury business, which is represented principally by the Ed Sullivan *Toast of the Town* program on CBS-TV.

* * *

N. W. AYER & SON: Radio-TV billing, $12 million; $6 million in radio, $6 million in TV. Radio-TV share of agency's overall billing, 14%.

This agency in 1952 continued to place its regular campaigns: Atlantic Refining's sport schedule; Lever Brothers' *Hawkins Falls* five times a week on NBC-TV, and *Houseparty* on CBS Radio and TV; Electric Light & Power Companies' *Meet Corliss Archer* on ABC radio; Bell Telephone Co.'s *Telephone Hour* on NBC radio, and the Sealtest *Big Top* show on CBS-TV.

* * *

MAXON Inc.: Radio-TV billing, $11 million; $4.4 million in radio, $6.6 million in TV. Radio-TV share of agency's overall billing, 40%.

In 1952 at this agency General Electric added to its schedule the *Ozzie and Harriet* show on ABC-TV. Otherwise the firm proceeded regularly with its client roster, which includes Gillette (sporting events), Snow Crop (Arthur Godfrey on CBS-TV), and Packard Cars (*Rebound* on DuMont).

* * *

SULLIVAN, STAUFFER, COLWELL & BAYLES: Radio-TV billings, $10 million; $4 million in radio, $6 million in TV. Radio-TV share of agency's overall billing, 50%.

At SSC&B in 1952 Pall Mall increased its radio-TV billing and Carter Products' Arrid added *City Hospital* on CBS-TV. The agency lost its portion of the American Chicle account to DF&S.

CUNNINGHAM & WALSH: Radio-TV billing, approximately $10 million; $4 million in radio, $6 million in TV. Radio-TV share of agency's overall billing, 33%.

As Chesterfield goes, so goes this agency; and last year Chesterfield cut its budget somewhat when it dropped the Bob Hope and Bing Crosby radio programs and took on instead the Dean Martin-Jerry Lewis show on NBC radio. Liggett & Myers continues with its *Gangbusters* and *Dragnet* TV shows and baseball and football sponsorship, the latter variously network, regional and local in both radio and TV.

* * *

NEEDHAM, LOUIS & BRORBY: Radio-TV billing, $8 million; $3 million in radio, $5 million in TV. Radio-TV share of agency's overall billing, 40%.

This Chicago-based agency last year placed its major account, Johnson's Wax, on two network television shows: the hour-long *Robert Montgomery Presents*, alternate weeks on NBC-TV, and the panel show *What's My Line* plus heavy newscast schedules on Mutual. It also added *Sky King* on DuMont for Derby Foods. Other major advertisers are Quaker Oats and Kraft Foods.

* * *

CECIL & PRESBREY: Radio-TV billing, $8 million; $3.6 million in radio, $4.4 million in TV. Radio-TV share of agency's overall billing, 50%.

Principal C & P clients are Electric Auto-Lite with *Suspense* on CBS Radio and CBS-TV; Sylvania Electric with its *Beat the Clock* on CBS-TV; and Block Drug Co. with *Danger* on CBS-TV. Agency during the latter part of the year negotiated a merger with J. D. Tarcher Agency; however, the full effect of this alliance will be felt next year with the added Benrus watch account. Tarcher brought in approximately $4 million in radio-TV billing.

* * *

COMPTON Adv.: Radio-TV billing; $8 million; $4.5 million in radio, $3.5 million in TV. Radio-TV share of agency's overall billing, 26%.

Last year Compton added the daytime serial, *Guiding Light*, on CBS-TV for Procter & Gamble. P & G, the big account here, continued in 1952 with *Fireside Theatre* on NBC-TV, Lowell Thomas on CBS Radio, and a portion of *Rocky King* on DuMont.

* * *

SHERMAN & MARQUETTE: Radio-TV billing, $7.5 million; $2.5 million in radio $5 million in TV. Radio-TV share of agency's overall billing, 50%.

Agency's No. 1 item is its goodly share of Colgate-Palmolive-Peet business. Last year CPP added *Mr. & Mrs. North* on CBS-TV to its list of TV and radio shows which had included portions of the *Colgate Comedy Hour* on NBC-TV and *Bob and Ray* on NBC radio. Quaker Oats, another agency client, sponsors *Sgt. Preston* and *Man on the Farm*, both radio shows, as well as *Gabby Hayes* twice weekly on NBC-TV.

* * *

RUTHRAUFF & RYAN; Radio-TV billing, $7.5 million; $3.2 million in radio, $4.3 million in TV. Radio-TV share of agency's overall billing, 25%.

R & R was the casualty of the year, suffering two major amputations that cut off the flow of perhaps five million in revenue, the effects of which will not be fully noted until next year's computation. Late in the year Lever Brothers withdrew both its Spi

(Continued on page 32)

WLEV-TV's Lehigh Valley, a tremendously potent 4-point market for advertisers: *Industry*—one of America's most important production centers; *Agriculture*—one of the richest producing farm areas in the country; *Education*—one of the country's leading centers of higher learning and culture; *Religion*—inhabitants of the Lehigh Valley have a very deep respect for religion—the backbone of community life.

Heralding

The Newest Profit Opportunity in Television

WLEV-TV

Bethlehem, Pennsylvania

First Television Station in the Lehigh Valley

WLEV-TV is the one medium which reaches the entire Lehigh Valley for you. WLEV-TV's market is long-known as a region of stable prosperity. The 481 million dollars spent by its half-million population in 1951 proves it is a region of tremendous sales response. It is a dynamic four-point profit opportunity.

INDUSTRY—Paid its Lehigh Valley employes $295,835,100 in 1951, manufactured products valued at $1,170,188,200.

AGRICULTURE—Its rich farm area grossed $34,391,000 in cash farm income in 1951—another great source of steady-buying income.

EDUCATION—Its 6 colleges and universities make it a forward-looking and informed area, giving advertising a highly receptive audience.

RELIGION—A basic part of the Valley's life since the first settlers. Community stability and family responsibility mean consistent, steady sales.

WLEV-TV is the Lehigh Valley's own television station—the only single medium reaching the entire Lehigh Valley. Initial telecast is scheduled for February 15, 1953. Top time available now. Write for information.

Leading Radio-TV Agencies

(Continued from page 29)

and Rinso accounts, channelling the former to FC&B and the latter to Hewitt, Ogilvy, Benson & Mather. Earlier in 1952 the agency lost the Dodge account to Grant Adv. R & R continues to place Wrigley's *Gene Autry* radio show, the Arthur Murray TV program; Clearsals' participation on *Today* and Elaine Curtis cosmetics on *Welcome Travelers.*

* * *

CAMPBELL-EWALD: Radio-TV billing, $7 million; $1.8 million in radio, $5.2 million in TV. Radio-TV share of agency's overall billing, 25%.

Agency services the Chevrolet dealers and the parent manufacturing company, both of which place much local radio and TV. The dealers, moreover, sponsor Dinah Shore on NBC-TV for a quarter-hour twice a week.

* * *

D'ARCY: Radio-TV billing, $7 million; $3.5 million in radio, $3.5 million in TV. Radio-TV share of agency's overall billing, 25%.

Gerber Products last year took over a portion of the *Kate Smith Hour* on NBC-TV, but this gain was more than offset when the agency lost the billing on the Ken Murray show on CBS-TV following Anheuser-Bush's decision to discontinue the program. Coca-Cola, another client, sponsors *Kit Carson* on a regional basis and uses spots extensively in both radio and television.

* * *

WARWICK & LEGLER: Radio-TV billing, $7 million; $3 million in radio, $4 million in TV. Radio-TV share of agency's overall billing, 50%.

In 1952 W & L took over from the Joseph Katz Co. the Ex-Lax radio business and continued heavily with its Pabst Blue Ribbon fights schedule in TV and radio. No losses.

* * *

WARD WHEELOCK Co: Radio-TV billing, $6 million: $3.5 million in radio, $2.5 million in television. Radio-TV share of agency's overall billing, 50%.

Campbell Soup Co. is this agency's major broadcast client. The firm sponsored *Club 15* on CBS Radio three times weekly, *Double or Nothing* on NBC radio five times weekly and on CBS-TV three times weekly, and the *Henry Aldrich Show* on NBC-TV.

* * *

HARRY B. COHEN: Radio-TV billing, $4.5 million; $1.8 million in radio, $2.7 million in TV. Radio-TV share of agency's overall billing, 60%.

The agency gained three new pot accounts in 1952: Airline Foods, Babbett's Glim, and Fitch Shampoo. It also placed the *Abbott & Costello* half-hour TV show for Utica Beer on a regional basis. Another Cohen client, Pearson Inc., sponsors *Hollywood Opening Night* on NBC-TV.

WILLIAM WEINTRAUB & CO.: Radio-TV billing, $4 million; $2 million in radio, $2 million in TV. Radio-TV share of agency's overall billing, 40%.

Blatz Brewing continued to be this firm's principal entry in 1952, represented on CBS-TV by *Amos 'n' Andy.* Other radio-TV clients include Henry Kaiser Cars and Seeman Brothers.

* * *

ERWIN, WASEY: Radio-TV billing, $3.5 million; $1.5 million in radio, $2 million in TV. Radio-TV share of agency's overall billing, 11%.

Last year Erwin, Wasey placed for Admiral the sponsorship of the national political conventions on ABC radio and TV while continuing that account's *World News* show on CBS Radio. Carnation, another client, carried on with its *Burns and Allen* show on CBS-TV on alternate weeks and *Stars Over Hollywood* on CBS Radio.

* * *

FULLER & SMITH & ROSS: Radio-TV billing, $3.4 million; $0.9 million in radio, $2.5 million in television. Radio-TV share of agency's overall billing, 15%.

This agency placed Owens-Corning sponsorship of the Godfrey show on CBS Radio and a portion of *Godfrey Time* on CBS-TV for the first time during 1952. It also added the Aluminum Co. of America's sponsorship of *See It Now* on CBS-TV. During the early part of the year its International Silver account sponsored Dave Garroway and Fiberglas sponsored Garry Moore.

PULSE GRANTED

Injunction in Hooper Spat

SUPREME COURT of New York on Dec. 29 granted Pulse Inc. a temporary injunction restraining C. E. Hooper Inc. from repeating statements contained in a letter written Oct. 7, 1952, describing what allegedly happened at a meeting in San Francisco of C. E. Hooper and a group of advertising agency executives.

Specifically, according to Sydney Roslow, director of Pulse, its legal action was to dispute a statement ascribed to Mr. Hooper that the agencies present at the San Francisco meeting had agreed there should be only one broadcast audience rating service and that this service should be Hooper's. This, Pulse claims, is not the truth.

Mr. Hooper last week declared, "Actually, the letter that is the subject of the dispute stated nothing but the truth and the whole truth. According to my attorney that is a complete defense to the charges. My own affidavit to that effect has been filed with the court and is supported by affidavits taken from individuals who, like myself, were at the meeting."

Coffee & Doughnuts

TO CALL attention to the debut of the early-morning *Bobby Sherwood Show* on ABC's WJZ New York last Monday, the network's promotion department sent a hot glass jar of coffee in an insulated bag, with doughnuts, to some 500 radio timebuyers at New York agencies. An accompanying card mentioned the *Sherwood* program (Monday-Friday, 6:30-8 a.m. EST) and also plugged the newscasts of Charles F. McCarthy (at 7:30 and 8 a.m. and 12:45 p.m. EST), which also started last Monday on WJZ.

KMPC Sale Okayed

(Continued from page 25)

guaranteed by Messrs. Autry and Reynolds.

KMPC reported current assets of $337,526.78 and current liabilities of $73,348.70 as of Sept. 30, 1952, while total assets and liabilities as of Oct. 31 were given as $573,953.38. KMPC showed a profit, after federal income tax, of $3,276.96 for October 1952 and $52,436.23 for the year 1952 to Oct. 31, the transfer application disclosed. Profit, after tax, for October 1951 was $8,235.81 and for year 1951 (to Oct. 31, 1951) was $44,039.70. KMPC staff totals 47 persons.

Depreciated cost of tangible property devoted to broadcasting, including land and buildings, as of Dec. 31, 1951, totaled $254,372.99, the application said. Replacement value was given as $894,966.

Mr. Autry, in addition to his 85% holding in KOOL, is 48% owner of Old Pueblo Broadcasting Co., licensee of KOPO Tucson. Old Pueblo Broadcasting also is 100% owner of KNOG Nogales.

In the KSWB action, FCC approved the assignment following Mr. Garland's satisfactory reply to allegations made in a protest filed by Dwight Harkins, secretary of Harkins Broadcasting Co., onetime applicant for KSWB's assignment of 250 w on 1240 kc.

Harkins Broadcasting protested FCC's failure to grant comparative hearing on its new-station application and the request of KSWB for reinstatement of its permit which had expired. FCC denied the Harkins petition on the ground that the application was filed Oct. 24, 1952, the same day the Commission had approved reinstatement of the KSWB permit, hence not entitled to comparative consideration under the Commission's 24-hour rule.

In his explanation, Mr. Garland related that on last Oct. 1 he was telephoned by William Conn, manager of Yuma's Bank of Douglas, suggesting Maricopa Broadcasters might be interested in buying KSWB, then in financial straits and not yet on the air. Conversations were held but when it was learned the permit had expired, Maricopa filed its own application for the channel, withdrawing it within a few days when it was learned KSWB had asked reinstatement.

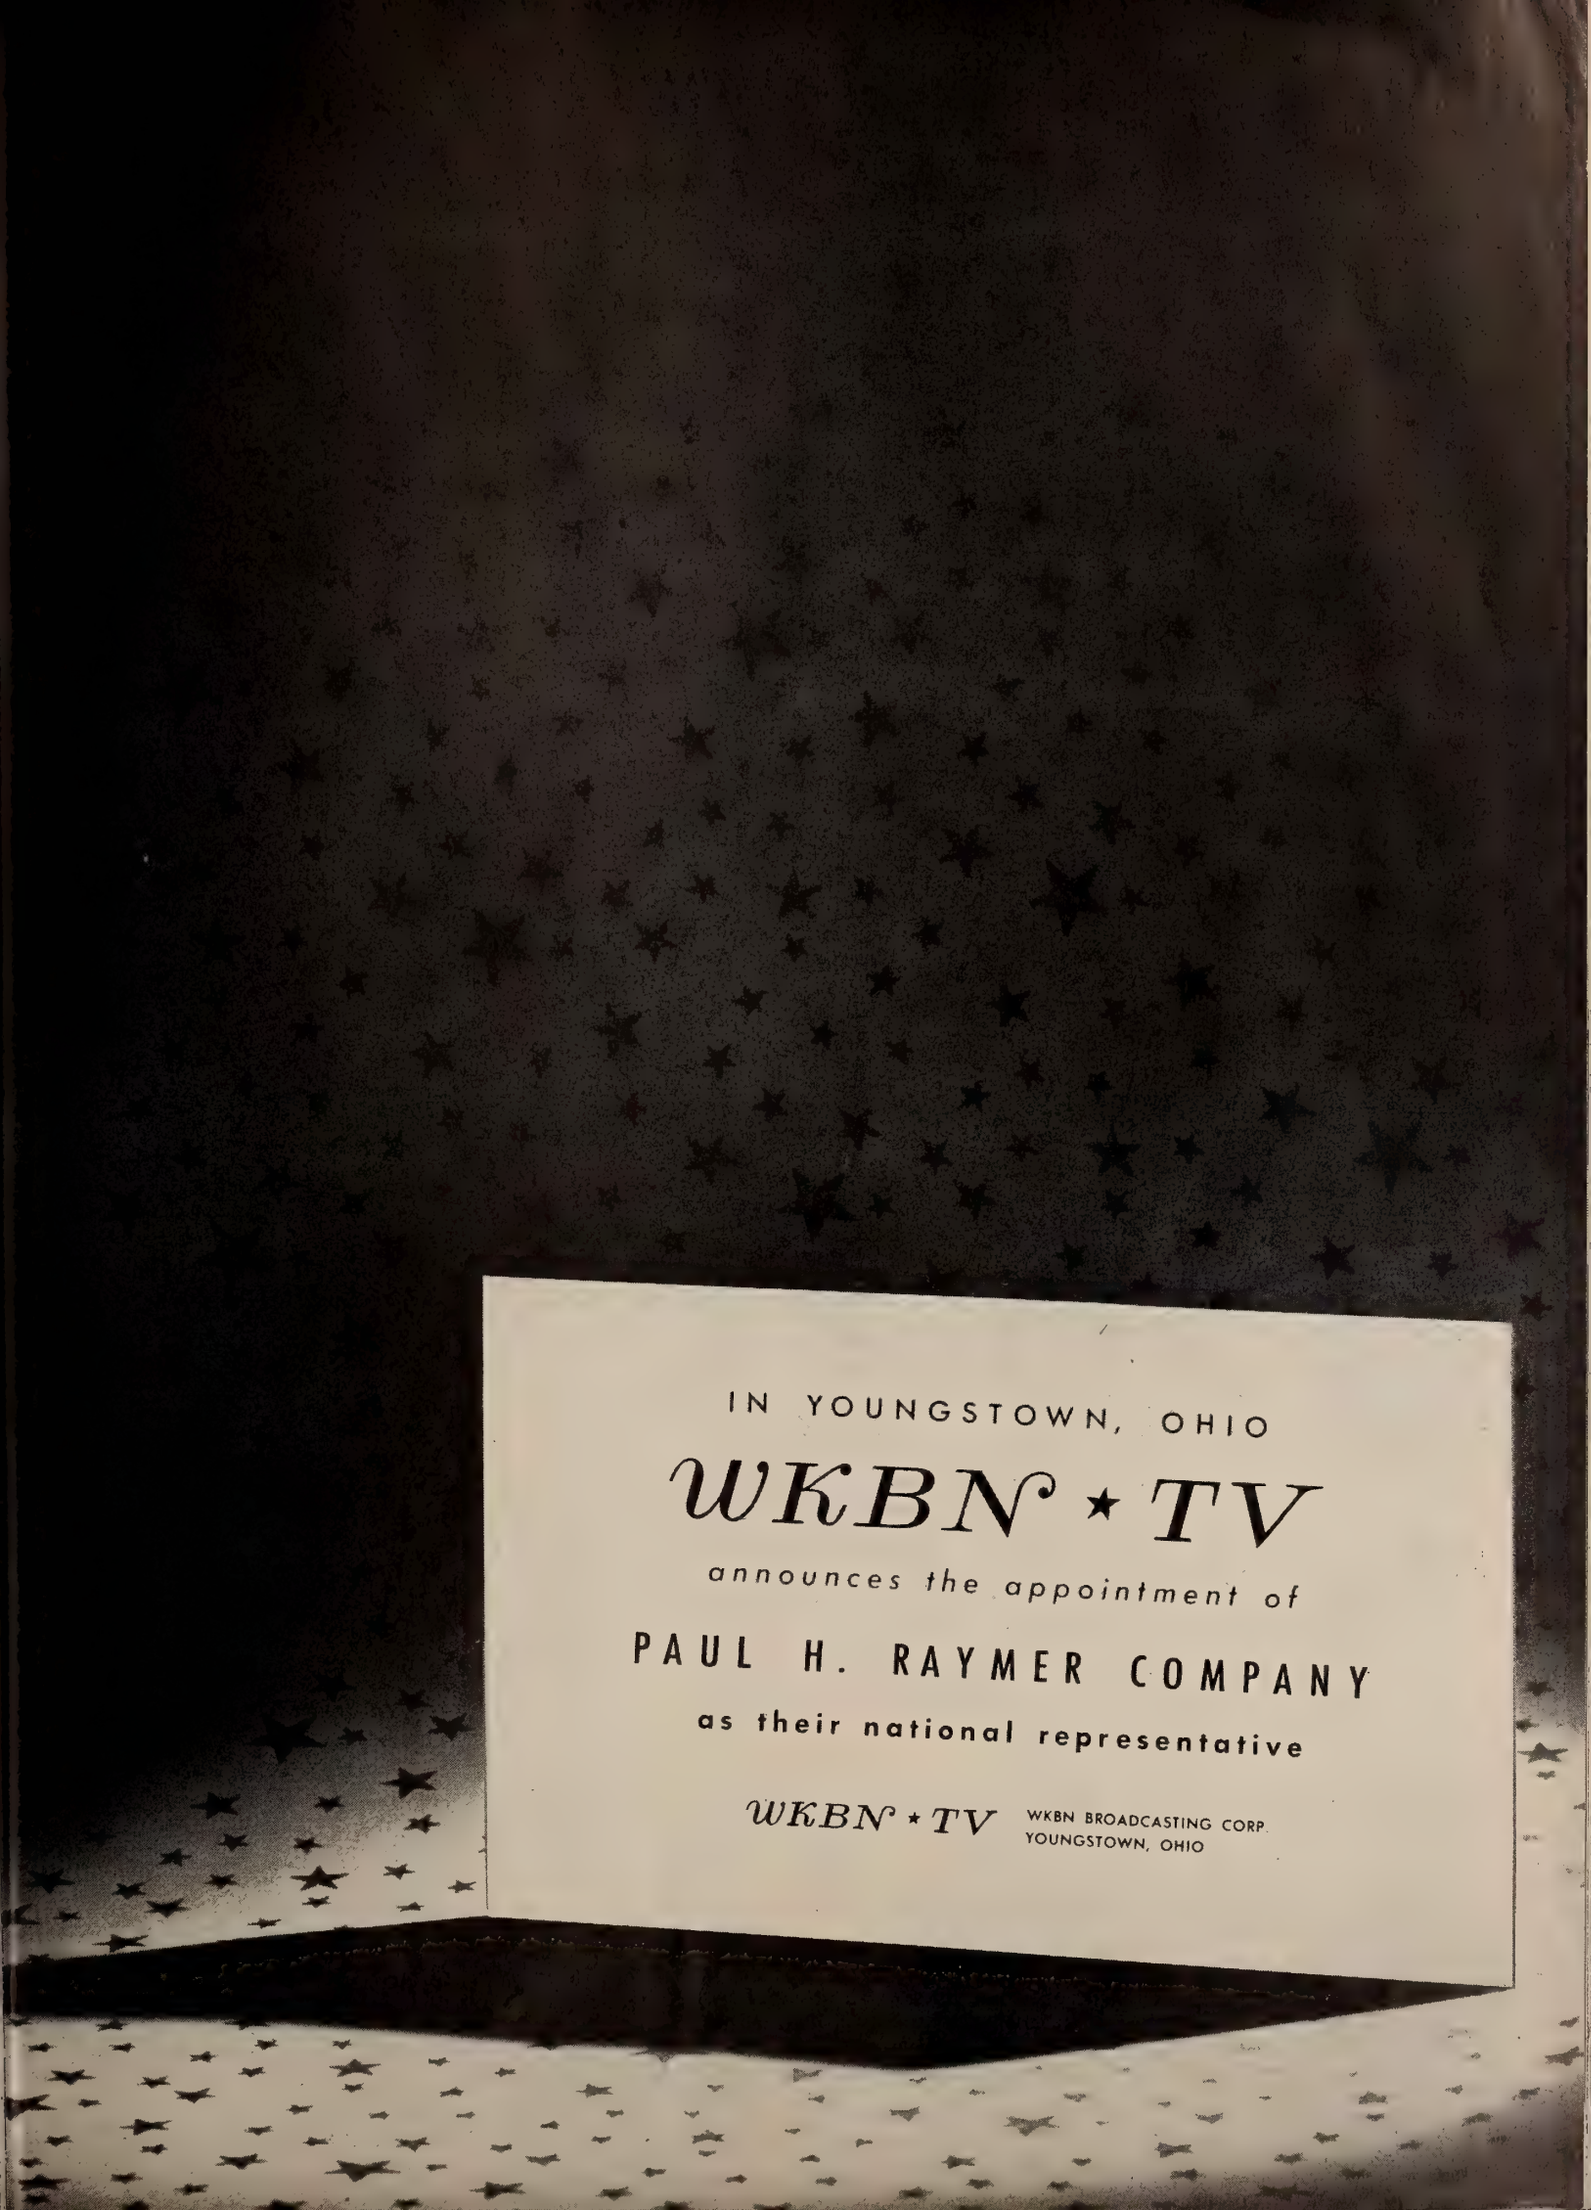
Mr. Garland related Maricopa took an option to purchase KSWB and offered advice and limited financial aid, but never took part in station management nor prepared any part of the reinstatement request, which did not mention the option upon the advice of a local attorney. The KOOL manager emphasized that Maricopa was conscious of Communications Act requirements concerning transfers and had informed KSWB that all agreements would have to be subject to FCC approval. He also informed the KSWB principals that the permit could be acquired only at cost, the letter explained.

The KSWB files at FCC disclosed that Mr. Darwin has filed with a local court a damage suit for nearly $100,000 against Dwight Harkins Amusement Enterprises Inc. in which he charges that failure by defendent to consummate a transfer approved by FCC and involving KCLF Clifton, Ariz. [B•T, June 16, 1952], as well as certain other matters, resulted in financial difficulties preventing his completion of KSWB's construction.

Mr. Darwin and Dwight Harkins Amusement Enterprises Inc. were each to hold 50% in KCLF through Saguaro Broadcasting Co.

Mr. Darwin further contended he was unjustly dismissed last September as KCLF general manager. The defendent's reply to the suit asserted Mr. Darwin was fired because he devoted time when he should have been at KCLF to his Yuma interest and alleged Mr. Darwin used KCLF employes and fixtures for KSWB.

NARTB DIRECTORS

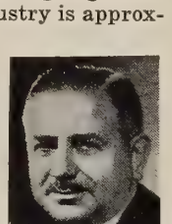


Election Forms Readied

THIRTEEN vacancies on the NARTB Radio Board of Directors will be filled under election procedure that gets underway this week. Nominating forms, along with a list of broadcasters eligible to run, will be mailed next Friday to member stations.

Vacancies will occur in 1953 in the nine odd-numbered districts. One each of the four at-large directorates (large, medium and small stations, and FM) will become vacant at the same time, with all newly elected directors taking office at the time of the annual convention April 29-May 1.

Nominations for the vacancies must be returned to NARTB headquarters by Jan. 26. Those nominated will be notified Jan. 27 and given until Feb. 3 to accept or decline, or to select which post to run for if nominated for more than one. Final election ballots will be mailed Feb. 6, returnable Feb. 23. Results will be given Feb. 26.



Currently NARTB members are voting by referendum on the revised by-laws unanimously approved by the full board last Dec. 3 [B•T, Dec. 8, 1952]. Ballots are due Jan. 16. If revision is approved, new by-laws go into effect Feb. 1.

FOLSOM '53 VIEW: 150-200 New TV Outlets

FROM 150 to 200 new television stations are expected to commence operation in 1953 and some 6,250,000 new TV sets probably will be distributed during the year, RCA president Frank M. Folsom said in a year-end statement issued Friday.

He said the annual "going rate" of the radio-TV industry is approximately $5 billion now and is expected to approach $6 billion during the latter part of 1953. The anticipated 150 - 200 new stations, including both vhf and uhf, will bring about 5 million families into TV's service range for the first time, he said.

Mr. Folsom

Overall, Mr. Folsom said, "the radio-television industry operating throughout 1952 under the impetus of ever-growing demands for both the government and the general public, achieved new all-time records in production, merchandising, and servicing of electronics equipment. . . .

"Equipped with the greatest production capacity in its history, the radio-television industry is successfully meeting the dual requirements of manufacturing for the national defense and the domestic market."

Defense production formed the bulk of the industry's 1952 output, while TV remained the major factor in the civilian field, with the year's 6-million-set production total adding more than $1 billion to the industry's gross income, he asserted.

$9 Billion Investment

Reviewing "America's overwhelming acceptance of television as one of our most powerful mediums of entertainment, culture, and news," Mr. Folsom noted that the public had invested more than $9 billion in TV receivers during the past six years. He called this "an unparalleled achievement," involving "the manufacture and distribution of approximately 23 million television sets, of which nearly 21 million are in use today."

Turning to radio, he continued:

"Along with television's growth, the public's interest in radio broadcasting continues firm. The industry distributed more than 9 million radio sets in 1952, and expects to produce a similar number in the coming year."

Mr. Folsom said RCA Victor produced in 1952 as many radio and TV instruments as government allocations of materials would permit. In TV the greatest demand was for 21-inch receivers, he reported, adding that the preference trend toward larger screen sizes probably will result in "substantial sales" of 27-inch sets by the end of 1953.

In radio, he continued, "the trend is to small sizes with high performance"—a trend which is being met with the help of miniaturization of component parts and tubes.

The growing interest in larger TV screen sizes is contributing to a rapid development of the set replacement market, Mr. Folsom asserted. He also noted that "there is a growing number of television families with two or more receivers in their homes."

The expansion of uhf, he said, is "a direct outgrowth" of RCA's experimental uhf station at Bridgeport, Conn., whose equipment was used in the first commercial uhf station at Portland, Ore. It was "largely as a result" of the Bridgeport experiments that the freeze on new-station construction was broken during the year, he declared.

Contributions of RCA and RCA Victor engineers in launching the Portland uhf station, and also the first post-freeze vhf outlet (in Denver), "included not only the design and construction of these transmitters, but advances in receiver design and the design and installation of new combination uhf-vhf antennas by the RCA Service Co."

In the manufacture of combination vhf-uhf sets and uhf converters, RCA's objective "is to continue to provide excellent reception in the home at all stages of television's growth," Mr. Folsom asserted. "In this connection, RCA has continued its engineering development of compatible color television as a future additional service to the public."

Led in Business Volume

The RCA president said NBC, an RCA service, led all other networks in volume of business, with radio-TV sales totaling $92,093,592 for the first nine months of 1952. The TV sales figure was placed at $57,793,752 at the end of the third quarter.

Appraising the electronics industry's outlook, he said "one of the most significant things" about this field "is its long-range capacity for expansion and diversification." He called attention to past predictions that the non-entertainment phases of electronics some day would produce a greater volume of business than radio and television, and said that high on the list of potentially important non-entertainment developments were the following:

1. Electronic business systems. Among the activities in this field, RCA Victor Div. currently is constructing an electronic inventory control system under government order for the U. S. Army Ordnance Corps.

2. Medical instruments. Already, he said, the RCA Lab. Div. has developed an electronic viscometer that determines the rate at which an individual's blood coagulates.

3. Personal services. Miniaturization

(Continued on page 36)

Folsom, DuMont Differ

SOME divergent viewpoints cropped up in the year-end statements of Frank M. Folsom, RCA president, and Dr. Allen B. DuMont, DuMont Labs. president, as often happens in the case of forecasts. Where Mr. Folsom placed the "going rate" of current industry production at about $5 billion, Dr. DuMont placed it at about $4 billion. Dr. DuMont predicted some 75 new TV stations would take the air in 1953; Mr. Folsom predicted 150 to 200. They agreed pretty closely, however, on estimated total public investment in TV sets over the past six years—Mr. Folsom said more than $9 billion, Dr. DuMont about $9.5 billion—and were in close harmony on 1953 TV set sale predictions: 6.25 million, according to Mr. Folsom, and "between 6 and 6.5 million" according to Dr. DuMont.

DuMONT EYES '53 And TV's Continued Growth

THE ELECTRONICS industry, "the basis for what can be realistically termed the second industrial revolution," is facing "its brightest year in 1953," Dr. Allen B. DuMont, president of Allen B. DuMont Labs, said in an annual business review and forecast released Friday.

"The most spectacular facet of the electronics industry—television—will continue its sensational growth pattern, which is one of the fastest-moving industrial developments on record," he declared. "From a $50 million manufacturing industry in 1947, television in only three years became a billion-dollar industry. This dynamic growth far outstrips the record of the automotive field, which took 10 years to achieve billion-dollar status."

Production Rate

Dr. DuMont said the electronics industry was producing at a "going rate" of $4 billion at the end of 1952, compared with $3 billion in 1951, and that "increasing applications of electronics in commercial and military fields during 1953 should run the volume even higher to new industry peak levels."

He offered this point-by-point estimate of "what 1953 can mean to the industry, barring some unforeseen circumstance or worsening of the international situation:

"New stations—upwards of 75 new television stations on the air with approximately 50 of this total in the uhf. This increase of stations will, of course, mean wide increase in present coverage by the networks.

"An interesting development recently announced is that of a new coaxial cable system, capable of handling simultaneously 600 telephone conversations plus one television program in each direction it travels. Widespread use of this revolutionary coaxial cable could conceivably help to cut present line costs appreciably.

"Transmitting equipment—Transmitter manufacturers, hampered during the three and one-half years of the 'freeze,' now look forward to a possible volume of $50 million for transmitting and studio equipment. Increasing uses of television for industrial purposes also present an attractive market for equipment manufacturers.

"Television receivers—The opening of new television areas and emphasis on the 'second set' in the home and replacement of small-screen sets in older markets cues manufacturers to plan for 1953 their biggest production year since 1950. Present indications are that the industry will make and sell between six and six and one-half million receivers in 1953. And at average factory price of $180 this can amount to a total volume of well over $1 billion. There is no indication that receiver prices will be reduced, because of rising labor and material costs.

"Cathode-ray tubes — With this huge anticipated receiver production the cathode-ray industry will be asked to produce more than eight million picture tubes in 1953. Of these, approximately two million will be for replacement and service purposes. The most popular tube size will be the 21-inch rectangular type with 17-inch running second in popularity. The 24-, 27- and 30-inch sizes will be produced in small quantities in 1953.

"Cathode-ray instruments — Oscillographs and other instruments, little publicized offshoots of the development of the cathode-ray tube, are taking a major role in industry wherever precision measurements are required. Manufacture and sale of these units is another segment of the electronics industry which should see great expansion in 1953."

Dr. DuMont said he felt that "good commercial color transmission, comparable to black-and-white, is still five to ten years away," although "there have been advances in research on color television."

He said research and development of transistors "is presently going at a steady pace but their applications in television receivers

TIPS ON A "SLEEPER"

from Zenith, to radio time buyers

New facts on FM make it a smart buy to round out your radio coverage

A tip on FM Station growth

Contrary to general belief, the number of licensed FM stations has steadily *increased*. There are nearly 100 more than in 1950.

A tip on programming

More and more FM stations are programming events and music not available to the AM audience. Local sports broadcasts are proving of high interest. Recorded programs of classical music are attracting large audiences, and are being expanded to include popular music and good special events.

A tip on static and "white spots"

There are hundreds of static and "white spot" areas all over the country where listeners rely on FM broadcasts, for good local reception free from "cross-talk" and static.

A tip on sales of FM sets

Zenith, the largest manufacturer of FM-AM radio sets, has had the biggest FM sales in its history. New competition is entering the field, for the first time. According to the NARTB, there are approximately 9 million AM-FM sets in use.

Don't overlook FM for complete coverage

SPECIAL TO BROADCASTERS

Your local Zenith dealer will gladly help promote your station and program in his newspaper ads and displays. Get in touch with him today.

ZENITH

The royalty of television and RADIO®

ZENITH RADIO CORPORATION, Chicago 39, Illinois

COPR. 1953

Folsom's View

(Continued from page 34)

of tubes and parts and the development of tiny transistors "hold great promise for the advancement of personal service devices in radio and recording."

4. Industry. Electronic devices of detection, control, inspection, and automatic operation are now in "substantial" use by manufacturers, and "can be expected to find increasing application in the next few years."

5. Printing. All-electronic color correction instruments are being developed to provide "the first economical means of achieving quick and accurate color reproduction in magazines and daily newspapers." RCA has one "in an advanced stage of development."

Mr. Folsom said the "growth and expansion of the radio-television and electronics industry is an outstanding example of American industry's capacity for teamwork." He continued:

"For our civilian population, this teamwork meant more and better television and radio sets, records, transmitting and industrial equipment, and all the other products that have enabled the people of our country to achieve their high standard of living.

"For our Armed Forces, it meant military equipment for technical assistance to help keep our country strong and free.

"Big companies and small companies worked together to make the products needed for our civilian use and defense. At RCA, for example, nearly 5,000 independently owned companies helped supply the materials and services needed to manufacture finished products. Three-fourths of these suppliers are classified by the government as small business firms, and they receive approximately half of the dollar volume of all RCA purchases.

"The electronic symbol is a bright and guiding star that challenges science and industry to advance into new fields of endeavor, to create, and to improve with quality and efficiency as the standards."

SET PRODUCTION

RTMA Lists for 11 months

OUTPUT of radio receivers totaled 8,386,076 for the first 11 months of 1952, with 5,175,194 TV sets produced in the same period, according to Radio-Television Mfrs. Assn. figures covering the entire manufacturing industry. Comparable figures in 1951 for 11 months were 1,701,115 radios and 4,798,056 TV sets.

Home radios having FM tuners totaled 33,200 units in November, 355,249 FM or FM-AM radios turned out in the 11 months. FM circuits were included in 7,603 TV sets in November, bringing the 11-month total of TV sets having FM tuners to 87,285.

Following are radio-TV production totals for the first 11 months of 1952:

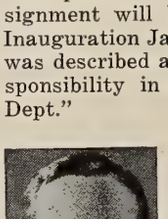
SMITH, JUSTER

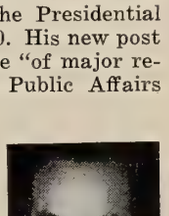
In NBC Changes

APPOINTMENT of Carleton D. Smith, NBC station relations vice president, as general manager of the network's Washington, D. C., outlets, WRC-AM-FM and WNBW (TV), was announced last Wednesday by James M. Gaines, NBC vice-president in charge of O & O stations.



Mr. Smith has accepted his new duties effective Jan. 1. He succeeds Eugene E. Juster, who transfers to NBC Public Affairs Dept. in New York City.

In his new position, Vice President Smith will assume management of NBC Washington radio-TV operations which have expanded appreciably the past year—and particularly since 1948 when he relinquished managerial reins at the same NBC outlets in the nation's capital.



In the intervening years, Mr. Smith was named, first, NBC director of TV operations, an NBC vice president in charge of station relations and, finally last March, director of operations for NBC's owned-and-operated stations division.

The shift was viewed as a bid by the network to strengthen its O & O stations by delegating major responsibility to vice presidents in the field.

Mr. Juster's precise duties were not spelled out, but his first assignment will be the Presidential Inauguration Jan. 20. His new post was described as one "of major responsibility in the Public Affairs Dept."

Mr. Smith

Mr. Juster

Mr. BARKMEIER

* * *

Sacks, Strauss

(Continued from page 24)

named vice president and general manager.

Mr. Strauss, who has served as director of a number of the nation's largest corporations, was a former partner of Kuhn-Loeb & Co. He is president of the board of the Institute for Advanced Study at Princeton and is a trustee of the Sloan-Kettering Institute and Memorial Hospital in New York. He entered the Naval Reserve as a lieutenant-commander in 1926 and rose through the ranks, becoming a rear admiral in 1945. He holds the Distinguished Service Cross and the Legion of Merit for service during World War II.

ABC-UPT MERGER

Landon Urges Approval

MERGER of ABC and United Paramount Theatres should be approved, Alf M. Landon, ex-governor of Kansas and 1936 Republican candidate for President, has urged the FCC in a letter released last week.

Oral argument on the initial decision favoring the merger and other applications in the Paramount case [B•T, Nov. 17, 1952] is scheduled to be heard by the Commission *en banc* today (Monday).

Speaking as president and 16⅔% owner of WREN Topeka—an ABC affiliate—Mr. Landon held that approval of the merger would aid competition, not reduce it. This was, he said, a reference to the objections raised by Sens. Charles W. Tobey (R-N. H.), scheduled to be chairman of the radio-powerful Senate Interstate & Foreign Commerce Committee, and William Langer (R-N. D.), due to head the powerful Senate Judiciary Committee [B•T, Dec. 8, 1952].

In addition to WREN, which operates on 1250 kc with 5 kw, Mr. Landon is president and 65% owner of KSCB Liberal, Kans., on 1270 kc with 1 kw, daytime.

DuMont Eyes '52

(Continued from page 34)

will probably not become a reality in production sets for some time to come, because of the cost factor involved."

Finding "little wonder television is called America's fastest growing industry," Dr. DuMont said "an all-time cumulative total of television receiver production since 1946 runs to 23.6 million units, making an aggregate public total investment at retail level of $9.5 billion. And this figure is apart from the investments averaging $500,000 each in approximately 120 telecasting plants."

He said his own organization "is looking forward to more than a 25% increase in dollar volume in 1953, which will be the greatest year, sales-wise, in the company's history."

He noted that billings of the DuMont TV Network passed $10 million in 1952 and "are expected to be upped appreciably in 1953." The network's $4 million new Telecentre in New York will be the origination point for most DuMont programming in 1953, he asserted.

DuMont TV set production "is expected to follow the 1952 trend which saw production hard pressed to keep up with expanding sales." he said, while sales of oscillographs and cathode-ray tubes "will show major advances" and "the transmitter division should show a sharp rise in sales of transmitting and studio equipment."

New Congress

(Continued from page 27)

carrier systems or contract systems.

A plus for broadcasting in the new Congress is the succession by Rep. Joseph W. Martin Jr. (R-Mass.) to the post of Speaker. Rep. Martin already has declared he did not favor Speaker Sam Rayburn's (D-Tex.) ban on radio-TV coverage of House committees [B•T, Nov. 24, 1952].

In fact, Rep. Harold H. Velde (R-Ill.), scheduled to head the House Un-American Activities Committee, already has announced he intended to permit radio microphones and TV cameras to cover some of his committee's hearings. And last week, Sen. McCarthy announced that he also favored radio and TV coverage of the investigations subcommittee of the Government Operations Committee.

Undoubtedly, also, there will be the usual several bills to give the FCC power to police interstate communications so they may not be used for gambling—all an outgrowth of the Kefauver Crime Committee hearings of two years ago.

And without a question there will be again, as there has been in the last several Congresses, Rep. Sheppard's proposal that the FCC revise its network rules to encourage the rebroadcast of stations' signals.

It's EASY to pick the winner in Kentucky radio!

55.3% of Kentucky's total retail sales are made in the area covered by WAVE *alone.* To cover the people who make the rest of the State's retail purchases, you have to use many of the State's 46 *other* radio stations.

An impressive number of leading advertisers buy WAVE exclusively in Louisville. There must be a reason. Ask Free & Peters for all the facts. You might be surprised!

WSFA INTEREST

Pill Sells for $100,000

HOWARD E. PILL, president and general manager of Montgomery Broadcasting Co., licensee of WFSA Montgomery, Ala., and applicant for vhf Ch. 12 in that city, is selling his 25% interest in the firm for $100,000, subject to customary FCC approval.

Mr. Pill

Mr. Pill said he intends to retire from WSFA managerial duties, but will retain his 50% interest in WDAK Columbus, Ga. He also owns Alabama Gulf Radio, applicant for an AM station in Foley, Ala., on the Alabama Gulf Coast, where Mr. Pill says, "I have done my fishing for 30 years."

A veteran of 24 years at WSFA, Mr. Pill, with Gov. Gordon Persons, founded the station in 1929.

Largest of three purchasers of Mr. Pill's interest is R. F. Hudson Jr., son and business associate of R. F. Hudson, owner of 75 of 300 shares, or 25%. The younger Mr. Hudson is buying 50 shares for $66,666.67. This will give the Messrs. Hudson and the elder Mr. Hudson's son-in-law, Sebrie B. Smith, who owns 25 shares, 50% control of WSFA.

The other purchasers of Mr. Pill's interest are H. S. Durden, present owner of 100 shares, who buys an additional 15 shares from Mr. Pill for $20,000 to give him a total of 115 shares. David E. Dunn is purchasing 10 additional shares for $13,333.33 to give him a total of 35 shares.

The application for transfer of Mr. Pill's stock was filed Tuesday at the FCC, according to John Spearman, of Spearman & Roberson, Washington attorneys representing WSFA. Mr. Spearman said plans call for W. W. Hunt, present station sales manager, to succeed Mr. Pill as general manager.

CHICAGO STRIKE

WLS, WGN AFTRA Agree

WEEK-LONG strike of American Federation of Television & Radio Artists against WGN Inc. and WLS Chicago came to an end Tuesday.

The strike was called off at WGN, WGNB (FM) and WGN-TV at 6 a.m. Tuesday morning, one week to the minute from the time it started. It was the first such strike in AFTRA's 15-year Chicago history. At WLS, owned by the Agricultural Broadcasting Co., the strike concluded at 6 p.m. Tuesday.

The new contracts, signed by union officials and management at both stations the same day, reflected the give-and-take discussions which have been carried on for several weeks, with both parties taking and giving concessions in an effort to halt the strike of announcers and performers.

WLS General Manager Glenn Snyder signed the standard Class A station agreement Tuesday afternoon, agreeing to the $150 weekly salary base for announcers, as prevails for the other Class A stations there. WLS, which sought separate classification from the stations which are on the air fulltime and have television interests, gained a discount on the unit system.

Schreiber Signs Pact

According to provisions of the contracts at other Class A stations, an announcer gives 12 commercials free, and then gets an $11 fee per commercial.

Under the WLS contract the station will get the first 12 commercials free, pay $6 for the 13th and the standard $11 for all commercials starting with the 14th.

Frank P. Schreiber, general manager and treasurer of WGN Inc., signed the radio and television contracts with union representatives, who included Raymond A. Jones, executive secretary of AFTRA in Chicago; Sanford I. Wolff, Chicago attorney for the local; George Heller, AFTRA national executive secretary; Henry Jaffe, national legal counsel, and Ed Schlesinger, national field representative.

WGN Inc. and WLS were the only stations struck, as they were the stations which declined earlier to sign new contracts. Other Chicago stations had signed previously, agreeing to the $150 weekly minimum salary, upped from $135, and to fringe benefits. They were ABC, WENR and WENR-TV; NBC, WMAQ and WNBQ (TV); CBS, WBBM and WBKB (TV).

Principal issue involved at WGN was the union's claim on newsmen not described as commentators or analysts. The union disclaimed authority in the final contract, providing that newsmen were restricted to fulltime news duties and not permitted to handle straight commercial assignments. In exchange, the station agreed to keep a minimum staff of 14 commercial announcers, the current number.

As Mr. Schreiber said during the strike, "the difference lies in the term news announcer as opposed to news commentator, analyst or reporter. Our newsmen edit and write their own ideas and interpretation. News announcers merely read what is handed to them as written by our news staff, and when used are accorded whatever 'dignity, standing and prestige' that accrues therefrom. Our newsmen have not been used as announcers, and only Robert F. Hurleigh and Spencer Allen, the heads of our news departments on radio and television, have stepped out of their normal routine during the strike to offer aid."

Mr. Hurleigh added, "WGN and WGN-TV newsmen are members of no union, and never have been approached or invited to join one, including AFTRA. Futhermore, they have expressed no interest whatsoever in becoming union members."

The union relinquished its petition for the checkoff, by which WGN Inc. would collect union dues from paychecks, and the station, in turn, agreed to the union's request for unlimited severance pay. This provides for one week of pay for every year of service if an announcer or performer is laid off or fired.

Other points successfully arbitrated included sick leave, retroactive pay under the new contract, and an 18% salary increase for sound-effects men. One sound-effects man was dismissed, leaving one man on the staff.

Brown Shoe Buys

BROWN Shoe Co., St. Louis, for its Buster Brown shoes, will sponsor *Smilin' Ed McConnell* on the full ABC Radio Network Saturdays, 10 to 10:30 a.m. CST from Jan. 17. Contract for 52 weeks was placed through Leo Burnett, Chicago.

FM BUSINESS

Advertiser Trend Seen

TREND toward greater use of FM broadcast stations and their related services by major national advertisers was noted during 1952 by John H. Smith Jr., director of the NARTB FM Dept. More than 65 new accounts were listed in reports of FM broadcasters to the department, he said.

Listed among national advertisers entering the FM medium last year were these:

Food—Armour, Beech-Nut coffee, Borden's milk, Bunte Tangoes, Jell-O, Jewel tea, Libby baby food, Minute Maid rice, Reddi-Wip, Royal lemon, Swans-Down, Swift baby meat, Fanny Farmer candy.

Electronics — Concord, Motorola, Philco, RCA, Raytheon, Muntz, Zenith, Pilot.

Appliances—Hotpoint, Norge, Hobart, General Electric.

Pharmaceutical — Rem, BiSoDol, Anacin, Trokels.

Automotive—DeSoto, Lincoln-Mercury, Dodge, Chrysler, Pontiac, Hudson, Studebaker, Chevrolet.

Miscellaneous — American Airlines, Firestone, Ben Franklin Stores, Cameo cleanser, Pfeiffers beer, Decca Records, State Farm insurance, Washington National insurance, Longines watches, Heet, Freezone, Kolynos, Middleton tobacco, Coca Cola, Family Circle, Holiday magazine, Atlantic Monthly, Pepsi Cola, Hammond organs, Amoco gas and oil, Bell Telephone, S. S. Kresge stores.

Read how WNBC Increased Knickerbocker Beer Sales 300%
(please turn page)

In one week, WNBC Spot Radio announcements combined with CHAIN LIGHTNING displays increased the sale of Knickerbocker Beer by an average of 300%.

Quote from the feature article on Knickerbocker's CHAIN LIGHTNING success in the October 20, 1952, issue of *Sponsor Magazine:*

". . . Ruppert bought time on WNBC, New York, in order to get in on that station's [unique*] "CHAIN LIGHTNING" merchandising plan . . . Under this arrangement Ruppert was guaranteed exclusive displays in 1,600 chain stores accounting for 62% of the retail food business in the vital New York market . . .

"The value of this type of merchandising is attested to by Ruppert Merchandising Manager Ted Brady, who says, 'During the week in which we are permitted our extra display, sales for Knickerbocker increase on an average of 250 to 300%. A 700% increase was experienced in a store in Astoria, L. I.'"

At the end of the first cycle, Ruppert signed a 52-week contract with WNBC and increased their original expenditure by 428% in 1952.

Today the most successful radio advertisers buy more than time . . .
They buy Radio time that works in the home, as well as at the point of sale. CHAIN LIGHTNING is Radio at work where desire is created and where sales are made . . . in the home *and* in the store. It provides you with 1,600 'special display' stores in the New York market, and the plan will soon be extended to include 3,000 cooperating independent supermarkets.

CHAIN LIGHTNING is also available at WMAQ Chicago, WTAM Cleveland, and KNBC San Francisco, through NBC Spot Sales. If you are an advertiser with 'food store' distribution, you can get the same sensational sales results as Knickerbocker Beer. Call your NBC Spot Salesman or WNBC directly for details on CHAIN LIGHTNING in New York.

Young's Radio Yen

CAUGHT in a conflict between his starring roles on NBC radio *Father Knows Best* and in legitimate road company tour of "Country Girl," actor Robert Young decided in favor of his radio show. Practice of tape recording the program in various cities or flying back to Los Angeles for sessions proved too much.

'MORALS' INQUIRY

Future up to New Group

HOUSE Interstate & Foreign Commerce Committee accepted unanimously last week the report of the FCC subcommittee investigating radio and TV programs [B•T, Dec. 22, 1952] and ordered it filed with the Clerk of the House.

No indication was given whether the full committee viewed with favor the subcommittee's recommendation that the morals probe be continued [B•T, June 2, 1952, et seq.].

Whether it is continued will be up to the new leadership of the House Commerce Committee. Scheduled to be chairman of the committe is Rep. Charles W. Wolverton (R-N. J.). Rep. Wolverton could not be reached last week for his comment.

The subcommittee, which was headed by Rep. Oren Harris (D-Ark.), suggested that the investigation be continued to permit a study to be made of radio and TV programs in other parts of the country (the committee had concentrated on the East Coast during the six-month-long hearings) and also on the relationship of the motion picture industry to television.

Anti-Censorship Sentiment

Out-and-out opposition to any legislation smacking of censorship was the nub of the subcommittee's report. It held that self-regulation was making progress and that more time should be permitted to see how the industry handles its own problems.

In answer to several statements that Congress has no power to censor programs, the committee held that Congress has the right to legislate in this field. It cited the Supreme Court verdict in "The Miracle" motion picture case *(Burstyn v Wilson)*.

The report also emphasized that ultimate responsibility for program content rested with the licensees.

The subcommittee's investigation was based on a resolution by Rep. E. C. Gathings (D-Ark.), calling for a study of broadcasting "to determine the extent to which radio and television programs currently available . . . contain immoral or offensive matter, or place improper emphasis upon crime, violence and corruption. . . ."

OGILBY, CHAFFEE

Receive New Philco Posts

DUAL appointments of Frederick D. Ogilby as vice president and general manager of Philco Corp's Television Div. and of William H. Chaffee as Radio Div. vice president and general manager were announced last week by Larry F. Hardy, president of both divisions.

Mr. Ogilby, vice president in charge of the Philco TV Div.'s product design and sales for the past three years, now has full responsibility for all division operations, including engineering, product design, production, purchasing and sales. Mr. Chaffee has the same overall responsibilities in the Radio Div., Mr. Hardy said.

The promotions, according to Mr. Hardy, reflect Philco's increasing activities in radio and TV, and place into effect a new divisional policy.

Mr. Ogilby started with Philco 20 years ago as a salesman in the New York division of Philco Distributors, became general manager of the Philadelphia branch in 1938 and in 1945 returned to New York as branch general manager. In May 1947 he became sales manager of Philco's Radio Div. and TV sales manager in May 1948.

Mr. Chaffee joined Philco's purchasing department in 1934, served in the Air Force from 1942 to 1945, and received a Legion of Merit award for radar and radio operations planning. In 1949 he was named vice president and director of purchases of Philco and was elected to the board of directors in 1950. He became vice president of the newly-created Radio Div. last September.

METALS EASED

During 1952, Listed by DPA

IN the past year 13 materials, including basic metals used in radio-TV receivers and components and broadcast station construction, have been removed from the Defense Production Administration's "most critical" category, the DPA said last week, reporting "continued progress" in expansion of materials output in a compilation by its Conservation Div.

Among the metals are aluminum, selenium, copper, lead, zinc and tungsten. Still critical are cobalt, molybdenum and nickel, used in loudspeakers and other parts.

Heads ARF Committee

ROBERT M. GRAY, advertising and sales promotion manager, Esso Standard Oil Co., has been named chairman of a special Advertising Research Foundation committee to supervise a Buying Habits study, newest ARF project.

GENERAL Electric Co., Syracuse, N. Y., will double its production of germanium diodes during 1953 to meet the rising demand of TV manufacturers.

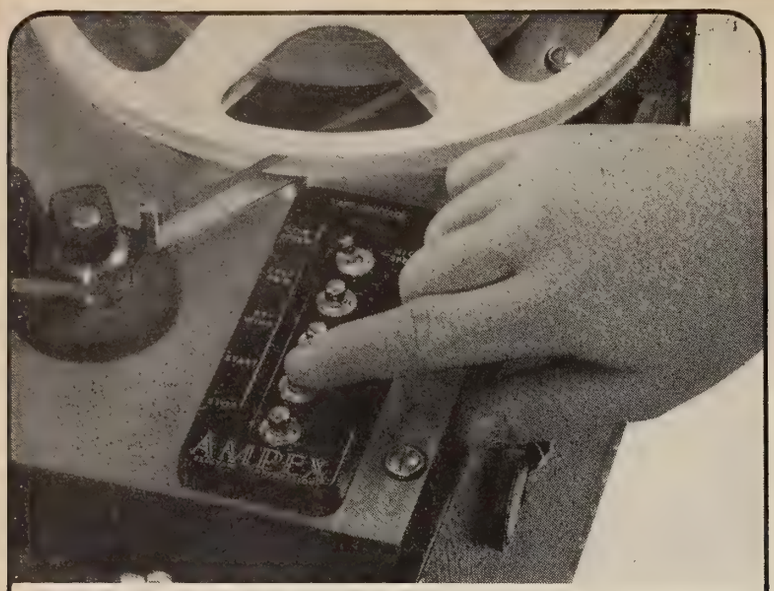
Chip Pulls a "Pip"

Chip Hanson is a clever commercial artist. Besides doing cartoons on our paper, he picks up a lot of "free lance" drawing jobs.



Right now he's whipping up posters for the Safety Campaign. They all have big headlines like "PLAY IT SAFE!" . . . or, "A LIVE WIRE CAN START A FIRE!" Things like that.

Chip looked sheepish yesterday. Didn't want to tell me why at first. Finally he blurted out, "I feel like a dope. Here I am working on this safety program and the fire inspectors tell me my own studio's a fire trap. I've been storing paint there for years and never thought . . ."

From where I sit, what happened to Chip could happen to anyone. He was just too busy keeping everyone else informed about safety—not realizing his own safety was threatened. Like those who fret about their neighbors—whether they can afford a new house, whether they should have coffee or a glass of beer with lunch—Chip simply forgot to "draw" some obvious conclusions about himself!

An AMPEX is always ready to go

— Even after thousands of hours of service

Supreme reliability is the most important quality your tape recorder can have — whether your station is 250 watts or 50,000 watts. Countless operators have found that AMPEX eliminates the fussing, the adjustments and the uncertainty they had previously suffered in using tape recorders that were "built to a price."

The AMPEX 400 Series Recorder is the one outstanding bargain in tape recorder service. It costs least per hour of use; it minimizes maintenance and adjustment; it protects your programs from the hazard of sudden failure; and its reliability frees your engineer's attention for other tasks.

Even after thousands of hours of service, your AMPEX Recorder will be reliable in these important ways:

- *When you press the button, it operates*
- *Program timing stays accurate*
- *Starting, stopping and rewind will operate smoothly*
- *Fidelity will still be high*
- *Maintenance costs will still be low*

If you plan for tomorrow, buy an AMPEX today.

For new broadcast application bulletin, write Dept. D-1041B

CHRISTMAS ECHOES

Further Special Yuletide Programs Reported

THOUGH Santa was well on his way back to the North Pole, further reports of stations' Christmas programming [B•T, Dec. 29, 1952] were received last week.

WFIL Philadelphia arranged a special series of Yuletide choral music programs which began Dec. 17 and continued through Dec. 24. Groups heard included the Haddonfield Choral Society.

WBAL Baltimore announced, with a note of pride, that its campaign to raise food for the Salvation Army brought not only more than 300 pounds of tinned foods, but also 15 Christmas trees, a considerable amount of cash and one gas stove.

WMAL Washington's Harold Stepler, for the fourth time, interpreted the role of Scrooge in a radio adaptation of Charles Dickens' *Christmas Carol.* WMAL's Jackson Weaver was heard Dec. 23 on the ABC network in a narration of *Peter & the Wolf* during *The Navy Hour.*

KWJB Globe, Ariz., presented Pedro Oviedo, veteran Spanish announcer, in Mr. Oviedo's 13th consecutive Christmas Eve program.

WEBJ Brewton, Ala., was host to more than 2,000 children at a Christmas party. The entire staff of WEBJ aided in arranging and staging the yuletide event.

More than 100 employes of the four stations owned and operated by E. D. Rivers Jr. were presented with Christmas cash bonuses at special parties. Stations were listed as KWEM West Memphis-Memphis; WEAS Decatur-Atlanta; WJIV Savannah, and WGOV Valdosta, Ga.

NBC REALIGNS

Western Div. Operations

COMPLETING integration of NBC radio and TV operations, John K. West, Western division vice president, has announced realignment and expansion of duties for three top executives in Hollywood.

Thomas C. McCray, director of radio and TV network program operations, also will serve as division assistant director, heading program activities, TV news and TV directors and producers.

H. Earl Rettig, director of finance and operations, also will direct communications, plant maintenance and operations, staging services, staging arts, comptroller's office, technical operations, film operations and operations office.

As public relations director, Lewis S. Frost will supervise personnel and labor relations in the departments of continuity acceptance, guest relations, press, publicity, advertising and promotion.

Reporting directly to New York divisions will be John Williams, radio and TV network sales; Clifford Ogden, TV film syndication sales; Walter B. Davison, national spot sales; Richard H. Graham, legal department; James Sandner, merchandising; Paul Gale, station relations and traffic; Henry Maas, sales and program services; Don Norman, general manager, KNBH (TV), and Sam Fuller, executive producer of *All Star Revue* and *Colgate Comedy Hour* TV units.

SAFETY AWARDS

Entries Invited to March 15

BROADCAST stations and networks have been invited by the National Safety Council, Chicago, to petition for that group's noncompetitive public interest awards and for the competitive Alfred P. Sloan foundation highway safety awards. Citations are given annually by both groups.

Public interest awards are given by NSC to radio and television stations and to networks for exceptional service to safety.

Judges for the radio, TV and advertising section for the NSC awards include Norman Damon, vice president, Automotive Safety Foundation; Arthur F. Harre, general manager, WCFL Chicago; Wesley Nunn, advertising manager, Standard Oil Co. of Indiana, Chicago, and coordinator of the "Stop Accidents" campaign of the Advertising Council; Robert K. Richards, director of public affairs, NARTB, Washington, and Judith Waller, director of public affairs and education at NBC Chicago.

Nominations for both the NSC and Sloan awards may be made on blanks obtainable from Council headquarters at 425 N. Michigan Ave., Chicago, before March 15.

Sloan judges include Mrs. Oscar A. Ahlgren, president, General Federation of Women's Clubs; Kenneth G. Bartlett, dean, University College, and a director of the radio workshop at Syracuse U.; Ned H. Dearborn, NSC president; George Jennings, radio and television director, Chicago Board of Education; Don McClaugherty, president, American Assn. of Motor Vehicle Administrators, and Dr. John W. Studebaker, chairman, National Committee for Traffic Safety.

Sarnoff Broadcast

WORK of the new Citizens Advisory Commission on Manpower Utilization in the Armed Services was outlined in a news broadcast Dec. 28 by Brig. Gen. David Sarnoff, head of the 11-man group. The RCA board chairman reviewed objectives of the task force and its inquiry into communications, accounting, transportation and other aspects touching on use of military manpower. Gen. Sarnoff appeared on *Capitol Memo,* a 15-minute transcribed news program distributed by Gannett Newspapers Inc.

Revlon's Treasurer and General Manager, Joseph Revson, with "Fire and Ice" girl Dorian Leigh

He kept 7,235 dates with this girl!

Five months ago she was just an idea. Today, as the temptress who sells Revlon's new "Fire and Ice" Lipstick and Nail Enamel, she's America's most talked-about glamour girl!

"She created the greatest shipping problem we ever had," says Joseph Revson. "7,235 stores wanted 'Fire and Ice' merchandise and displays – to be delivered *before* the promotion date of November 1.

"There was only one way to keep all those dates! And as heavy re-orders flooded in, we continued to fill them via Air Express. Volume is now the heaviest in our history! In maintaining that momentum—and keeping the goodwill of the stores—Air Express service has been invaluable.

"We don't overlook costs, either. Air Express rates are the lowest in the field on practically every shipment we make. With a volume like ours, those savings add up to a very substantial figure!"

RADIO HOMES COUNT

Issued for Texas and Virginia

NUMBER of radio homes in Texas and Virginia is shown in official figures just released by the U. S. Census Bureau. Figures show the official tabulation of radio homes as determined by the 1950 decennial census.

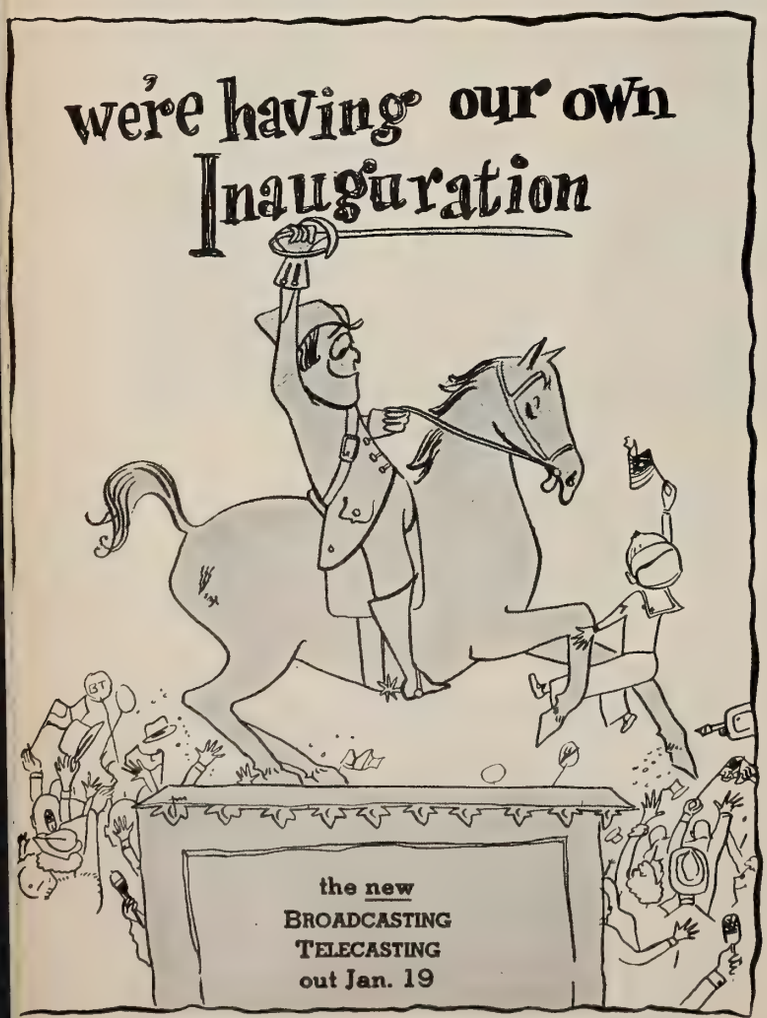
Television homes also are shown but TV circulation is based on April 1950, when fewer than 5 million TV receivers had been manufactured and stations were just coming on the air in most areas. Present TV circulation for the nation as a whole is nearing 20 million sets.

Official census data for the states follow:

STATISTICS in adjacent tables are extracted from final reports of the 1950 Census of Housing, Series H-A, No. 43 for Texas and 46 for Virginia, and will be available in about six weeks from the Superintendent of Documents, Washington 25, D. C., at $1.75 and 70 cents per copy, respectively.

Statistics on distribution of the population in the states are presented in final reports of the 1950 Census of Population, Series P-A, Nos. 43 and 46, now available from the Superintendent of Documents at 30 and 20 cents a copy, respectively. Descriptions and maps of "urbanized areas" are presented in these reports.

Statistics on characteristics of the population in the states are presented in final reports of the 1950 Census of Population, Series P-B, Nos. 43 and 46, available from the Superintendent of Documents, at $1.50 and 65 cents per copy, respectively. Descriptions of Standard Metropolitan Areas, if any, are presented in these reports.



A Standard Metropolitan Area is generally described as a county or group of contiguous counties with at least one city of 50,000 or more. In New England, it is defined on a town or city rather than county basis.

An urbanized area contains at least one city of 50,000 or more and includes surrounding closely settled incorporated and unincorporated areas.

Stalin's Gobbledegook

WHILE listening to a newscast the other night, we realized how deft is the Soviet propaganda machine, even to its choice of names for governments, armies and party functions.

The newscaster, whom we know to be irreproachable, read an item about the "People's Court" of Czechoslovakia, and somehow we were reminded of other such uses of "people" in Red operations, the "Chinese People's Army," "East German People's Government," "Mongolian People's Republic."

To Americans, the word "people" has a special significance since their own government is of, by and for the people—in the pre-Soviet and pure sense of the word. How many Americans, subconsciously perhaps, may react less critically than they should to another government which is also said to be the "people's"?

In print, these Red terms may be placed in quotation marks, but the newscaster has no such easy device at hand when delivering them on the air. Spoken straight, without some sort of qualification, the words "World Peace Congress," for example, do not evoke suspicion except to the sophisticated.

We have no newsroom rules to propose on the treatment of these propaganda euphemisms, but we would urge all who appear on the air to consider their responsibilities. One way to help stop a Soviet "Peace Offensive" is to report it for what it really is. In the curious language of the Communists, "peace" can mean almost anything except that.

Life Under Ike

THIS MONTH life under Ike begins. Congress has convened, with mere razor-edge majorities for the GOP in each House. The President-elect, between now and Jan. 20, is expected to name his new FCC Chairman and one or possibly two new GOP members of the FCC.

These are the two keystones in the new communications regulatory arch under Ike. So far, there is every indication that the new FCC Chairman will be Rosel H. Hyde, who has served as a Republican member of the FCC with distinction since 1946. He has been in radio regulation longer than any other FCC official. There are no other active candidates for the chairmanship. Yet there is some talk about a "new broom" for Chairman—one that will sweep clean and have no compunctions about rooting out the arch New Dealers.

We can understand why, after 20 years of Democratic rule, the political leaders are anxious to clean out the Federal establishment of "undesirable elements." At the FCC the changes must be deeper than a job or two in the law department or in the secretary's office. But who would know better where those bodies are buried than a career executive like Mr. Hyde?

The FCC hasn't been a political dumping ground. Quite a few of its more radical minions, having seen the hand-writing, left months ago. Mr. Hyde knows that considerable money can be saved through the appointment of one or two efficient administrators, and the elimination of budget, personnel, economic and efficiency "experts."

We hope Mr. Hyde will be promoted. We feel that he can do the job because he has demonstrated his administrative prowess and has a quiet sternness that gets things done.

In the appointments thus far announced, President-elect Eisenhower has not yielded to political considerations above others. He has selected men and women well qualified for their assignments. It thus can be expected that his new FCC appointees will be men well qualified by background and experience to participate in the important work ahead.

What Congress will do under the GOP insofar as it affects communications can't be foretold. That it will be a hot topic is preordained. Sen. Tobey, as chairman of the Interstate & Foreign Commerce Committee, isn't one to let a noteworthy or newsworthy event go by without comment or deed. He will succeed to the toga of his Democratic predecessor, Sen. Johnson of Colorado, who ensconced himself as "super-Chairman" of the FCC. Indeed Messrs. Tobey and Johnson are disposed to think alike on matters pertaining to radio and TV.

There's unfinished FCC business on the House side too, stemming from the Gathings resolution on TV and radio programming. Incoming Chairman Wolverton of New Jersey of the House Interstate & Foreign Commerce Committee proposed an inventory of all agencies subject to its legislative jurisdiction. Almost anything could happen.

But before Congress gets investigating again, it's to be fervently hoped that it will give the new President a chance to set up his new Republican majority on the FCC and the new GOP majority a chance to reorganize.

TV Outposts

NOW that television has begun its development into a truly national service, it is time for telecasters to reappraise the usefulness, or lack of it, of community TV systems.

There can be no question that such systems have served an interim purpose in extending TV service to areas that would otherwise have been without it during the FCC freeze. We wonder, however, if in the long run community systems will do more harm than good.

Is it not conceivable that they will discourage the construction of television stations in areas of relatively small population where commercial applicants might take a chance if wired TV service, relayed from distant stations, were not already installed?

It will be argued, of course, that there are areas where no television station could ever make its way and where community services can provide a means of delivering television. But there is another way to deliver TV to outlying areas.

It is technically and economically possible for a television station to establish satellite or booster stations at remote points from its main transmitter. Legally, of course, such operations would require approval of the FCC.

The advantages of that technique over the technique of wired community TV are several. For the audience, subscription or rental fees are eliminated, with the removal of the middleman who operates community TV. For the broadcaster, coverage and audience are enlarged to dimensions that can be computed in his rate card. And, as important as any, the principles of U.S. broadcasting are observed.

The FCC must eventually be called upon to deal with this question.

Meanwhile, telecasters have it within their power to decide whether they do or do not want to go on living with community TV systems, since such systems cannot exist without the program supply that is obtainable only from operating stations. In Asheville, N. C., the city council refused to approve a community system after WBTV (TV) Charlotte denied the system permission to relay its programs and the holder of a CP for a uhf station threatened to turn back his grant.

our respects to:

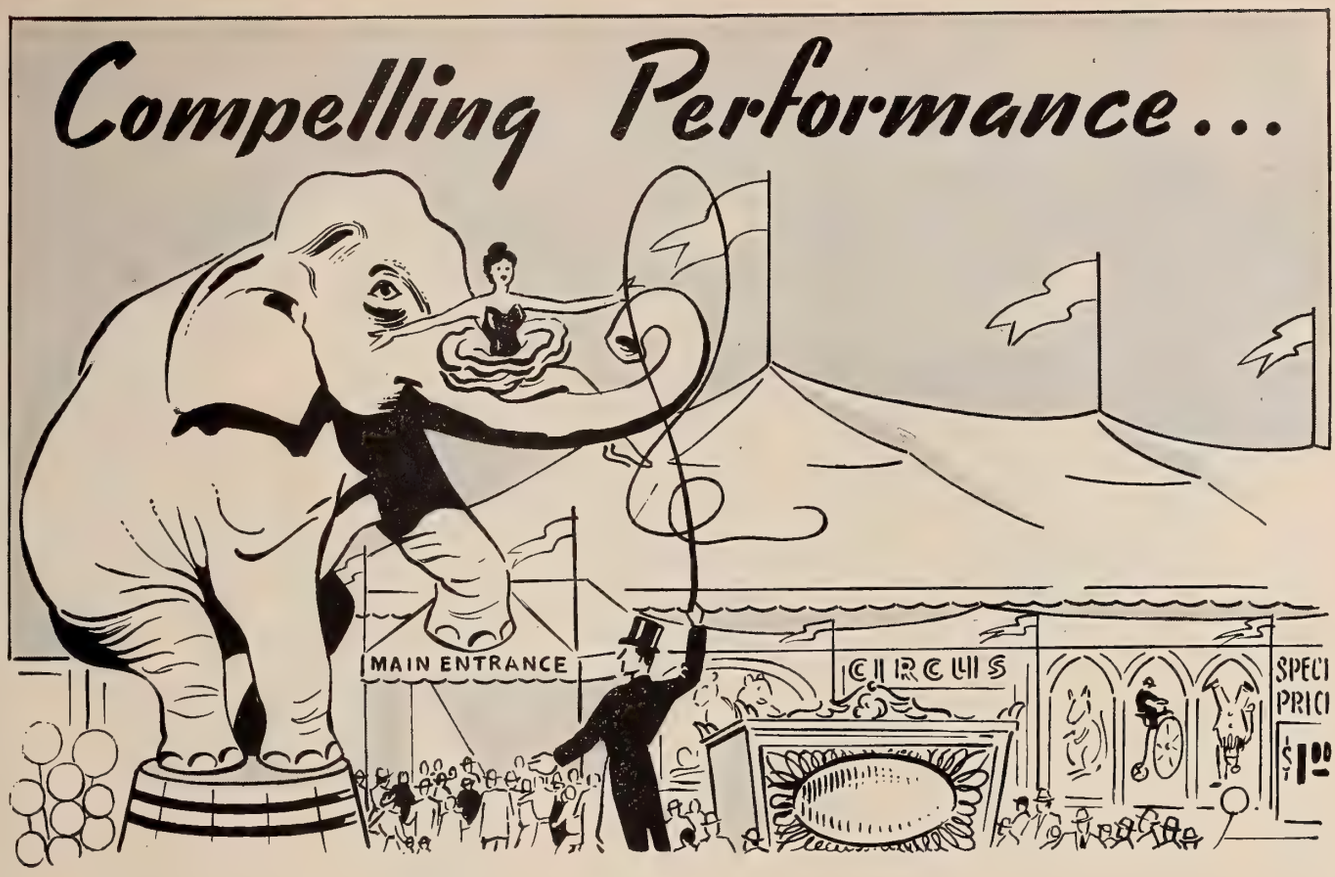
FRED LOUIS BERNSTEIN

AT 28, Fred Louis Bernstein, general manager of WTTM Trenton, N. J., can look back on a 15-year business career. He was managing a radio station at 23.

Mr. Bernstein got his first taste of advertising and merchandising at 13 when he became a part-time clerk in a chain grocery store in Charleston, S. C. Turning his technique to other retail selling activities, he worked in a pawn shop, a uniform store, a clothing store, and in the summer of 1940, he became at 16 the manager of a Charleston shoe store, handling all the buying and advertising. As a sideline he took on the additional chores of emceeing at high school events and community functions.

There never seems to have been any doubt in Mr. Bernstein's mind that he would end up in the broadcasting industry, although his college career doesn't indicate it. He studied agriculture, engineering, pre-dentistry, psychology and business administration.

About these diverse studies, Mr. Bernstein says only this:



"Engineering taught me to press the button on a console; agriculture taught me that even farmers listen to the radio; psychology that there are no temperamental people — particularly in the broadcasting business; pre-dentistry taught me to look out for cavities in programming; and business administration taught me that you can't make a profit without a sale."

Serving three years in the Armed Forces where he was awarded the Purple Heart, Mr. Bernstein returned to Charleston in 1946 and completed his studies at the College of Charleston. During this time, as stage manager for the Footlight Theatre Group, he struck up a nodding acquaintance with show business.

Then for six months afterward he tried to get into radio, to no avail, until one day he answered a help-wanted ad seeking an engineer for a new station opening in Charleston. After two weeks of camping on the doorstep, Mr. Bernstein was hired—not as an engineer—but as the station's first and only salesman.

Three months later WFAK (now WPAL) was on the air and in the black—and Mr. Bernstein was puffing slightly from a three-month schedule during which he had worked an average of 18 hours a day, seven days a week. During the following nine months he was successively, salesman - copywriter - announcer, program director, sales manager and

(Continued on page 81)

in the BIGGER and BETTER memphis market

In selling as in showmanship, it's the quality of the performance that determines the interest of the audience. In the greater Memphis Market, comprising 76 rich counties with a buying potential of over $2 Billion, you'll always find the greatest audience tuned to WREC. HERE'S WHY: High quality programming and engineering perfection insure good reception and a compelling performance of interest to your best customers. WREC prestige adds believability to your message, too! The cost is another pleasant surprise . . . 10% LESS per thousand listeners than in 1946!

WREC

MEMPHIS NO. 1 STATION

CORNY?

WIBW advertisers don't think our methods of selling to farmers are corny. Not when they check sales figures in Kansas and nearby states.

WIBW The Voice of Kansas in TOPEKA

ATAS ELECTIONS

Ruggles Elected President

CHARLES RUGGLES, star of KECA-TV Los Angeles' *The Ruggles*, has been elected president of the Academy of Television Arts & Sciences. Mr. Ruggles will take office Feb. 5, succeeding Hal Roach Jr., vice president of Hal Roach Studios Inc.

Other officers are Guy Thayer, vice president of Roland Reed Productions, Culver City, elected first vice president; Hal Hudson, CBS Hollywood network program TV manager, second vice president; Robert Cummings, star of NBC-TV's *My Hero*, secretary; Ernest Felix, business manager, John I. Edwards & Assoc. agency, treasurer; Isabelle Pantone, free lance TV publicist and packager, recording secretary; Robert Pelgram, manager of press information, KNBH (TV) Los Angeles, corresponding secretary, and Mildred Beach, free lance TV producer, secretary to treasurer.

Tax Writeoffs

ELECTRONICS firms are listed by the Defense Production Administration as among recipients of speedy tax writeoffs during December. Receiving certificates of necessity for quick tax amortization on new or expanded plant facilities were: General Electric Co., Bridgeport, Conn.; Keystone Electronics Co., Stamford, Conn.; Peerless Instrument Co., New York; Radio Condenser Co., Camden, N. J.; Technical Appliance Corp., Sherburne, N. Y.; Western Electric Co., Forsyth County, N. C.; Hobart Mfg. Co., Dayton, Ohio.

air-casters

BILL RUFF, sports and news editor, KOLO Reno, Nev., to KWRN same city, as program director.

DAVID PARKER and **JOAN MURPHY** to NBC Chicago, as associate TV director and TV program assistant, respectively.

CHUCK THOMPSON returns to WFOR Hattiesburg, Miss., as disc jockey.

FRED W. FOERSTER Jr., production staff, WDEL-TV Wilmington, Del., to WBRE-TV Wilkes-Barre, Pa., in same capacity.

JINI O'CONNOR to WIP Philadelphia, as continuity writer, replacing **MAGGIE BURNETT.**

WARREN BOOROM appointed director of sales promotion, WTOP-AM-FM-TV Washington, succeeding **HAYWOOD MEEKS**, who transfers to WMAL-AM-FM-TV that city.

RALPH YOUNG to WHIZ-TV Zanesville as film director. **ARTHUR SPRING** named art director of station.

ART SCHREIBER, WHOI East Liverpool, Ohio, announcer, to similar post at WHIZ.

DON PARKER, WLYN Lynn, Mass., to announcing staff, WKXL Concord, N. H.

JERRY SACHS and **ROLAND REED** to announcing - engineering staff, KCOW Alliance, Neb.

MIKE ROSS, regular member of NBC-TV *Red Skelton Show*, assigned role in Paramount Pictures feature film, "Here Come the Girls."

JOE FORTE, who portrays Horwitz on CBS Radio *Life with Luigi*, assigned role in Warner Bros. feature film, "The Grace Moore Story."

CATHY and **ELLIOTT LEWIS**, co-star of CBS-AM-TV *My Friend Irma* and director on CBS Radio *Suspense*, respectively, co-star on new CBS Radio *On Stage with Elliott and Cathy Lewis* series, starting Jan. 1.

SPADE COOLEY, star of KTLA (TV) Hollywood *Spade Cooley Show*, will be featured in untitled western feature film to be produced by Nunes-Cooley Productions. **LES ATKINS**, program staff writer, is writing script.

GEORGE WALSH to WFIL-AM-TV Philadelphia, as sportscaster.

HAL SWANEY, disc jockey, WIDE Biddeford, Me., and Jean Lajoie were married Dec. 6.

***News* • • •**

ART SMITH, news director, WNAX Yankton, S. D., named to advisory board of Briar Cliff College, Sioux City, Iowa.

BILL WHITLEY, director of news, public affairs and special events, KNX Hollywood, transfers to CTPN and KNXT (TV) that city, in same capacity.

LOU CIOFFI, CBS Radio correspondent in Korea, awarded Purple Heart medal for wounds received while covering Second Div. last October.

MBS Buys Mysteries

HARRY S. GOODMAN Productions, New York, announced last week it has sold to Mutual, for more than $150,000, a series of mystery programs titled, *Crime Files of Flamond*. The program, to be broadcast with a live cast from WGN Chicago, will begin on MBS Wednesday, 8-8:30 p.m. The production company said MBS has sold participating spots to national advertisers.

DENVER U. ARTS

Unit Includes Radio, TV

A SCHOOL of Communication Arts coordinating radio, television, the theatre and journalism programs has been set up at the U. of Denver, with Dr. Campton Bell as director. Communication unit will function within the university's College of Arts and Sciences.

Objective is to ground students more fully in academic and professional training needed for the four arts, Dr. Bell explained. School will call on leaders of each profession to conduct special short courses, seminars and workshops. Dr. Bell, who heads DU's Theatre School, also noted the "rapid growth" of radio, television and other arts in recent years and stressed need of qualified personnel.

'Barn Dance' Sales

FIVE more video stations have bought the syndicated film, *Old American Barn Dance*, produced by Kling Studios, Chicago, and sold by United Television Programs. The stations are KKTV (TV) Colorado Springs, KHQ-TV Spokane, KGNC-TV Amarillo, KDUB-TV Lubbock and WEEK-TV Peoria, Ill., bringing the total number of station purchasers to 37, according to Fred Niles, vice president in charge of TV and motion pictures for the studio. The series stars Bill Bailey and such musical performers as Tennessee Ernie, Pewee King and Tex Williams.

Literary Woof

BOOKS by men about dogs are not unusual but it's sensational news when a dog writes about men. That was the reaction to a new book by Delmar W. Beman Sr., public relations director of Langhammer & Assoc. Adv., Omaha. Mr. Beman, in his book, *And I Learn About People*, gives a "pup's view" of life while wandering through a world of humans.

IN SYRACUSE . . .

TELEVISION SUPPLEMENTS RADIO

. . . Does NOT Replace it as a Source of Entertainment and Information

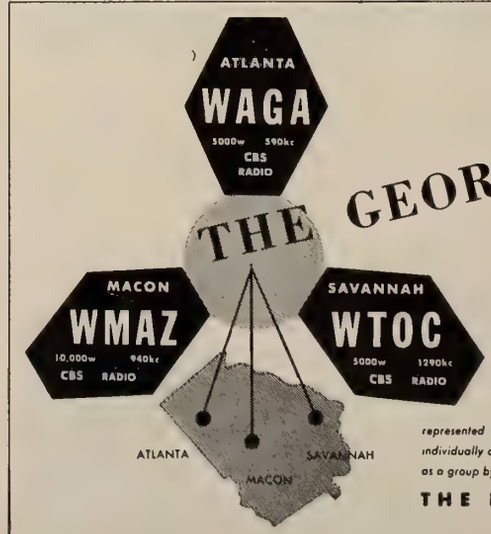
Syracuse is a two-TV-station city. According to Niagara Mohawk Power Company monthly surveys, 71% of the homes in the Syracuse area have TV sets. According to the calamity howlers, radio in Syracuse should be a dead duck. But two separate *surveys of television homes* (October and December 1951) show that radio is alive and vigorously kicking. (Details, including methods of sampling, free on request.) Here are the combined results:

Number of Homes Called	Number of TV Homes	TV Homes Only Average Hours per Day		
		Radio	TV	Both
1467	986	3.07	4.52	7.59

The Survey Also Showed:

1 - An average of 2.4 radios per TV home.

2 - 61 radios purchased *after* the homes had television.



3 - Average of 4.4 hours per day of radio listening in non-TV homes.

Comparative loss of radio-listening time in TV homes — only 30%. Here is PROOF that TV has NOT replaced radio in Central New York — merely provides another means of reaching this rich market.

The Big Idea in Television

Watch the birth of new industries.

Here is a new, *big idea* in television — an idea that offers your company a unique opportunity to use television successfully and economically. This concept is embodied in a new Du Mont Network program appropriately titled "THE BIG IDEA"— a program with an enviable record for the past four years as a local show.

"THE BIG IDEA" is a program of ideas — of new inventions to better our way of life, our industrial methods. It is a program dedicated to free enterprise, to the growth of America. If your company is similarly dedicated, if your company actually benefits from the development and expansion of industry, "THE BIG IDEA" can serve you as no other television program can. It can be your dramatic way of talking to the many important business leaders and executives who are numbered among the large audience of this program.

Call Du Mont today and learn more about the *big idea* in television. It is your idea—and your opportunity.

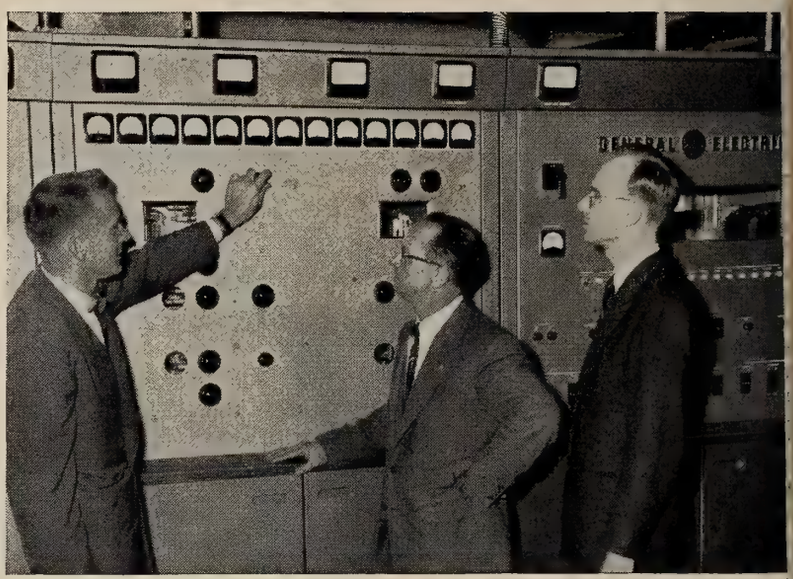
KHQ-TV STARTS AT 100 KW ERP CHANNEL 6



New Spokane, Wash., Station on the Air Dec. 8 at Maximum Allowable Power

KHQ-TV became the first VHF television station in the nation to go on the air with maximum allowable power when it started operations at 100 kw on Dec. 8, 1952 in Spokane. The station also established a local first by being the first TV outlet on the air in Spokane and the Inland Empire and the first with programming during an hour-long show Dec. 15.

"Our staff, after thorough research, chose General Electric transmitting equipment to make this historic event possible," said Dick Dunning, KHQ-TV president and general manager. Both the station's transmitter and five-bay bat-wing antenna were designed and fabricated by G.E.

The station followed its first test pattern with programming each evening on Dec. 15 and planned commercial programming beginning Dec. 20. KHQ-TV, an affiliate of the National Broadcasting Co., has also signed an affiliation with the American Broadcasting Co.

The initial telecast from KHQ-TV flooded the station's switchboard with calls from towns in Washington, Oregon, and Idaho. Community reaction has been terrific in the entire market area—an area which is completely isolated from any other TV outlet.

KHQ-TV Chief Engineer, A. G. Sparling, center, shown above with General Electric engineers R. E. Utterback and D. O. Martin checking the station's giant G-E transmitter.

Four and a half tons of steel start their way upstairs to the top of KHQ-TV's 826-foot tower. The five-bay bat-wing antenna rests atop the tower used jointly by KHQ-TV and KHQ-AM.

NEW STATION COST $332,000

Richard O. Dunning KHQ-TV

Richard O. Dunning, President and General Manager of KHQ-TV, estimates the total station cost at $332,000.

Equipment delivered by G.E. included a 5-kilowatt transmitter, 35-kilowatt amplifier, and a five-bay antenna. The combined 35-kilowatt output of transmitter and amplifier will be multiplied five times by the antenna, to produce 100 kilowatts of effective radiated power.

KHQ-TV's chief engineer, A. G. Sparling, did an outstanding job in solving the many technical problems connected with putting a station of this magnitude on the air.

John H. Painter

John H. Painter, special representative for General Electric broadcast equipment, with headquarters in the Wyatt Building, Washington, D.C., is responsible for liaison between all G-E broadcast equipment personnel and broadcast consulting engineers.

A native of Dover, N. J., and a graduate of Newark College of Engineers, Painter has been with the General Electric Company since 1945. Following assignments in manufacturing and field engineering, he became engaged in application engineering work on television broadcasting systems in 1950.

COLOR TV QUANDARY

CBS Reopens Controversy

CBS last week called upon "all elements in the industry and in the government" to settle the color television issue "as soon as possible in 1953," for the public's sake.

The company which developed the so-called CBS field-sequential color system—and won FCC approval of it over the vigorous and continuing opposition of most of the industry—issued a statement reiterating that it, like other members of the industry, thinks a "compatible" color system is "extremely desirable."

But, the statement continued, CBS also still believes its own system, although not compatible with existing black-and-white standards, is "the only practical, workable and inexpensive color system." The statement said:

"The manufacturing industry, broadcasters and the FCC owe the public the obligation of promptly considering whether it still remains true, as CBS believes on the basis of information currently available to it, that the present field sequential system is the only practical, workable and inexpensive color system or whether this approved system is to be replaced by a compatible system which must be equally practical, workable and inexpensive."

Long History

The color TV battle has been in progress for years. CBS won FCC approval of its system in 1950 after protracted hearings in which its chief opponent was RCA, which offered a compatible system. Since the hearings, the National Television System Committee, an industry-wide group including RCA, has been continuing work on the development of a compatible technique. CBS, meanwhile, broadcast via its system for a few months, stopping when the National Production Authority halted manufacture of color TV equipment.

A CBS official later explained that, while CBS would like to pursue the colorcasting issue with the FCC, it could see no procedure for doing so, inasmuch as the Commission already has approved its system. He expressed hope NTSC would go to FCC fairly soon.

Even if the ban on materials is lifted and the CBS system is still the official one, CBS will not resume color broadcasting unless it gets industry support, the official predicted. CBS found in its earlier experience, he said, that it is difficult to buck the entire industry.

There has been some speculation that restrictions on vital controlled materials—and thus on manufacture of color TV equipment—may be lifted by mid-1953, barring unforeseen international developments. Such an eventuality at least would remove the barrier in the path of mass production of color TV equipment.

Reluctant to Reply

Manufacturers have been reluctant to apply for materials since color TV went to war late in 1951 at the request of former Defense Mobilizer Charles E. Wilson who conferred with industry leaders. Loosening of overall restrictions by NPA last year had no practical effect on manufacturing plans, merely setting up certain stringent criteria.

CBS, which also is represented on the NTSC, reported that in its own work during 1952, conducted by the CBS Labs. Division in conjunction with Hytron Radio & Electronics Co., another CBS division, "substantial progress" was made in the development of a tri-color tube which would replace the disc used in CBS-type color receivers in the past. It also singled out Chromatic Labs. as having made "important progress" on tri-color tubes usable with the CBS system.

(RCA also is developing a tri-color tube which CBS contends can be used with the CBS as well as the RCA or other compatible systems.)

Text of the CBS statement:

In the spring of 1951 regular commercial color television broadcasting under field sequential standards developed by CBS were finally approved, and shortly thereafter, CBS began such broadcasting.

Late in the fall of 1951, just as the CBS color program schedule was beginning to expand and some progressive manufacturers were preparing to enter into production of color receiving equipment, the National Production Authority issued an order which prevented further manufacturing activity in this field. As a result, CBS necessarily ceased its color broadcasting.

Although the NPA, in 1952, modified the terms of its ban, the modification was not significant in practical effect and precluded that substantial degree of color receiver manufacturing which would have warranted re-institution of regular color broadcasting by CBS.

Although, therefore, 1952 was a period of complete quiescence so far as regular commercial color broadcasting was concerned, there was nevertheless activity and progress in the field of color television.

The CBS Laboratories Division, with Twentieth Century-Fox, developed and successfully demonstrated the Eidophor method of large screen color television, which should see important fruition in 1953. The field sequential color system came into increasing use for industrial purposes and for use in the field of medical education, with a number of medical schools installing the CBS equipment for such purposes.

The CBS Laboratories Division continued its work in improving and simplifying receiving equipment and

SIX NEW GRANTS

FCC Actions at Yearend

FIRST television station for Maine —vhf Ch. 5 to WABI Bangor—was included in last week's half-dozen new television grants by FCC, winding up post-thaw TV actions for 1952.

The six authorizations boosted the post-thaw total of new station construction permits to 175, of which 10 are for noncommercial, educational outlets. Total number of TV stations authorized in the U. S. now stands at 283, of which 126 are on the air.

The Commission ranged through both its Group A and Group B processing lines in last week's actions in an effort to catch up on uncontested applications in cities passed over earlier in the year.

Processing in the Group A-2 line (cities without service) ranged from No. 15, El Paso, Tex., where Franklin Broadcasting Co. was advised that its uncontested bid for uhf Ch. 20 involves questions which indicate necessity of a hearing, to No. 159, New London, Conn., where WNLC was granted a permit for uhf Ch. 26.

On the Group B lines (cities with service, local or nearby), FCC action extended from Harrisburg, Pa., No. 8 under Group B-1, where Donald E. Newhouse's Harrisburg Broadcasters Inc. received uhf Ch. 71, to Altoona, Pa., No. 176 under Group B-3, where WFBG received vhf Ch. 10.

The final six TV construction permits of 1952 are as follows:

- **Bangor, Me. (City priority Group A-2, No. 153)—Community Telecasting Service (WABI), granted construction permit for vhf Ch. 5, effective radiated power of 1.9 kw visual and 0.95 kw aural, antenna height above average terrain 670 ft.**
- **Lakeland, Fla. (Group A-2, No. 157) — WONN-TV Inc. (WONN), granted uhf Ch. 16, ERP 85 kw visual and 43 kw aural, antenna 730 ft.**
- **New London, Conn. (Group A-2, No. 159)—The Thames Broadcasting Corp. (WNLC), granted uhf Ch. 26, ERP 105 kw visual and 54 kw aural, antenna 500 ft.**
- **Harrisburg, Pa. (Group B-1, No. 8) — Harrisburg Broadcasters Inc., granted uhf Ch. 71, ERP 220 kw visual and 110 kw aural, antenna 990 ft. Authorized earlier: WHP-TV, uhf Ch. 55.**
- **Festus, Mo. (Group B-1, No. 72)—Ozark Television Corp., granted uhf Ch. 14, ERP 170 kw visual and 89 kw aural, antenna 870 ft.**
- **Altoona, Pa. (Group B-3, No. 176) — The Gable Broadcasting Co. (WFBG), granted vhf Ch. 10, ERP 316 kw visual and 160 kw aural, antenna 990 ft.**

In other television actions last week, the Commission approved the application of KPRC-TV Houston, Tex., operating on vhf Ch. 2, to increase effective radiated power from 15 kw to full 100 kw and to change antenna height from present 500 ft. to 630 ft.

The Commission postponed to Jan. 19 the deadline for filing comments on its proposed amendments to Part 4 of the FCC rules governing television auxiliary broadcast stations, previously set for Dec. 19. The proposed changes were announced by the Commission Nov. 19.

FCC also proposed to add uhf Ch. 75 to Patchogue, N. Y., and set Jan. 26 as deadline for comments. The proposed change in the TV allocation table was requested by

Estimated construction cost $767,263, first year operating cost $575,990, revenue $385,000. Post office address: 11 North Second St., Harrisburg. Studio location 911 Market St. Transmitter location 5.75 mi. North of East Pennsboro in Cumberland County, Pa. Geographic coordinates 45° 19′ 03″ N. Lat., 76° 56′ 50″ W. Long. Transmitter and antenna GE. Legal counsel Fisher, Wayland, Duvall & Southmayd, Washington. Consulting engineer Craven, Lohnes & Culver, Washington. Sole owner is **Donald E. Newhouse,** ⅓ owner of KGW Portland, Ore., and Vice President of The Evening Journal Assn., Jersey City, N. J., Long Island Daily Press Pub. Co., Jamaica, N. Y., and Newark Morning Ledger Co., Newark, N. J. [For application see TV Applications, B•T, July 21.] City priority status: Gr. B-1, No. 8.

EXISTING STATION CHANGE GRANTED

KPRC-TV HOUSTON, Tex. Granted ERP 100 kw visual, 50 kw aural; antenna height above average terrain 630 ft.

TRANSFER OF CONTROL REQUESTED

WMBR-AM-FM-TV JACKSONVILLE, Fla.—Florida Bcstg. Co. Transfer of control to **Washington Post Co.** through sale of 100% interest for $2,470,000 cash. Principals in transferee include Chairman of the Board **Eugene Meyer,** President and Publisher **Philip L. Graham** and Vice President **John S. Hayes,** who also is president of WTOP-AM-FM-TV Washington, and which is owned by WTOP Inc. (Washington Post Co. owns 55% of WTOP Inc., and CBS owns 45%.) Transferee is publisher of *The Washington* (D. C.) *Post* (daily morning newspaper), and is borrowing $2 million from Riggs National Bank, Washington, D. C., in order to effect cash purchase of WMBR-AM-FM-TV.

WLTV (TV) ATLANTA, Ga.—Broadcasting Inc. Transfer of control to **Crosley Bcstg. Corp.** through sale of 100,820 shares of common stock and 72,000 shares of preferred stock (100%) for $1,500,000. Principals of Crosley Bcstg. Corp. include Chairman of the Board **James D. Shouse,** President **R. E. Dunville,** Secretary **R. S. Pruitt,** Vice President and Treasurer **K. T. Murphy,** Vice President **R. J. Rockwell,** Vice President **Harry M. Smith,** Vice President **William P. Robinson** and Vice President **John T. Murphy.** Sole owner of 100% of stock of Crosley Bcstg. Corp. is **Avco Mfg. Corp.,** New York. Transferee is the licensee of WLW WLWT (TV) Cincinnati, WINS New York, WLWD (TV) Dayton and WLWC (TV) Columbus, and applicant for new TV stations in Indianapolis and Toledo.

ASSIGNMENT OF CP REQUESTED

WGBI-TV SCRANTON, Pa.—Scranton Bcstrs. Inc. Assignment of construction permit to **MCL Telecasting Corp.** through relinquishment of 66⅔% interest now held by Scranton Bcstrs. Inc. (WGBI) to *The Scranton Times* (WQAN) and the Meco Realty Co. Principals include President **Frank C. Walker,** Meco Realty Co., former postmaster general; Secretary **Edward J. Lynett,** co-publisher of *The Scranton Times* Treasurer **Mrs. M. E. Megaree,** president of WGBI-AM-FM-TV; **Elizabeth R. Lynett,** co-publisher of *The Scranton Times*; **Mrs. Madge Megargee Holcomb,** vice president of WGBI; **Vance L. Eckersley; Thomas L. Moran, Thomas P. Comerford,** and **J. J. O'Leary.** WGBI, WQAN and Meco Realty Co. each have ⅓ interest in MCL Telecasting Corp. Each ⅓ stockholder will contribute $50,000 to MCL Telecasting Corp., each agrees to loan $50,000 to MCL Telecasting Corp., and Meco Realty Co. and WQAN each agree to loan additional $50,000 if necessary. Studios and transmitter buildings will be leased from WGBI; in addition, WGBI receives credit of $25,000 for work already done on studios and transmitter buildings and for obtaining contract with CBS-TV for network program service. (Last July WQAN and Meco Realty Co., each owning 50% interest, filed for uhf Ch. 16 as Electric City Telecasting Co. [B•T, July 20], but application was set for comparative hearing with WARM. WGBI-TV was granted CP Aug. 14 [B•T, Aug. 18].)

EXISTING STATIONS CHANGES SOUGHT

WENR-TV CHICAGO, Ill.—American Bcstg. Co. CP to increase ERP to 316 kw visual, 158 kw aural; antenna height above average terrain 731 ft.

KFDA-TV AMARILLO, Tex.—Amarillo Bcstg. Co. Mod. CP (which authorized new TV station) to change studio location from "to be determined" to 2.8 mi. north of Amarillo city limits on North Ong St. (extended) at SE corner of intersection of North Ong St. and West Cherry Ave.

NEW APPLICATIONS

Listed by States

PINE BLUFF, Ark.—Pine Bluff Television Co., vhf Ch. 7 (174-180 mc); ERP 50.5 kw visual, 27.2 kw aural; antenna height above average terrain 537 ft. above ground 574 ft. Estimated construction cost $350,500, first year operating cost $120,000, revenue $150,000. Post Office address 1407 South Akard St., Dallas, Tex. Studio and transmitter location at intersection of Bay St. and Seventh Ave. Geographic coordinates 34° 13′ 20″ N. Lat. 92° 02′ 28″ W. Long. Transmitter and antenna GE. Principals include President **H. Westerman Whillock,** Treasurer **Earl Glade Jr.** and Secretary **Willis C. Moffatt.** City priority status: Gr. A-2, No. 506.

HUGHES APPOINTED

WOR-TV News Director

APPOINTMENT of John B. Hughes, for many years conductor of the *News and Views* program on MBS as director of news for WOR-TV New York, was announced last week by Warren Wade, station manager.

Mr. Hughes

Mr. Hughes joined WOR-TV Dec. 1, 1952, at which time John Wingate resigned as the station's news director to join WNBT (TV) New York. Prior to joining WOR-TV, Mr. Hughes handled special assignments for MBS' news department in addition to his *News and Views* show.

NBC-CBC Agreement

NBC and CBS-TV last week entered into an affiliation arrangement with the Canadian Broadcasting Corp. for television stations in Toronto and Montreal. CBLT (TV) Toronto will be interconnected with NBC-TV but CBFT (TV) Montreal will be non-interconnected for the present.

DuMONT ADDS

New Sponsors in '52

THE NUMBER of sponsors of DuMont TV Network programs went from 35 to 43 during 1952, carrying the network's gross billings "close to the $10 million mark for the year," Director and General Manager Chris J. Witting said last week in a year-end statement.

He said 20 new affiliates were signed during the last half of the year to bring the total to more than 80. Lifting of FCC's licensing freeze, coupled with rapid addition of affiliates, "will bring about the end of one of our principal impediments, lack of outlets," he asserted.

Mr. Witting cited the recent opening of its new $4 million TeleCentre in New York as "only one example of DuMont's confidence in the future of television and of New York City as the production capital of the growing industry."

The network has worked and will continue to work on the development of new shows and new programming techniques, and on "breaking of monopolies especially in the sports field," he declared.

Commercial shows and library of the DuMont Teletranscription Dept. represent more than 12,000 individual programs along the DuMont Network, he said.

Additionally, Mr. Witting reported, the network's closed circuit TV department had "outstanding success" in 1952 and anticipates a substantial increase in the use of this service by industrial organizations in 1953.

UTP EXPANDS

Plans Own Film Packages

WIDELY expanded sales organization and filming of its own video packages was planned by the newly-organized United Television Programs at a three-day post-Christmas meeting in Chicago. The sales operation, doubled in the past month, has been implemented with addition of Fred M. Kress as operations manager, headquartering in Chicago.

Mr. Kress is a former sales and accounting executive with various manufacturing representative concerns. Monroe Mendelsohn, formerly with Snader Telescriptions, joins UTP in New York as sales promotion manager. Several field representatives have been added, including C. Crenshaw Bronnar in Atlanta and Gordon Wiggin in Boston.

Although United Television Programs has completed plans for filming its own syndicated film packages at the Gross-Krasne Studios in Hollywood, no details on titles and formats will be released for several weeks.

The company plans heavy local promotion, merchandising and sales aids in cooperation with stations and advertisers who use UTP programs.

The New Grantees' Commencement Target Dates

‡ On the air, operating commercially. * Educational permittee.

HERE are post-thaw TV grantees and the dates on which they expect to commence operation. Channels authorized, network affiliation and national representative, where signed, are given.

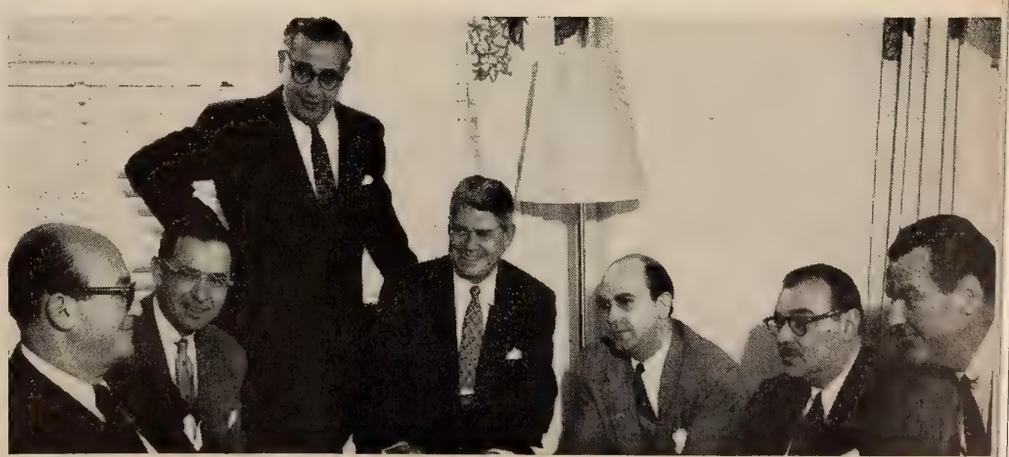
CBS-TV BILLINGS

'52 a 'Record Year'

CBS Television's gross billings in 1952—"a record year"—showed an increase of 67.56% over those for 1951, the network said in a summary of its 1952 highlights.

The report listed 10 clients who entered network television via CBS-TV during the year, plus a score of others who were newcomers to that network. Additionally, it was noted, "practically all clients retained their time periods through the summer months."

CBS-TV, the summary noted, "extended interconnected network service to all remaining corners of the country in 1952," winding up the year with a network of 70 stations—63 interconnected and 7 non-interconnected. The report listed 14 stations which either joined CBS-TV during 1952 or are "coming on early in 1953."



Other highlights of its expansion during the year were dedication of CBS Television City in Hollywood, acquisition of the Sheffield Farms Co. depot and office building in New York for conversion (already started) into "the largest television production center on the Atlantic seaboard," and acquisition of a part interest in a new corporation to operate WCCO and WCCO-TV (formerly WTCN-TV) Minneapolis-St. Paul.

NTFC OFFICERS

Mayers Elected President

ARCHE MAYERS, president of Unity Television Corp., New York, was elected and inducted as president of the National Television Film Council at a meeting in New York last Tuesday.

Other officers chosen were: Sally Perle, Mesal organization, New York vice president; William Van Praag president of Van Praag Productions New York, secretary; and Waldo Mayo, president of Mayo Productions New York, treasurer. Members of the board of directors elected were: Melvin L. Gold, Bill Holland, Henry Brown, Sidney A. Mayers, David Savage, Lou Feldman, Frank Bibas, Dr. Alfred N. Goldsmith, Andrew Jaeger, William Reddick and David Bader.

OUTLINING new sales and programming strategy at a three-day, post-Christmas meeting in Chicago [AT DEADLINE, Dec. 29, 1952] of United Television programs executives are (l to r) Jack J. Gross, former partner in Gross-Krasne which merged with UTP and Studio Films Inc. [B•T, Dec. 15, 1952]; Milton Blink, executive vice president and co-founder of the original UTP; Phil Krasne, former partner with Mr. Gross; Gerald King, board chairman who formerly was president and co-founder of UTP; Sam Costello, formerly president and founder of Stud Films Inc.; Ben Frye, vice president in charge of sales f UTP, and William M. Tuttle, who has been named president of the new firm.

Woodbury College Polls Coast Viewers

(Report 249)

A SIZABLE majority of TV set owners in Los Angeles, San Francisco and Salt Lake City, Utah, would not pay to see major sports or top variety shows at movie theatres, according to the eighth Tele-Census report prepared by Woodbury College, Los Angeles. Survey found a lesser majority (50% and up) would pay, however, to see the same events on home TV if not otherwise available. Percentages of "nos" on theatre TV ranged from 62.6% to 78%, with viewers balking mostly at major sports theatrecasts.

Other findings in the survey of some 3,000 set owners in 16 districts of the three cities were these:

(1) Television is the "most influential" media in purchase of advertised products, with highs of 45.3% in Los Angeles, 42.9% in San Francisco and 41.7% in Salt Lake City. Newspapers, magazines, radio and billboards ranked next in order.

(2) From 43.6% to 47.3% of viewers who have had sets over three months in the three cities are watching television less now than the first few months of ownership.

Additional TV Line Established by AT&T

AN additional westbound TV channel from Chicago to the West Coast was put into use Dec. 27 by Long Lines Division of AT&T, making two westbound and one eastbound video transmission circuits available on a regular basis, the company announced last week. On the same day, Pacific Telephone & Telegraph Co. announced that it had added two additional channels for TV service between Los Angeles and San Francisco, one northbound and one southbound, making two fulltime in each direction.

In a yearend statement, AT&T reported the installation of about 3,100 miles of coaxial cable and radio relay routes during 1952, with some 31,500 channel miles of circuits now available for transmitting network TV shows over the nationwide system, to which 14 cities were added last year.

* * *

Children Stimulate Set Purchases in Homes

CHILDREN will bring television into a home quicker than purchases in homes without children, and the more children, the more likelihood of TV. This was concluded by Bernard J. Fine, who wrote a thesis on set ownership for his Master of Science Degree from Boston U. last June. Report was released last week.

Mr. Fine found that if there was a video set under the Christmas tree this season, in a majority of cases it was because the children of the family were really the super TV salesmen.

WKNX-TV PLANS
Given at Bentley Dinner

PLANS for WKNX-TV Saginaw, Mich., to start operating next March were outlined last Monday at a dinner honoring Congressman-elect Alvin M. Bentley, new vice president and director of Lake Huron Broadcasting Corp. (WKNX-AM-TV).

William J. Edwards, Lake Huron president, who introduced Mr. Bentley, announced the station's plans for a four-day TV Exposition, to be held at Saginaw's Civic Auditorium Jan. 13-16. WKNX-TV will operate on uhf Ch. 57.

Television receivers will be demonstrated by leading distributors and closed circuit live and film shows will be fed from a studio to exhibitors' booths. Fourteen receivers and Ch. 57 antennas will be awarded to persons attending the exposition. Professional acts also will be featured.

Shipley, Fox Named

JOHN SHIPLEY, formerly of the TV engineering staff of WTOP-TV Washington, has been named chief engineer of WKNB New Britain, Conn., and of WKNB-TV, which is slated to commence operations on Ch. 30 this month. In anticipation of its opening, WKNB-TV also has named Jack Fox, formerly of Pathe Film Labs., New York, and WJIM-TV Lansing, Mich., as its film director.

INTERFERENCE
All-Industry Session Called by RTMA

ALL-INDUSTRY conference on the problem of interference caused by spurious receiver and transmitter radiations will be held Friday at Biltmore Hotel, New York, under auspices of Radio-Television Mfrs. Assn. Dr. W. R. G. Baker, General Electric Co., called the meeting on behalf of the Engineering Dept. of Radio-Television Mfrs. Assn.

FCC Chairman Paul A. Walker recently suggested that a study of interference be undertaken by Joint Technical Advisory Committee, a group formed by RTMA and Institute of Radio Engineers to advise the government on technical radio and television matters [B•T, Dec. 15, 1952].

All engineering committees within RTMA have been invited to take part in the conference, if their activity involves interference. Invitations have been sent to manufacturing organizations and technical units in the industry, whether RTMA members or not, suggesting they participate. FCC and JTAC will participate.

Dr. Baker informed Chairman Walker RTMA is "deeply concerned" over the interference problem and desires "to cooperate fully with the Commission and JTAC both in developing and putting into operation effective solutions to the problems."

Further reply to FCC's warning on the radiation problem was sent to Chairman Walker last week by Ralph Bown, JTAC chairman, who said JTAC is studying the problem.

Mr. Bown explained to Chairman Walker that the subject of spurious radiations has been broken down into three parts by JTAC in its consideration.

"There exists a considerable amount of information on the principles and methods of dealing with spurious radiation problems which derives from experience in designing and operating radio and conducted and guided wave systems over the past few decades," Mr. Bown explained, stating, "It seems to us that an important contribution could be made to this subject which would be of aid particularly to those who do not have long experience with it, if this information were to be segregated and organized into a report or engineering reference handbook.

To Set Up Committee

"This would call for formulation of the guiding principles and factors which control engineering decisions in the solution of interference problems," he said. "Part of our plan is to set up a committee of engineers who are familiar with this kind of work acting directly as a subcommittee of the Joint Technical Advisory Committee to formulate such a report.

"Principles and methods, however sound, cannot be brought to bear upon practical situations without there being available quantitative information about the magnitudes of the factors which must be controlled or designed," Mr. Bown noted. "The physical measurement of these quantities has been the entering point for engineering handling of interference. A considerable body of information exists on measurement methods and for many purposes and in many frequency ranges apparatus is available. There are, however, some gaps.

"To deal with this problem," he said, "JTAC is requesting the Institute of Radio Engineers to set up a temporary committee which can work closely with JTAC to formulate and systematize the available information as it bears upon the spurious interference question and to point out clearly the gaps so that means can be considered for filling them.

"Principles and measurements do not solve problems," Mr. Bown said. "There remains the necessity for arriving at hard quantitative decisions in the many practical cases which exist in the radio operating field today. It is to this area of the subject that the five points made in the Commission's letter are primarily directed.

"We note further from the letter that one of the problems of this kind, which is pointed to as particularly urgent and important, is that of spurious radiation from transmitters and receivers in television broadcasting. Our initial step in considering this has been to ask the television equipment manufacturing industry, as represented by the Radio-Television Manufacturers Assn., to supply us with a statement of their view of the situation on this problem and any plans or program which they have, or may propose, to cope with it.

"We do not intend to confine our study to the particular current difficulties of television broadcasting, but you will appreciate that the field is so broad that we must be selective at first if significant progress is to be made which will be of immediate value to the Commission."

Meanwhile, the Commission has instituted a proposed rule-making proceeding to amend Sec. 3.687 of its rules so as to specify 60 db as minimum for spurious emissions by TV broadcast transmitters for all frequencies at least 3 mc removed from the edge of the respective channel [B•T, Dec. 1, 1952]. The addition of a harmonic filter to transmitter designs is expected to be adequate protection on a temporary basis, it was noted.

The Commission also has lauded nearly 200 local committees for their work on the local level to track down and eliminate television interference [B•T, Dec. 22, 1952]. These local TVI groups include representatives of the military, Civil Air Patrol, civil defense, NARTB, American Radio Relay League, RTMA, power companies, local radio and TV stations, airways, distributors and service firms.

ZIV 'FAVORITE'
Top Sales Record Seen

PREDICTION that *Favorite Story*, new Ziv television program to be released in January, will be sold in more markets than any other Ziv TV show, was made last week by M. J. Rifkin, vice president in charge of TV sales for Ziv Television Programs Inc.

Mr. Rifkin reported that the series, starring Adolphe Menjou, already has been sold in more than 40 markets. He said the latest sale was to Drewry's Ltd., South Bend, which added Indianapolis to the market lineup (five stations) it previously had bought.

WBAL-TV

NBC IN MARYLAND

Nationally Represented by Edward Petry & Co.

ON THE listening end at a session of NBC's first national sales convention, held last Monday and Tuesday in New York, are these executives of the network: Front row (l to r) John K. Herbert, NBC vice president in charge of radio and TV networks; Ruddick C. Lawrence, director of promotion, planning and development; George H. Frey, vice president and sales director for radio and TV. Others were unidentified.

* * *

ABSORPTION in another session is reflected by these NBC officials. In front row are (l to r) Sylvester L. Weaver, new vice chairman of the NBC board; Thomas Coffin, research manager; Hugh M. Beville Jr., director of research and planning; Robert Elder, consultant. First two men in second row are Edward R. Hitz, manager of the Central Sales Div., and Fred N. Dodge, director of merchandising. Others were unidentified.

* * *

NBC SELLING

Weaver Sees New Radio-TV Plans

NBC sales and merchandising personnel were told last week that "NBC radio and television will come up with plans which will give the full two-edged power of broadcasting to all companies, large and small, in so wide a range of advertising techniques that all marketing plans can be absorbed."

This assurance was given by Sylvester L. Weaver Jr., who is vice chairman of the NBC board, at a two-day sales convention called to acquaint salesmen with details of their roles—and the assistance they will receive from other departments—under NBC's reintegration of radio and television operations. The meeting was held Monday and Tuesday in New York.

"Television and radio are two sides of one coin, the coin being America," Mr. Weaver said in a speech reiterating highest confidence in the future of radio and TV as an integral part of the home. "Picture America — 45 million homes. Half read magazines; a little more read newspapers. All have radios and use them. Nearly half now have television and use it heavily."

Plans under the reintegration of radio and TV, he said, form "the most exciting development ever in advertising. As we plan it, it will meet the growing marketing revolution and be geared to it."

'A Grand Design'

He told the sales and merchandising men that they were part of "a grand design" to make NBC the largest selling as well as social force in the nation, "a prosperous commercial operation giving advertisers a new conception of range and power in selling their goods and services, and supported by this advertising, a great program service with entertainment as its vitality-giving base.

"But along with this, coverage of the real world and the culture of mankind, presented adroitly and with showmanship, will be integrated into our schedule to make the impact of viewing and listening to NBC an impact for good, for maturity."

John K. Herbert, new vice president in charge of radio and television networks, told the group that "all of you here who constitute the selling force of the NBC network sales department—this includes merchandising, for if these men aren't part of sales, there is no reason for their being—should know that of all the departments or forces in our great institution yours is the most vital—for yours is the source of incoming dollars and revenue."

He predicted that "1953 will mark the start of truly serious concentration on salesmanship."

The salesmen heard top departmental and division executives throughout NBC outline the operations and policies of their respective units as they relate to the integrated sales staff. These included advertising and promotion, planning, research, programming, station relations, production and facilities, press, merchandising, and film syndication.

In addition to the New York sales and merchandising staffs, NBC salesmen and executives and merchandising district supervisors from throughout the U. S. who were on hand for the sessions included the following:

Walter Gross and Bob White, Detroit; John Williams and Wallace Hutchinson, Western Div.; Edward Hitz, Ed Stockmar, George Diefenderfer, Bud Swats, Dan McGuide, Arnold Johnson, Bob McKee, Gordon Mills, and Charles Standard, from the Central Div. The network's 12 merchandising districts were represented by Jim Sandner, Bud Odell, Sid Giles, Stewart Carr, Charles Garrison, Loy Lee, John Roepke, Ronald Jones, Matt Bajnett, Charles Wallace, and Fred Keefer.

$1.5 MILLION LOAN
Made by Western TV

WESTERN Television Corp., New York, a subsidiary of Motion Pictures for Television Inc., has completed arrangements for a $1,525,000 loan from the Amusement Industry Division of the Bankers Trust Co., New York, Matthew Fox, president and chairman of the board of Western Television, announced last week.

The loan, described as the first of such magnitude to be concluded between a commercial bank and a corporation distributing films for television, was negotiated by Harry Watkins, Ray Andersen and Herbert Golden of Bankers Trust, and Mr. Fox and Henry Zittau, treasurer of Western Television.

Purpose of the loan, according to Mr. Fox, is to acquire new products for Western Television and to expand the distribution facilities of MPTV. Mr. Fox also heads and owns MPTV.

156,000 TV SETS

IN THE QUAD-CITY AREA

•

Each month this TV set total is ascertained by Quad - City wholesalers serving this area. Actually, the total of TV homes reached by WHBF-TV is considerably larger as our TV signals are received over an extensive area beyond the Quad-Cities.

Increased power has doubled WHBF-TV radiated strength; the staff and facilities have recently moved into enlarged quarters.

True to a 25 year tradition of service in radio broadcasting, WHBF-TV now also serves Quad-Citians *well*—and advertisers *profitably.*

TALL TOWERS

Cullum Charges CAA Bias on Radio-TV

BROADCAST interests are unable to obtain a fair hearing in competition with aeronautical groups in cases involving tall television towers, according to A. Earl Cullum Jr., consulting radio engineer.

Charging that present procedure is slanted in favor of aviation interests whereas broadcast applicants get scant consideration, Mr. Cullum suggested it may be necessary to ask Congressional action on the airport problem.

"It is becoming more difficult all the time to get aeronautical approval for suitable tall television towers and we cannot help feeling that this problem will come to a head in the not too distant future due to rather arbitrary decisions which the Civil Aeronautics Administration interests have made regarding tower proposals," Mr. Cullum told BROADCASTING•TELECASTING.

"Our contacts with CAA people lead us to believe that the agency is trying to avoid giving any consideration to the overall problem of tall towers. As matters stand now, the FCC has rules which can be used as a guide to determine whether a tower up to 500 feet would constitute an aeronautical hazard.

"Under those rules all tower proposals over 500 feet are referred to the Airspace Subcommittee of the Air Coordinating Committee. When we look into the activities of the ACC, we find that their prime objective is to protect the aviation interests above all else, and accordingly we may have been fortunate to obtain what tower approvals we have from this group."

Stresses Problems

Mr. Cullum said that while Airspace Subcommittees have indicated willingness to "compromise" on TV or radio proposals, the compromise is usually "from some theoretical limit up to the actual limit being flown in practice."

"We have never yet seen a plan presented where the CAA would rearrange its facilities so as to provide for the public service which would be rendered by television stations," Mr. Cullum continued. "We have made detailed studies of aeronautical problems in many communities and have never yet found a community where a suitable area could not be found for the erection of tall radio and television towers without undue aeronautical hazard if only the aeronautical interests would cooperate by modifying existing procedures in the area."

Criticizing hearing procedure, Mr. Cullum said that while anyone can attend Airspace Subcommittee hearings, only CAA, CAB, Air Force, Navy, Army and FCC representatives are allowed to vote. Non-voting associate members representing Air Transport Assn. and Airline Pilots Assn. are allowed to remain in the room but radio and TV representatives are asked to leave, he charged.

Only the FCC member in any way represents radio-TV, Mr. Cullum continued, but he is instructed by the Commission not to vote in these proceedings.

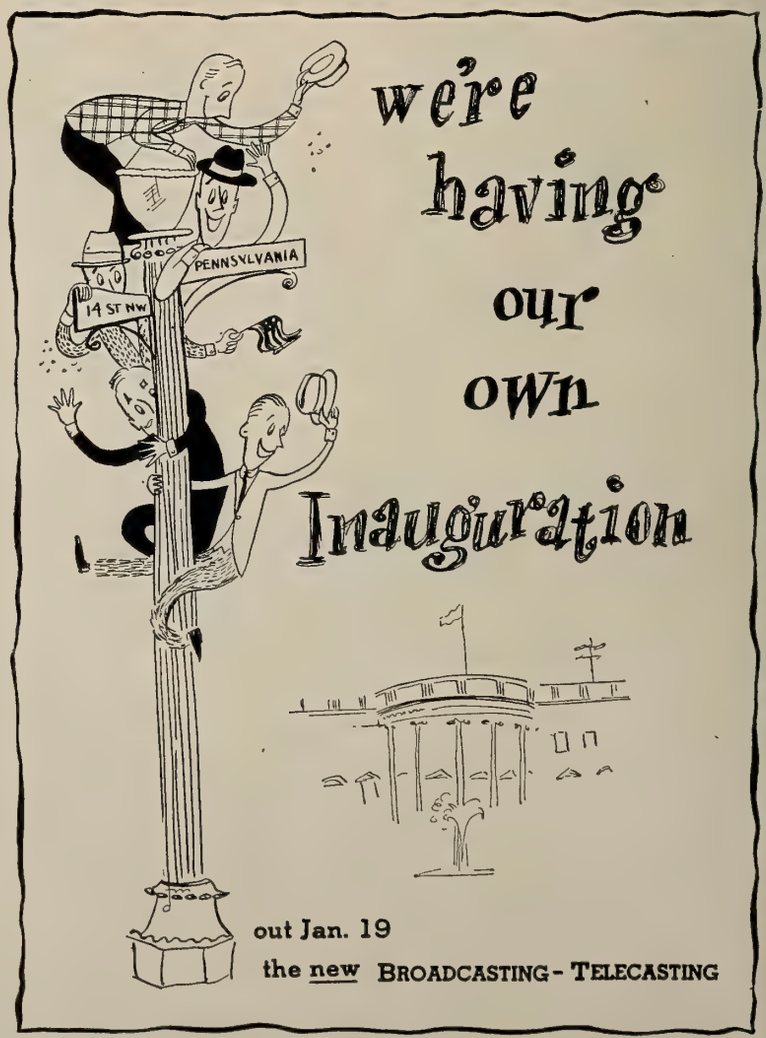
"It has been found in practice," he said, "that if any one of the five members representing aeronautical interests has an objection, the other members generally will vote with him so that action taken by the Airspace Subcommittees is taken by persons representing the aeronautical interests, and the television and radio interests are not represented.

"In simple justice we feel that there must come a time when the broadcasting interests will be able to get a fair hearing as to whether or not an aeronautical proposal would constitute a hazard. Furthermore, there should be a way of working out possible modifications of aeronautical facilities so that television facilities can be provided for in a way which will not increase hazards to air navigation."

SESAC Inc., N. Y., sending subscribers January shipment of its transcribed library including scripts of *American Folk Music*, *Music We Remember* and *Here Comes the Band*, which spotlights states of the U. S. and provinces of Canada.

N.Y. HEARINGS

On TV's Teaching Role



SERIES of public hearings by the New York State Temporary Commission on Educational Television will open at 10 a.m. EST, in Buffalo tomorrow (Tuesday) to explore the role of television as a teaching medium. Other sessions will be held in New York Jan. 1 and in Albany Jan. 21.

Douglas Moffat, chairman of the commission and Henry V. Poore, its counsel, both of New York, said they have scheduled the hearings in the hope they will be able to collect the viewpoints of civic and educational groups on the proposed network by the New York State Board of Regents and on possible alternative plans.

Charles E. Wilson, former Defense Mobilizer and ex-president of General Electric Co., has gone on record in favor of educational television and called on the public to support the movement.

In a statement released by the National Citizens Committee for Educational Television, Washington, D. C., said he felt that "nationwide educational television is economically sound" and that educators can "support" the operation.

JOHNNY OLSON, m.c. on WJZ-TV New York's *Homemaker's Jamboree*, has been signed to serve in same capacity in forthcoming WOR-Mutual show *Movie Quiz* starting Jan. 9.

Six New Grants by FCC

(Continued from page 57)

Suffolk Broadcasting Co., operator of WALK Patchogue.

Other television developments last week included announcement by Paul M. Segal, Washington counsel for WWSW Pittsburgh, that the station's appeal of the FCC's Sixth Report and Order now pending before the U. S. Court of Appeals at Philadelphia is going to be withdrawn in order to expedite new TV service for the Pittsburgh area. Mr. Segal noted that WWSW's complaint of the Commission's failure to allocate vhf Ch. 4 to Pittsburgh aroused public concern resulting in the allocation of Ch. 4 to Irwin, Pa., near Pittsburgh.

WSAL Logansport, Ind., which already has an appeal of the Sixth Report pending before the U. S. Court of Appeals for the District of Columbia [B•T, Nov. 17, 1952], last week presented another appeal to the court. WSAL's new complaint is directed against FCC's action of Dec. 2 granting without condition the bid of WHAS-TV Louisville for switch from vhf Ch. 9 to Ch. 11. WSAL charged the WHAS-TV grant, without condition to any action the court might take upon the WSAL appeal of the Sixth Report and involving Ch. 11 in that area, has the practical effect of negating the protest.

WSAL to File

WSAL also was expected to file a similar complaint on Friday with respect to FCC's unconditional grant to WTTV (TV) Bloomington, Ind., to switch from Ch. 10 to Ch. 4 [B•T, Dec. 8, 1952].

Motion by Missouri Broadcasting Corp. (WIL), St. Louis, last week asked the FCC to refuse to accept the uhf Ch. 42 application filed Dec. 15 by Belleville (Ill.) Broadcasting Co. (WIBV) for use in the latter city.

WIL claimed that the Belleville application was improper in that uhf Ch. 42 is assigned to St. Louis and cannot be moved to Belleville (even though it is 15 miles away) since uhf Ch. 54 was assigned to the Illinois city. Ch. 54 already has been granted.

If the Commission returns the Belleville application, WIL asked that it be granted a CP immediately, since it would leave the St. Louis uhf Ch. 42 applicant uncontested. WIL stated that the Commission reached St. Louis in the processing line but passed over its application because of the apparent conflict of applications.

Carl G. McIntire, president of Ozark Television Corp., uhf Ch. 14 grantee at Festus, Mo., near St. Louis, reported commencement target date of July 1 using GE equipment. Network and representative are unknown at this time, he said.

Murray Carpenter, vice president-general manager of WABI Bangor, Maine's first TV grantee with vhf Ch. 5, said it is hoped to get the station on the air by Jan. 31. Construction begins today (Monday), he said, and RCA equipment already is enroute from Camden, N. J. Network has not been set but George P. Hollingbery Co. will be national representative.

Gerald J. Morey, president and general manager of WNLC New London, granted uhf Ch. 26, hopes to be on the air by July with interim power of 20 kw ERP. An RCA antenna and DuMont transmitter are to be used.

Jack Snyder, managing director of WFBG Altoona, vhf Ch. 10 grantee, said the station plans to get on the air by Feb. 1 with GE equipment to be used throughout the station. The building originally designed for FM will be used for TV, he said. Network negotiations are underway with NBC and H-R Representatives Inc. will handle national sales.

KPRC-TV Houston, according to Jack Harris, vice president and general manager, hopes to go to full 100 kw ERP by mid-April using a new GE transmitter. Station will be in its new studios by March 1, he estimated.

Following is the text of Mr. Segal's statement in behalf of WWSW Pittsburgh:

WWSW Inc., of Pittsburgh, has filed in the Circuit Court of Appeals for the Third Circuit (at Philadelphia) appropriate litigation to challenge a decision of the FCC in which decision, last April, the FCC refused to allocate Ch. 4 to Pittsburgh or the immediate Pittsburgh area.

In our opinion, this action of the Commission was arbitrary and unjust, and we felt that it should be challenged.

Unless something had been done about the problem, Allegheny County would have but one additional vhf television channel for general-service use. This would have been intolerable. Moreover, from time to time there have been between six and nine applications pending for that one channel and it was clear that many years would be consumed in hearing and litigation over the channel.

Apparently the court case aroused considerable interest and brought Pittsburgh's plight to popular attention. Mayor David Lawrence filed a request with the FCC to assign Ch. 4 to Irwin. This was done.

As a result, three of the Pittsburgh applicants have filed for the Irwin channel, leaving three for the Pittsburgh channel. This promises a fair and orderly hearing without excessive delays, and the successful Irwin applicant will be able to render some measure of service to the people of Pittsburgh.

In the interest of bringing expeditious service to the people of Pittsburgh, I am about to dismiss the Circuit Court of Appeals case.

Richfield-KNBH Pact

RICHFIELD OIL Corp., Los Angeles, has signed a 26-week contract with KNBH (TV) Hollywood for blanket TV coverage of special and spot news events. No limit was placed on the number of events or cost. KNBH personnel will travel by air to disaster points. Coverage may be live or film. Contract negotiations were concluded by Fred Jordan, Richfield advertising manager; Kai Jorgensen and Dorr Walsh of Hixson & Jorgensen, and MacGregor Eadie, KNBH account executive.

NCAA MEET

Will Tackle Problem Of Televised Football

NATIONAL Collegiate Athletic Assn. will wrestle with the controversial issue of college football and television this week.

The problem of framing a plan that will protect college football receipts from the alleged inroads of television and still pacify critics of the 1952 NCAA TV program rates a high spot on the agenda of NCAA's annual convention at the Mayflower Hotel, Washington, starting today (Monday) and continuing through Saturday.

Actual spadework on the 1953 plan will begin Tuesday and continue through Wednesday when the 10-man TV Committee will hold closed sessions. Its recommendations will be presented to the 372-member college representatives Thursday for discussion and vote.

The committee is reported as favoring a "restricted" telecasting program similar to the one in effect the past season. This prescribed one college football game to be telecast nationally each week. The contests were carried over NBC-TV.

One conciliatory gesture by the committee toward proponents of "unlimited" telecasting is reported to be an expansion of a policy permitting a game to be carried on video locally when it is a sell-out contest.

Report 'Satisfied'

The tip-off that the TV Committee probably will adhere to a "limited" program came early in December when it concluded a two-day meeting in New York and reported it was "satisfied" with the 1952 plan [B•T, Dec. 8, 1952]. Several days later, the Eastern Collegiate Athletic Assn., a powerful element within NCAA, supported NCAA's position on college football telecasting by a 48-2 vote [B•T, Dec. 22, 1952].

NCAA has relied upon surveys by the National Opinion Research Center, which has been studying the effects of television upon college football attendance since 1949, to bolster its contention unrestricted TV would harm college football [B•T, Dec. 29, 1952].

Most outspoken critics of NCAA's TV policy have been U. of Pennsylvania, U. of Notre Dame, and Dr. Allen B. DuMont, president of Allen B. DuMont Labs. and DuMont Television Network [B•T, Nov. 24, 1952, et seq.]. They have charged that the NORC studies cited by NCAA have not proved definitively that TV hurts the gate.

The controversy has prompted polls by at least two newspapers, the *Philadelphia Inquirer* and the *Chicago Herald-American*, inquiring into public preferences. Both newspapers reported fans in their areas are opposed overwhelmingly to NCAA's "limited program." But an NCAA spokesman last week said these polls reflect the opinions of the fans and not those of the colleges which NCAA is set up to protect.

In the second tabulation of votes in the *Herald-American* poll, the newspaper reported Dec. 28 that 45% of the ballots still favored unlimited television; 42% small fee TV; 10% regional TV, and only 3%, NCAA's limited TV.

One interesting sidelight to NCAA's convention is that DuMont Television Network, a determined opponent of "limited" telecasting, will carry the "coach of the year" ceremonies at NCAA's dinner in the Hotel Statler, Washington, Thursday at 9-9:30 p.m.

The NCAA TV Committee that will make recommendations to the convention consists of Robert S. Hall, 1952 chairman; Asa S. Bushnell, director; J. Shober Barr, Walter Byers, Keff C. Coleman, Howard Grubbs, Willis O. Hunter, Reaves E. Peter, E. L. Romney and Kenneth L. Wilson.

KNBH (TV) RATES

New Card Issued

KNBH (TV) Los Angeles' new Rate Card No. 6, with an hourly base rate of $1,700 for Class A program time and $350 for Class AA announcements, a new classification (Monday through Friday, 8-10 p.m.; Saturday, Sunday, 6-10 p.m.) effective Jan. 1, was announced last week by General Manager Donald Norman of the NBC-TV owned and operated station.

Class C hourly time rate of $600 remains the same, with Class B time reduced in station breaks and minute announcements only. Station now offers two separate discount plans, the first based on total weekly time volume or weekly frequency of announcements. The other is based on the number of consecutive weeks of telecasting. By virtue of these new discounts, station break advertisers now can earn up to 50% discount, it was explained.

UHF TRANSMITTERS

RCA Ships to WKBN, WFMJ

RCA VICTOR Div. last Wednesday shipped two new uhf TV transmitters—to WKBN-TV and WFMJ-TV—both in Youngstown, Ohio. The transmitters, 1 kw models capable of providing up to 27 kw ERP in 479-890 mc frequency, will provide Youngstown's first TV service, according to the firm's Engineering Products Dept. at Camden, N. J.

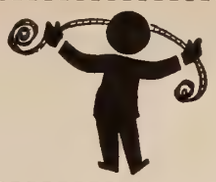
The transmitters were scheduled to arrive in Youngstown last Thursday, but station operation will be delayed for arrival of accessory equipment, to be shipped later by RCA. Antennas and monitoring equipment shipped by RCA already have been installed. WFMJ-TV, licensed to Vindicator Printing Co., will operate on Ch. 73, and WKBN-TV, licensed to WKBN Broadcasting Co., will be on Ch. 27.

BASEBALL STUDY

Frick Names Six-Man Unit

TO STUDY effects of radio and television upon baseball in general, and the minor leagues in particular, Baseball Commissioner Ford C. Frick last Tuesday named a six-man committee representing the American League, the National League and the minor leagues.

Selected by Mr. Frick were George M. Weiss of the New York Yankees and Frank C. Lane of the Chicago White Sox, American League; Charles Feeney of the New York Giants and Bill Walsingham of the St. Louis Cardinals, National League; Frank Shaughnessy, International League, and Sen. Edwin C. Johnson (D-Col.), president of the Western League.



Mr. Frick's action followed a directive adopted at the annual baseball meetings in Phoenix [B•T, Dec. 8, 1952]. He emphasized to BROADCASTING • TELECASTING that the function of the committee is "purely exploratory."

He said it has been instructed to make an "intensive" survey of the radio-television picture and prepare a report not later than July 7 when the major leagues are scheduled to hold a joint meeting.

Alexander Film Co., Colorado Springs, Col., announces recent TV commercial productions for the following organizations:

Beneficial Life Insurance Co., Salt Lake City, one 60-second film through **Featherstone Adv. Agency,** Salt Lake City. **Hill's Dog Food,** Topeka, Kan., one 60-second and one 20-second film through **Lago & Whitehead,** Wichita, Kan. **Aero Mayflower Transit Co.,** Spokane, Wash., one 60-second and one 20-second film through **Virgil A. Warren,** Spokane. **Elgin,** Elgin, Ill., thirteen 13-second films through **Young & Rubicam Inc.,** Chicago.

Production . . .

Bo-Mor Productions, Hollywood, has signed **Don Wilson,** radio-TV announcer, as star-commentator of a new half-hour television film series, tentatively titled *Hollywood Observatory.* Filming starts in January and format will utilize motion picture stars and stories from current outstanding feature films, according to **Richard Morley,** executive producer. **Edward Maxwell** is writing the scripts.

Availabilities . . .

Colson & Co., Dallas, Tex., will start releasing *The Roving Reporter* weekly beginning Jan. 19. The new quarter-hour TV film program centers around a reporter's interviews with persons in all walks of life and in all parts of the country. Thirteen programs are now ready and 39 more are in production, Harrison Colson, company's president, announced. Each program is open for three spot announcements. Firm's address is 1122 Jackson St., Dallas.

Random Shots . . .

Meridian Pictures, Hollywood, which films CBS-TV's *Schlitz Playhouse of Stars,* was paid $500 by **Stanley Kramer Co.** for motion picture rights to the title, "The Juggler." The television company had completed a video adaptation of **Arthur Stringer's** story of that name, which was registered in 1936. The motion picture firm is completing a feature in Israel, based on **Michael Blankfort's** novel published early in 1952. The television film has been labeled "The Playwright."

Academy Film Productions Inc., Chicago, is distributing cartoon-calendar and film editing and timing chart which aids film producers in planning the narration and editing of filmed commercials by giving the number of words and amount of film footage for any determined length of television commercial. Requests for the calendar and film timing chart should be addressed on company letterhead to Bernard Howard, Academy Film Productions Inc., 123 West Chestnut St., Chicago 10, Ill.

Film People . . .

Bert Somon, sales director and producer at **United Broadcasting Co.,** Chicago, outlined how radio and television "can live together" yesterday (Sunday) at a Chicago meeting of the Restonic Mattress Corp. He spoke to members of the sales force and franchise representatives.

* * *

Paul Weston, West Coast musical director of Columbia Records Inc., has been signed to score the CBS-TV *Alan Young Show,* which starts Feb. 15 on alternating sponsorship with CBS-TV's *Ken Murray Show* for **Bristol-Myers Co.**

* * *

Ernst Jaeger, production coordinator for Frank Wisbar Productions on NBC-TV's *Fireside Theatre,* has resigned.

* * *

Bernard Saber, director of music at **United Broadcasting Co.,** Chicago, is father of a son, Kenneth Louis.

NBC INSTALLATION

New Relay Equipment Used

NBC is using a new television master desk and control room combining the latest principles of relay and vacuum tube switching in its New York studios and theatres. They were designed by A. A. Walsh, John Lake, and Eric Burglund, working under Chester A. Rackey, manager of NBC's audio-video engineering department, the network said last week.

Features of the desk and control room include a precision time clock that automatically disconnects circuits from a studio at the end of a program and a unit that switches video and audio into action from one studio or theatre to another as programs change.

Only ALEXANDER FILM SHORTS Let You Feel As Free As THIS

Weary sponsors discover new life and zip when they start using Alexander film shorts. The outstanding reason is the superior support that Alexander shorts give the advertiser. (After all, no sponsor likes to spend money for television time, and then fail to realize full value because his advertising shorts fall down on him.)

Don't be half safe! You can make sure your television campaigns are effective beyond a shadow of a doubt with Alexander film shorts. So, do as more than 400 of the world's major advertisers have done . . . Select Alexander for your TV film commercial needs!

TECHNICIAN AID
S. F. School Sets Pattern

THERE WILL be a reservoir of 85 TV-converted radio broadcast operators available to new television stations in late spring of 1953 —thanks to San Francisco's new J. A. O'Connell Trade & Technical Institute, which is doing something about the threatened video technical shortage.

The 85 journeyman operators were recruited from large and small stations in north California last October and enrolled for a two-hour lecture period each week, plus "crew" training sessions in studio and field pickup phases.

The course "Television Operations Training," stemmed from an advisory committee study of technical requirements of the TV industry. Plans were laid and budget set for the training project. Last fall RCA field pickup equipment was delivered. KALW (FM), educational outlet of San Francisco's Board of Education, was pressed into use. KALW claims to be the country's first FM educational station.

TV operations are quartered in temporary studio facilities adjoining the KALW plant in the Samuel Gompers Trade School Bldg. Assistance has been given by labor groups (IBEW and NABET), chief engineers, station supervisors and manufacturers.

Success of the training is ascribed to employment of industry instructors; interest and encouragement offered by school officials; formation of a special Trade Advisory Committee of labor, employer, employe and educational members; acceptance of trained personnel by industry.

Estelle Lutz

FUNERAL services were held for Miss Estelle Lutz, 60, owner of the Estelle Lutz Artists Bureau, in Chicago last Wednesday. Miss Lutz, a talent and musician's booker for radio and TV, died the previous Saturday in Presbyterian Hospital after an illness of several months. She is survived by three nieces and a nephew.

COURSE in "Television Operations Training" was the outgrowth of a study of TV technical field by a Radio-Television Operations Advisory Committee comprising number of fields. Members include clockwise: Standing, Dale Walfron, principal of O'Connell Trade & Technical Institute; Ken Nilsen, radio-TV instructor; Russ Pray, president of IBEW Local 202; Joe Clisham, vocational supervisor; Harry Jacobs, engineer-in-charge, KGO-TV San Francisco; seated, Jack Dunn, business agent, IBEW Local 202; Paul Williams, chief supervisor, KPIX (TV) San Francisco, and Ken Dragoo, radio-TV instructor. Equipment includes two 21-inch RCA 21T159 receivers, which serve as floor monitors. ←——

PHILCO TELECAST
Introduces New '53 Line

COAST-to-coast closed circuit telecast introduced Philco Corp.'s new 1953 line of radio and TV receivers to 10,000 Philco dealers last Monday. Dealers in 54 cities viewed the new sets and heard talks by Philco executives from Philadelphia headquarters.

Highlight of the new group was a 27-inch picture tube which will be marketed in only one console model. Also featured in the 1953 line is the all-channel uhf tuner available in all receivers. Featured radio is the multiwave receiver with special service band that, in addition to regular broadcast reception, brings in short-wave calls from ships at sea, amateurs and police.

WBZ-TV Boston has received Gold Medal Awards for *Fun With Food* and *Night Owl Theatre*. Awards were made last week by Thomas MacDonough, general manager of New England *TV Guide*.

MOTOROLA SETS
New Plant Ups Output

TELEVISION production of Motorola Inc. will be almost doubled with construction of a new $3 million plant in Franklin Park, a Chicago suburb. President Paul V. Galvin said construction, beginning immediately, is expected to be completed by mid-1953.

Details of the new plant facilities were released last week by Mr. Galvin in a message to a series of nationwide distributor meetings at which the new 1953 Motorola line was introduced. It included 30 TV models, five of which are entirely new. Ten have 17-inch screens and 21 feature the 21-inch size. Although prices were not announced, Edward R. Taylor, vice president and assistant to the president, said Motorola would hold the line on prices wherever possible.

The new plant will include a bulk assembly unit for final assembly, storing, packing and shipping of television sets. Some of these functions now carried out in Motorola's main plant on Chicago's West Side will be transferred to the Franklin Park site. The company also has three other plants in Chicago and one in Quincy, Ill.

The structure will be built on a 27½-acre plot, and will comprise some 278,000 feet in a one-story building 833 feet by 325 feet.

Production costs are expected to be lowered, Mr. Galvin said, with construction of the new plant, because production, increasing rapidly, suffered from overcrowding as it increased.

CANADIAN TV stations for the present will not carry the Bishop Fulton J. Sheen program which DuMont has wanted to bring to Canada. The National Religious Advisory Council of the Canadian Broadcasting Corp. recommended further study of the subject of commercially sponsored religious TV programs.

HALPIN TALK
Hits 'Saturation' Claim

NATION'S television receiver industry can tap a potential volume of more than $1.5 billion from sales of second and third sets in the home and replacements for old small screen sets, Dan D. Halpin, general sales manager of the receiver division, Allen B. DuMont Labs., declared last Tuesday.

He made this assertion at a dealer showing of five additions to the current line of DuMont TV sets held in New York by the DuMont New York factory distribution branch. The meeting was one of a nation-wide series held by DuMont distributors for dealers last week.

Mr. Halpin set out to back his statement with statistics showing that there are in American homes more than four million receivers that are three years old or more, many of which have screen sizes less than 12 inches. He asserted that in these homes another set could be sold by stressing to consumers the need for a second set, bigger screen, improved performance and technical advances in the newer sets and improved cabinet styling.

Mr. Halpin took issue with market statistics that point to "so-called high 'saturation' of receivers in present markets," declaring:

"These market figures do not consider the over all sensitivity and ambition of the American people to have the most modern and best of everything they have in their homes. Proof that scouts the idea of 'saturation' comes from the automobile industry which is still able to sell five to eight million new cars each year."

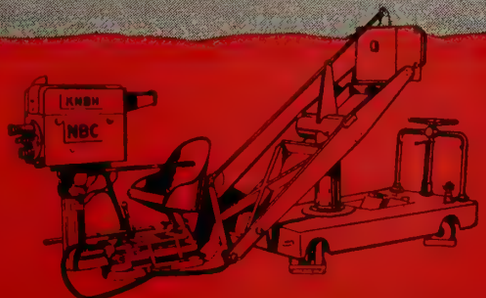
SOCIAL AWARD
WDSU's Beal Honored

ANNUAL "Achievement Award" for public service TV has been presented by the National Foundation for Social Integration to Joseph Carleton Beal, former television production manager at WDSU-TV New Orleans, which shared in the honor.

Mr. Beal was honored by the foundation's board of directors for a remote telecast from Dillard U. showing an art exhibition from the Metropolitan Museum of Art, New York City, and for an all-Negro dramatic presentation aired in WDSU-TV studios.

Mr. Beal commended Robert D. Swezey, WDSU general manager, for "his willingness and anxiety to give . . . public service programs of dramatic interest, deep sincerity and great educational value." He cited dramatic and musical programs telecast by WDSU-TV in cooperation with religious and community groups.

Recordings were used on the *WDSU-TV Playhouse* as the community project developed in New Orleans in cooperation with seven theatre organizations.



TERRIFIC!

NEW TV CRANE by *Houston-Fearless*

Extreme versatility, maneuverability and ease of operation are combined in the new Houston-Fearless TV Crane, model TC-1. It provides new convenience and comfort for the cameraman. It allows continuous shooting while raising or lowering camera boom from 9'-6" (lens height) high to 3'-6" low, two types of smooth panning, steady rolling-dolly shots or any combination of these actions. High Houston-Fearless quality for complete dependability. This is the perfect answer for top-flight television showmanship.

Write for complete information on the new Houston-Fearless TV Crane, model TC-1 and other television studio equipment.

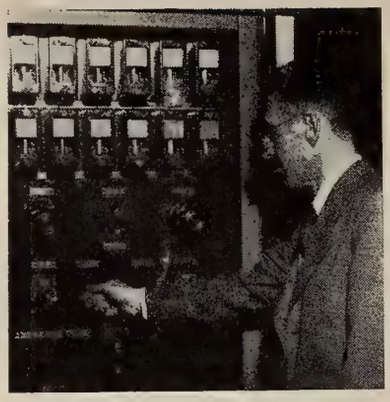
"WORLD'S LARGEST MANUFACTURER OF MOTION PICTURE PROCESSING EQUIPMENT"

FILM ANTI-TRUST

Justice Dept. Must Clarify

DEPT. of Justice was given 30 days last week in which to amend its anti-trust suit complaint against motion picture studios and distributing companies to force release of 16mm feature films to television and other outlets.



Federal Judge William Byrne in Los Angeles hearing arguments of government and defense counsel Monday, Dec. 29, granted the defendants only two of the 12 requests for clarification of the Dept. of Justice's complaint. He gave government attorneys William C. Dixon and James McGrath 30 days to amend the complaint. Companies being sued will have the same number of days in which to reply.

The defendants in mid-December petitioned Judge Byrne to order the government to give them a more definite bill of particulars and drop the "ambiguities" of the complaint. More specific information was requested to the government's accusation that the motion picture studios and distributing companies had conspired among themselves "by oral and written agreements" to withhold films from TV and other outlets, as charged in the suit filed in Los Angeles on July 22.

The court Monday ordered clarification of the phrase "among other things" in the government's charge that "during the period of the time covered by this complaint, and for the purpose of effectuating the aforesaid combination and conspiracy, the defendants did, among other things, enter into written and oral agreements containing restrictions hereinafter set forth, limiting the purposes for, locations at, times when, and conditions under which 16mm films may be exhibited."

The second phrase ordered clarified is "limiting conditions" in the charge that "the aforesaid restrictions on 16mm feature film exhibitions consist of the following: Limiting the conditions on which licenses for exhibition of 16mm feature films may be granted to churches, schools, clubs, hotels and drive-in theatres."

Named as defendants are 20th Century-Fox Film Corp., Warner Bros. Pictures Inc., Warner Bros. Pictures Distributing Corp., RKO Radio Pictures, Republic Pictures Corp., Republic Productions Inc.; Columbia Pictures Corp., and Subsidiary Screen Gems Inc., Universal Pictures Co. and subsidiary United World Films Inc., Films Inc., and Pictorial Films Inc. Theatre Owners of America is named as a co-conspirator but was not made a defendant.

WOW-TV Omaha Chief Engineer Bill Kotera turns switch sending station's power to 28 kw from 17.2 kw previously authorized, after quick FCC decisions two days apart, first authorizing station 28 kw and then 100 kw. Station expects to increase power to authorized 100 kw during January, when it receives additional technical equipment.

LeRoy Miller

LeROY MILLER, 39, disc jockey for WFIL Philadelphia for the past 15 years, died Dec. 28 in St. Joseph's Hospital, Lancaster, Pa., following a heart attack. For 13 years he was m. c. of the annual May Day ceremonies at Philadelphia's Fairmont Park Zoo. Survivors include his wife and two children.

April 29-May 2: NARTB Convention, Biltmore Hotel, Los Angeles.

June 14-17: Advertising Federation of America 49th Annual Convention, Hotel Statler, Cleveland.

CANADIAN RATES

Permit More U. S. Show

THE CANADIAN Broadcasting Corp. announced new rates for its TV stations at Toronto and Montreal Dec. 24.

Reasons underlying the change are attrition of commercial sponsors in TV noticeable after three months of telecasting, and a stalemate on the question of payment to American networks for commercial TV shows.

New rates are for station time only. Production costs are added on live shows where needed. In the past, CBC had lumped production and station time charges into a one rate on the premise that a sponsor using film should pay part of the production facilities for live shows, thereby helping develop Canadian talent.

CBC now is optimistic that it can quickly reach accord with NBC, CBS, ABC and DuMont to bring live TV shows via microwave from Buffalo to Toronto, and thence to Montreal. DuMont had been supplying CBC with film shows (sustaining). But other networks balked because of low percentages CBC was ready to pay.

New arrangements with the U. S. networks are being made, which will permit CBC to pay NBC and CBS 50% of the station time rate.

A number of Canadian advertisers, affiliated with American companies, have been waiting to bring in U. S. shows. It is expected such shows, including *Studio One, Aldrich Family* and *Robert Montgomery Presents,* may soon come to Toronto and Montreal.

New CBC TV rates have been divided into Class A and B times, with Class A time from 6-11 p.m. Monday to Friday, from 1-11 p.m. Saturday and Sunday. Remaining time is Class B time. CBLT Toronto, now starts at 5:30 p.m.; CBFT Montreal starts about 3:30 p.m.

At Toronto, where Canada's biggest TV audience is located, Class A rates start at $750 an hour for station time only, as against $1,600 an hour previously which included time and production facilities. Other CBLT Toronto rates are: 45 minutes, $600; 30 minutes, $450; 20 minutes, $375; 15 minutes, $300, and 10 minutes or less $262.50. Announcements are $200 for 1 minute, $150 for 20 seconds, $75 for 8 seconds.

At Montreal Class A rates now start at $375 an hour, as against $750 previously for time and facilities; $300 for 45 minutes, $225 for 30 minutes, $187.50 for 20 minutes, $150 for 15 minutes, $131.25 for 10 minutes or less. Announcements are $100 for one minute, $75 for 20 seconds, $37.50 for 8 seconds.

Class B rates start at Toronto at $450 for one hour, at Montreal $225 for one hour. An allowance of 10% is made if both stations are used. Microwave relay rates from Buffalo to Toronto are $150 for one hour, $100 for 30 minutes; from Toronto to Montreal $200 an hour, $135 for 30 minutes. The Buffalo-Toronto link is in operation. The Toronto-Montreal link is not quite ready yet.

There is a long list of production facilities rates for sponsors who wish live shows.

BEARDSLEY BACKS
Educational TV in Iowa

MOVEMENT for development of educational TV in Iowa, including 12-station network program service, has won the support of the state's Gov. William S. Beardsley.

Addressing the Governor's Conference on Educational Television in Des Moines a fortnight ago, Gov. Beardsley said there would be advantages gained from pooling the resources of Iowa's educational institutions, including privately-owned schools and colleges. TV's benefits would extend into adult and advanced education, he said.

Plans for the network developed earlier this winter were presented during the conference by representatives of the Iowa Joint Committee on Educational Television. Gov. Beardsley urged that citizens of the state be fully apprised of educational TV's promise.

WKNB-TV SIGNS
CBS-TV Affiliation Announced

PRIMARY affiliation of WKNB-TV Hartford-New Britain with CBS-TV was announced last week by Peter B. Kenney, station manager. WKNB-TV is scheduled to make its debut in late January, operating on Ch. 20.

The station transmitter is located atop Rattlesnake Mountain in Farmington, Conn. Station claims the antenna, located 970 feet above average terrain, will be one of the highest in the East.

NBC-NABET Hearing

NATIONAL Labor Relations Board has set NBC-NABET hearing for Jan. 19 in Los Angeles on NBC charges against the National Assn. of Broadcast Engineers & Technicians (NABET). The network seeks to enjoin the union from enforcing its claimed jurisdiction over the lighting on field and remote TV pickups. NBC awarded the work to IATSE, with NABET protesting and refusing to accept the network's decision. NABET officials claim the lighting work has been theirs historically. NBC appealed to NLRB.

HIGH TV SALES
Seen in '53 by Craig, Cramer of Crosley

FULL production and steady sales at high levels for television end electronics manufacturers in 1953 were predicted in year-end statements released Friday by John W. Craig, vice president and general manager of Crosley Div. of Avco Mfg. Corp., and L. F. Cramer, vice president and assistant general manager of the company.

Mr. Craig believed opening of new television stations will create "a demand for television receivers that will exceed anything the industry has known to date." He said estimates indicate some two million TV homes already exist as a result of TV stations now under construction.

Adding to the bright picture, Mr. Craig said, are indications "governmental restrictions and materials shortages will be lessened to a large degree" in 1953. He voiced the opinion that by the end of 1953 "over-restrictive controls and regulations" will be abolished and "metals will be available in a more free supply."

Mr. Craig described 1952 as "a year of adjustment," noting the appliance and electronics industry began the year with high inventories. He added that mid-year inventories were brought back into balance by mid-year, and second-half year business rose sharply over the first six months.

Although supporting Mr. Craig's belief TV set sales would be high in 1953, Mr. Cramer warned that a shortage might develop in picture tubes, particularly in larger sizes. He also predicted an increase in receiver prices and a popular acceptance of the yet-to-be introduced 21- and 24-inch rectangular-spherical tubes.

Size of Screens

Mr. Cramer estimated there would be two million new TV homes in 1953 and total industry sales of approximately 6½ million sets. He felt 21-inch screens would lead all others in sales with approximately 4,335,000 sets (67%), followed by 17-inch, 1,300,000 (20%); 24-inch, 715,000 (11%), and 27-inch, 130,000 (2%).

In predicting a picture tube shortage, Mr. Cramer noted that in 1950 the industry had a capacity equivalent to approximately 18 million 17-inch tubes. Although tube manufacturing facilities have increased, he said, the industry's capacity has been lowered because it takes nearly twice as long to build a 21-inch tube as a 17-inch tube.

"Faced with a sales forecast of 6½ million new sets and with the growing replacement market for tubes, which is likely to exceed three million tubes in 1953, a tube shortage will begin to be seriously felt," Mr. Cramer declared. "Manufacturers without tube-making facilities and those who do not expand their tube operations are going to face urgent problems."

Mr. Cramer based his belief that receiver prices would rise in 1953 on the steadily increasing costs of labor, materials, component parts and selling expenses in the past year and a half. He said the "unhealthy inventory at the beginning of 1952 led manufacturers to bring out sets during the year at price margins far too low for economically sound business."

WROV-TV Studios

CONSTRUCTION of new studios at WROV-TV Roanoke, Va., has been completed, according to Frank E. Koehler, general manager. Mr. Koehler said installations are complete and "everything that has been installed operates satisfactorily." Station expects to receive its transmitter from RCA before Jan. 15, date set to begin operations.

HOFFMAN RADIO Corp., L. A., manufacturers of radio and television receiver sets, declared a dividend of 25 cents a share on the common stock, payable Dec. 31 to stock of record Dec. 23. This was first dividend on the stock since April 1951.

N. Y. Mayor's Talk

VINCENT R. IMPELLITTERI, New York mayor, was heard on two radio stations and one TV outlet Tuesday in Part Two of his "Report to the People on the Bus Situation," relative to a long-pending strike of Local Transport Workers Union. Part One originally was telecast live over WJZ-TV New York Sunday, after which WNYC, the city's municipally-owned radio station, recorded the sound portion and rebroadcast it as a radio address. Same process was used Tuesday, with WNBT (TV) carrying the mayor's original live address at 7-7:15 p.m. EST and WNYC's taped version was heard at 8:15-8:30 p.m. WMGM also carried the recorded speech at 7:30-7:45 p.m. the same night.

Paul O. Reehling

FUNERAL services were held last Wednesday with burial at Arlington Cemetery for Paul O. Reehling, 59, business accountant in the FCC at Washington, who was found dead the previous Monday at his home in nearby Alexandria, Va. Survivors are his wife, a brother and two sisters.

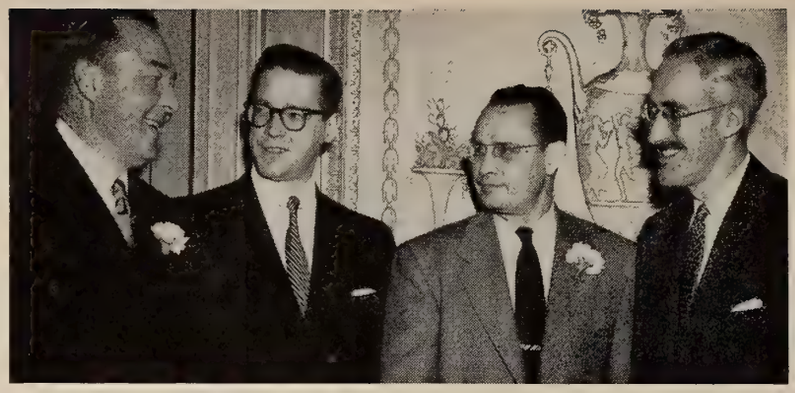
TRANS. SALES

Taylor Sees $50 Million

PREDICTION that the sale of TV transmitters would top the $50 million mark in 1953 was voiced last Tuesday in a report by Herbert E. Taylor, manager of the television transmitter division of Allen B. DuMont Labs. (Also see DuMont statement this issue.)



In making this forecast, Mr. Taylor noted that sale and shipments of DuMont television transmitters and associated station studio equipment in 1952 increased 200% over 1951. He added that in 1953 the transmitter manufacturing field would enter "the greatest growth period it has ever known."

Mr. Taylor said that he based the $50 million-plus figure on sales to some 75 new TV stations which will go on the air in 1953, on sales to another 75 stations during the next 12 months, plus new sales of transmitters and associated station and studio equipment.

Referring to the expected growth of uhf telecasting during 1953, Mr. Taylor said uhf will pose the problem of how much equipment should be manufactured and shipped. He said that at this time it is difficult to estimate closely production figures for uhf equipment.

Mr. Taylor said he based this uncertainty on the following considerations: The split production of plants as vhf manufacturers start to produce both uhf and vhf simultaneously; the speed with which uhf can be manufactured and tested, which will remain undecided until quantity production gets underway; the rapidity with which FCC concludes hearings and grants licenses and the comparative number of vhf and uhf construction permits granted.

Pointing out that TV is finally "coming into its own after three and one-half years of the 'freeze,'" Mr. Taylor predicted that enormous expansion in the manufacturing of broadcast equipment in 1953 would spur collateral activities in the industry. In this connection, he cited the introduction of new products, development of new plant equipment to turn out the products and the use of many time and money-saving methods that could not be introduced previously because of limited production during the "freeze."

CLOSED CIRCUIT showing in New York's Waldorf-Astoria Hotel of WWJ-TV Detroit's new building and facilities was attended by (l to r) George P. Hollingbery of the station representation firm bearing his name; Tom Carson, Benton & Bowles Inc. Adv.; Edwin K. Wheeler, WWJ-TV, and Chester Slaybaugh, Morse International Inc. Adv.

Crosley Sponsors

CROSLEY Div. of Avco Mfg. Corp. sponsored a five-minute warmup and five-minute summary of Gater Bowl game, New Year's Day, from Jacksonville, Fla. on the full MBS network. Mutual carried the game as a co-op program for Crosley's white goods division, through Benton & Bowles, and Crosley's electronics division, through BBDO.

J. Light's Estate

ENTIRE estate of $433,000 left by Joseph Light, owner of WCAV Norfolk, Va., and building contractor, who died last month [B•T, Dec. 22, 1952], will go to his wife Pauline, according to his will filed in U. S. District Court, Washington, D. C., last Monday.

HIGH school students from foreign lands visiting the U. S., are starred on *World We Want*, new weekly series which began Jan. 3 on WOR-TV New York. The *New York Herald Tribune* is cooperating on the show.

KLYSTRON TUBES

GE Adds Line for Uhf

SIX high-power klystron tubes have been added to General Electric Tube Dept.'s line of transmitting tubes. E. F. Peterson, manager of marketing for the Tube Dept., has announced that production of the new tubes will begin at the company's Schenectady plant early this year.

Tubes, rated for a maximum power output of 15 kw with a synchronizing peak level of 12 kw, reportedly are the most powerful yet developed for uhf telecasting. Each tube is rated for a specific uhf range. Together they cover all uhf channels from 470 to 890 mc. In size they vary in length from 4½ to 5 feet and in net weight from 180 to 280 pounds, with a maximum overall diameter of 21½ inches.

Each tube is tunable and contains three resonators. All six are integral cavity tubes which will mean that the transmitter manufacturer will not have to provide cavities for his final amplifier tubes.

N. Y. U. Courses

NEW YORK U. will offer seven courses in radio, television and electronics during the spring semester in its technical studies program, the university has announced. Among industry personnel slated to participate as instructors are Otis S. Freeman, WPIX (TV) New York assistant chief engineer; Louis J. Clement, WPIX operations supervisor, and Kerim Onder, consulting engineer and former RCA Labs. engineer. Topics include equipment maintenance, circuitry and other technical aspects. Registration will be held daily Jan. 19 through Feb. 6 at the Div. of General Education, Technical Studies Office, 3 Washington Square North, New York City.

JOSEPH H. McCONNELL, NBC president, was host to nearly 2,500 NBC employes and their families at network's annual Christmas party at the Center Theatre, New York, Dec. 24.

NEWS ASSN.

Opposes Union Contrac

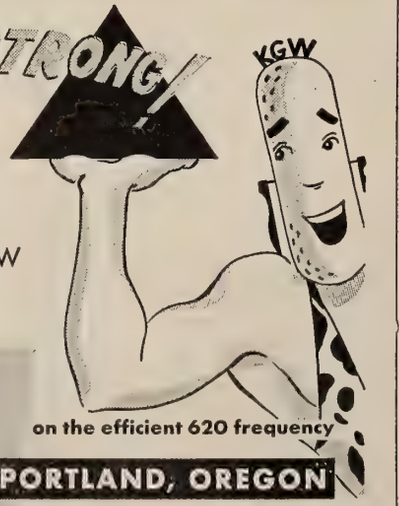
ASSN. of Radio News Analyst is on record in New York with resolution which expresses the op position of its members "to bein compelled to join a labor union a the result of any agreement whic may be signed by any network o radio station."

The action apparently is aime at an agreement concluded by th major networks and the America Federation of Television & Radi Artists, calling for inclusion o news reporters and newscasters i a new pact. Though the pro posed contract would exempt new analysts and news commentator from membership in AFTRA, it in cludes a stipulation that arbitra tion will decide whether a newsma falls into the exempt categor [B•T, Dec. 15, 1952].

The resolution declares that as sociation members had always con sidered themselves "as independen contractors" and were "unwillin to authorize any union official t negotiate with any network or sta tion" on their behalf. It notes tha members believed that if they wer forced to join a union, they coul not report and analyze labor dis putes "without favor or prejudice."

Amateur Privileges

PROPOSAL to grant amateur op erators certain radiotelephon privileges has been adopted b the FCC. The Commission wil amend Part 12 of its rules o amateur service to permit Genera and Conditional operators to us the 3800-4000 kc and 14200-1430 kc bands for radiotelephone emis sions. Amendment becomes effec tive next Feb. 18. Previously thes privileges were granted only t holders of Advanced and Extra Classes of amateur licenses. FC also provided for additional radio telephone space for amateur us in the 7 mc band. Proposal tha such space be made available i the new 21 mc amateur band wil be acted upon in the immediat future, FCC said.



CHRISTMAS auction of the Advertis ing Men's Post No. 209 of the Amer ican Legion, New York, netted $7,015 according to Vice Commander Cyril L Ellison. Funds will be used to suppor the post's J. O. B. (Just One Break Wing, which attempts to place dis abled veterans in private industry.

ANNUAL Mummers' Parade in Philadelphia on New Year's Day was presented for the third consecutive year over WFIL-TV by C. Schmidt & Sons Inc. Agency for the account is Al Paul Lefton Co. Highlights and background on the Mummers and on each group participating in the parade were handled by Phil Sheridan, Harry K. Smith and John Corcoran.

SIMULCAST GETS AWARD

EXECUTIVE board of the New Jersey Education Assn. has presented WATV (TV) and WAAT Newark with a special award for its educational program, *Junior Town Meeting*. Award was presented to Robert B. Macdougall, director of the stations' educational activities. Show enjoys the participation of 150 secondary schools and is used in numerous classrooms throughout the state.

CHRISTMAS COOKIE CONTEST

A DISC jockey's hunger for some home-baked Christmas cookies turned into one of the largest baking contests Cleveland ever had, according to reports from WERE in that city. Station's Bill Randle suggested that he would like some samples of Christmas cookies made by his listeners. Response was so enthusiastic that Mr. Randle decided to convert his request into a baking contest. Idea drew some 500 contestants whose samples were sent to three orphanages and a Marine hospital.

SAFE-DRIVING CAMPAIGN

SAFE-DRIVING campaign for the New Year holiday was broadcast for three days in advance of New Year's Eve by MBS. Network stations broadcast more than 200 five-word slogans alerting motorists to safe-driving practices.

programs promotion premiums

BASKETBALL SCHEDULE

FULL schedule of collegiate basketball games will be carried by KROW Oakland, Calif., during the coming season. Series will be sponsored by Tide Water Associated Oil Co. Schedule includes games which will be played by U. of California, St. Mary's, U. of San Francisco, Fresno State College, Santa Clara, Stanford and College of the Pacific.

MOVIE-TV PROMOTION

MOTION picture theatre tie-in promotions put WTOP Washington stars on the screens of local theatres during the Christmas holidays. One trailer plugged Eddie Gallaher's *Sundial, Moondial* and *Moondial Matinee* shows. Signs in the theatre lobby also promoted Mr. Gallaher's programs. Other trailer plugged *Toast of the Town* variety show which recently saluted the film, "Stars and Stripes Forever." Film deals with the life of John Philip Sousa, who composed the "Washington Post March." *Washington Post* is 55% owner of WTOP.

WINTER RESORT COVERAGE

WGY Schenectady reports that its coverage area includes 126 ski resorts in upstate New York and western New England, according to information received at the station from the New York State Dept. of Commerce and the New England Council. Figures indicated that more than $130 million will be spent this winter at the resorts in the WGY listening area.

RADIO SCHOOL PROMOTION

MAILING piece stressing that you're "Never Too Old to Learn" has been sent out by Wisconsin State Broadcasting Service at U. of Wisconsin, Madison. Stations cooperating in the fall and winter adult education program are listed along with courses offered on the Wisconsin College of the Air.

MORNING FEATURE

NEW morning feature on WMAR-TV Baltimore thrice weekly is *This Is Edith Land*, program featuring songs, stories and interviews. Miss Land is a former New York fashion designer and has also been a school teacher. Participating sponsors on her program are Bryant Roofing & Home Improvement Co., Fromm Sales, The Dorman Electric Supply Co., Sun Furniture Co. and Appliance Center.

MORNING SEGMENT PLUGGED

PROMOTION piece has been prepared by WPEN Philadelphia plugging *Del Parks Treasure Club*, 6 a.m. daily show featuring music, news, sports, time signals and weather reports. Long list of sponsor classifications advertising on WPEN between 6-9 a.m. are included in the folder along with a description of the show's format and some details on Mr. Parks' background.

PIEL'S FIFTH BUY

PIEL Brothers, New York Brewery, has added a fifth TV program, *The First Show* on WPIX (TV) New York, to the four started earlier in 1952 to promote Piel's Light Beer in the metropolitan area. Thomas P. Hawkes, advertising and sales promotion manager, in announcing the new series, telecast Monday through Friday, 7:30-9 p.m., said: "This tremendous growth in Television advertising is designed to increase consumer recognition and acceptance of Piel's beer . . . Piel's stepped-up sales push through the TV medium, supported by our radio, newspaper and point-of-purchase advertising and merchandising, is reflected in current record-breaking sales in the New York area."

BOWLERS ON TV

RETURN of *Bowlers' Jackpot* to television in Cleveland took place Dec. 27 when the show was again seen by audiences there on WNBK (TV). Show originates from Shangs Recreation Center and is emceed by Sammy Levine. Six men and women bowlers from the WNBK viewing area will compete weekly for prizes. Bowling instructions, match games and popular rounds for the jackpot prizes are included in plans for the show which is now scheduled as a regular WNBK feature.

SYMPHONY PROJECT

TELEVIEWERS in the St. Paul-Minneapolis area saw the first of 10 hour-long Minneapolis Symphony Orchestra telecasts on WCCO-TV on Jan. 4. Station considers the project the most elaborate symphony telecasting experiment in the country to date. Main cash contribution for the series is from Fund for Adult Education. Theme of the project is "A Great Symphony Orchestra and the Region It Serves."

NBC Radio Sales

TABLE of network time sales for November and January-November, 1952, versus 1951 [AT DEADLINE, Dec. 29], erroneously reported NBC radio January - November 1951 gross time sales as totaling $40,980,710. Figure should be $49,980,710.

KODI'S SIMPSON

May Be in GOP Post

MILWARD L. SIMPSON, part owner of KODI Cody, Wyo., was reported last week to have accepted a post as assistant secretary to Oregon Gov. Douglas McKay, Interior Dept. Secretary-designate, when the Eisenhower Administration takes office Jan. 20.

Mr. Simpson, a Cody attorney, is associated with his family (Lorna and Peter Simpson, not further identified) in ownership of KODI, licensed to Absaroka Broadcasting Co. According to FCC records, the attorney held 10 of 19 shares as of Dec. 12, 1951. Total of 190 shares were reported to be outstanding at that time when the family obtained control of the station in a stock transfer.

Mr. Simpson also is part owner of a weekly newspaper and chairman of the U. of Wyoming Board of Regents.

Appointment of Robert Cutler, trust executive and lawyer, as administrative assistant to President-elect Eisenhower also was announced. Mr. Cutler was the third named to such a position, joining Emmet Hughes and Dr. Gabriel Hauge in the Executive Office.

CBS RADIO press information dept. has moved to 49 East 52d St., New York. Mailing address: 485 Madison Ave., New York 22. Telephone is Plaza 5-2000.

BERT COLE appointed eastern regional manager headquartered in N. Y., for Servel Inc., Evansville, Ind. **WILLIAM K. GRUBE** named to head firm's midwest region with headquarters in Chicago.

JAMES S. COHAN, advertising manager of factory sales branch of Allen B. DuMont Labs.' TV Receiver Div., named cooperative advertising manager.

JOSEPH R. MATTHEWS, manager, Weed & Co., S. F., to Nielsen Coverage Service, that city, as western sales manager.

JAMES M. CRAWFORD, general manager of Motor and Generator Div., General Electric Co., Schenectady, N. Y., elected vice president of company. Other division general managers elected to same office: **FRANCIS E. FAIRMAN,** Transformer and Allied Products Div., Pittsfield, Mass.; **CRAMER W. LaPIERRE,** Aircraft Gas Turbine Div., Evendale, Ohio; **CLARENCE H. LINDER,** Major Appliance Div., Louisville, Ky.; **HAROLD A. MacKINNON,** Component Products Div., Ft. Wayne, Ind.; **CHARLES K. RIEGER,** Small Appliance Div., Bridgeport, Conn.; **GLENN B. WARREN,** Turbine Div., Schenectady; **WILLIAM C. WICHMAN,** Industrial Power Components Div., Plainville, Conn.

TOWER LIGHTING Div., Hughey & Phillips, L. A., moves general offices to Encino, Calif. Firm's engineering and production plant relocates at 3300 N. San Fernando Blvd., Burbank.

TERRENCE O'FLAHERTY, radio-TV columnist, *San Francisco Chronicle,* appointed a member of advisory board of George Foster Peabody Radio and Television Awards.

UNITED CATALOG PUBLISHERS Inc., N. Y., announces publication of cross-indexed, illustrated buying guide and reference book containing 80,000 items of current electronic products. Book gives descriptions of all items as approved by each manufacturer.

Technical . . .

AL KEISELBACH, engineering staff, WSRS Cleveland, to WGAR same city, in same capacity. **BILL MARTIN** named chief engineer at WSRS.

TERRELL KIRKSEY, sales engineering consultant in Southwest for Transmitter Div., Allen B. DuMont Labs., appointed chief engineer, KDUB-TV Lubbock, Tex.

ROBERT BROWN to engineering staff, WIBX Utica, N. Y.

BYRON DIDLO to NBC Chicago, as TV studio enginer.

ARMED Forces contest awarding $1,000 to each best march composed by service man or service woman in the Army, Navy, Marine Corps and Air Force, has been announced by ASCAP. Prizes will be known as the ASCAP-John Philip Sousa Awards.

JUMP AT MAJESTIC

Predicted by Ashbach

FORECAST of a 50% increase in production of Majestic radio and television receivers and tightening of raw materials in 1953 was made in an announcement for release today (Monday) by Leonard Ashbach, board chairman of the Majestic Radio & Television Div. of Wilcox-Gay Corp.

At the same time Mr. Ashbach announced enlargement of the company's Brooklyn factory.

This plant addition, together with the main Brooklyn and Charlotte, Mich., plants, are calculated to raise Majestic's current production figure of 800 TV sets daily to about 1,200 units a day by the end of 1953, Mr. Ashbach reported.

Taking cognizance of newly opened television areas, Mr. Ashbach said Majestic added approximately 40 new distributors in such areas in 1952 and plans to acquire 150 new distributors in 1953. He said Majestic is conducting dealer meetings in prospective TV areas stressing sales, merchandising and advertising suggestions.

"We anticipate," declared Mr. Ashbach, "a normal distribution pattern by the end of 1953, free from the 'ups and downs' which for the past few years have raised havoc in our business. We are now at the threshold of a new industrial development, making television one of the nation's leading economic forces. We predict that television production will be increased 25% in 1953 with almost the same rate of growth straight through to 1958."

CBS 20-Year Club

FORMATION of a CBS 20-year club, comprising 141 employes in the company's service that length of time, was announced last week by the network. The 92 New York employes with CBS since 1932 were presented $100 savings bonds and pins by CBS President Frank Stanton, CBS-TV President J. L. Van Volkenburg, and CBS Radio President Adrian Murphy at a party last Monday. Those in other cities have received them or will receive them later [B•T, Dec. 29, 1952].

general manager.

One of the youngest general managers in the country at 23, Mr. Bernstein promptly created a full-time merchandising department: "I have always felt that to sell a product successfully, whether over the radio, TV, or newspaper, that product must be carefully and individually merchandised."

In May 1948 he joined Forjoe & Co., national radio and television representative, as Philadelphia district office general manager. Here he put his knowledge of local radio to work in the national agency field. In a five-month period he wrote more business for Forjoe than any other man in the office had written within a year, it has been claimed.

In Philadelphia he became friendly with S. Carl Mark, then owner of WTTM Trenton, who asked Mr. Bernstein to serve as a consultant for WTTM besides his regular duties with Forjoe.

In February 1949 he joined WTTM as sales manager and program consultant, later taking over additional duties as station manager.

Record of Success

WTTM's net profit has almost quadrupled since Mr. Bernstein joined the station. "Our successful sales picture," he says, "can be attributed directly to an aggressive selling force, a hard-hitting merchandising department, outstanding local programming and a record of public service second to none."

The station has been praised for presentation of news on governmental affairs and public service programming by New Jersey's Gov. Alfred E. Driscoll.

A fortnight ago FCC approved sale of WTTM to Peoples Broadcasting Co., wholly owned subsidiary of Farm Bureau Mutual Automobile Insurance Co. [B•T, Dec. 29, 1952]. Mr. Bernstein became general manager under Herbert E. Evans, vice president.

In 1951, under Mr. Bernstein's sales leadership, WTTM received seven BAB awards, a record which it claims no other station has equaled. Mr. Bernstein's comment: "Our advertisers are considered as part of our family, and they are asked continually to make suggestions, criticisms, and to give their thoughts on how to make a successful operation more successful. This makes the advertiser feel that he is personally a part of station management."

Mr. Bernstein for the past four years has been a radio and TV consultant to the National Democratic Club of New Jersey and is a consultant for Forjoe. His wife is the former Anita Kahn of Trenton. They live in Glen Afton. His day runs from 8:30 a.m. to nearly midnight.

Other Activities

These long hours are caused in part by his civic activities. He is a member of the Masons, Elks, Junior Chamber of Commerce, chairman of the mayor's Citizens' Committee for Radio & Television, member of the National Sales Executives Club, Trenton Chamber of Commerce, president of the Advertising Club of Trenton, executive director of the New Jersey Broadcasters Assn. and a member of the board of governors of the Advertising Club of New Jersey.

A member of college varsity basketball and track teams and of Tau Epsilon Phi fraternity, Mr. Bernstein now confines his athletics to golf, shooting in the middle to low 80s. He belongs to the Greenacres Country Club in Lawrenceville, N. J.

His daughter, Lynn Frances, 1, already is in the radio business. He has recorded her crying and has used it for sound effects on several station programs. "She's the best darn cryer I know," he says.

He plans eventually to invest in radio and television properties. He has full faith in radio and believes that with aggressive selling and programming, radio will continue as the number one advertising medium today per dollar spent. He believes television is a natural complement to radio.

At KLIL Opening

MORE THAN 3,500 persons toured the new studios and building of KLIL Estherville, Iowa, during a two-day open house. A 100-w station, it took the air Dec. 10. Station officials served as hosts to listeners in the area the following Saturday and Sunday. The eight-room structure is painted in a variety of pastel colors. Eighteen hours of programming are beamed daily to "the entire Iowa lakes area." Shows also originate at nearby studios in Spirit Lake, Ia., and Jackson, Minn. William E. Schons is president of the station, operating on 1340 kc and owned by the Estherville Broadcasting Corp.

WRTA

You buy

Performance Security

when you buy RCA Tubes

AS A RESULT OF progressive and continuing development at the RCA Tube Department, electron tubes are steadily being improved to provide better performance.

Take the 892-R, for instance. By using a stronger, more efficient radiator and an improved grid support structure, RCA has reduced operating temperatures, increased tube strength, and appreciably extended average life expectancy. The results of these improvements are lower operating costs and reduced maintenance.

Take advantage of the latest advances in tube development. Rely on RCA Tubes for *Performance Security.*

Your local RCA Tube Distributor can make quick delivery on your RCA Tube requirements. Call him.

IRE CONVENTION

NTSC Color TV Leads Mar. 23-26 Slate

COLOR TV system being developed by the National Television System Committee, cooperative enterprise embracing engineers from all phases of TV—research, manufacturing and broadcasting—will be the prime subject of discussion at the technical sessions on television to be given at the 1953 convention of the institute of Radio Engineers, March 23-26 in New York [B•T, Dec. 29, 1952].

Opening TV session, scheduled for Monday afternoon (March 23), will include the following speakers and topics: Donald Richman, Hazeltine Corp., "Theory of Synchronization Applied to NTSC Television"; W. E. Wood, General Electric Co., "Color Synchronization in the NTSC Color TV Receiver by Means of the Crystal Filter"; Mr. Richman, "Automatic-Phase-Control Color Synchronization for NTSC Color TV"; J. S. S. Kerr, General Electric Co., "Transient Response in a Color Carrier Channel With Vestigial Side Band Transmission"; P. W. Howells, General Electric Co., "Transients in Color TV."

Tuesday morning TV technical session agenda includes: W. F. Schreiber, Harvard U., "Probability Distribution Measurements of TV Signals"; D. C. Livingston, Sylvania Electric Products, "Colorimetric Properties of Gamma-Corrected Color TV Systems"; A. P. Stern, General Electric Co., "Phase Measurements at Sub-carrier Frequency in Color TV"; I. C. Abrahams and R. C. Thor, General Electric Co., "A Precision Line Selector for TV Use"; C. E. Page, Hazeltine Corp., "A Monitoring System for NTSC Color TV Signals."

Two symposia on TV broadcasting are scheduled for Wednesday. Morning session program comprises: Robert H. Tanner, Northern Electric Co., "The Design of Speech Input Consoles for TV"; Allen R. Kramer and Edwin R. Kramer, Kramer, Winner & Kramer, "Building TV Broadcast Facilities for Growth, Flexibility and Economy"; Frank G. Kear, Kear & Kennedy, and John G. Preston, ABC, "Fashions in TV Transmitting Antennas"; John Ruston, DuMont Labs, "High Gain Amplifiers for High Power TV Transmitters"; Ray D. Kell and A. C. Schroeder, RCA, "Optimum Utilization of the Radio Frequency Channel for Color TV."

Afternoon Session

Afternoon symposium on videocasting includes a paper on "A Flexible TV Studio Intercommunication System," by R. D. Chipp and R. F. Bigwood, DuMont TV Network, and one on "CBS Hollywood TV City's Video, Audio and Intercommunication Facilities," by Richard O'Brien, Robert Monroe and Price Fish, CBS, as well as five papers on uhf telecasting equipment: Jess Epstein and Donald W. Peterson, RCA, "An Experimental Study of Wave Propagation at 850 mc"; W. H. Sayer Jr., DuMont Labs., "A Typical Uhf Installation"; A. E. Rankin, General Electric Co., "High Power Uhf Klystron Application"; N. P. Hiestand, Varian Assoc., "High Power Klystron Amplifier Design;" H. M. Crosby, General Electric Co., "High Power Uhf TV Broadcasting Systems."

Receivers for color TV via the NTSC system will be discussed by Kenneth E. Farr, Westinghouse Electric Corp., and Will M. Quinn, General Electric Co., at the two Thursday sessions on receivers, which will also include other papers on various phases of receiver design.

The growing interest in transistors, tiny semi-conductors which are expected to take over many functions performed today by vacuum tubes, is reflected by the inclusion of 18 papers on transistors in the IRE agenda of 220 technical papers in 43 sessions. Most of the technical sessions will meet at the Waldorf-Astoria Hotel, convention headquarters, but some will be held at the Belmont Plaza Hotel and at Grand Central Palace, scene of the Radio Engineering Show where some $10 million worth of radio-electronic equipment will be shown in 400 exhibits.

Keynoted with the theme: "Radio-Electronics, A Preview Of Progress," the IRE convention will cover the full range of electronic science in its technical sessions, which for the first time this year will include a seminar on "Acoustics for the Radio Engineer," an all-day tutorial discussion between a six-member panel and the audience.

KGST Representation

KGST Fresno, Calif., reported last week it expects to name a new national representative firm in the near future. The station announced last Monday termination of its exclusive national contract with Forjoe & Co.

Help Wanted

Managerial

Opportunity to purchase all or part and manage independent radio station in fast growing industrial and agricultural market of 75,000 in state of Washington. Deal directly with owner by writing in care of Box 355S, BROADCASTING • TELECASTING.

Salesmen

Top Illinois small market. Salesman-announcer who expects to increase income through sales and commission. $240 guarantee to start. Box 383S, BROADCASTING • TELECASTING.

1000 watt, East, fulltime needs experienced salesman with salable ideas. Car essential. Salary plus commission. Box 394S, BROADCASTING • TELECASTING.

Experienced local salesman wanted by 5000 watt CBS New England affiliate tops in its field. Salary and commission. Earning power excellent and advancement assured to steady, reliable, persevering man. If applicant is TV-minded will have opportunity in not too distant future. Applications confidential. Send full details to Box 397S, BROADCASTING • TELECASTING.

Salesman—thoroughly experienced, aggressive man can make 8 to 12 thousand yearly. Competitive, but excellent market. Thousand watt independent with very salable programming. Must have proven record of selling and stability. Draw and liberal commission. Air mail complete detail. Radio Manager, P. O. Box 120, Lexington, Kentucky.

Need ambitious young man anxious to develop into selling and/or production. Would start servicing accounts and writing continuity. NBC affiliate, Box 1056, Twin Falls, Idaho.

Announcers

Announcer-engineer, 250 watt Virginia station. Box 300R, BROADCASTING • TELECASTING.

Somewhere there is an announcer-copywriter working for a 250 watt station who is ready to advance in his radio career. We are looking for such a man to work for a 5,000 watt CBS affiliate which takes special pains to provide advanced training. If you are the man write giving full details first letter. Box 264S, BROADCASTING • TELECASTING.

Two announcers preferably combo. Forty-hour week. Northwest. Box 316S, BROADCASTING • TELECASTING.

Top flight DJ to take over morning spot. Pay is dependent on ability to build and maintain audience. Box 361S, BROADCASTING • TELECASTING.

Staff announcer, needed by Southern network affiliate with TV plans. Must be conscientious and versatile. Salary commensurate with ability. Box 364S, BROADCASTING • TELECASTING.

Combo man, emphasis on announcing 1 kw Midwest independent—permanent. 40 hours, employees insurance. Send photo, tape, resume. Box 385S, BROADCASTING • TELECASTING.

Announcer. Straight staff. Old, established Midwest 250 watt ABC in 25,000 city. Only station. Best working conditions including forty hour week. Submit complete details except audition tape or disc. No West or East Coast applicants please. Box 386S, BROADCASTING • TELECASTING.

Wanted — Experienced announcer for 1 kw independent. Please, no beginners. Box 395S, BROADCASTING • TELECASTING.

Help Wanted (Cont'd)

Sportscaster and a news writer—progressive Midwestern regional station. Good working conditions. Send complete information. Box 396S, BROADCASTING • TELECASTING.

Southern full time regional network affiliate needs good announcer. Excellent working conditions and hours. Apply by letter only. Box 418S, BROADCASTING • TELECASTING.

Regular staff announcing position open. George Overton, Radio Station KMUS, Muskogee, Oklahoma.

Good combo man needed by Southwest CBS affiliate, $91.50 for 6-day week if you know your business. Mail complete qualifications, references and disc to Jim Duncan, KSIL, Silver City, New Mexico.

Experienced announcer, Southwest network affiliate. Top salary. Give details in writing. Audition, disc or tape required. KTBS, Shreveport, Louisiana.

Newsman to handle major newscasts on air. Stress is on reporting ability. Newspaper background will be given preference. We will work with you on air style. Our preference is for man with basic ability, desire to learn, mature, cooperative. Contact: KWKH News Bureau, (CBS 50 kw) P. O. Box 1387, Shreveport, Louisiana.

WDOB, Canton, Mississippi needs three announcer-engineers. $1.60 per hour plus time and half all over forty hours. Rush audition, photo, and resume.

Want experienced combination announcer-engineer. WFRX, West Frankfort, Illinois.

Competent announcer with air personality and civic consciousness. Well paying job for experienced man. WMIX, Mt. Vernon, Illinois.

TRANSMISSION LINE and FITTINGS

at a fraction of their cost

Because the FCC assigned us a UHF-TV frequency, we have a quantity of type 506 and 505, 50.5 ohm transtype 506 and 505 50.5 ohm transmission line, originally installed for VHF which had to be replaced. It has never been in use and is in top condition, other than having weathered on the tower durig the "freeze". Some of it is brand new, never out of the boxes. It's complete with "O" rings, bolts, connectors, etc. Clean as a whistle inside, carefully boxed for shipment and ready to go. We'll sell the lot at 50% of today's list price.
540 feet 3⅛" Type 101-506 (27-20 ft. lengths).
40 feet 1⅝" Type 114-505 (2-20 ft. lengths).
2-45° 3⅛" Type 73.506 Elbows.
3-90° 3⅛" Type 72-506 Elbows.
1-3⅛" to 1⅝" Type 85-506 Reducer Assembly.
2-45° 1⅝" Type 42-505 Elbows.

THE 'UNWANTED' WGAR Wins Safety Award

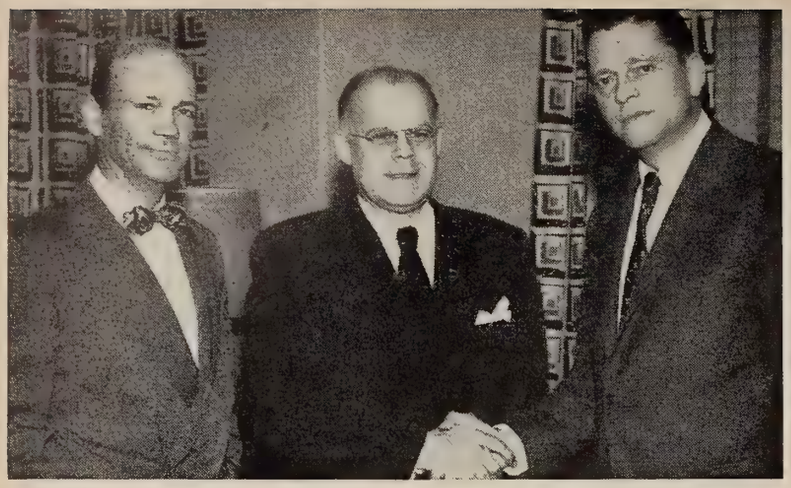
WGAR Cleveland is the only Ohio organization to win more than one outstanding achievement award from the Ohio Safety Council, according to station.

Award was to the station's *Unwanted First* broadcast prepared by Jack Dooley and Charles Day, WGAR news editor.

Unwanted First attempted to impress listeners with the importance of traffic safety by "interviewing" victims in hospitals and morgues.

Amateur Rules Amended

FCC now has completed, with certain changes, its proposed rule-making of April 17, 1952 (Docket 10073) with respect to Amateur Radio Service Rules so as to: (1) Provide for use of radiotelephone emissions in the 72-7300 kc segment of the 7 mc amateur frequency band; (2) enable novice class amateur operators to use the 7175-7200 kc portion of the 7 mc amateur band; (3) establish standards for amateur radio teleprinter operation; (4) open up the non-radiotelephone segments of the 3.5, 7 and 14 mc amateur bands to F-1 (frequency shift telegraphy) emission, and (5) clarify requirements for the transmission of amateur call signs, including teleprinter operation. Changes are effective Feb. 20.



Miscellaneous

We are interested in working with some television production firms. If you have produced any TV commercials, for sectional breweries, that could be adapted for use in Michigan and Ohio without conflict and at a minimum expense to us, we are interested. KENNETH CHURCH (c) receives congratulations on his appointment as vice president of WKRC-AM-FM-TV Cincinnati. Promotion was announced by Hulbert Taft Jr. (l), executive vice president of Radio Cincinnati Inc. Shaking hands with Mr. Church, who joined WKRC as sales manager in 1941, is David Taft, also vice president of licensee firm and managing director of Transit Radio operation (WKRC-FM) in Queen City. Mr. Church was with KMOX St. Louis before coming to Cincinnati.

ARENS TO HEAD

Good Music Sales Activity

APPOINTMENT of John E. Arens to the newly-created post of sales manager of Good Music Broadcasters was announced last week by Raymond S. Green, vice president and general manager of WFLN (FM) Philadelphia, and Norman S. McGee, vice president in charge of sales for WQXR New York.

Mr. Arens will resign as sales director of WFAS-AM-FM White Plains, N. Y., to assume the new GMB post today (Monday). In his new position Mr. Arens will supervise the sales activity of an organization of 13 radio stations founded in 1951 to sell programs of good music to national advertisers. Stations making up GMB are:

WQXR-AM-FM New York; WEAW (FM) Evanston, Ill.; KFAC-AM-FM Los Angeles; WFLN (FM) Philadelphia; WEW St. Louis; KEAR San Francisco; WGMS - AM - FM Washington; WXHR (FM) Cambridge, Mass.; KIXL Dallas; WBIB (FM) New Haven; WSNJ-AM-FM Bridgeton, N. J.; WDRC-FM Hartford, and WITH-FM Baltimore.

PUBLIC BUYING

Quantities of Radio-TV Sets

CONSUMERS who purchased more household goods than they needed during scare-buying periods in 1950 and early 1951 are now buying substantial quantities of radio-TV receivers and other products, the Commerce Dept. has reported.

Surveying business conditions during December, the department painted a glowing picture for the U. S. economy, with personal income and retail sales showing gains. Indication that the public is buying replacements for worn out radio-TV sets has been evident since January 1951 when scare-buying hit its peak, the Commerce Dept. added.

PROCTER & GAMBLE Co.'s *The Guiding Light* daytime show, switched to a new time period, 12:45-1 p.m. beginning last Monday on CBS-TV. Agency is Compton Adv., N. Y.

Television Investment

$200,000.00

Attractive opportunity to invest in television property in excellent Midwest market. Investment amortized on agreed schedule and protected by conservative mortage provisions. Liberal yield and very attractive stock bonus features.

SUBSIDY FROM NAEB

WFMT Is an FM Outlet—And Commercial, Too

A COMMERCIAL frequency modulation station in Chicago has received a subsidy from the National Assn. of Educational Broadcasters to produce and broadcast high-quality dramatic and documentary shows in cooperation with the U. of Chicago. This is believed unusual, primarily because the station operates on an FM band and secondarily because it is commercial.

The outlet is WFMT Chicago (formerly WOAK), which has worked out an agreement with the U. of Chicago to broadcast an unlimited number of shows, all of which will be for sale. The grant from NAEB was made to the U. of C., and indirectly to WFMT, the only commercial station in 13 chosen for cooperative work in the broadcasting of quality productions from the U. S. and all parts of the world.

Although the arrangement has been effective since early December, WFMT began regular programming with NAEB features Jan. 1, and has scheduled the *Jeffersonian Heritage* and *Ways of Mankind*, 13 week series which have been praised highly.

Classical Emphasis

Managed and owned by Bernard Jacobs, WFMT will continue to place its programming emphasis on classical music, with the U. of C. and NAEB programming secondary. Shows will be chosen for their entertainment value, and "if they happen to be educational, that's fine, but that's not our purpose."

The new shows will be spotted irregularly in the station's nine hour daily schedule, which will probably be expanded to 10 shortly. It now takes the air at 3 p.m. and signs off at midnight.

Sponsors of the dramas, monologues, documentaries and narrations produced either live or on tape by faculty members and the U. of C., will be required to maintain WFMT's current standards for clients. These include two and one-half minutes of commercial per hour, presentation with no interruption of any kind, spots without any attention-getting tactics, unnecessary repetition and gimmicks, and broadcast of a selection in its entirety. In addition, Mr. Jacobs said, he will continue with the policy of accepting only clients whose merchandise he can vouch for and clients for whom he can do a selling job.

He has acquired numerous new sponsors of his classical FM music programming since the inception of these policies about a year ago.

Working with him and his staff on original productions will be Thomas D. Parrish and Jack E. Wallace of the U. of Chicago, assigned full-time to the WFMT plans. The radio board of the U. of C. is headed by Lawrence A. Kimpton, chancellor of the university and radio chairman, working with George E. Probst, executive director of the radio office; Cyril O. Houle, dean of the university college; George B. Bobrinskoy, chairman of the department of linguistics; Grosvenor W. Cooper, chairman of the department of music; Garfield Cox, Robert Law professor of finance; Kermit Eby, professor of social science; Andrew W. Lawson, chairman of the department of physics; Dr. George V. LeRoy, professor of medicine; Robert Redfield, professor of anthropology; Henry Sams professor of English; Alan Simpson professor of history; Sheldon Tefft, professor of law, and Dr. Paul A. Weiss professor of zoology.

The money allocated to the U. of C. by the NAEB came from an earlier grant of some $450,000 to NAEB from the Ford Foundation.

WFMT expects more extensive coverage in the Chicago area when it goes from an effective radiated power of 8.3 kw to 34 kw. Equipment will be installed shortly. FCC has given its approval of the petition.

STATION FREEZE

CBC Lifts on AM-FM Bids

FOR THE FIRST time in several years the board of governors of the Canadian Broadcasting Corp. will hear applications for new AM and FM stations when it meets at Ottawa Jan. 22-24. With the freeze lifted on steel for construction CBC again is considering applicants for broadcast stations.

Five applicants for new AM stations will be heard on Jan. 22, and one applicant (CFRC Kingston) for an educational FM station. Power increases will be requested by CKCW Moncton, N. B., and CKDA Victoria. AM frequency change is being asked by CHNC Sudbury, Ont., and FM frequency change is requested by CHML-FM Hamilton.

Three stations are asking for emergency transmitter licenses, CHML Hamilton, CHRC Quebec and CHLN Three Rivers. Fifteen stations are asking for permission for share transfers, recapitalization or change of licensee to another corporate licensee.

Hearings Jan. 23 will be devoted to revisions in the proposed new regulations for AM stations [B•T Oct. 13, 1952].

Scranton News Group

OFFICERS of the newly-formed Radio News Club of Northeastern Pennsylvania, organized by newsmen of four Scranton radio stations, are: President, Tom Powell, WGBI; vice president, Bob McHale, WSCR; secretary, William T. Cullen Jr., WQAN, and treasurer, Paul Brand, WARM. Membership is open to newsmen of all regional radio stations and eventually will be extended to TV newsmen.

NARTB MEMBERS

Drive Begins Today

TWO-MONTH campaign in which NARTB members take part in a concentrated drive to enroll new members will start today (Monday). It will conclude Feb. 28, according to William T. Stubblefield, director of station relations.

AM station membership of NARTB passed the 1,000-mark late last year, a figure it had not boasted since the post-war burst of new operations. As of last Nov. 30 there were 1,025 AM members and 370 FM members, plus two national networks (MBS, NBC). At that time there were 97 TV members and 78 associates, a grand total of 1,576. The figure has risen since that time.

Membership committees totaling 12 members have been formed to represent all 17 NARTB districts around the country. The campaign will be conducted at the district level, with each district having a quota. Those taking part in the contest will be given special recognition at the Los Angeles convention April 29-May 1.

Discussing the campaign, NARTB President Harold E. Fellows said, "We have had two happy years in NARTB's growth—during which time most of the television stations in the nation have become members of the association, and the radio representation has been stepped up markedly. This is the first campaign we have undertaken in that time. Obviously, our objective is to make 1953 even a happier new membership year."

Mr. Stubblefield has sent committee members packets of campaign materials and a plan to conduct the selling effort on an organized basis. If all districts reach their quotas, an increase of 28% in membership will be effected, bringing it close to the 1,300 mark.

WMBD SALE

John Fetzer Buying

SALE of WMBD-AM-FM Peoria, Ill., from Peoria Broadcasting Co. to Charles Caley and John Fetzer was announced last week. Application for FCC approval was filed Friday.

Quarter-century-old WMBD, which operates on 1470 kc with 5 kw, was bought by the two broadcasters from Mr. and Mrs. Carl P. Slane and Elizabeth P. Talbott for $225,000. Mr. Caley, president and general manager and 25% stockholder of Peoria Broadcasting Co., will be president and two-thirds owner of the new WMBD Inc. Mr. Fetzer will be vice president and one-third owner.

In addition to his holdings in WMBD, Mr. Caley is also president and one-fourth owner of WDZ Decatur, Ill. Mr. Fetzer owns and operates WKZO-AM-TV Kalamazoo and WJEF-AM-TV Grand Rapids, Mich. Mr. Fetzer also has a minor interest in KXEL-AM-FM Waterloo, Iowa.

KMPC Los Angeles, Calif.—KMPC: The Station of the Stars Inc. Granted assignment of license to KMPC Inc. for $799,986 (of which $536,992 is to be cash, $190,687 is to be notes and $73,307 through exchange of stock). Principals in assignee include President **Gene Autry**, licensee of KOOL Phoenix, Ariz., KOPO Tucson, Ariz., and KNOG Nogales, Ariz., 85% owner of KSWB Yuma, Ariz. (see KSWB Yuma assignment grant above), owner of Melody Ranch Enterprises Inc. (which is 51% owner of KMPC Inc., the assignee), and radio, television and motion picture actor; Vice President **Robert O. Reynolds** (40%), general manager of KMPC; Vice President **Lloyd Sigmon** (3.33%), assistant general manager of KMPC and radio engineer; Secretary **Wesley L. Nutten Jr.** (4%), Los Angeles (Calif.) attorney, and Treasurer **Oren G. Mattison** (1.66%), auditor and accountant for KMPC. **Melody Ranch Enterprises Inc.** owns 51% of assignee; this stock is and will be voted by Mr. Autry. Melody Ranch Enterprises Inc. schedules public performances, motion pictures, sound recordings, and AM and television broadcasting for actors and actresses. Granted Dec. 31.

KCHS Truth or Consequences, N. M.—Sierra Bcstg. Co. Granted assignment of license to **Ollie Louis Dennis** and **Gladys P. Dennis** for $10,000. Mr. Dennis is minister of First Baptist Church, Truth or Consequences, N. M. Granted Dec. 31.

WOHP Bellefontaine, Ohio — Charles H. Chamberlain. Granted assignment of license to **Lake Erie Radio & Television Corp.** for $30,000. Principals in assignee include President **Theodore M. Nelson** (27.5%), president and 25% stockholder of WIRO Ironton, Ohio, and general manager of WIKK Erie, Pa., from 1948 to 1952; Secretary-Treasurer **David S. Gifford** (27.5%), Erie (Pa.) attorney and secretary-treasurer and ⅓ owner of Nickle Plate Sand & Gravel Co., Erie; Vice President **William P. Shannon** (15%), vice president and 25% stockholder of WIRO Ironton, Ohio, and sales manager of WIKK Erie from 1949 to 1952; Vice President **Clinton E. McElroy** (15%), secretary and 25% stockholder of WIRO Ironton, Ohio, and assistant general manager of WIKK Erie from 1950 to 1952, and Vice President **Clarence A. Baker** (15%), treasurer, chief engineer and 25% stockholder of WIRO Ironton, Ohio, and chief engineer of WIKK Erie from 1949 to 1952. Granted Dec. 31.

WMOD Moundsville, W. Va.—James D. Sinyard. Granted assignment of license to **Robert W. Munn** for $10,000. Mr. Munn is sole owner of Grand Theatre (motion picture exhibition), Moundsville, W. Va. Granted Dec. 31.

FCC Actions

(Continued from page 83)

change studio location and change type trans.

WPID Piedmont, Ala.—Granted mod. CP for approval of ant., trans. and studio location and change type trans.

WAGG, Franklin, Tenn. — Granted mod. CP for approval of ant., trans. and studio location.

Extension of Completion Date

Following were granted mod. CP's for extension of completion dates as shown:

KLCN Blytheville, Ark., to 6-23-53; **KPIX San Francisco, Calif.**, to 3-25-53; **KROW Oakland, Calif.**, to 7-6-53.

Delete Application

WFMT Chicago, Ill.—Granted request to delete application to modify existing CP to change frequency from 105.9 mc to 103.5 mc and change ERP from 9.3 kw to 9.35 kw.

FCC POSTS

Minderman, Werner Quit

EARL MINDERMAN, assistant to the Chairman of the FCC since mid-1946 and former information director of the Commission, resigned last week to join the newly-formed National Citizens Committee for Educational Television [B•T, Dec. 1, 1952].

Mr. Minderman, who was with FCC since August 1943, will serve as field liaison officer with the citizens' group, according to Robert R. Mullen, executive director.

Also resigning from the FCC is Jack Werner, chief of the Common Carrier Bureau. Mr. Werner is joining the Washington law firm of Freedman & Levy.

During his tenure as assistant to the Chairman, Mr. Minderman worked under Charles R. Denny Jr., Wayne Coy and the present Chairman, Paul A. Walker, himself an ardent advocate of educational TV.

The exact nature of Mr. Minderman's duties with the citizens' committee was not known, but it was understood he would consult with community organizations and business groups in an effort to stimulate interest in TV. He will headquarter in Washington, D. C.

Assistant chief of the Common Carrier Bureau is Curtis Bushnell, who presumably will be acting chief until Mr. Werner's successor is appointed.

KFBB STOCK

Wilkins Acquires Control

TRANSFER of controlling interest in KFBB Great Falls, Mont., from Fred Birch, local contractor, to Joseph P. Wilkins, manager for the past 12 years, has been completed, it was announced last week.

In a reorganization of the Buttrey Broadcasting Co., licensee of the 5 kw DA-N station on 1310 kc, Mr. Wilkins was elected president. E. F. Galt, stockholder and First National Bank president, was elected vice president and Lillian F. Wilkins, secretary-treasurer.

Motorola Forms Unit

MOTOROLA Inc., Chicago, announced formation of a wholly owned subsidiary, Motorola Communications and Electronics Inc which will distribute product manufactured by the company communications and electronics d vision. President Paul V. Galvi said products include two-wa radio systems, multi-channel micr wave relay systems, power lin carriers and supervisory and i dustrial control equipment.

Color TV Quandary

(Continued from page 57)

ansmitting techniques. The Laboratories Division, together with Hytron adio & Electronics Co., a CBS division, also made substantial progress the development of a tri-color tube hich can be used with the field equential system and which would place the disc which had theretofore been used in receivers. Other mpanies, notably the Chromatic aboratories Inc., made important rogress in developing tri-color tubes sable with the field sequential system.

In addition, the manufacturing industry continued with its work in ttempting to develop a "compatible" olor television system. Although in he hearings in 1950 before the FCC, was represented that such a comatible system would be perfected and lly ready for commercial use by he spring of 1951, there has been subantial delay and postponement from me to time in the target date, which ill remains in the indefinite future.

As CBS has always stated, its chief bjective is that the important added imension of color be brought to the levision viewing public at the earest possible moment.

As it has also stated, CBS believes extremely desirable that such a olor system be compatible so that xisting black and white receivers an receive the color transmissions in lack and white without any change such receivers.

CBS genuinely hopes that the industry committees and groups now orking on such a compatible system ill be successful in their efforts and ill press forward to obtain approval f its standards in 1953. Because of he uncertainty and conflicting claims, he public is not now receiving this nportant new development of color levision even though the FCC has pproved field sequential color standrds.

The manufacturing industry, broadasters and the FCC owe the public he obligation of promptly considerng whether it still remains true, as BS believes on the basis of informaon currently available to it, that the resent field sequential system is the nly practical, workable and inexpenive color system or whether this approved system is to be replaced by a ompatible system which must be qually practical, workable and inexensive. All elements in the industry nd in the government should strive romptly to resolve this question so hat all can go forward in vigorous fforts under whichever system prevails.

It is devoutly to be hoped that this nportant issue be resolved as soon s possible in 1953 so that color broadasting will once again be made availble to provide the ultimate in educaon, entertainment and information o viewers in their homes.

Raytheon Profits Up

NET PROFIT of $1,913,000 after provision for federal income and xcess profits taxes of $4,450,000, was reported for the first half of he fiscal year ended Nov. 30 by the aytheon Mfg. Co., Waltham, lass. This compares with a profit f $718,000, after provisions for 1,060,000 for federal income and xcess profits, for the same period. ast year.

ELECTION TAB

Lists All Party Funds

MAJOR political parties spent upwards of $6 million on radio and television on behalf of all national candidates during the 1952 campaign, a Senate subcommittee reported last week.

The figures represent perhaps the first clear inkling of broadcast expenditures on the major networks and individual radio-TV stations by all major parties. They cover money paid out for the Presidential, Vice Presidential, Senatorial and Congressional campaigns at the federal level.

The data was supplied by the Senate Privileges & Elections Subcommittee, headed by Rep. Thomas D. Hennings (D-Mo.), which has been studying methods of streamlining national election procedures. The objective is to revise upward the campaign expenditure ceiling (now $3 million for each national political committee) to take cognizance of the broadcast outlay.

The Hennings group reported that all parties spent $6,062,378.05 on radio and television—on networks or local stations. Breakdown showed $3,111,049.53 for radio and $2,951,328.52 for television —divided among ten and six political parties, respectively.

Rep. Hennings cited the broadcast industry for its "splendid cooperation" in returning questionnaires. A full 100% of networks and radio outlets and 85% of TV stations responded, with the balance of television stations in markets where federal candidates probably bought no time. All figures cover network estimates including cost of pre-emptions and time, and station revenue (without overlap).

The Republicans spent $1.8 million-plus on radio and $1.6 million-plus on TV; the Democrats, $1.2 million-plus on radio, $1.3 million-plus on television—or roughly $3.4 million for the GOP and $2.6 million for the Democrats on both media. Variance with previous estimates [B•T, Nov. 10, 1952], which showed lesser amounts, is attributable to inclusion of local station time purchases and amounts received locally for Congressional and Senatorial candidates.

Other parties spending money on radio-TV were the Socialist Labor, Progressive, Liberal, American Labor, Socialist Workers, Prohibition, Independent and Socialist.

SHOEMAKER NAMED

Is WWCO General Manager

APPOINTMENT of James H. Shoemaker as general manager of WWCO Waterbury, Conn., effective today (Monday), was announced last week by W. G. Wells, part owner of the station.

Mr. Shoemaker has been associated with WKOX Framingham, Mass., as commercial manager. He was a co-founder of the station, which went on the air in 1947, and a partner in the licensee firm, Suburban Broadcasting Co.

NEW partners in reorganized A. D. Ring & Assoc. are (l to r): Messrs. Kershner, Ring and Head. Partnership resulted in change of firm's name from A. D. Ring & Co. ➤

SINGLE RATE

KFYO, WOND Issue Cards

THE SINGLE rate plan for radio gained additional support last week as KEYO Lubbock, Tex., and WOND Pleasantville, N. J., issued new cards in each of which the day and night rates are the same, effective Jan. 1.

KFYO, on 790 kc with 5 kw day and 1 kw night, made the change by setting all rates, from 6 a.m. to 12 midnight, slightly less than they had been during the Class "A" 6 p.m. to 10:30 p.m. period.

Where the one-hour, one-time Class "A" rate had been $90, for example, it now is $80 in all periods. The station is under the general managership of Gordon Thompson, with Leon E. Harris as commercial manager, and is represented nationally by the O. L. Taylor Co.

WOND, on 1400 kc with 250 w, not only is adopting a single day and evening rate, but is setting it generally higher than the old Class "A" rate—although at the same time increasing discounts considerably—and also is setting aside the 8-10 p.m. segment as non-commercial.

RING FIRM

Head, Kershner Are Partners

REORGANIZATION of A. D. Ring & Co., Washington, D. C., consulting radio-TV engineer firm, into a partnership comprising two new principals was announced by A. D. Ring last Wednesday.

The new firm will be known as A. D. Ring & Assoc. New partners are Howard Head and Stephen Kershner, who have been with the company since late 1945. No changes in policy or services are contemplated. Work will be under the general supervision of Mr. Ring.

Mr. Head has been occupied with presentations to the FCC, field work and hearings. He has been active on problems of standard, FM and TV broadcasting, both in Washington and in the field.

Prior to World War II, he was engaged in research and development work with RCA Labs. He returned from active service in the Signal Corps Engineering Labs. with the rank of major in 1945 before joining the Ring firm.

Mr. Kershner has been assigned mainly to the firm's foreign work, including services for the State Dept.'s Voice of America, Radio Free Europe and other activities. He also has handled intricate domestic problems requiring research and specialized design work.

Among his achievements are development of new techniques for adjustment and maintenance of critical directional antenna systems and improved methods for conducting field surveys on TV stations.

Columbia '52 Sales

COLUMBIA Records Inc., subsidiary for CBS, had the best sales year in its history except for 1947, surpassing 1951 by more than 12%. James B. Conkling, CRI president, reported in a year-end statement. During the year, long-playing records became increasingly important in the transcription field, with complete half-hour programs available on single 10-inch, 33⅓ RPM discs, he said.

at deadline

FCC SETS ISSUES IN LANCASTER SNARL

FINANCIAL representations made in TV applications by Peoples Broadcasting Co., licensee WLAN Lancaster, Pa., as well as extent of common ownership and signal overlap among Steinman Stations WGAL-TV Lancaster, WDEL-TV Wilmington, Del., and WLEV-TV Bethlehem, Pa., were included in issues set by FCC for comparative hearing scheduled Feb. 2 on request of WGAL-TV for regular license on vhf Ch. 8 and new-station Ch. 8 bid of WLAN.

Released Friday, hearing order and issues had been adopted by Commission Wednesday, night of which WGAL-TV switched from Ch. 4 to Ch. 8 under conditional grant of last September, which grant WLAN has appealed to court [B•T, Dec. 22, Sept. 22, 1952]. Switch to Ch. 8, ordered by Sixth Report finalizing TV reallocation plan, was granted on conditional basis subject to outcome of comparative hearing between WGAL-TV and WLAN.

What is believed will be expedited proceeding before unspecified FCC hearing examiner, hearing was ordered by Commission *en banc* with Chairman Paul A. Walker and Comrs. Rosel H. Hyde, E. M. Webster, Robert T. Bartley and Eugene H. Merrill, with Comr. George E. Sterling dissenting and Comr. Merrill issuing separate statement.

Hearing issues specified are as follows:

1. To determine whether Peoples Broadcasting Co. is financially qualified to construct and operate the proposed station and whether misrepresentations were made to the Commission by Peoples Broadcasting Co. with respect to its financial qualifications in its above-entitled application in the light of the information contained in the application of Binghamton Broadcasters Inc. for a permit to construct a television station in Binghamton, N. Y. (BTCT-1100).

2. To determine whether the installation and operation of either of the stations proposed in the above-entitled applications would constitute a hazard to air navigation.

3. To determine on a comparative basis which if either of the above-entitled applications should be granted with particular reference to but not limited to the following:

(a) The background, experience and capabilities of WGAL Inc. and Peoples Broadcasting Co. to construct and operate the television broadcast station proposed by each applicant. (b) The type and character of the program service proposed to be rendered by WGAL Inc. and Peoples Broadcasting Co. and whether said proposed service would meet the needs of the communities and areas within the grade A and B field intensity contours. (c) The management and operation of the stations proposed by WGAL Inc. and Peoples Broadcasting Co. (d) The extent of common ownership and interest of WGAL Inc. in television stations WDEL-TV Wilmington, Del. and WLEV-TV Bethlehem, Pa. (e) The extent of overlap that would result from the operation of WGAL-TV as proposed in its above-entitled application and the operation of WDEL-TV and WLEV-TV as authorized.

Comr. Sterling's dissent:

I dissent to the adoption of the hearing order for a comparative hearing for the reasons set forth in my dissent of September 16, 1952, when the Commission majority decided that Peoples Broadcasting Company was entitled to a comparative hearing with WGAL-TV to determine which applicant is to occupy Channel 8 in Lancaster, Pa. I dissent further to the inclusion in the hearing order of an overlap issue in such hearing since any overlap results from the Standards adopted by the Commission in order to provide an improved television service to all of the Nation. The Commission recognized this when it granted the Crosley applications in accordance with the new Standards.

Comr. Merrill's statement:

I concur with the majority of the Commission in the designation for hearing of applications for construction permits filed by WGAL Inc. and Peoples Broadcasting Co. for operation of a television station on Channel 8 at Lancaster. However, in my opinion, the order setting this matter for hearing should provide issues for inquiring into the possible overlap of areas that would be served by WGAL-TV Lancaster as proposed; and WLEV-TV Bethlehem, Pa.; and WDEL-TV, Wilmington, Del., operating with maximum antenna height and power as set forth in the Sixth Report and Order adopted by the Commission April 11, 1952.

CLASSES ON TV

WBAL-TV Baltimore Friday offered facilities to city's board of education for conducting classes on TV in wake of manual laborers' strike. Board reportedly is studying offer for daily TV classes, 9-12 noon, covering primary and public schools, and is compiling tentative broadcast schedule. Strike started New Year's Day and schools scheduled to reopen today (Monday) after holiday recess. Laborers handle furnace-janitor chores in 40 Baltimore schools.

PHILIP MORRIS ORDERED TO CEASE CERTAIN CLAIMS

PHILIP MORRIS & Co., New York, ordered by Federal Trade Commission to cease certain claims based on irritation factors and effect on smoker's breath. Action substantially upholds conclusions of Hearing Examiner Earl J. Kolb in initial decision issued Jan. 23, 1952.

Firm ordered to cease advertising claims that Philip Morris cigarettes are non-irritating; less irritating than other leading cigarettes, or will not affect smoker's breath or leave after-taste. Firm ordered to drop claims made for diethylene glycol, used as humectant in cigarettes instead of glycerine.

TV APPLICATIONS

UHF TV BIDS for Winston-Salem and Durham, N. C., and Richmond, Va., by group identified with ownership of WTOB Winston-Salem, reported filed with FCC Friday. Other new applications include transfer request by WGBI-TV Scranton, Pa., uhf Ch. 16 grantee, whereby WGBI, *Scranton Times'* WQAN and Meco Realty Co. would each become one-third owner of TV outlet (see TV applications, page 58). Three new uhf bids are:

Durham, N. C.—Winston-Salem Bcstg. Co., uhf Ch. 46; ERP 173.6 kw visual, antenna height above average terrain 525 ft. Estimated cost $244,915, annual operating cost $190,000, revenue $205,000. Principals include President **James W. Coan** (7.5%), president and 30% stockholder of WTOB Winston-Salem, N. C.; Vice President **Robert V. Brawley** (5%), Winston-Salem attorney and 20% stockholder of WTOB; Secretary-Treasurer **John G. Johnson** (7.5%), 30% stockholder of WTOB; Assistant Secretary **Archibald Craige** (11.25%), Winston-Salem attorney and 20% stockholder of WTOB; **Thomas B. Rice** (12.5%) and **Jonas S. Rice** (12.5%), each 50% owner of Dr. Pepper Bottling Co., Winston-Salem; **Albert Butler** (18.75%), president and 25% stockholder of Arista Mills (textiles), and **Earl F. Slick** (25%), oil producer. Applicant also seeks TV stations in Winston-Salem, N. C., and Richmond, Va.; see below.

Winston-Salem, N. C.—Winston-Salem Bcstg. Co. (WTOB), uhf Ch. 26; ERP 198.2 kw visual, antenna height above average terrain 365 ft. Cost $245,016, operating cost $190,000, revenue $205,000. For principals, see Durham N. C., application above.

Richmond, Va.—Winston-Salem Bcstg. Co., uhf Ch. 29; ERP 17.2 kw visual, antenna height above average terrain 544 ft. Cost $153,954, operating cost $180,000, revenue $180,000. For principals, see Durham, N. C., application above.

MARATHON TELECAST

BOYS' CLUB of Chicago will benefit from three-hour marathon telecast Jan. 10 on WNBQ (TV) Chicago, with columnists Tony Weitzel and Irv Kupcinet interviewing guest celebrities. Program to include 100-voice choir and 75 piece band from club. Time donated by Hauser Nash sales, facilities by NBC.

PEOPLE...

JAMES WEBB YOUNG, consultant to J Walter Thompson Co. and Ford Foundation engaged by General Mills as independent consultant to review advertising with view toward future development, on recommendation of Advertising Director Samuel C. Gale.

BERNARD G. RASMUSSEN, timebuyer and business manager of Ruthrauff & Ryan, N. Y. to Fuller & Smith & Ross, that city, in similar capacity. He will be responsible for controlling budgets, estimates, billing, cut-in operations and interruption rebates on most of agency's local and network radio and TV programs.

DAN WELCH, Toni Co. account executive at Foote, Cone & Belding, Chicago, before account shifted bulk of its business Jan. 1 to Weiss & Geller, same city, joins W & G in same capacity. Dick Sachse, assistant account executive at FC&B on Toni, has joined W & G's account staff.

IRVING HARRIS has resigned as executive vice president of Toni Co., Chicago Div. of Gillette, to work there in Merchandise Mart offices as risk capital investment counsel. Mr Harris continues as a Gillette board member and will work with Toni in consulting capacity.

ANTONY WRIGHT promoted to vice president in charge of commercial products division at Capehart-Farnsworth Corp., Fort Wayne, Ind.

FRIDAY TV ACTIONS

FCC granted seven more requests for maximum power to pre-freeze stations in Group D priority line. Five post-freeze stations were granted modifications of construction permits, and five others were granted special temporary authorization. One of those receiving STA, WJAC-TV Johnstown, Pa., is existing (pre-freeze station), due to shift from vhf Ch. 13 to vhf Ch. 6 under FCC Sixth Report & Order [B•T, April 14, 1952]. All Friday actions by FCC Broadcast Bureau.

GROUP D GRANTS

KPIX (TV) San Francisco, Calif., granted modification of construction permit for 100 kw visual, 50 kw aural; antenna height above average terrain 1,140 ft.

KRON-TV San Francisco, Calif., granted 100 kw visual, 50 kw aural; antenna height above average terrain 1,310 ft.

WNHC-TV New Haven, Conn., granted 316 kw visual, 158 kw aural; antenna height above average terrain 720 ft.

WHBF-TV Rock Island, Ill., granted 100 kw visual, 50 kw aural.

WJBK-TV Detroit, Mich., granted 100 kw visual, 50 kw aural.

WHEN (TV) Syracuse, N. Y., granted modification of construction permit for 190 kw visual, 100 kw aural; antenna height above average terrain 960 ft.

WSYR-TV Syracuse, N. Y., granted 100 kw visual, 50 kw aural; antenna height above average terrain 1,000 ft.

GRANTED CP MODIFICATIONS

WICC-TV Bridgeport, Conn., granted modification of construction permit for 180 kw visual, 91 kw aural.

WKNX-TV Saginaw, Mich., granted modification of construction permit for 19 kw visual, 10 kw aural, with condition that there be no adverse effect upon WKNX-AM.

WNOK-TV Columbia, S. C., granted modification of construction permit for 780 kw visual, 390 kw aural; antenna height above average terrain 620 ft.

KDUB-TV Lubbock, Tex., granted modification of construction permit for 31 kw visual, 15.5 kw aural; antenna height above average terrain 820 ft.

WSLS-TV Roanoke, Va., granted modification of construction permit for 250 kw visual, 125 kw aural; antenna height above average terrain 1,960 ft. Transmitter location to be on west side of U. S. 221 atop Poor Mt.

GRANTED STA

WKAB-TV Mobile, Ala., granted special temporary authorization to operate commercially on uhf Ch. 48.

WKBN-TV Youngstown, Ohio, granted special temporary authorization to operate commercially on uhf Ch. 27.

WJAC-TV Johnstown, Pa., granted special temporary authorization until March 11.

WBRE-TV Wilkes-Barre, Pa., granted special temporary authorization to operate commercially on uhf Ch. 28.

KTSM-TV El Paso, Tex., granted special temporary authorization to operate commercially on vhf Ch. 9.

IN THE HEART OF AMERICA...

It's The

KMBC KFRM

Team and It's

Wholehearted and "Wise"

*"Market-Wise"...**

For years, there's been a strange courtship going on in the Heart of America. It has been the wooing and winning of the Kansas City Primary Trade Area by The KMBC-KFRM Team. The Team was the successful suitor – in fact the only logical suitor from the very first. KMBC-KFRM made it a point to understand and coddle "Miss Kansas City Market" from the moment they met. KMBC-KFRM helped the Market grow – saw her through good times and bad – served her with the greatest in radio – was her best friend and through this intimacy became "Market-wise".

There is no record of when the wedding of The KMBC-KFRM Team and the Kansas City Primary Trade Area actually took place. But it's been a tremendously successful union. The heart of the Team and The Heart of America beat as one and advertisers will tell you that the best proof of this union are the thousands and thousands of "sales" – large and small – begat by this powerful voice of The KMBC-KFRM Team and the plump purse of the Kansas City Primary Trade Area.

* This is the fourth of a series on The KMBC-KFRM know-how which spells dominance in the Heart of America.

Call KMBC-KFRM or your nearest Free & Peters Colonel for the Kansas City Market Story. BE WISE—REALIZE...to sell the Whole Heart of America Wholeheartedly it's . . .

The **KMBC-KFRM** *Team*

THE NEWSWEEKLY OF RADIO AND TV

"WOR-TV *created the demand for our product and can take a bow for its success."*

John Roosevelt

President, 4711 Ltd.

The Product

Sof-Set... a liquid hair-spray

The Advertising

WOR-TV... and *only* WOR-TV

The Result

The advertising produced results even *before* the campaign began. The sponsor sold Sof-Set to New York's two leading drug chains on strength of the contemplated WOR-TV campaign.

When the campaign started, sales and distribution increased rapidly. Within five months, the majority of its New York retailers found Sof-Set the Number One seller in its field.

The client reports: "Retailers placed orders because of demand for the product from people who'd seen it advertised on WOR-TV. Our confidence in WOR-TV has been more than justified."

Results like these explain why sponsors say:

IT'S GOOD TO BE...ON

WOR-TV

What's the 1960 picture?

Will our rockets have reached the moon?

Will the uses of atomic energy
be a boon to mankind?

And what about broadcasting? Will radio be
a satellite of television? Perhaps a new miracle
of air transmission will be exciting the world.

In 1960, as today, you can bank on this:
Havens and Martin Stations will be experimenting,
pioneering, and programming for
the listeners of Virginia.

Half the joy of broadcasting is vision.
Much of the rest is serving.

Watch the First Stations of Virginia in 1953 . . .

In the 27 days between Thanksgiving and Christmas, 4 top kid shows on KEX drew this unprecedented mail count from western Washington, Oregon and northern California—16,478 individual actions resulting from KEX Kid show appeal!

Here are the KEX Kid Shows and Stars—

★ SANTA CLAUS

In the "Letters to Santa Claus" program, sponsored by *Meier & Frank Company*, "Santa" made special trips to KEX every day during the Christmas season to read letters from children at 4 p.m.

★ JOHNNY RAINBOW

"Happy Time" starring Johnny Rainbow, a regular Monday through Friday 4:45 p.m. feature. A contest for the *Schoewe Shoe Store* accounted for a high mail response.

★ MERRIE VIRGINIA

"The Merrie Circle", another Monday through Friday 5 p.m. favorite, features original children's stories in fantasy by Merrie Virginia. The *Schoewe Shoe Store* contest drew heavy mail response on this show.

★ UNCLE BOB

"The Squirrel Cage" at 4:15 p.m. features Uncle Bob, longtime favorite KEX Kid Star. Uncle Bob receives a heavy volume of unsolicited fan mail the year around.

Youngsters *prefer* KEX Kid Stars and KEX advertised products! Consistent program promotion and personal appearance of stars keep these shows out in *FRONT!*

No other medium in Oregon can equal the tremendous KEX double impact: 50,000 watt coverage plus action-producing KEX Kid Shows. SEE FREE & PETERS NOW for availabilities.

CLOSED CIRCUIT

DON'T LOOK FOR appointments to FCC until after change in administration—or after Jan. 20. To date no appointments for any of independent agencies have been announced. Nothing has developed to disturb view that Vice-Chairman Rosel H. Hyde will be elevated to chairmanship. Virtually same names reported in these columns remain as candidates for FCC post, with considerable correspondence endorsing one candidate or another for two upcoming vacancies piling in at both Eisenhower headquarters at Commodore in New York and Republican National Committee headquarters in Washington.

SEN. HOMER E. CAPEHART (R-Ind.) has two horses running in FCC sweepstakes. In letter to President-elect Eisenhower, Friday, Sen. Capehart recommended Ray S. Donaldson, RTMA attorney, for one of two upcoming FCC vacancies. Donaldson is native of Washington, Ind., was graduated from DePauw U. in 1932, got law degree from Harvard in 1935, served as Senator's administrative assistant from 1946 to mid-1951 when he joined RTMA. As replacement for Democrat T. J. Slowie (salary, $10,800), Sen. Capehart has endorsed Sam Dodd, former manager of WAOV Vincennes, Ind., owned by publisher-broadcaster GOP National Committeeman Eugene Pulliam. Until first of year, Mr. Dodd served in office of Sen. Capehart.

THAT FAME is sometimes fleeting indicated in security check being made by FBI on Arthur Godfrey. FBI Agent traced one prominent broadcasting figure across country to make check in connection with duties to be assigned CBS' one man gang. Godfrey is reserve commander in USNR, aviation, but reportedly is under consideration for Dept. of Defense post —probably advisory.

DON'T BE SURPRISED at "delay" in election of Joseph H. McConnell, former NBC president, as president of Colgate-Palmolive-Peet (story page 24). Colgate by-laws, it's understood, must be changed to permit election of "outsider," and two regular board meetings are necessary to make that change. Next board session scheduled Feb. 11-12 (one was held last week). Meanwhile, Mr. McConnell is scheduled to leave today (Mon.) for extended vacation, mostly in Florida. Slated to return to New York at end of February. which dovetails with original reports he would move to Colgate in early March [B•T, Jan. 5].

THERE IS increased sentiment in Eisenhower top echelon for radio-TV personage in official White House family. Thus it's certainty that James C. Hagerty, press secretary, will have as his right hand bower, one versed in radio-TV, including production end, to handle news contacts as well as presidential appearances. And it's going to be full-time job.

WHEN FCC last week granted Chicago area its first uhf station—Ch. 26 to Rep. Richard W. Hoffman (R-Ill.) owner of WHFC—it at same time had before it uncontested application of WIND for uhf Ch. 20. This was

(Continued on page 6)

MEADE RETIRING AT Y&R; WOLFF WILL SUCCEED HIM

EVERARD W. MEADE, vice president and director of Young & Rubicam's radio-TV department, is retiring effective March 15, and Nat Wolff, vice president in charge of radio-TV production, will succeed him, S. S. Larmon, agency president, disclosed in announcement for release today (Monday).

Mr. Meade, 43, with Y&R for nearly five years and member of its executive committee, is retiring from advertising field to return to his home in Charlottesville, Va., to write for television and lecture on radio and television writing and producing.

Mr. Wolff has been with agency since December 1951 and has been active in writing and producing radio and television programs and motion pictures in Hollywood.

WHITE HOARSE

THAT DEEP hoarseness in Frank White's voice last week was hard-earned, but, colleagues said, well worth it in employe relations. New NBC president. they reported, conferred with members of every department of network's New York headquarters on Monday and Tuesday, first two business days after his election. Colleagues also felt his technique was ingenius as well as effective. In addition to personal approach that goes with small-group meetings, he introduced get-acquainted note by arranging to have groups made up of members of departments that don't regularly come in contact with each other.

TALENT SIGNED BY NBC

HELEN HALPIN, comedienne, and Betty Ann Grove, singer and comedienne, have been signed by NBC to long-term talent-development contract. NBC claims to be first network to sign new talent in this manner.

BUSINESS BRIEFLY

RADIO SPOT ● General Electric TV sets to start additional six-week radio spot announcement campaign on Feb. 2 in areas GE feels need additional promotion. Maxon Inc., New York, is agency.

TEXAS ONLY ● Gillette Co. placing saturation radio spot announcement campaign for eight weeks in Texas only, starting Jan. 19. Maxon Inc., New York, is agency.

KENT TEST ● Kent Cigarettes, through Young & Rubicam, New York, planning radio daytime minutes and participations-program schedule in Miami for 13-week test.

MINUTE POTATO ● General Foods' new product, Minute Potato, which had been tested in Minneapolis and Detroit, expected to use radio spots in Indianapolis next. Firm uses mostly women's participation shows and is expected to go into general expansion schedule if tests prove successful.

21 MARKETS ● General Foods, New York (Wigwam syrup), through Benton & Bowles, New York, preparing radio spot announcement drive to begin Jan. 26 in about 21 markets. One-minute E. T.'s will be used for 13 weeks or longer.

CASHMERE SPOTS ● Cashmere Bouquet, New York, starting radio spot campaign in most markets—with few exceptions—which it previously used. Spots start Jan. 19 to run through to Dec. 31. Agency is Sherman & Marquette, New York.

GEYER NAMED ● Flotill Products Inc., New York (Tasti-Diet), names Geyer Adv., that city, to handle its advertising effective immediately.

NCAA Refuses to End Grid Monopoly

SKELETON coverage of college football in 1953 voted by National Collegiate Athletic Assn. late Friday at annual Washington convention. NCAA adopted its TV Committee policy recommendation by vote of 172 to 13 after brief discussion (see early story page 55).

New NCAA policy follows general lines of 1952 schedule, with general limit of one-network contract, one game per Saturday and one appearance per college. Some relaxation expected, however, to meet public demand for telecasting of games having regional interest.

NCAA's action was criticized Friday evening by Harold E. Fellows, NARTB president. He voiced "deep regret" and said sole responsibility for controlled accessibility to college football on TV rests with NCAA. On behalf of TV industry he opposed any plan that limits program sources available to public.

NCAA TV Committee submitted report to convention Thursday. It expired with Friday's vote and new committee is to be named soon. This group will adopt new plan after hearings and after watching Dept. of Justice case against National Football League, which goes to trial Jan. 26.

Fr. Edmund P. Joyce, Notre Dame vice president, called NCAA's plan artificial control that isn't going to last. He argued NCAA cannot equalize attendance in stadiums or force people to attend games by legislation.

"TV is a great advertising medium," he said, "and should be used to promote football." He said 50 million can see game telecasts Saturday compared to 1½ million who actually go to stadiums. He called NCAA plan reactionary, of doubtful legality and socialistic. He said 1953 program should give more emphasis on academic achievements of colleges. Accumulation of funds for distribution among colleges would be "dangerous," he said, suggesting schools don't share endowments or profits from scientific discoveries.

Francis Murray, U. of Pennsylvania, said TV has not affected gate in that area during 11 years of football telecasting in Philadelphia. "In a short time you'll all be struggling to get on TV," he predicted.

Vote at 1952 NCAA convention for controlled TV was 163-8. Friday's action taken on motion by Robert Browne, U. of Illinois, and second by David E. Reese, commissioner of Mid-American Conference.

INCREASE MEMBERSHIP OF NINE COMMITTEES

SENATE voted Friday to increase membership of nine major committees and to reduce number of committeemen of four committees.

Among committees which will be increased from 13 to 15 is Senate Interstate & Foreign Commerce Committee which has jurisdiction over broadcasting matters.

There has been some talk that House Committee on Committees was planning to cut down size of lower House's committees from 30 to 27.

Among names of prospective new members of Senate Commerce Committee these, among others, have been mentioned during last week: Republicans Francis Case (S. D.), Andrew F. Schoeppel (Kan.), John M. Butler (Md.), J. Glenn Beall (Md.), and Democrats Russell B. Long (La.) and George A. Smathers (Fla.).

Reports also continue to circulate that Sen. Homer E. Capehart (R-Ind.), member of Senate Commerce's communications subcommittee and former radio - phonograph manufacturer, might give up his Commerce Committee post in view of his probable chairmanship of Senate Banking & Currency Committee and desire for post with Foreign Relations Committee.

MORE GROUP D GRANTS

FCC Broadcast Bureau last week approved 12 more requests from pre-freeze TV stations for power boosts. Also, two STA's were granted, and there were four miscellaneous requests granted.

SPECIAL TEMPORARY AUTHORITY GRANTED

WJTV (TV) Jackson, Miss. Granted STA for commercial operation; effective Jan. 10.

WISE-TV Asheville, N. C. Granted STA for interim operation from Beaucatcher Mtn., in Asheville, instead of from site specified in CP. (Station does not expect to go on air for several months, however.)

GROUP D GRANTS
Listed by States

WNBW (TV) Washington, D. C. Granted ERP 100 kw visual, 50 kw aural, antenna height above average terrain 500 ft.

WAGA-TV Atlanta, Ga. Granted ERP 100 kw visual, 50 kw aural, antenna 530 ft.

WSB-TV Atlanta, Ga. Granted ERP 100 kw visual, 50 kw aural, antenna 930 ft.

WHBF-TV Rock Island, Ill. Granted ERP 100 kw visual, 50 kw aural.

WAAM (TV) Baltimore, Md. Granted ERP 26 kw visual, 13 kw aural, antenna 530 ft.

WMAR-TV Baltimore, Md. Granted ERP 100 kw visual, 50 kw aural, antenna 380 ft.

WCBS-TV New York. Granted ERP 42 kw visual, 21 kw aural, antenna 1,300 ft.

WJZ-TV New York. Granted 110 kw visual, 55 kw aural, antenna 1,380 ft.

WNBT (TV) New York. Granted ERP 30 kw visual, 15 kw aural; antenna 1,440 ft.

WOR-TV New York. Granted ERP 316 kw visual, 158 kw aural, antenna 970 ft.

WPIX (TV) New York. Granted ERP 100 kw visual, 50 kw aural, antenna 1,410 ft.

WTVN (TV) Columbus, Ohio. Granted ERP 100 kw visual, 50 kw aural, antenna 540 ft.

OTHER GRANTS

WKAB-TV Mobile, Ala. Granted ERP 270 kw visual, 140 kw aural, antenna height above average terrain 250 ft. (uhf Ch. 48).

WBKB (TV) Chicago, Ill. Granted STA to operate with transmitter output power of 5 kw visual, 2.5 kw aural, until April 4, 1953. Conditional.

KFDA-TV Amarillo, Tex. Granted authority to move studio location to SE intersection of Ong St. (extended) and West Cherry Ave., about 2.8 mi. north of Amarillo city limits.

NBC-TV, New York. Granted extension of authority to furnish XELD-TV Matamoros, Mexico, with kinescope recordings of TV programs until Feb. 1, 1954.

WTVI (TV) NAMES WEED

WTVI (TV) Belleville, Ill.—St. Louis, appoints Weed & Co. as its station representative. Station expects to take air in May.

In this Issue—

Sen. Tobey, slated as chairman of the Senate Interstate & Foreign Commerce Committee, throws a monkey wrench into the proposed merger of ABC and United Paramount. He asks FCC to hold up decision on the case and announces Senate hearings on possible legislation to prevent movies from moving in on TV. *Page 23.*

Justice Dept. seeks to revoke licenses of WDAF-AM-TV Kansas City as part of civil anti-trust suit against the parent company, Kansas City Star Co., charging the newspaper - radio - TV operation with "monopolizing the dissemination of news and advertising." Roy Roberts, chairman of the board and president, says the suit is groundless and politically motivated. *Page 23.*

Baltimore schools are closed by strike of municipal workers, but education goes on over radio and TV. *Page 25.*

Study of department stores' use of radio shows that radio's customary fixed schedules of "same time, same day, same station" won't do for them. Radio should adopt newspaper techniques of "lots of advertising today and little or none tomorrow." *Page 26.*

Political broadcasting law is up for revision in the House. O'Hara bill, which died in 82d Congress, is reintroduced, and Horan bill, also a casualty last year, is scheduled for resubmission. *Page 38.*

Football telecasting problem monopolizes agenda of annual convention of the National Collegiate Athletic Assn. Majority of colleges like the controlled, chosen-instrument policy of 1952. *Page 55.*

Standards of compatible color television system expected to be drawn up at meeting of National Television Systems Committee next Friday. *Page 57.*

FCC wants $8 million budget for fiscal 1954. It's $1,591,540 more than was appropriated for fiscal 1953. *Page 27.*

Gross time sales in 1952 on ABC and MBS, by advertisers and agencies, are reported on *Page 28.*

FCC grants 11 more TV stations, including the seventh non-commercial, educational CP to New York State. *Page 55.*

Upcoming

Jan. 12-13: CBS Inc. board of directors, regular January meeting, CBS Television City, Los Angeles.

Jan. 12-13: NARTB Standards of Practice Committee, NARTB Hdqrs., Washington.

Jan. 14-15: NARTB TV Code Review Board, NARTB Hdqrs., Washington.

(Other Upcomings on Page 38)

Closed Circuit

(Continued from page 5)

passed over because of identity of H. Leslie Atlass, CBS vice president, with WIND along with his brother, Ralph L. Atlass. FCC, it's understood, wanted further information in view of pending acquisition of WBKB (TV) by CBS from Balaban & Katz (United Paramount subsidiary) for $6,000,000. Atlasses, however, are not major stockholders in CBS and it's presumed situation will be cleared up.

SPECTRE OF G. A. (Dick) Richards case has arisen to haunt FCC in GOP party councils. Number of highly placed Republicans feel that FCC hastened death of late principal owner of WJR Detroit, WGAR Cleveland and KMPC Los Angeles in so-called "news-slanting" case. This has caused travail and is mainly responsible for insistent demand that there be "top to bottom" staff reorganization of FCC.

ANOTHER "MARRIAGE" proposal before FCC went by boards last week pending further study. It involves Macon Television Co. (WBML and WNEX) Macon, Ga., for Ch. 47, with "middleman" to hold balance of power. FCC failed to agree, because of prospect that additional UHF channel can be assigned Macon, making possible grants to each party. This on theory that mergers should be considered as last resort, when to do otherwise, would tie up applicants in litigation and deny public of prompt service.

DESPITE proposed increase of $1.5 million in new total of $8 million in budget for FCC for fiscal 1954 sent to Congress Friday (story page 27), FCC spent hapless hours same day trying to solve its personnel-budget problems. Morale at FCC is at low ebb, notably among professionals who fear GOP axing in all branches. Many stenos and typists already have quit and engineers are eying outside prospects which pay infinitely better.

FCC itself isn't deluded by President Truman's proposed budget increase. Members know that new GOP Congress is economy-bent, and that steep cut will be proposed. Between now and June 30, FCC, which has been deficit-spending, must trim its costs to come within its $6 million legal budget.

WHILE NARTB convention programmers are keeping agenda for Los Angeles spring meeting under tight wraps, it's known they plan to upset recent custom by selecting outstanding broadcaster to deliver keynote address.

STAR PLEADS INNOCENT

ATTORNEYS for Roy A. Roberts, president of Kansas City Star Co., and Emil A. Sees, treasurer and advertising director, entered pleas of innocent Friday on anti-trust suit filed by Justice Dept. Pleas with "reservation to withdraw" within 90 days denied by U. S. District Court Judge Richard M. Duncan, who set 60-day limit. Defendants not required to appear for arraignments.

Meanwhile, Sen. Frank Carlson (R-Kans.) charged that allegations in grand jury indictment and anti-trust suit, which asks revocation of WDAF-AM-TV Kansas City licenses, are "punitive action" by President Truman for *Star's* vote fraud exposure. He expressed hope Eisenhower administration will act "courageously" on suit. (See story page 23.)

YOU MIGHT GET A SIX-FOOT MOUNTAIN LION*—

BUT...

YOU NEED THE FETZER STATIONS TO BAG SALES IN WESTERN MICHIGAN!

The double-barreled power of the Fetzer operation, can help you "bag the limit" in Western Michigan. That's WKZO-TV in television, WKZO-WJEF in radio.

TELEVISION

WKZO-TV is the Official Basic CBS Television Outlet for Kalamazoo-Grand Rapids. Its sharp Channel 3 picture effectively serves a 28-county area which boasts 58.1% of Michigan's non-Detroit population . . . 60.1% of its non-Detroit retail sales. WKZO-TV reaches more than a quarter million television homes — or more TV homes than are available in Atlanta, Kansas City or Seattle. And here's the payoff: The October 1952 Videodex Report credits WKZO-TV with 106.1% more *afternoon* viewers than Station "B"—213.4% *more evening viewers!*

RADIO

WKZO, Kalamazoo, and WJEF, Grand Rapids, are Western Michigan's one outstanding radio buy. Both are so far ahead of competition in their home cities that they deliver 57% more city listeners than the next-best two-station choice in Kalamazoo and Grand Rapids. *Yet they cost 20% less!* Rural coverage is tremendous, too. 1949 BMB figures showed that WKZO-WJEF have greatly increased their unduplicated audiences over 1946—*up 52.9% at night, 46.7% in the daytime!* And there is good reason to believe that similar increases have occurred since 1949.

It will pay you to get all the facts—write direct or ask Avery-Knodel.

** J. R. Patterson killed a 276-pound mountain lion at Hillside, Arizona, in March 1917.*

WJEF top4 IN GRAND RAPIDS AND KENT COUNTY (CBS RADIO)

WKZO-TV top4 IN WESTERN MICHIGAN AND NORTHERN INDIANA

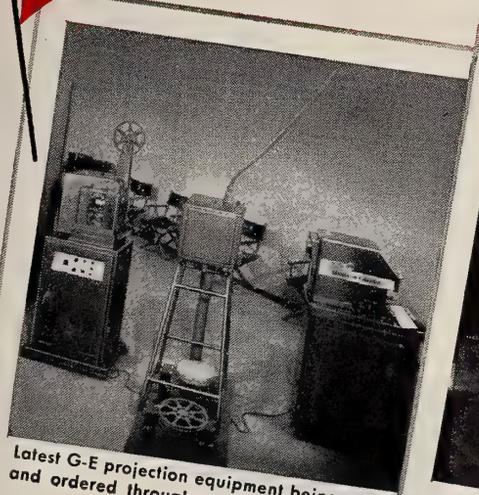
1878 **75** 1953
YEARS OF ELECTRICAL PROGRESS

1928
First demonstration of television broadcasting.
First TV play..."The Queen's Messenger." G-E station WGY, Schenectady.
First "remote TV pick-up" on record. Gov. Smith's acceptance of democratic nomination for President.

1930
First transoceanic TV broadcast. Schenectady, N. Y. to Sydney, Australia.

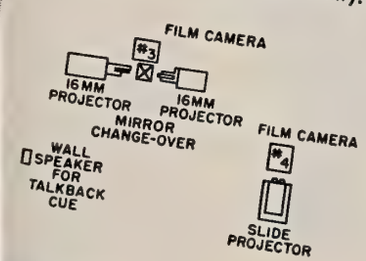
1939
First long-distance reception of modern high definition television...in Schenectady, 129 miles and 7900 feet below line of sight from New York City.

1940
First TV network. New York City programs brought to the Schenectady-Albany-Troy area via 5-hop G-E microwave.
Color television demonstrated.



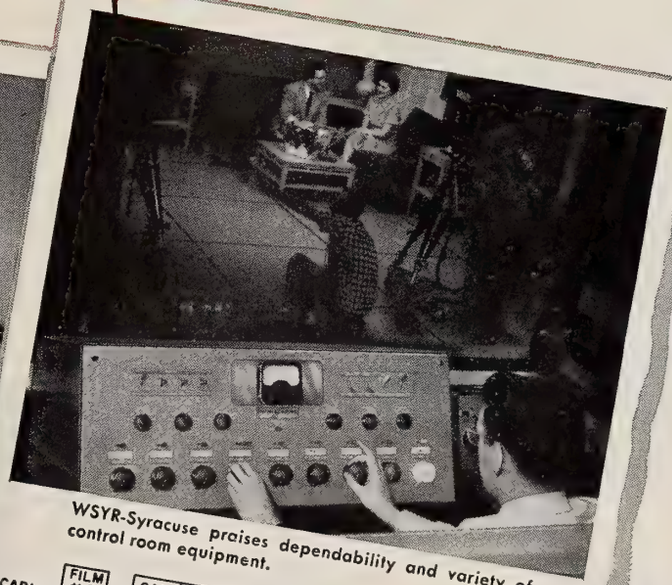
1941
Increased transmitter power to make WRGB the highest power television station in the world.

1950
First high power UHF TV transmitter. High power klystron tube.

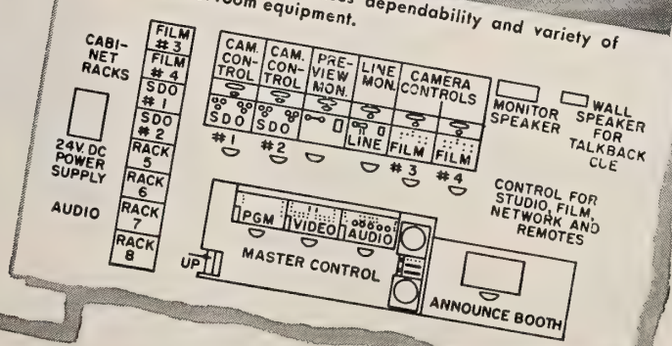


1951
First high-gain side-fire type of helical antenna for UHF TV transmission.

1952
Highest power VHF TV transmitter made commercially available. Power output of 35 kilowatts.



PROJECTION ROOM



Latest G-E projection equipment being used and ordered throughout the country.

on all accounts

MORE old-fashioned integrity and business ethics are needed in advertising today, according to William Thomas Crago, radio-television director of Los Angeles' Leonard Shane Adv. Agency.

Having chalked up more than 20 years in broadcasting and advertising fields, he believes many advertisers and their agencies, in an effort to achieve a quick goal, are by-passing the very virtues that make advertising men and women proud of their profession.

Pointing to the harm done by such methods of operation, he contends that "advertising is one of the major phases of public relations, and, regardless of the media, it is intended to earn lasting friends for the sponsor. It is one of the essential elements in building good will."

Keep it honest and above reproach, is his business philosophy and one which is also maintained by the three-year-old agency with which he is now associated.

A native of Youngstown, Ohio, Mr. Crago completed his formal education in Cleveland. Having a fine baritone voice, he worked in a gas station before and after graduating from high school to pay for singing lessons.

Eugene Carr, now associated with a Canton, Ohio, newspaper and then program director of WTAM and later WGAR, both in Cleveland, took an interest in the youth. Mr. Carr coached him in microphone techniques and later gave him various announcing assignments.

Becoming radio director and copywriter for the Gordon Vichel Adv. Agency in late 1933, the 20-year-old Crago resigned about 18 months later to join Muzak's wired radio in Cleveland as announcer. Next stop was WXYZ Detroit where he was announcer-writer-producer.

Mr. CRAGO

In early 1937 he joined NBC in Chicago as staff announcer. A transfer to WRC and WMAL then the NBC Red and Blue Washington, D. C., stations followed 12 months later. Besides handling news, Mr. Crago did a man-on-the-street broadcast covered a number of special events of national importance and interviewed nearly every important person that came to town.

Besides handling NBC's first full time TV experiment from that city in January 1939, he also announced the third inaugural broadcast of

CRACKER BARREL PHILOSOPHER
.... CRACKER JACK SALESMAN !

Joe Wesp and his mike bring home the bacon when selling the prosperous farmers of Western New York

Down on the farm they all listen to Joe! Yes, every day, Monday through Saturday, the well-fixed farmers of Western New York's rich farm area tune in WBEN to hear what their friend Joe Wesp has to say. For country boy Joe — born and raised on a farm himself — knows the kind of radio programming farmers like, and how to give it to them in their own language. His early morning show features livestock and produce prices, news, music and personal interviews — and best of all, bits of Joe's own brand of homespun philosophy.

Joe keeps his point of view up to date by making frequent visits to his rural friends. His many field trips include cross country buggy jaunts, helicopter hops, and visits to county fairs to record on-the-spot interviews for broadcasting on WBEN.

Count on friendly Joe to sell *YOUR* product in a friendly way to one of the richest markets in rich New York State.

Ask Henry I. Christal, about availabilities on WBEN's daily farm program — 5:30-6:00 A. M.

PURINA Salutes the WINNING STATIONS

in their BOWL GAME

FARM RADIO MERCHANDISING CONTEST

RADIO PUT THESE "LIVE DEMONSTRATIONS" OVER WITH A BANG

RADIO AGAIN PROVES TO BE POWERFUL LOCAL PROMOTION FOR PURINA DEALERS

The twenty-three radio stations whose pennants fly over the Purina Bowl Game stadium on the opposite page are the cream of the crop of America's farm radio merchandisers. Because they know how to make farm radio really sell at the local level, two representatives of each station received all-expense trips to New Year's Bowl Games at Purina's expense. They were accompanied by the Purina Dealers they had helped during September, October and November with local store promotions.

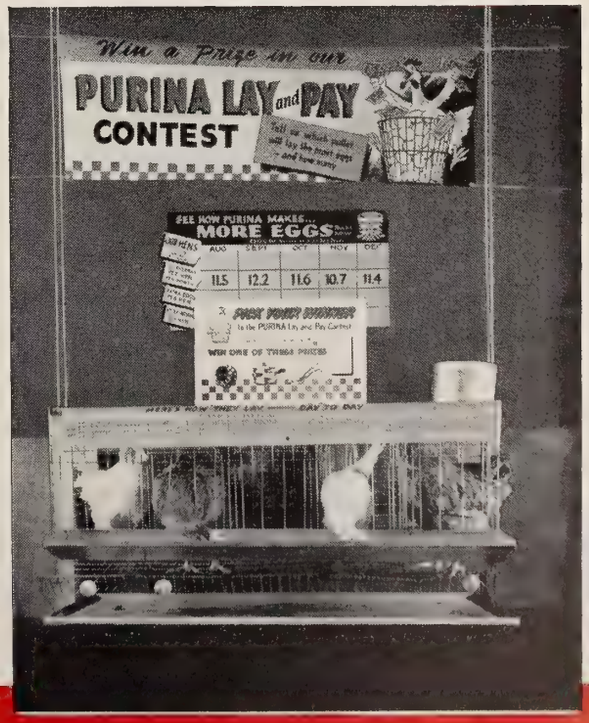
ENTRIES DOUBLED IN '52

Competition was keen and the judges had a hard time picking the winners. There were twice as many entries as in 1951. And almost every one represented an outstanding local promotion job—a magnificent example of cooperation between station and dealer at the local level.

IDEAS UNLIMITED

The job was to help Purina Dealers promote two live demonstrations in their stores . . . the "Mike & Ike" pig-growing demonstration and the "Lay & Pay" egg-laying demonstration. Radio made these demonstrations into community projects known to every man, woman and child. There were pig scrambles, parades, dances, entertainments, fund-raising devices, contests and many more promotion ideas. They built store traffic and increased sales and prestige for the Purina Dealers. They put the radio stations in the community spotlight, too.

We thank every station, winner or loser, for the many jobs well done—for proving again that there's real power in radio. In the entries we have the proof. And as a result we say more enthusiastically than ever—"*Purina believes in farm radio!*"



RALSTON PURINA COMPANY

G. M. Philpott, Vice-President and Advertising Director

Maury Malin, Advertising Manager Purina Chows Division

MIKE and IKE Two pigs grown in the store to demonstrate the value of proper feeding.

LAY and PAY Five hens, each from a local poultryman's flock, compete for egg-production honors.

RCA ANNOUNCES

A new advanced film–camera for television..

THIS NEW FILM CAMERA does for TV film presentations what RCA's new TK-11A studio camera is doing for "live" pick-ups. The TK-20D camera provides a remarkable advancement in picture quality and operating convenience over former types—puts "live" quality into films regardless of scene content or shading. Low picture noise level compares with the low noise level of "live" pick-ups.

Operated in conjunction with an RCA TP-9B Film Multiplexer, one TK-20D Film Camera provides show continuity with any one of the following set-ups: (1) two RCA TP-16D 16mm Film Projectors, (2) two RCA TP-6A Professional Film Projectors, (3) two RCA 35mm Film Projectors, (4) one 16mm and one 35mm Film Projector, (5) or one projector of either type and a slide projector.

With TV programming emphasis more and more on films, let us help you get the most from film—with the new TK-20D. Your RCA Broadcast Sales Representative is ready to help you plan the right film system for your station—*with everything matched for best results!*

Iconoscope beam current control, with indicator. A new arrangement that takes the guesswork out of day-to-day adjustments—provides a standard of comparison to help the operator adjust for optimum picture quality. The panel mounts on the housing of the film camera console, or in the remote control console.

... Type TK-20D

- "Live" quality all the time—regardless of scene content, shading, or other adjustments. New back-lighting system, and new automatic black-level control permits the TK-20A virtually to run itself!

- "Noise-free" pictures comparable to "live" shows. New high-gain cascode preamplifier, with "noise-immune" circuits, offers 200-to-1 improvement in microphonics. No high-frequency overshoot (trailing white lines). No low-frequency trailing (smear).

- Good-bye edge flare. New edge-lighting system provides substantial reduction in stray light, improves storage characteristic, stops light beam reflections on Iconoscope mosaic. Adjustable light level is provided.

- No more a-c power line "glitches" (horizontal-bar interference)—because camera filaments are operated from a separate d-c source.

- Faithful, high-quality pictures every day—through new beam-current control circuit. No more need to "ride" the shading.

feature of the week

HOW radio—virtually single-handedly, among advertising media—built the Me Too Supermarkets in Iowa from a single store to a chain of nine, now grossing some $7 million annually, is detailed in a new presentation prepared by BAB for its members.

The eight-page booklet, released last week under the title, "The White Elephant that Radio Put in the Black," notes that Me Too started in 1937 in an old Cedar Rapids post office building which was purchased at a "White Elephant sale." The booklet continues:

"Nine cents out of every dime it spends directly for advertising its merchandise goes to radio. . . . All of its regular advertising, including the all-important Thursday effort, is by radio only. And in large part it's been that way throughout the past 14 years."

The Me Too radio formula is based on a daily "radio special" advertised on WMT Cedar Rapids—a different leader offered each day at a money-saving price to draw store traffic for both the specials and the full line of merchandise. The booklet reports:

"Me Too's advertising adds up to about six minutes of commercial time spread over 30 minutes of programming Monday through Friday; three minutes of commercial time in 15 minutes of programming on Saturday.

"It isn't much time, and in view of the gross it brings in, it isn't a very large advertising percentage (an expenditure to WMT of $14,000 annually, to realize a gross volume of upwards of $7 million—a direct advertising budget of 0.2 of 1%); but the Me Too management believes it's enough for right now.

"It's enough because if customer traffic were increased much more, the stores would need elastic walls. But most importantly, it's enough because of the way those six minutes are used, and because of the merchandising theory and practice behind those six minutes."

The chain has used no daily newspapers in the past year and a half, the booklet reports.

strictly business

IN these days of hard selling, the relationship of a station with its representative looms important.

Nobody knows this better than Clark N. Barnes, Hollywood manager of Headley-Reed Co., station representative firm. His advice for radio selling is the common sense approach that must be used in any selling job—"sell them [the agency or advertiser] on yourself and your integrity.

"In such a personal service business, you must know your properties, disseminate the right information, and if you don't know the answers, find out PDQ," he says.

Mr. Barnes has been in the business five years, starting in Hollywood as manager of Burn-Smith Co. and now with Headley-Reed since June 1951.

While he cut his teeth on radio, Mr. Barnes welcomes TV and looks forward to increasing the firm's current list of nine TV stations.

The "big future," as he puts it, is in video representation: "No one knows the limitations yet—it is like a giant slowly being awakened—but unquestionably station representatives will grow."

Mr. Barnes was born in Des Moines 38 years ago. He attended the U. of Colorado at Boulder, was a Beta Theta Pi and was graduated in 1936 a major in economics.

Mr. BARNES
. . . *radio and TV a combination.*

* * *

He spent three years in sales, mostly in the industrial field, before deciding to enter radio. He did so by enrolling in the Drake U. School of Radio in his home town.

First he concentrated on preparing himself on sports announcing (he has been a baseball participant and fan since childhood).

With two schoolmates and $100

we don't have a list . . .

"as long as your arm"

And, frankly, it's not because we couldn't have! Rather, H-R has a policy, born the day this organization was started three years ago, that it's better to do a REAL selling job for a limited number of stations than it would be to do a mediocre job for many.

It's not our ambition to be the *biggest* rep in the field but rather to be known as the *best*. And with that aim in view, we also have the policy of hiring only the best of men . . . hiring one man at a salary that might well be paid to two of lesser ability.

These are just two of the policies which have paid handsome dividends to our member stations. When you are thinking of national spot, we ask you to remember that H-R Representatives is the organization that always sends a Man to Do a Man's Work.

TOBEY ASKS FCC DELAY

In ABC-UPT Proposed Merger

By EARL B. ABRAMS

WITH approval of the merger of ABC and United Paramount Theatres Inc. virtually decided last week, Sen. Charles W. Tobey (R-N. H.) stepped in and made all guesses as to the outcome of the two-year-old case inconclusive.

In a wire to FCC Chairman Paul A. Walker Wednesday, Sen. Tobey implied he wanted the FCC to hold up action on the case.

He also said he was preparing to hold a hearing on the possible need for legislation to ban the amalgamation of motion picture and TV interests as tending to monopoly.

Intervention of the chairman-to-be of the radio-powerful Senate Interstate & Foreign Commerce Committee almost ensured that the final decision on the ABC-UPT merger would not be forthcoming for at least another fortnight—and certainly not until after the Inauguration of President-elect Dwight D. Eisenhower and his Republican administration.

The Commission on Tuesday discussed the Paramount case and, according to best information, a majority was in agreement that the merger should be approved. Before final action comes, however, at least three additional meetings of the FCC are indicated.

In effect, the Commission majority was prepared to accept the blanket approvals recommended by Examiner Leo Resnick in his initial decision last November [B•T, Nov. 17, 1952].

Hennock Opposition

It was understood that Comr. Frieda B. Hennock continued to oppose the merger and indicated that she would dissent. This was in line with her questioning during the day-long oral argument held Jan. 5. She is seeking staff assistance on accounting and economic aspects, it is understood.

Although Comr. Edward M. Webster did not indicate he was opposed to the merger, it was understood that he was unhappy about the legal technicalities of the transfers from the old Paramount Pictures Inc. to the new producing and theatre-owning company. This, too, he had expressed during the oral argument.

Sen. Tobey's message, by wire, was received at Chairman Walker's office Wednesday. In it he:

(1) Questioned the legality of the proposed merger.

(2) Raised questions regarding the need for legislation to prevent the combination of motion picture and TV companies on the theory that motion picture interests may dominate TV.

(3) Declared that he intended to have his committee hold hearings on the subject in two weeks.

(4) Asked Chairman Walker to distribute copies of his wire to all Commissioners so they would have time to prepare for such a hearing.

(5) Said that his committee wanted to look into the educational TV situation.

At week's end the Commission had not decided what to do about this request to postpone action on the merger. However, it was felt that the Commission would delay taking final action until after the Congressional hearings proposed by Sen. Tobey.

Sen. Tobey's interest in the ABC-UPT merger case is not new. While in Paris, as a UNESCO delegate, the New Hampshire Republican cabled Chairman Walker that he was "shocked" by the examiner's initial decision proposing the grant of the merger applications [B•T, Dec. 8, 1952].

Same attitude toward the initial decision was expressed by Sen. William Langer (R-N. D.), scheduled to assume the chairmanship of the Senate Judiciary Committee [B•T, Dec. 8, 1952].

Talked With Johnson

It was learned that Sen. Tobey talked with Sen. Edwin C. Johnson (D-Col.), outgoing chairman of the Senate Commerce Committee, and told him what he was planning to do. A check with several other holdover members of the Senate Commerce Committee showed he had not conferred with them.

During the oral argument, Sen. Tobey was in attendance during the morning hours.

Also in the audience at the oral hearing were former Sen. Burton K. Wheeler, radio-newspaper columnist Drew Pearson, as well as executives of parties in the case—ABC's Edward J. Noble, Robert E. Kintner and Robert H. Hinckley, UPT's Leonard H. Goldenson and Robert H. O'Brien, Paramount Pictures' Barney Balaban and Paul Raibourn, among others.

Ex-Sen. Wheeler's firm represents Zenith Radio Corp., TV applicant for Chicago's Ch. 2. This is the frequency UPT's WBKB is scheduled to move to under the FCC's Sixth Report and Order. As part of the merger deal, CBS is scheduled to buy WBKB from the merged company for $6 million. Zenith is contesting WBKB's move to Ch. 2 without a hearing.

Although the prime purpose of

WDAF ON GRID

Justice Asks Revocation

IN AN unprecedented move, the Justice Dept. last week called for revocation of licenses of WDAF-AM-TV Kansas City, Mo., in a civil anti-trust suit against the parent Kansas City Star Co.

The department announced the suit on the heels of a grand jury indictment charging the publishing firm with anti-trust violations. The company was accused of "monopolizing the dissemination of news and advertising" in Kansas City.

In an equally unprecedented move, The Star Co., instead of issuing a reply, bought display space in leading publications answering the suit. Roy A. Roberts, president, expressed "complete confidence" in the outcome.

Atty. Gen. James P. McGranery said the Justice Dept. would seek an injuction to enjoin "a continuation of the charged violations and to restore competitive conditions." The company publishes the *Kansas City Star* and *Times* and owns WDAF-AM-TV.

The department said it would ask the courts to revoke the radio-TV licenses of the Star Co. under provisions of Sec. 313 of the Communications Act—a request without precedent in broadcast annals.

The indictment, returned by the Federal Grand Jury in Kansas City last Tuesday, alleged that advertisers who bought time on WDAF were given "special discounts" (combination unit rates) for advertising in the newspapers, and that advertisers not using the papers "have been denied access to the *Star's* television station." It charged advertisers were induced to buy time on WDAF with special discounts, from 1933 to 1937.

Named as defendants, along with The Star Co., were Mr. Roberts and Emil A. Sees, treasurer and director of The Star Co. and advertising director of the evening *Star* and morning *Times*. They were to be arraigned before U. S. District Court Judge Richard M. Duncan last Friday morning.

To Ask Bill of Particulars

Mr. Roberts said the company will file a motion for a bill of particulars "so we may know just what specific allegations we have to meet and to prepare our defense." He stated it would "meet the charges headon" and "there will be no effort to quash or delay the anti-trust indictment." He added the firm would insist "on an early trial, confident that complete vindication will come from the court and jury."

Mr. Roberts also answered the government's anti-trust charges with a scathing statement imputing political motives to the outgoing Democratic administration dating back to the *Star's* probe of the celebrated Kansas City vote fraud case in 1946.

Local Washington, D. C., attorneys and FCC legal experts agreed that the request for license revocation is without precedent, though such action is clearly within the purview of the Communications Act. No such action, for example, was sought in a similar anti-trust action filed against the New Orleans Times Picayune Co. (*Times-Picayune* and *Evening States* and WTPS-AM-FM).

The U. S. District Court in New Orleans upheld certain charges and dismissed others on a complaint also involving combination unit rates for advertising in newspapers under common ownership.

The U. S. Supreme Court last November agreed to review the case March 9. A decision would have a direct bearing on the Kansas City case, it is believed.

In explaining its stand in half-page ads in leading newspapers throughout the country The Star

ZIV CAMPAIGN

Set for Lombardo-Gruen Show

PLANS for all-out advertising, promotion and merchandising campaigns for the new Guy Lombardo-Gruen radio show and other Ziv radio programs scheduled for 1953 were outlined last week at a Frederic W. Ziv Co. radio sales convention in Cincinnati.

In welcoming the salesmen, Frederic W. Ziv, founder and president of the company, reaffirmed his faith in radio as the "advertiser's best buy when properly and skillfully merchandised and promoted."

Alvin E. Unger, vice president in charge of radio sales, pledged that Ziv radio will continue an aggressive campaign during the coming year. He said Ziv will offer stations, advertiser and agencies many new programs, merchandising and promotional aids to assure sponsors "more than their share of 1953 business."

"We are going to support our radio advertisers and stations even to a greater degree than in the past," Mr. Unger promised. "And what's more, we are going to do this all year long."

In preparation for the campaign, Leo A. Gutman Jr., director of advertising, reported he has increased his budget and enlarged his staff.

Merchandising Plans

In announcing the campaign on behalf of the Lombardo program, Mr. Unger cited a merchandise tie-in whereby each sponsor will receive $2,500 worth of Gruen watches to distribute to his local audience. Additionally, Mr. Unger said, Ziv will implement a plan whereby each sponsor's dollar spent on radio will help his point of purchase dollar, and each point of purchase dollar will help his radio dollar.

Mr. Unger said all radio stations carrying the Lombardo program will receive free announcements cut by Mr. Lombardo, which may be used as station breaks, and other aids.

FREDERIC W. ZIV Co. welcomes two new salesmen into the organization during Cincinnati sales convention. L to r: Sid Freeman, Great Lakes Div. sales manager and longtime Ziv salesman; Frederic W. Ziv, Ziv president; Jack Skinner, new salesman for the Indiana area, and Russ Stone, new salesman for the Buffalo, N. Y., district.

NETWORK BUYS

L&M, Beltone, Wood, Jergens Sign

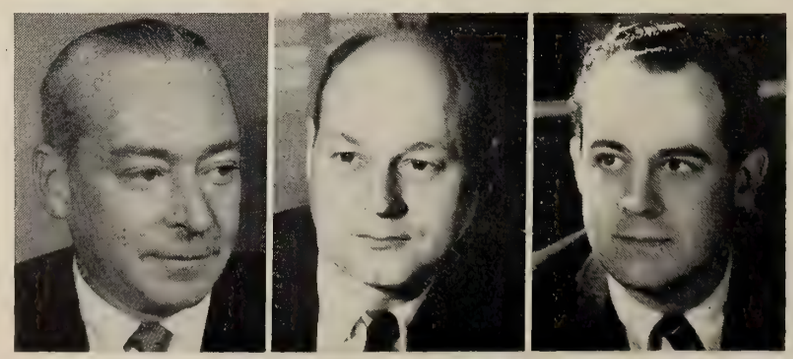
NETWORK time sales were given an added boost last week with contracts for new shows by four advertisers, two signing with ABC, one with CBS Radio and the other with Mutual.

Liggett & Myers, New York (Chesterfield cigarettes), effective Jan. 26 will sponsor a five-minute news show, *Les Griffith and the News*, five times weekly on ABC radio, 7:55-8 p.m. EST. The contract, placed for Chesterfield by Cunningham & Walsh, New York, is for 52 weeks. The newscast will embrace headline news of national and international import.

Beltone Hearing Aid Co. will sponsor *Life Begins at 80*, for one time only (Wednesday) 8:30-9 p.m. also on ABC. Olian Bronner Inc., Chicago, placed the contract. The show is heard on 108 ABC radio stations.

Andrew Jergens Co., Cincinnati (Jergens Lotion and All Purpose face cream), will sponsor *Time for Love*, a new weekly series of dramatic programs starring Marlene Dietrich, on CBS Radio effective Jan. 15. Miss Dietrich will play the role of Leda Saint-Ange, a mysterious international chanteuse who is followed all over the world by Michael Victor, a writer, who narrates each weekly story.

Agency for Jergens is Robert W. Orr & Assoc., New York.



J. R. Wood, New York (rings, diamonds and other jewelry), will sponsor a quarter-hour radio show featuring Lanny Ross, effective March 1, on Mutual. The program will be heard Sunday, 1:15-30 p.m. EST. BBDO, New York, agency for Wood, placed the contract for 52 weeks with 13-week options.

N. Y. Headquarters

NEW YORK offices of BROADCASTING • TELECASTING are moving today to 444 Madison Ave. The old address was at 488 Madison. Telephone number will remain Plaza 5-8385.

F&P Elects Hoag

HAL W. HOAG, western manager of Free & Peters, now in his 15th year with the firm, has been elected a vice president of the station representative organization, it was announced Wednesday by H. Preston Peters, president. Announcement followed a dinner in New York Tuesday at which Mr. Hoag received a scroll naming him "Colonel of 1952." Jones Scovern, eastern sales manager for radio, was "Colonel" for 1949, when F&P began the custom of so recognizing unusual growth and contribution to its business. Bill Bryan, Detroit manager, was 1950's "Colonel." In 1951, the title was not given to any individual but to the Chicago radio office as a unit.

THREE Young & Rubicam vice presidents have been appointed to newly created posts of senior vice presidents. They are (l to r) Frank Fagan, with the firm since 1934; Harry Harding, with Y&R since 1943, and William H. Howard, who has been there since 1949. All three men will report to Louis N. Brockway, executive vice president, and each will have executive responsibility for a specific group of accounts.

C-P-P BOARD

Ups Sims, Mute on McConnell

THE BOARD of directors of Colgate-Palmolive-Peet Co. last Thursday elected William L. Sims 2d as president of Colgate-Palmolive International, a new corporation, but took no action on the expected election of former NBC President Joseph H. McConnell as president of the parent company [B•T, Jan. 5].

Failure to act on the McConnell move was construed to mean it was not on this meeting's agenda —and not that it had been considered and action deferred. Although C-P-P has contended from the outset reports linking Mr. McConnell with the Colgate presidency were "premature," reliable sources just as steadily have maintained the reports will be proved true.

Feb. 11-12 Meeting

Next C-P-P board meeting, it was reported, is set for Feb. 11-12. There was no indication that Mr. McConnell's name either would or would not come up at that time. Earlier reports, however, indicated he was expected to join Colgate about March 1.

Mr. McConnell's resignation from NBC and the election of Vice President and General Manager Frank White to succeed him both as president and as member of the NBC board of directors were announced Jan. 2. At that time, and since, NBC officials have declined to comment on Mr. McConnell's future plans except to say he left "to join a company in another industry, and his new position will be announced by that company in the near future."

E. H. Little, Colgate's present president, who is expected to become board chairman upon Mr. McConnell's assumption of office, announced election of Mr. Sims as president of the new Colgate-Palmolive International, formed to aid in coordinating Colgate's foreign operations, carried on through 25 subsidiaries, four branches and an export department.

Other Board Actions

Mr. Sims also was elected to the executive committee of C-P-P and will continue as executive vice president in charge of its foreign business. The announcement said Colgate employes outside the U. S. number about 9,900 and that Colgate's foreign sales in 1951 exceeded $122 million. Sales for 1952 have not been disclosed.

BBDO's Duffy to Talk

BEN DUFFY, president of BBDO, New York, will speak Wednesday at a luncheon of the New York Young Men and Young Women's Republican Clubs, discussing "Campaign Advertising."

BALTIMORE SCHOOL STRIKE

Educators Laud Radio-TV Aid

By JOHN OSBON

EDUCATORS last week raised their voices in acclaim for commercial broadcasters who helped Baltimore weather a storm precipitated by a strike that capsized two-thirds of the city's public schools.

The Baltimore experiment in air education proved a spontaneous success as radio and television once again demonstrated their value in an emergency, beaming classes at some 80,000 pupils kept home from over 100 of the city's 175 schools.

So keen was the interest that newsmen from out-of-town magazines and newspapers converged on Baltimore to get a first-hand view of education over commercial broadcasting facilities in an unprecedented local crisis.

Interest in this experiment, in fact, exceeded that in the strike of the city's municipal workers, who forced schools to close for lack of heat. There were indications late Thursday that schools would reopen shortly.

The Baltimore Dept. of Education took a sample random survey of a few thousand pupils in half-a-dozen schools and reported that attendance at their telesets was nearly 100%—though many pupils themselves indicated they would prefer education in the classroom rather than by television.

Dr. William Lemmel, superintendent of public instruction who rallied support for the radio-TV classes and organized the experiment, termed response of broadcasters, "most heartening."

Favorable Comments

Jack Dey, member of the Dept. of Education's radio-TV section, said there was considerable favorable comments from educational, civic and religious groups and lauded broadcasters for their cooperation. Mr. Dey worked along with Eleanora Kane, of that section, supervising some of the telecasts.

Dr. Harry C. Byrd, president of U. of Maryland, also acknowledged support of the industry. He told BROADCASTING • TELECASTING that stations had done a commendable job. He acknowledged that many educational institutions might find it difficult to raise funds for television stations to present programs on a regular basis.

Dr. Byrd spoke at a *McCall's* magazine awards dinner in Baltimore Thursday evening, but did not comment specifically on the city's school emergency. He cited TV's tremendous potentialities.

Credit for proposing the TV classroom plan to the Board of Education goes to WBAL-TV, which offered its facilities immediately after the strike was called New Year's Day [AT DEADLINE, Jan. 5]. Suggestion that all Baltimore radio-TV outlets participate was part of the proposal.

D. L. (Tony) Provost, vice president and general manager of WBAL-AM-TV, noted the station's policy on community service and stated:

"Since this is the first time that television has been used to such a large extent for educational purposes, it will be interesting to watch and see how effective teaching by television can be. Certainly the commercial broadcasters have proved once again that they will do everything possible in an emergency, whether it be for education or for anything else."

Mr. Provost said he felt that this experiment "could very well decide whether or not it is advisable for educational institutions to build television stations of their own." He noted the Board of Education's sample survey indicating many pupils' preference for education in the classroom.

Some educators were not immediately prepared to evaluate the success of the TV classes. The Board of Education said beforehand there would be "defects" and the experiment would be "something less than perfect."

A *Washington Evening Star* staff correspondent, Jack Jonas, summed it up this way:

"It would have to be more lively to compete with space cadets and cowboy heroes—not enough Indians were biting the dust."

The strike was called New Year's Day, forcing closure of 107 of the city's 174 public schools. Some 3,300 employes, including janitors, refuse collectors, engineers, firemen and other municipal workers, were involved.

37 Hours Offered

The job of allocating classes to the different radio and TV outlets fell to the Baltimore Dept. of Education, which found itself hard pressed to fill some 37 hours of air time per week offered by cooperating commercial broadcasters.

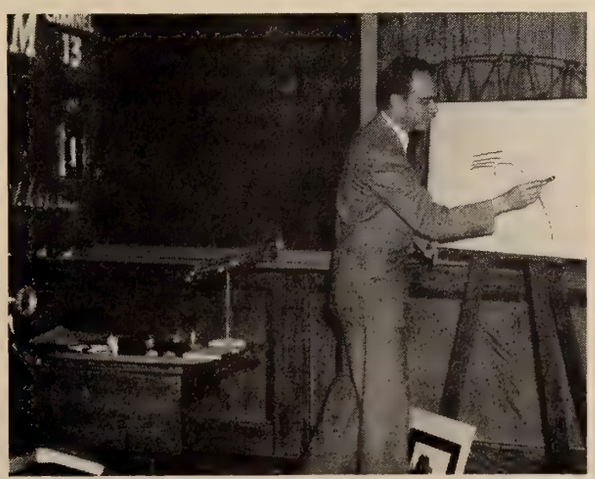
Mr. Dey of the department's radio-TV section broke the schedule down this way: WBAL-TV and WAAM (TV), two hours per day; WMAR-TV three hours per week; WFBR, one hour per day, and other stations varying amounts of time.

Mr. Dey stressed that the department's decision to press the WBAL-TV proposal into action was based on a desire to continue "some education during the emergency period." School authorities stressed that TV programs were not intended to "replace completely classroom instruction but would serve as a value addition to the other homework which pupils were given to do."

WBAL-TV and WWIN carried programs of elementary instruction, while lessons for junior and senior high school and vocational schools were broadcast over WFBR and telecast by WAAM.

WBAL-TV's schedule was tailored for elementary school students, with science of toys, 10-10:30 a.m.; arithmetic, 10:30-11 a:m.; and art and language arts, 11 a.m.-12 noon —Monday through Friday.

WAAM coverage consisted of science at 12 noon, modern language (German, Spanish) at 12:15 p.m., and fundamental skills Wednesday only at 12:45 p.m. A culture session was telecast at 1:30 p.m. and aeronautics principles were also outlined. The two-hour emergency schedule for secondary school students was supplemented by three regular weekly shows.



WMAR-TV was booked for Maryland history (all grades), Tuesday and Thursday, 2-2:30 p.m. and vocational classes 11 a.m. Thursday, according to Robert Cochran, program director of the station. It carried civic courses for high school students on a Mon.-Fri. schedule, 3-3:30 p.m. WMAR-TV offered the department 12 hours of sustaining (and some commercial) time, between 9 a.m. to 4 p.m. Language, arithmetic and other "basics" also were telecast. Mr. Cochran described the reaction as "enthusiastic."

Commenting on WFBR's role in

(Continued on page 69)

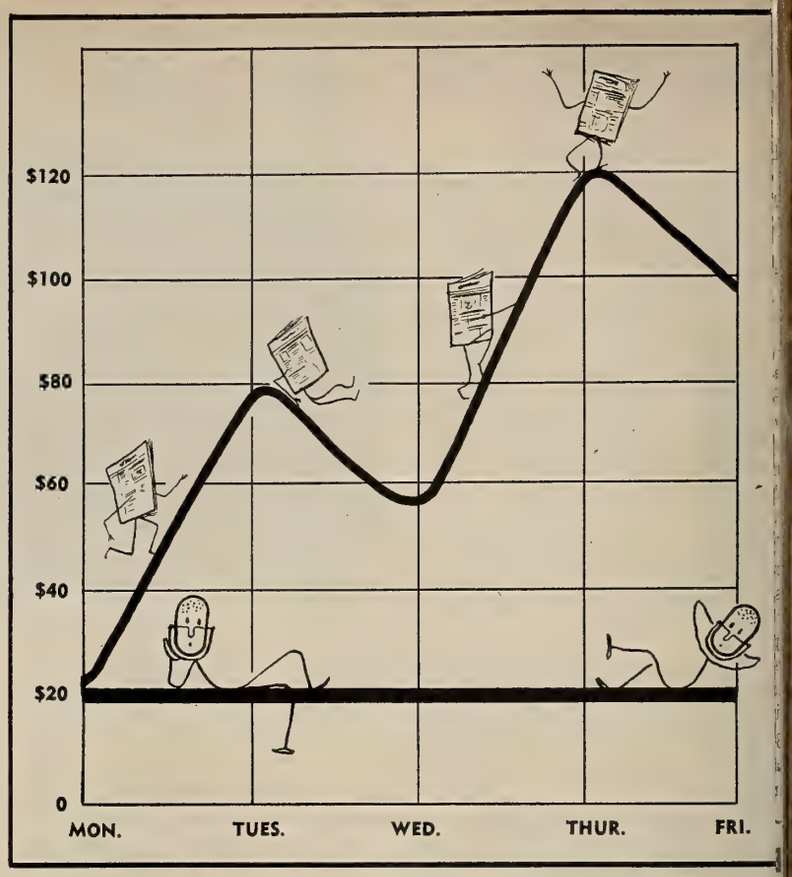
OPENING classes for elementary pupils were telecast by WBAL-TV as part of its two-hour-per-day schedule. Teacher is explaining workings of a thermometer to one of handful of pupils at WBAL-TV studios. Station carried TV lessons during morning hours.

SECONDARY school students were given courses each day over WAAM (TV) Baltimore during the strike. Before camera is Malcolm Davies, science instructor at Baltimore Polytechnic Institute.

TEACHERS of Baltimore schools gathered in studios of WFBR to conduct classes for pupils. Bill LeFevre (standing near microphone), staff announcer, briefs them before program gets underway.

Newspaper Technique Suggested for Radio

THE BEST way to sell radio to department stores is not by the familiar, consistent, day-after-day, week-after-week, "same time, same station" pattern of radio, but in the "lots of advertising today and little or none tomorrow" formula of store advertising in newspapers.



That is not only the best way to sell stores on using radio, but it's the best way to make them regular radio advertisers, because it's the way that pays off best for them and produces sales at a lower cost than newspapers do.

Those conclusions are drawn from Department Stores Study reports of results of more than six months' use of radio advertising by a typical store (Pomeroy's) doing an annual business of $3 million in a market of 25,000 population (Pottsville, Pa.). These conclusions are confirmed by the experiences of other department stores in other localities, according to DSS.

The simple graph in the chart at right, covering the Monday-Friday segments of a one-week period of department store newspaper and radio advertising in one market, contrast the typical "peak and valley" pattern of the store's use of newspaper space with the "horizontal pattern" of radio.

The newspaper pattern coincides with the buying habits of the community and with the normal department store practice of placing its advertising accordingly. But it is easy to see, as DSS points out, that "radio has been trying to sell itself *against* the normal department store promotional pattern. Thus radio became most prominent in use during the stores' promotional valleys. As such, *it stood out* in poor selling times and became relatively inconspicuous during promotional peaks.

"Radio's fixed schedules called for commercials when store people were at their lowest point of promotional enthusiasm," DSS explains. "Psychologically, this made radio somewhat of a nuisance. More important, it brought to radio for selling, a poor selection of items, poorly written commercials and a great deal of institutional activity." (With most store advertising costs allocated to the departments whose merchandise it advertised, specific item ads are favored and institutional advertising considered more or less of a waste, in department store circles, except on special occasions.)

Newspaper buying varies, in comparison with radio's set pattern during the week

* * *

Identification Stressed

An illustrative case history cited by DSS reports on a store whose "schedule of radio usage consisted of an across-the-board nighttime news program. In this five-minute segment there was room for store identification at the beginning and end, *which the store discounted as almost without real value*, and time for one full-minute merchandise item in the middle.

"The store thus thought of this program as one spot and used it for one item for five days ('used' is correct; the program was cancelled). The cost was approximately $100 for the week. *Not one department in the store could afford to continue this advertising at this cost.*

"Now compare this with what the store is doing now. The $100 buys 20 daytime participation spots. Four items on an average are promoted with these spots and *all on the store's normally peak days when results are easy to get.* Cost per item averages $25."

Newspaper techniques should also be followed for store advertising copy on the air, DDS said. Note the below copy in a store ad. The largest type goes to announce the price, second largest to identify the item advertised, with the description subordinated, whether in words or illustration. Headlines are the important things; they should be that way on the air as well.

"Make your copy headline copy," says DSS. "Give the merchandise, the price, the store name, and then repeat these, then a brief description (and make it *very* brief and to the point), then the merchandise again and the price again . . . then the store name and the store hours —preferably only nights open information."

Stores like this kind of advertising, DSS notes, because it's the kind they're familiar with. It is also good because, by creating store traffic, it refutes the frequent store executive argument that people don't remember radio commercials but can always go back to a newspaper ad. Finally, this type of radio sells merchandise, as test after test has proved.

In one continuing series of tests, in which the same items were advertised one week on the air, the next in the newspaper (or vice versa), with the same amount of money spent with each medium, DSS found radio consistently outselling newspapers. In a nine-week period, radio sold $2,491 worth of merchandise to $1,956 worth sold by newspaper space.

An interesting sidelight is that radio's inability to illustrate the

$8 MILLION FOR FCC

Asked in '54 Budget

PRESIDENT TRUMAN last Friday asked the Republican-controlled 83d Congress for $8 million to run FCC's fiscal 1954 operations. The figure is $75,000 shy of the request made a year ago, but $1,591,540 more than Congress appropriated last summer for fiscal 1953.

FCC would receive $1,667,074 for broadcast activities, a boost of $499,051. The additional money, according to Mr. Truman, would be used to "handle the substantially increased workload in processing applications for new television stations."

The 82d Congress last summer appropriated $300,000 additional to speed processing of TV applications. During Senate and House Appropriations Committee hearings, it was emphasized the extra funds were to pay for more examiner teams.

Before passage of this appropriation, FCC had seven examiner teams. It now has 13. It can be assumed that should this Congress grant the new increase requested and earmark it exclusively for the hiring of examiner teams, FCC could add at least another 10. An examiner team is made up of the examiner, attorney, engineer, accountant and clerical help.

The budget delivered to the new Congress was Mr. Truman's last as President. It can be expected that the GOP Congress will scrutinize the budget very carefully. The President's other budget requests were presented to Congresses in which the Democrats were in the majority (except for the 80th Congress).

Committee Chairmen

Sen. Styles Bridges (R-N. H.) is slated to chairman the Senate Appropriations Committee and Rep. John Taber (R-N. Y.) is expected to head the committee in the House.

Here is the budget's breakdown of broadcast activities for fiscal years 1951, 1952, 1953 (estimated) and 1954 (also estimated):

	1951 actual	1952 actual	1953 estimated	1954 estimated
Stations regulated as of June 30 of each year	3,153	3,280	3,758	3,958
Applications disposed of for new stations or major changes of facilities:				
AM	466	270	290	505
FM	172	135	129	145
TV	26	92	448	521

The other part—and the lion's share—of the more than $1½ million increase requested would be used to "strengthen radio-monitoring and enforcement activities including the establishment of new monitoring and direction-finding facilities," Mr. Truman said. FCC long has been seeking more funds for its monitoring activities. But Congress never has been receptive.

Overall, Mr. Truman requested more than $4 billion beyond U. S. expenditures for fiscal 1953 which ends June 30. This fact alone most likely will put Congress into an economy mood.

Here is the complete breakdown by activity of the 1953 budget of FCC followed by the 1954 request:

Common carrier, $704,390, $775,051; applied technical research and frequency allocation, $386,643, $488,796; field engineering and monitoring, $2,313,271, $2,843,312; safety and special radio services, $585,928, $716,458; broadcast, $1,168,023, $1,667,074, and executive, staff and service, $1,252,377, $1,514,609.

Proposed increase in field engineering and monitoring "is primarily for the establishment of two new monitoring stations and for placing secondary monitoring stations on 24-hour operation," the Chief Executive said.

Voice Request

Voice of America would receive nearly $50 million under the budget (see more detailed story, page 43).

The Federal Trade Commission would be appropriated $1,111,600 for fiscal 1954 for investigation and litigation in its "anti-deceptive practices." This branch of FTC takes action against false and misleading advertising. The figure compares to $1,107,886 spent last year.

FTC also would get nearly $4,000 more for its "trade practices conferences," which come under anti-deceptive practices.

Next step on Capitol Hill is for the appropriations committees in both branches of Congress to hear testimony from the agencies involved. They can be expected also to hear top finance officials in the new Eisenhower Administration.

CBS BOARD MEET

Features L. A. Facilities Tour

CBS Inc. board of directors will hold its regular January meeting in Los Angeles today (Monday) and tomorrow, it was announced last week.

Business sessions will take place at Television City, and an inspection tour of CBS Radio, CBS-TV and Columbia Records Inc. facilities in the Los Angeles area has been arranged. Expected to attend are the following board members:

William S. Paley, CBS chairman of the board; Leon Levy, Personal Investments; J. A. Iglehart, partner, W. E. Hutton & Co.; Dorsey Richardson, vice president, Lehman Corp.; Ralph F. Colin, Rosenman, Goldmark, Colin & Kaye; Frank Stanton, CBS president; Edward R. Murrow, CBS Radio and CBS-TV news analyst.

Frederick L. Chapman, partner, Barrett Herrick & Co.; Bruce A. Coffin, president, Hytron Radio & Electronics Co.; Lloyd H. Coffin, chairman of the board and treasurer, Hytron; David H. Cogan, president, CBS-Columbia Inc.; Adrian Murphy, CBS Radio president, and J. L. Van Volkenburg, CBS-TV president.

CBS-TV Sales Shifts

THEODORE F. SHAKER, account executive in CBS-TV Spot Sales Chicago office, moves to the New York office in the same capacity Feb. 2, while Bruce Bryant, a TV sales staff member of Edward Petry Co., joins CBS-TV Spot Sales in Chicago Jan. 19, it was announced last week. Mr. Shaker has been an account executive in the network's Chicago office since 1951 and before that was in the television sales department of The Katz Agency. Mr. Bryant had been with Petry four years and before that was with ABC radio spot sales in Chicago.

BING CROSBY (c), singing star and board chairman, Bing Crosby Enterprises Inc., Beverly Hills, Calif., with Wayne R. Johnson (l), TV project engineer, and John T. Mullin, chief engineer, examines section of Minnesota Mining & Mfg. Co. magnetic tape used on new sight and sound VTR (Video Tape Recorder) being developed by the Crosby firm [B•T, Jan. 5]. Mr. Crosby holds interest also in KXLY-TV Spokane.

'Silver' Record Issue

CLAIMING the phrase, "Hi, Ho, Silver," its personal property, Lone Ranger Inc. has warned the Trenier Twins, Hollywood song and dance team, and Columbia Records, not to release a new recording by that title made by the entertainers and Okay Records, a Columbia subsidiary. Lone Ranger Inc. also demands that the entertainers refrain from publishing the song through Mobile Music Co.

WMGM SALE

Lebhar to Buy for $2 Million

NEGOTIATIONS for acquisition of WMGM New York by Bertram Lebhar Jr., director of the station, in a $2 million deal with Loew's Inc., present owner, were nearing completition last week. The station (50 kw on 1050 kc) is one of the nation's leading independents.

Mr. Lebhar acknowledged that discussions are in progress and said he hoped to have a statement ready shortly. He said Loew's had given informal approval but pointed out that the board's official approval, as well as that of FCC, is needed.

Under the terms of the proposed agreement, Mr. Lebhar would pay Loew's $500,000 in cash and the remainder at a rate of $150,000 a year for 10 years. The sale would be subject to the usual FCC approval.

Mr. Lebhar also said he would give the new corporation a 10-year contract on his services and undertake to get similar contracts from his key executives. Additionally, he said the plan called for him to attempt to secure a $2 million policy on his life, with the new corporation as beneficiary.

To raise initial funds for capitalization of about $770,000 the new corporation would enlist the aid of advertisers through five-year contracts for time on WMGM, Mr. Lebhar said, noting that this offer would be available to advertisers not now using the station as well as to present sponsors.

Mr. Lebhar, 45, has been with WMGM since 1939, when he joined the station (then WHN) as director of sales. He became director in 1949, and the same year formed MGM Radio Attractions. Aside from his administrative and sales duties, he is a widely known sportscaster under the name of Bert Lee, and is one of the top-ranking contract bridge players in the country. He broke into radio as a salesman with CBS when WOR was CBS' New York key station, and subsequently served in a sales capacity with WOR and WMCA New York before moving to WMGM.

ABC '52 GROSS

Radio Up $1 Million, TV Off

COMBINED gross time sales of ABC's radio and TV networks in 1952 totaled $52,088,456, roughly half a million dollars ahead of the 1951 total of $51,539,771 gross, ABC reported.

ABC total radio time sales for 1952 were $34,391,316, the network estimated, up slightly more than $1 million from the 1951 gross of $33,242,182, while gross TV time sales aggregated $17,697,140 in 1952, down $600,000 from the 1951 TV gross of $18,297,589.

General Mills was top ABC radio client for the seventh consecutive year, with total expenditures of $5,745,055 for ABC radio time. This company also was the number one user of ABC's TV network, with total time purchases of $2,090,483 for 1952.

Dancer - Fitzgerald - Sample ranked first according to the amount of billing placed on ABC's radio network—$5,818,090—and J. Walter Thompson Co. second—$2,421,559. These two agencies have ranked one-two on the ABC radio roster since 1946, the network reported.

D-F-S also was the top agency in 1952 with ABC-TV time placements for its clients. Gross time purchases were $3,295,001. Second agency for ABC-TV was Kenyon & Eckhardt, whose clients used $1,410,989 worth of ABC-TV time during last year.

Analysis of ABC advertisers by type of industry shows that food and food products advertising ranked first in both radio—where this type of advertising accounted for gross time sales of $11,590,356—and in TV, where the food gross was $5,633,877.

On the ABC radio list, drugs and toiletries ranked second, with total time purchases of $7,061,742, followed by tobacco products, $2,988,367.

ABC-TV category breakdown found the radio, refrigerator and household appliance class in second place, with gross billings of $2,283,756. Drugs and toilet goods ranked third, with total expenditures for ABC-TV time of $2,060,573.

The radio billings, broken down by advertisers, agencies and classifications, follow. Detailed breakdown of TV billings will be published next issue.

MBS TIME SALES

Gross Gains 17% in '52

MUTUAL Broadcasting System's gross time sales during 1952 totaled $21,004,976, the network reported last week, noting that the figure included actual sales for 11 months, with December estimated.

Billings, a gain of 17% above the MBS 1951 gross time sales, cover the use of the network's facilities by 86 advertisers who used an average of 407 MBS stations, 15% more than in 1951. Their business was placed through 62 advertising agencies.

S. C. Johnson & Son was Mutual's leading sponsor last year, spending $2,050,194 for time on this network. Sterling Drug ranked second, with MBS time purchases of $1,828,720. P. Lorillard Co. was third with $1,379,535, followed by Miles Labs., $1,252,606; American Federation of Labor, $1,204,352, and Quaker Oats Co., $1,040,047.

Needham, Louis & Brorby, agency for S. C. Johnson & Son, not unnaturally turned out to be top agency from the standpoint of volume of time purchases during the year. The $2,941,743 worth of MBS time placed through this agency included purchases for Derby Foods and State Farm Automobile Insurance Co. as well as for Johnson's Wax Products.

J. Walter Thompson Co. ranked second among MBS agencies, placing $2,038,667 worth of time on that network for Johns-Manville Corp.; Kraft Foods Co.; Libby, McNeill & Libby, and Credit Union National Assn. Dancer-Fitzgerald-Sample placed third, spending $2,034,865 for MBS time for Sterling Drug and Falstaff Brewing Co.

Other agencies placing $1 million or more business with MBS during 1952 include Lennen & Newell; Geoffrey Wade Adv.; Furman, Feiner Co., and Sherman & Marquette.

Advertising for drugs and toilet goods comprised the largest volume of MBS advertising of any class of client, buying $5,796,733 worth of Mutual time last year. Food and food products were second with $3,012,572; laundry and household supplies next with $2,073,212, and tobacco products fourth with $1,701,663.

Breakdown of the 1952 billings follow:

Like champagne goes with caviar

Successful advertising goes with W-I-T-H just like champagne goes with caviar! And how the local merchants do know it! *W-I-T-H regularly carries the advertising of twice as many of them as any station in town!*

Here's why: W-I-T-H delivers more-listeners-per-dollar than any other radio or TV station in Baltimore. And this BIG audience, at such LOW rates, produces *low-cost results!*

W-I-T-H can do it for you too. Get in on this *natural* combination—low-cost, resultful advertising and W-I-T-H. Your Forjoe man will give you all the details.

IN BALTIMORE

W-I-T-H

TOM TINSLEY, PRESIDENT • REPRESENTED BY FORJOE & COMPANY

Visitors at WFAA 30th Year Radio Fair requested more than 85,000 photos of their favorite stars

Reuben Bradford separating the grand and the opera

life began at 30...

They're never too old or too young to enjoy the Shindig

The news writer's "30" marks the finish of his story. To Radio Station WFAA, "30" symbolizes its Thirtieth Year of leadership . . . a year of great accomplishment, a vigorous advancement at a time when others cowered, fearful for the future of radio. With the successes of 1952 highlighted on these pages secure in its belt, WFAA strides forward with daring and dramatic sureness into 1953.

Joe Reichman is always a great showman

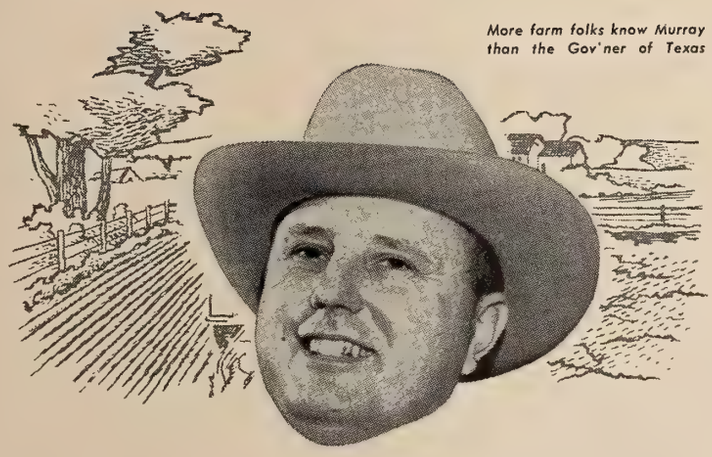
WFAA 30TH ANNIVERSARY RADIO FAIR

The week of June 23rd more than 30,000 friends poured through WFAA's penthouse studios — from daylight to 10 P.M. — to enjoy continuous audience shows, shake hands with their favorite WFAA personalities, view colorful, dramatic historical and merchandise exhibits, win prizes!

MURRAY COX, R.F.D.

Broadcaster, traveler, editor, promoter . . . leading exponent of Southwestern agriculture, now in his seventh year as Farm Director of WFAA. His 3rd annual WFAA Farm Tour last spring conducted 218 enthusiastic farmers and ranchers through the Corn Belt, into Canada, and the New England states. Recognized "one of the best friends of farmers of Texas," and for his tireless and conspicuous work in behalf of soil conservation and pasture improvement, Murray's 6:30 morning and noon daily programs are closely followed by commercial farmers and ranchers throughout the WFAA area, to the great benefit of agriculture, his sponsor and WFAA.

JOE REICHMAN



Less than a year ago this big name bandleader-showman switched horses at the height of his career to join WFAA. Reichman's genius fuses a wealth of music, incidents, personalities and showmanship into delightful, informal shows that quickly gained him a strong following and six sponsors for 24 quarter-hours a week!

REUBEN BRADFORD — "OPERA ONCE OVER LIGHTLY"

Good natured spoofer, Reuben takes the "grand" out of grand opera, and introduces the beauty of its music to the man in the street. The general appeal of Reuben's witty, unique commentaries brought his program to the attention of NBC* — and a network contract.

**Listen each Saturday 8:30 P.M. EST — your favorite NBC station.*

for WFAA!

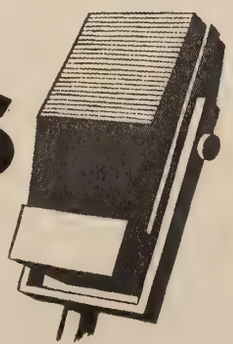
More farm folks know Murray than the Gov'ner of Texas

WFAA SATURDAY NITE SHINDIG SHOW

The largest folk and country music stage show and broadcast in the Southwest was opened by WFAA at the State Fair of Texas, October 4-18, 1952. A fast paced four hours of hilarious entertainment — the Shindig's company of fifty artists, two bands, an emcee, two comics, a quartet, four top recording stars, and frequent booking of top guest stars*, are drawing an increasing paid attendance.

**Spike Jones Revue, Jan. 17*

NEW TALENT



Forty radio and stage artists were added to the WFAA roster during the year, greatly broadening the station's public appeal and the variety of its programming at every taste level.

These were our laurels of 1952. They are recounted in proof of WFAA's reluctance to stand still . . . of its ability to ever step forward. Our plans are continual. Life *began* at 30 for WFAA. By *began* we mean these were first steps in increasing our service — that in 1953 WFAA shall be more exciting, more entertaining, more interesting to our audience . . . and more productive and profitable to our advertisers.

FOREIGN FILMING

Council's Opposition Mounts

ENCOURAGED by the responses from agencies and sponsors, Hollywood AFL Film Council last week voted to step up its campaign to discourage "runaway" production of TV films, described as the making of pictures abroad to escape payment of higher technicians' wages in this country.

Roy M. Brewer, council chairman, said several top agencies and advertisers have assured him their plans for making TV films abroad have been cancelled. To give wider coverage to its campaign, the council appointed a committee to contact all other producers, distributors, agencies and sponsors who might go abroad for their filmmaking.

The committee includes Adolph Thomas, chairman of its foreign film production committee; Pat Somerset, assistant executive secretary of Screen Actors Guild, and Howard Costigan, IATSE public relations director.

Advertisers not acceding to the council's request face a national AFL "do not patronize" boycott.

Advertisement

The Kansas C
To The Gove

The following statement on behalf of The Kansas City Star is made by Roy A. Roberts, president of the company, concerning the anti-trust charges brought by the government:

"The Star will look with complete confidence to courts and the jury for vindication on the charges brought by the government in both the complaint in the civil suit and the indictment for alleged violation of the Sherman anti-trust act. Our business practices, covering nearly three-quarters of a century, have been an open book, still are, and conform to the law and good morals.

"The Star will meet the charges head-on. The most precious thing a newspaper possesses is its integrity, the confidence of its readers and community. There will be no effort of any kind to quash or delay the anti-trust indictment.

"Both the indictment and the civil suit are of the shotgun variety. The allegations of both are couched in language of such vague generality as to time and otherwise that we cannot at once prepare for trial because we are not sufficiently informed of what the government is complaining of.

"Naturally, we will file appropriate motions, such as for a bill of particulars, so that we will know what we have to meet and prepare our defense accordingly. There will be no unnecessary delay on our part in bringing these actions to a final hearing.

All One Newspaper

"The government under its complaint charges monopolization. It seeks, for instance, to destroy the basic structure upon which The Star's circulation has been maintained for more than a half century. We publish one newspaper. We give the subscriber a morning, evening and Sunday edition for one price.

"That service was started in 1901 by Col. W. R. Nelson, founder of The Star. It has never been challenged until now, two weeks before the present administration retires from office.

"The Star gives its readers the greatest bargain in the country. We deliver morning, afternoon and Sunday editions for 40 cents a week in Kansas City and all our territory. We have the lowest subscription price anywhere in the world. The morning edition covers twelve hours of news; the afternoon edition twelve hours of news.

"In 1903, The Star put into effect combined advertising rates for morning and afternoon on general and classified advertising. That practice has never been challenged on a 12-hour paper until now. We have maintained one of the lowest milline rates, if not the lowest, in the entire country. If we forgot entirely, say, the morning edition, and charged the combined rate simply for one edition, it would still be lower than the average advertising rate of the major newspapers in the country. Again, two weeks before the Truman administration goes out of office, this practice is challenged.

A Pioneer in Radio

"The government seeks to have The Star divest itself of both its radio and television stations although Congress has repeatedly refused to pass legislation conferring such powers. The Star went on the air for the first time in 1922, among the first five radio stations in the United States, long before there was even a station in New York, for instance.

"We pioneered in this field because we felt it was an opportunity to serve our community. We took a financial beating for years. We were one of the first five stations that constituted the original N. B. C. network, being the westernmost outpost at the time. The government on radio complains of a rate practice prevailing only from 1933 to 1937 and long since abandoned. **Not until now—two weeks before the end of the Truman administration—has any governmental agency challenged our conduct of radio.**

"The government seeks to have The Star divest itself of its television station, WDAF-TV. The same opportunity was open to any other applicants to go into the television field when we did. The facts are losses then being suffered by television were so terrific that everyone hesitated to take the risk.

No Favors From Administration

"The Star believed Kansas City was entitled to television service and chose to pioneer this new service as it had in radio, and expected it would take big losses. Fortunately, it turned out the other way. Goodness knows, the outgoing administration certainly wouldn't have given The Star any preference or favors on a license if there had been anybody else ready to take the risk.

"The Star has never purchased or consolidated any of its competitors since 1900. It has consistently followed through the years the policy of tending to its own business, and getting out the best paper at the cheapest subscription price and lowest advertising rates possible. Most of the time its rates have been the lowest in the country. The government complains that The Star bought certain properties from the bankrupt and now defunct Kansas City Journal. The facts are the Journal had been closed three years when there was an auction sale to dis-

y Star Makes Reply ment Anti-Trust Suits

ose of the equipment. We bought a ew linotypes, second-hand typewriters, hich were then hard to get, and cer- ain empty file cabinets and the library f the Journal. Previously we had had fire in our library at The Star and he files for several years were either damaged or destroyed. We replaced hese damaged files and volumes and ave the remainder of the Journal ibrary to the State Historical society. That's what that charge amounts to.

"Not once, but several times, The Star was given the opportunity to purchase the Journal before and after it suspended. We always refused to do so. When the Journal closed, we did not start to trim expenses but immediately increased them, taking on every news service that we did not then have until today The Star has at least as many, or more, news services than any other one newspaper in America. The fact that we were alone in the town was not of our making and we have constantly sought to keep in mind our responsibilities.

"The Star, against which the government took action, is one of the unique institutions in the United States in its ownership. It is solely owned by the people who work for it. There are more than 250 stockholders. Every share of stock is optioned to employees as may be designated by the board of directors. When any individual dies or leaves the paper his stock is immediately bought and resold to those actively engaged in making the paper. The largest stockholder has less than 15 per cent of the total holdings. Members of the board of directors and management all came up the hard route from the bottom and now run the various departments.

"The government complains that since the Journal folded in 1942 our subscription rates have been increased because we have an asserted monopoly.

Newspaper Expenses Up

"Of course, costs have forced every newspaper everywhere to increase its subscription price. Newsprint in 1942 cost $48 a ton. Today it is $127. The Star's pay roll has gone up from approximately 2½ million dollars in 1942 to almost 7 million a year in 1952, an increase of 185 per cent. Taxes have gone up from 1942 to 1952 a total of 265 per cent. All these items have increased roughly twice as fast as the subscription price. Nothing better illustrates the ridiculousness of this charge of the government.

"The basic theory underlying both the indictment and the civil complaint of the government is that The Star has attempted to create a monopoly in this territory. **Anybody with the slightest knowledge of business knows that the greatest factor in forcing consolidations and the involuntary discontinuance of newspapers, which is all very regrettable, is the government itself. The tax burden has become so terrific only the strongest papers can stand up under it. Newspapers have had to increase both subscription and advertising rates in a mad race to keep up with costs.**

"As rates go up, advertisers necessarily concentrate their spending in the papers that do the best job for them. All the anti-trust suits in the world will not stop this trend unless the government itself can get taxes down. This trend is eliminating newspaper competition. Almost as big a factor has been the tremendous increase in newsprint prices, equipment costs and labor costs. Those are the major factors that are creating situations which the government seems to be complaining of.

"Of course, no purported charges of coercion can or will be sustained. They are contrary to the facts and policies of The Star.

On a 26-Year Period

"Until the indictment was returned, The Star had never been informed of what the anti-trust division was complaining of or seeking action on. Nearly seven months ago The Star was served with a catch-all subpoena to produce books, records and documents of business transactions covering a period of more than twenty-six years. This included every conceivable record, bit of correspondence and otherwise, which any business institution might accumulate over a quarter of a century. We had been charged with nothing. The government simply walked in and subpoenaed the records. The fact that the anti-trust division was conducting the investigation was the only clue The Star had as to what might be involved.

"The Star said it had nothing to hide and would turn over to the government such of its records and documents as it then had available, as the agents might specify. We supplied them office space and equipment in The Star building. The agents were there for months. Not until twenty-four hours before the indictment was returned were any officials of The Star called before the grand jury and then only for a few perfunctory questions and identification of some documents. The so-called investigation was not an investigation as the public would conceive it, but an inquisition, entirely one-sided. There was no opportunity given to interview witnesses nor did the government agents seek to get from The Star any answers or explanations of anything about which they might have complaint. They didn't want our story.

"More than 250 witnesses were brought before the grand jury—not only local, but from all over the country. More than 1,000 subpoenas were served for records, letters and documents, anything pertaining to business transactions with The Star for a quarter of a century. Not until now was any information imparted as to the nature of the government's complaint. All this took the government agents seven months. It necessarily will require a reasonable time for The Star to investigate so as to prepare its defense.

A Bother for Customers

"This inquisition proceeding has presented a serious harassment to many customers of The Star who have had to spend days going over records and looking up documents and having their representatives interviewed by government agents. The Star is very appreciative of all the time and effort they spent and feels that the great majority know the facts as we know them.

"Without any intention of throwing a smoke screen or diverting attention from the charges leveled by the government against The Star, we can't refrain from commenting on the remarkable contrast in the zeal of the Department of Justice in this proceedings against The Star and their strange lack of zeal when an election fraud scandal was before them back in 1946.

"The Star has made many fights for honest elections here. Back in the late '30s, at the hey-day of the Pendergast machine's power, The Star conducted an exhaustive campaign against ballot-box stuffing. The administration in Washington then threw the FBI with all its force behind our campaign. Indictments were brought against 278 defendants. Sixty-three were convicted by juries. Thirty-six pleaded guilty. One hundred and sixty entered pleas of nolo contendere and received fines and jail sentences—only nineteen were discharged. More than 50,000 fraudulent names were eliminated from the registration books. That was when Roosevelt was President. We thought that was the end of election frauds here.

"But in 1946, back they came again. The Truman administration sought to purge Representative Roger Slaughter. A White House-picked candidate was put in against him. Evidently that was taken by the politicians as a signal that everything was jake. At any rate the primary election returns were so obviously fraudulent that The Star once more renewed its fight. More than sixty investigators were hired, most of them young law students in our local law school. With our reporters as instructors, a training school was set up. Together they canvassed the suspicious precincts, going from door to door and room to room. Glaring evidence of wholesale fraud was uncovered in a most systematic way.

Slow on Vote Investigation

"This evidence was offered both to state and federal prosecuting authorities. But this time the FBI, for reasons then unknown, did not come into the case. Later it developed they had been put under wraps. There was a strange lack of interest by the Department of Justice from top to bottom.

"It was disclosed later that the FBI by direct order from the top had been restricted to a strictly limited investigation and interviewed just six persons in Kansas City. It's a long story, but, in a few words, the government took the position that if there was any crime, it came under state jurisdiction. The public responded to this muzzling of the investigation by electing a new prosecuting attorney who called a state grand jury and went into the ballot boxes.

"It was found there was far more fraud than even The Star's investigation had revealed. The vote thieves hadn't even gone to the trouble of stuffing the ballot boxes. They just altered the returns. The evidence was there. But in the early morning of May 27, 1947, an explosion blast ripped open the steel vault in the election board office in the courthouse. The sheriff's office was on the top floor. The police department was across the street. This vault had been piled high with sacks of ballots and poll books. Gone were the ballots from thirty-two of the thirty-four precincts the county grand jury had investigated plus the tally sheets from nineteen of the precincts. Gone was the evidence.

Points to a Contrast

"The same administration, or Department of Justice, which had refused to interest itself in the case, suddenly found it was a federal offense and turned the FBI loose. But it was too late. The trail was cold; the evidence gone. We cannot help but wonder at the contrast in the conduct of the two investigations.

"Despite this indictment, there will be no relaxing in any degree of The Star's efforts against ballot-box stuffing, ghost voting and all the other fraudulent devices to defeat the processes of honest elections.

"The Star assures its readers and this community that it has conducted its business in an honorable way throughout these years. It expects to continue to do so in the years to come. Its endeavor will be constantly to keep improving and getting out a better newspaper and to be ever on the job fighting for this community and this territory."

RADIO-TV TAKE

Was Campaign's Biggest

"IT may never be known what methods of campaigning had the greatest effect in the 1952 elections —but if money outlays are taken as the index, broadcasting can make the best claim to the honor."

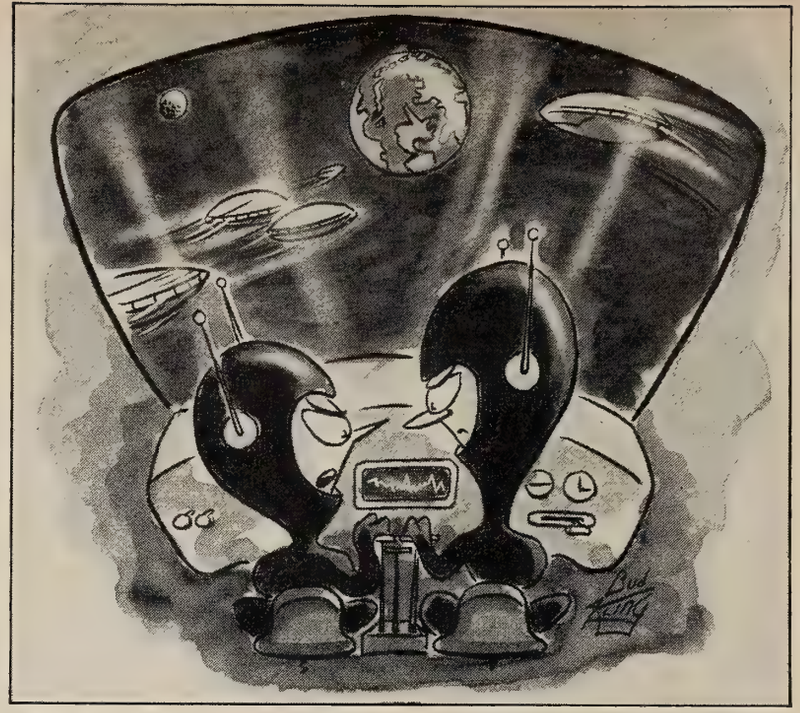
This reflection on the "high cost of campaigning" was contained in a report submitted to the 83d Congress by the Special House Campaign Expenditures Committee and published last Friday.

The committee, headed by Rep. Hale Boggs (D-La.), reported broadcasting expenses constituted the largest items of expenditures for both parties, including several independent committees—both for radio and television.

The report quoted political witnesses who appeared during committee hearings last month [B•T, Dec. 15, 1952] as feeling unanimously that the "spectacular growth of TV" the past four years was a major cause of "vastly increased" costs in the last campaign.

The Boggs committee also noted prospects for continued growth of television, reciting testimony by NARTB Government Relations Director Ralph Hardy. Among other things, Mr. Hardy had pointed out time costs actually were only a small part of overall expenses in television that also included line charges and operation outlays.

Mentions Walker's Views



The report also mentioned FCC Chairman Paul A. Walker's views on advisability of amending the Communications Act covering political libel and censorship, which the committee endorsed (AT DEADLINE, Jan. 5).

The report referred to Stephen Mitchell's testimony that his Democratic National Committee spent $400,000 out of $3 million on broadcasting, and that the Stevenson-Sparkman Forum Committee was believed to have spent between $700,000 and $800,000 on broadcast time. It noted a report by a representative of Volunteers for Stevenson that the volunteers spent $421,000 for network and $77,000 for spot radio-TV out of a total of $740,000 (of which $49,000 was for newspapers). Democrats' most expensive outlay was $120,000 for a Madison Square Garden rally.

The Citizens for Eisenhower spent $634,000 out of $1,145,000 for broadcast time, including $267,000 for the election eve rally on major radio-TV networks.

Both the House group and the Senate Privileges & Elections Subcommittee have issued reports on the extent of broadcast expenditures by political parties, the latter as part of its own special inquiry [B•T, Jan. 5].

The Senate unit still is compiling data before it submits its final report. Both groups agree present ceilings on campaign expenditures ($3 million for each major political party) are unrealistic and that present election laws should be revised.

"The first thing I want to find out is what they call a disc jockey."

Newspaper Technique in Radio Selling

(Continued from page 26)

advertised item proved an asset rather than a disadvantage. Private brand, low-price household appliances, for example, drew people to the department when advertised on the air, when the illustrations in the paper failed to attract by not jibing with the reader's preconceived idea of how the appliance should look. Once in the department, the prospect frequently rejected the advertised appliance only to buy a name brand article at a higher price, a step-up sale not made to the newspaper reader who did not visit the store.

In another series of DSS experiments, radio was used on Sunday in markets where there are no Sunday newspapers to promote store traffic—and sales—on Monday, normally a slow day for stores in those cities. Inexpensive merchandise, advertised at a special one-day price reduction, failed to increase store traffic on the off days, but when high-priced items were advertised as one-day specials customers did come in.

For peak day advertising, however, radio proved as good or better than newspapers in selling coats, dresses, brassieres, hosiery and other standard soft goods items, using 48 spots, six to each of eight items. They combined to make a "mass impact" on the listeners but when broken up costwise by items had a per-unit promotion cost well within any department's budget.

"Mass impact" for special promotions can also be achieved at a minimum cost by an adaptation of the hitch-hike technique. A New England store had just been appointed Girl Scout Headquarters for its market and had put in a full shop of Girl Scout equipment. The store at that time was using five radio stations, advertising a total of 19 items with about eight spots devoted to each. Copy for each spot was shortened by nine seconds and a recorded announcement on the Girl Scout Shop inserted after the regular commercial. "The Girl Scout Shop did over $300 worth of business the opening day; they had expected to do nothing," DSS stated. In subsequent weeks the store applied this hitch-hike technique to its radio advertising to announce on Sunday that a store-wide sale had been extended from Saturday to Monday (one and a half times the normal dollar volume for Monday was done); to call for full-time and part-time help for the holiday season (swamping the personnel department); to announce the Christmas Trim-a-Tree Shop (with highly satisfactory results).

Hitch-Hikes Effective

Hitch-hikes have also proved an effective promotion for store charge accounts, DSS reports, but to promote the use of coupon books more copy is needed, 100 words at a minimum.

Coupon book sales normally hit five peaks a year—before Christmas, Easter, Mother's Day and Father's Day and the opening of school. Experimenting in radio promotion of off-season sale of coupon books, DSS used 20 spots a day for the last five days of October with the usual free gift gimmick (a sample bottle of perfume). "Sales rose 62% above normal for the period."

The DSS studies may be summed up in this way. Presented properly, radio can be sold to department stores. Used properly, it will sell merchandise and at a cost per dollar of sales produced lower than newspapers can deliver.

KGW PROTEST

Hits KOIN Amendment

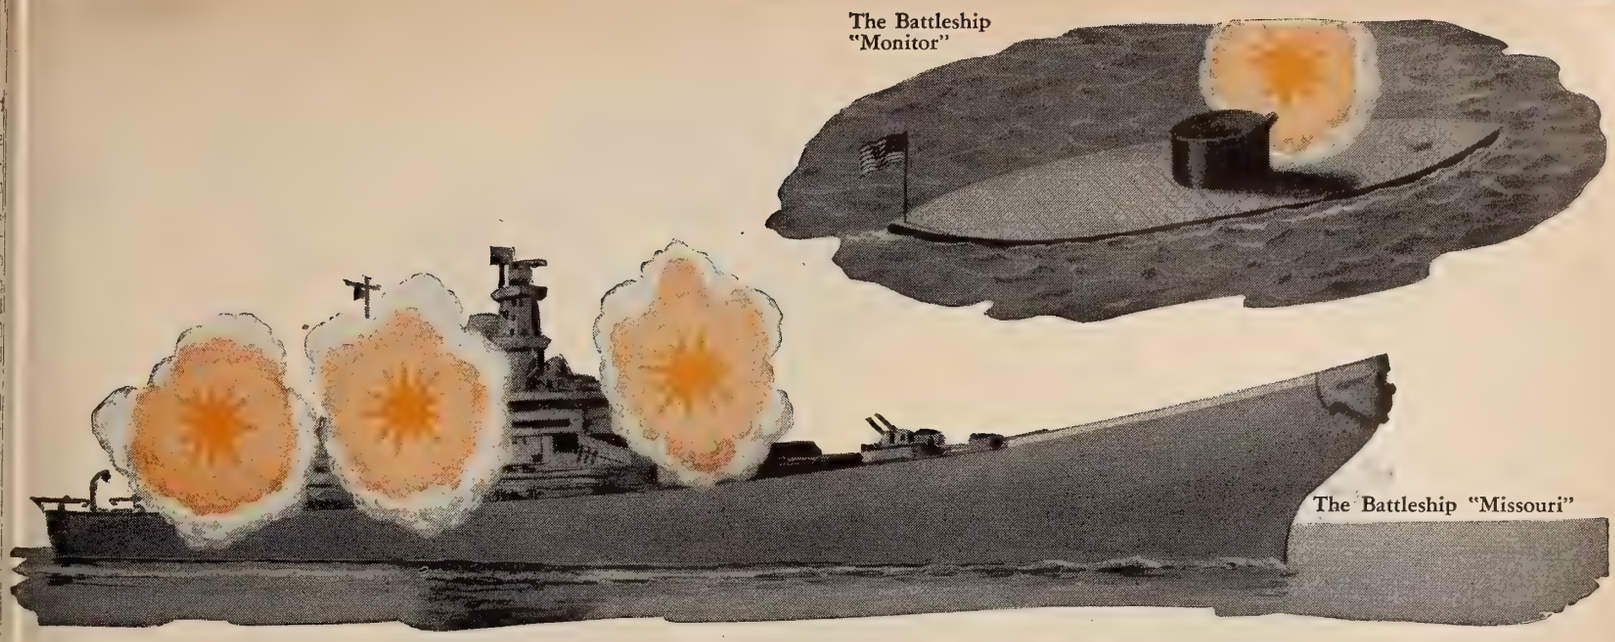
CHARGING FCC in effect has made a new rule and has "overruled or left meaningless a vast body of precedent," KGW Portland, Ore., last week petitioned the Commission to vacate its mid-December ruling which set aside a hearing examiner's denial and granted amendment of the competitive vhf Ch. 6 application of KOIN Portland [B•T, Dec. 15, 1952].

The KOIN amendment showed withdrawal of Ralph Stolkin, Edward Burke Jr. and Sherill C. Corwin, together 43.5% stockholders, and the assumption of their stock and certain obligations by other principal KOIN stockholders and 24 station employes. The FCC majority approved the amendment although Chairman Paul A. Walker and Comr. Frieda B. Hennock dissented and voted to uphold Examiner Elizabeth C. Smith who had refused acceptance on the ground the changes were substantial and good cause was not shown.

KOIN and KGW are the two remaining applicants contesting for Ch. 6. Hearing is set for March 16.

KGW's petition contended FCC erred in failing to consider the amendment "stems from the voluntary acts of [KOIN] alone, and not from any circumstances over which it had no control and that the *fait accompli* upon which [KOIN] relies could not possibly have led to the amendment. . . ."

KGW "specifically requests the right to oral argument," the petition said, for the following reasons:

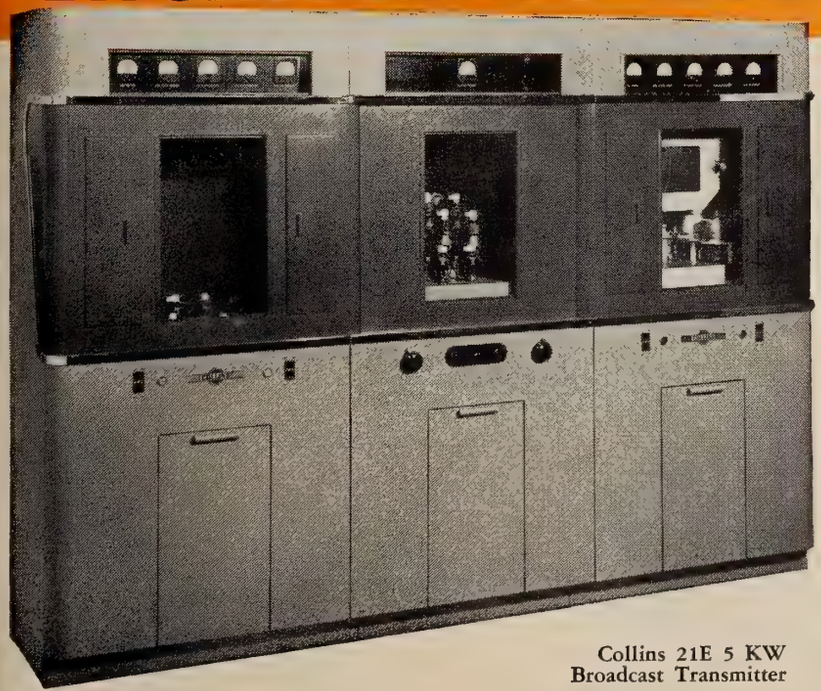


(1) Because of the importance of the right to amend on orderly procedure; (2) because the Commission has in effect made a new rule with no opportunity given to any parties to address themselves to the soundness thereof; (3) because the Commission has in effect overruled or left meaningless a vast body of precedent; (4) because the Commission has made no attempt to clarify its present position on the right to amend; and (5) finally, because the Commission has seriously prejudiced [KGW] by requiring it to proceed in a competitive hearing against an applicant which has no right, as presently constituted, to be a party to said proceeding.

SDX Awards Deadline

REMINDER was issued last week that the deadline is Feb. 9 on nominations for Sigma Delta Chi national journalistic fraternity's annual awards for distinguished service to journalism, totaling 13 categories of which three are for radio or TV newswriting, reporting and public service [B•T, Dec. 22, 1952]. Victor E. Bluedorn, SDX executive director, said winners will be announced in April.

Grant Postponed



EFFECTIVE date of FCC's action of Nov. 26, 1952, granting a construction permit for new station, WAMB Lebanon, Tenn., was postponed by the Commission last week pending hearing on a charge of excessive interference which would result to an established station, WKRM Columbia, Tenn.

ENGINEERING makes the difference

Collins 21E 5 KW
Broadcast Transmitter

In building battleships, or manufacturing quality broadcast transmitters, engineering excellence is the initial step toward the finished product. Collins new 21E 5 KW transmitter incorporates engineering advancement to achieve thorough dependability. Great simplification in the circuits associated with the modulator and power amplifier stages have been gained through use of recently developed high gain, long lived tetrodes. Frequency control is accomplished by means of the new plug-in, super stability low temperature coefficient crystals which automatically eliminate the need for crystal ovens. Complete accessibility and full visibility of all tubes plus built-in modulation peak limiting and operating economy combine to make the Collins 21E transmitter the superlative performer in the broadcast field.

Collins consistency in engineering excellence is your guarantee of dependability and premium performance in the complete line of broadcast and speech equipment. Write today for complete details and descriptive literature.

For quality in broadcasting equipment, it's . . .

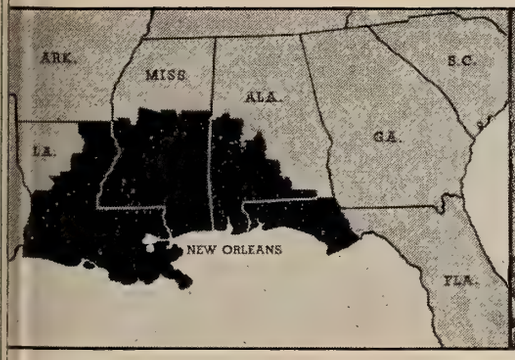
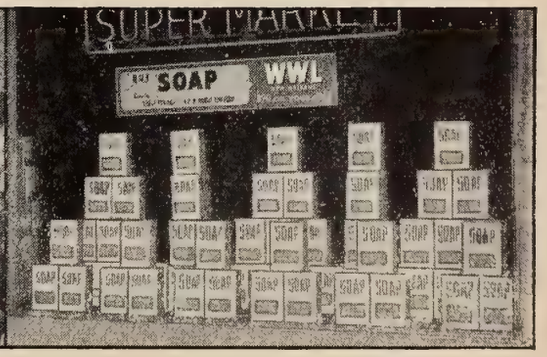
SOAP
WWL



Years WWL Has Been Selling Soap to More Southerners Than Any Other Advertising Medium!

Look what your advertising dollar buys on WWL:



Coverage unsurpassed in the deep South—intensive coverage over 4 states. More coverage than any other medium South can offer—in an area rich with new industry, and **still unquestionably radio dominated.**

The lion's share of Southern listeners—built up over a period of 30 years through excellent programing, featuring nationally known CBS stars and outstanding personalities of the South. **Verified by highest ratings.**

A liberal bonus of advertising extras—store displays, 24-sheet posters, streetcar and bus dash signs, newspaper ads, personal calls on jobbers and distributors. **No other station South gives advertisers such all-out support.**

LET WWL, *the South's Greatest Salesman,* SELL THE SOUTH FOR YOU!

LIBEL BILLS

O'Hara, Horan Take the Lead

LEGAL battle on Section 315 of the Communications Act is shaping up in the House.

Rep. Joseph P. O'Hara (R-Minn.) last week reintroduced his bill (now HR 539) to give broadcasters the right to censor libelous material in political candidates' speeches. Rep. Walt Horan (R-Wash.) will reintroduce his bill (HR 7062 in the last Congress) after conferring with NARTB officials. This would exempt broadcasters from damages for libel uttered by a political candidate over the air.

Section 315 provides that if a broadcaster gives time to a political candidate he must provide equal facilities to all other such candidates. It also forbids any censoring of a political candidates' speech. As amended last year by the McFarland Act, it also forbids a broadcaster from charging more than the regular commercial rate for time.

In the present situation, the broadcaster is on the horns of a dilemma. He is forbidden by Section 315 to censor, but at the same time he apparently can be sued if a candidate speaking over his station libels an opponent.

During the House debate on the McFarland Bill last year, both Reps. O'Hara and Horan offered their bills as amendments. The Horan version—exempting stations from damages—was accepted. This, however, was deleted from the final conference report on the ground that no hearings had been held on the matter.

Tending also to force broadcasters into what they consider an untenable situation is the FCC's 1948 Port Huron decision. In this, the Commission stated affirmatively that broadcasters must not censor political candidates' speeches and that because of Sec. 315 they were immune from libel suits.

Repeated Ruling

In several subsequent decisions and policy announcements, the Commission repeated its interpretation of Sec. 315—that no broadcaster may refuse equal facilities to all candidates if a single candidate is given access to its microphones. This occurred in 1951 when the FCC renewed the license of WDSU New Orleans and again in answer to a complaint of a Socialist Labor Party candidate. In the latter, the Commission held that since the state refused to legally qualify the Socialist Labor candidate on the ballot, he was not a candidate under the terms of Sec. 315.

On the other hand, broadcasters know they can censor supporters of candidates. This was formalized by the U. S. Court of Appeals in 1949 which held that Sec. 315 applied only to actual candidates, not to spokesmen. The Horan Bill last year included "authorized" supporters as well as candidates in its revision of Sec. 315. Inclusion of supporters in the provisions of Sec. 315 was recommended by FCC Chairman Paul A. Walker (see Boggs Committee story on page 34).

Key to Rep. O'Hara's bill is the section providing that:

No obligation is imposed upon any licensee to broadcast any defamatory, obscene or other material which may subject it to any civil or criminal action in any local, State or Federal court.

This attitude, Rep. O'Hara told BROADCASTING • TELECASTING last week, is based on his belief that defamation should be prevented. The only way this can be done, Mr. O'Hara said, is by giving broadcasters the power to delete such material from candidates' speeches.

"It's not that I don't have any sympathy for the broadcasters," Mr. O'Hara said. "I know they are the innocent bystanders in this problem. Particularly since the Port Huron decision, which I consider very bad.

"But to me no one, political

WOODland! AM

Sold-384,320 Cook Books, a story of real sales action!

WOOD and WOOD-TV offered a series of 24 "WOOD and WOOD-TV Cook Booklets" to the important food outlets in Western Michigan. Normal profit margins were granted and WOOD and WOOD-TV assured adequate radio and television advertising backing.

Booklet No. 1 was offered for sale the first week. Each week thereafter throughout the 24-week period a new booklet was added. The promotion started February 28, 1952.

OBJECTIVES?

1. To promote WOOD and WOOD-TV to our audience and your customers.
2. To obtain a factual report on the ability of WOOD and WOOD-TV to move merchandise at the retail level — in large volume and at reasonable advertising cost.

USED RADIO AND TV EQUALLY . . .

We budgeted $400 a week for radio and TV advertising over the 24-week period. This broke down as follows:

Daytime TV (announcements only) — first and third six-week periods

Daytime and Nighttime Radio (announcements and programs) second and fourth six-week periods

Each medium received an equal share of the budget. *No other promotion was used.*

Grade A Milk Bowl

EDITOR:

This has been a period of real progress for the Milk Bowl, and I have a sense of real appreciation for the help and encouragement given by many folks thoroughout the past year. . . May I express gratitude for your good will toward this project.

As you know, the 1952 Milk Bowl had national press, radio, movie, magazine and TV (film) coverage. . . The game was broadcast over the full facilities, coast-to-coast, more than 550 stations, of the Mutual Broadcasting System, as the Game of the Week, with Al Helfer doing the play by play. . .

The 1953 National Milk Bowl will be held in Lufkin, Tex., probably on Dec. 5 or 12. Radio and TV coverage continues to be welcome. Radio Station KTRE is the local station in Lufkin; this station may also be a TV one by December, providing both radio and TV broadcast possibilities.

Eugene C. Weafer
Executive Director
The National Milk Bowl
Bryan, Tex.

WQXR Network

EDITOR:

I noticed that in the issue of Dec. 29 on page 78 you failed to include WWNY-FM Watertown, N. Y., and WMSA-FM Massena, N. Y., in the article on the WQXR network.

Since an omission is a rarity in your fine magazine, I am sure that you will be willing to correct this error. . . .

Earl R. Kelly
Station Manager
WWNY-AM-FM
Watertown, N. Y.

Low, Lower, Lowest

EDITOR:

We never like to make a statement that is not a fact. Accordingly, when we said WFPG-TV was the lowest rate in TV, we were stating the truth.

Frank Koehler of WROV-TV, contemplated operation in Roanoke, called attention to the fact that his proposed station was $140 per hour compared with ours of $150 per hour [OPEN MIKE, Dec. 22]. . . . However, you will note that his rate states "local rates" of $140. . . . Accordingly our $150 per hour nationally for WFPG-TV is still lowest. . . .

Fred Weber
President
WFPG-TV Atlantic City, N. J.

Global Coverage

EDITOR:

It isn't often that an independen 250 watter can lay claim to bein heard around the world but on Dec 23 WNEB's *Way Back Home* pro gram for AFRS was piped aroun the globe by 60 AFRS station overseas. Constant plugging of th show, handled by our special event director John Bassett, alerted th home folks to write to their serv icemen. The result was that grate ful letters came in from Japar Korea, Germany and Italy fron Worcester boys who heard a wor picture of the home town.

This is a type of public servic that results in inestimable goo will for the station. It gives th station one of the finest opportuni ties to serve the community i which it exists and upon which i depends for a healthy living.

The feeling of warmth you ge from receiving those letters o thanks is all the reward you coul ask for.

John J. Hurley
General Manager
WNEB Worcester, Mass.

How Big Is Texas?

EDITOR:

The Dec. 29 issue of BROADCASTING • TELECASTING carries an ad on page 10, placed by Broadcast Advertising Bureau. BAB states there are 27,424,500 automobile radios alone in these United States.

In the same issue, on page 74, in "Programs, Promotion, Premiums" I see a special story on a recent promotion of WOAI San Antonio. Here, WOAI claims there are 21 million auto radios in the WOAI coverage area.

I know Texas is big. . . but THAT BIG?????

Bob King
WNAX Yankton, S. D.

[EDITOR'S NOTE: Not WOAI but a B•T staffer unnecessarily added to Texas' size. The WOAI promotion said there were 21 million auto radios throughout the U. S.]

* * *

Availabilities

EDITOR:

. . . A story [in B•T, Dec. 22, 1952] states that [our] newscasts are not available for sponsorship.

Since we are kinda happy about our 18% increase in sales, we don't want national agencies to think we don't need more business. The 12:30 and 4:30 p.m. *Scranton Times* newscasts are not for sale, but all the others available are. . . .

Cecil Woodland
General Manager
WQAN Scranton, Pa.

FUNDS FOR VOA

$50 Million Asked

THE STATE Dept. has asked the 83d Congress for nearly $50 million to finance Voice of America operation and station construction after next July 1.

This figure was contained in the President's fiscal 1954 budget submitted to Capitol Hill last Friday (see funds story this issue).

The International Information Administration is seeking $114,515,800 for its overall information and educational activities, with $28,328,009 tabbed for "radio broadcasting service." Another $20,200,000 is requested for "acquisition and construction of radio facilities."

An increase of $27 million-plus over the current year is asked for IIA because of "the costs of operating new radio facilities" and "other program activities to meet current psychological objectives in critical world areas." It was understood that IIA originally sought $135 million but was cut by the Budget Bureau.

The $20,200,000 would be used "for completion of two facilities and for acquisition of sites and equipment for three additional facilities in a world-wide radio broadcasting network." Funds for broadcasting service cover programs transmitted from the U. S. and overseas relay stations and transcriptions of radio-TV programs shipped for use on local outlets.

A sum of $100,000 from overall IIA monies is to be made available to private broadcasting licensees for developing programs to be beamed to Western Europe and Latin America. Walter S. Lemmon, president of World Wide Broadcasting Corp. (WRUL), had suggested this provision in previous Congressional hearings.

The President's budget request served to point up the importance of IIA's role in psychological warfare and the potential overhauling of the entire U. S. foreign information program, of which the shortwave radio arm is but one major part.

Possible Revisions

Speculation is rife that the Eisenhower administration will accelerate the whole program, reorganizing IIA and perhaps giving it a greater status. There is talk of a super psychological - information agency which would comprise all U. S. foreign information activities —with the pattern interweaving functions of the old OWI, the Psychological Strategy Board and other groups—and be divorced from the State Dept.

A Senate Foreign Relations subcommittee has been looking into overseas information functions, not alone of State but of the Defense Dept., Technical Cooperation Administration, Mutual Security Agency and other departments. The subcommittee staff has recommended separation of VOA from the State Dept. [B•T, Nov. 24, 1952].

Subcommittee members have returned from field trips to Europe, the Far East and Near East and will report by Jan. 31. Hearings are scheduled but no definite date has been set. Subcommittee is headed by Sen. J. William Fulbright (D-Ark.).

IIA has had its own long-range study underway, with Dr. Wilson Compton, himself just returned from a worldwide tour, prepared to report his findings to Secretary of State Dean Acheson before the latter is succeeded by John Foster Dulles.

Dr. Compton has concerned himself with inspection of field operations looking toward greater stress on U. S. information field offices (and VOA)—so-called localization of radio and other media—and a reanalysis of domestic VOA facilities. Inherent in a potential streamlining is the consolidation of certain U. S. shortwave transmitter plants, improvement of others and counter-measures for Soviet jamming. Latter study is based on a report prepared by Booz, Allen & Hamilton at the request of the State Dept. Its contents have not been revealed for security reasons.

Consolidation of some domestic facilities fits the pattern of greater emphasis on field operations, with more radio programs beamed directly from foreign countries where feasible—and perhaps with the aid of nationals of those countries [B•T, Oct. 27].

Meanwhile, IIA is due to get a new chief shortly—Carl W. McCardle, chief of the Washington bureau of the *Philadelphia Bulletin* and veteran newspaperman. He was appointed by President-elect Eisenhower to succeed Howland Sargeant as Assistant Secretary for Public Affairs. Dr. Compton would report directly to him. His appointment is subject to Senate confirmation.

SEATTLE CAMPAIGN

$24,812 in Time Donated

RADIO contributed an estimated total of $16,800 in free air time and television, $8,012, in the Seattle November pedestrian safety campaign.

This is one highlight of the first report on Seattle's Traffic Safety Crusade, being conducted jointly by the Advertising & Sales Club of Seattle and the Seattle-King County Safety Council.

All radio stations used the spots in varying degrees. . . . KING broadcast 1,152 spots during the campaign, estimated as equivalent to $9,734 worth of commercial time.

As for TV, the report stated that the city's only TV outlet, KING-TV, donated time "valued at $8,012 for its 115 public service spot announcements on pedestrian safety alone."

IN REVIEW . . .

"This Is Charles Laughton," 15-minute weekly program, filmed by Sherman Harris Productions, telecast on 21 stations.
Sponsor: Duffy-Mott Co. (Mott's Apple Products; Sunsweet Prune Juice).
Agency: Young & Rubicam; Account Executive: Frank Henderson.
Production Cost: Approximately $5,000.
Cast: Charles Laughton.
Producer: Paul Gregory.
Associate Producer: Sherman Harris.
Director: Charles Laughton.
Research: Albert Brush, Charles Laughton.
Cameraman: Jack MacKenzie.
Film Editor: Bob Golden.

THE basic principles of TV production are shattered by Paul Gregory, producer of *This Is Charles Laughton*, in the quarter-hour film series which made its debut last week on 21 stations in 20 cities, two stations being used in New York.

In this program there is no rapid motion across the screen. There is no scenery and scarcely any props —a small table atop a large one and a couple of books. There is only a man, leaning against the table and talking or reading. But, since the man is one of the finest actors of our time and since his material is carefully culled from the most readable writings of the world's greatest writers, that is quite enough.

The basic format of the series is disarmingly simple. A theme is selected and discussed briefly by Mr. Laughton, who, once the mood is established, reads appropriate passages which contrast the treatment of the theme by an ancient and a modern writer. If this reminds you of Lit. 2 at college, don't be alarmed. With Mr. Laughton doing the reading, there will be no nappers in this class. The sponsor, with exceptional consideration for both the star and his audience, has omitted the customary middle commercial so that the mood of the program is unbroken and the reading goes on without interruption.

Consistent for each program, the mood of the various program units varies widely throughout the series, now philosophical, now gay, here contemplative, there dramatic or romantic. One might expect Mr. Laughton to wring the full flavor from each type of reading, as his sponsor presses the last bit of juice from each apple, and one is not disappointed. Reading the story of David and Goliath from the Old Testament in an early program, he is alternately the confident, almost cocksure youth urging King Saul to let him face Goliath; the uncertain King, reluctant to send the boy to almost certain death and yet not knowing what else to do; the boastful and defiant giant Philistine.

Another program, lightly humorous in tone, deals with folklore and fable, contrasting the works of Aesop and the Brothers Grimm with the modern fables of James Thurber. Mr. Laughton here recalls the familiar tale of Little Red Riding Hood with its "What big teeth you have, grandmother," climax, that, he comments, "is enough to scare any child to death." He follows this with Thurber's version of the same story in which the modern Red Riding Hood sees at once that the gowned and hooded figure on the bed in no way resembles her grandmother and shoots the wolf before he can "eat you, my dear." Mr. Thurber's moral: "It's not as easy to fool little girls as it used to be," drew a contagious chuckle from Mr. Laughton.

This same program opened with some limericks and a couple of verses from that old favorite collection of "Ruthless Rhymes from Heartless Homes" — the classic "Little Willie in the best of sashes ****" whom no one liked to poke up, and the less familier "In the drinking well, which the plumber built her, Aunt Eliza fell. We must buy a filter." Mr. Laughton's rendition of these childhood classics hit precisely the right note of enjoyment of these gay trifles for what they are, with no hint of the usual apologetic adult attitude for wasting time on such childish matters.

Mr. Laughton was equally successful in attuning his delivery exactly in the proper key in the more sober telecast contrasting Shakespeare's "Seven Ages of Man" with Thomas Wolf's prose treatment of man's earthly span in *You Can't Go Home Again*. This telecast proved a bit of TV sabotage, for one viewer at least, as it drove this reviewer to his bookshelf to find that passage and the rest of that evening was spent reading instead of viewing.

Technically, the production is excellent throughout, with one small defect. The sensitive microphone, in transmitting the nuances of Mr. Laughton's voice, also picks up with unhappy emphasis his gulping inhalations, introducing a needlessly discordant note into the otherwise flawless performance.

CBS Appointments

APPOINTMENTS of Kingdon S. Tyler as manager and Harold W. Van Wagenen as assistant manager of CBS' building construction department were announced last week by Frank Faulkner, vice president in charge of operations for CBS-TV. Mr. Tyler who joined CBS in 1938, will be responsible for construction of the new CBS-TV production center in New York. Mr. Van Wagenen became associated with CBS in 1944.

TV OPPORTUNITY
McCormick Points Up

OPPORTUNITIES in television for experiment and innovation are "more spectacular" than in the "older enterprises," said Col. Robert R. McCormick, editor and publisher of the *Chicago Tribune*, licensee of WGN-AM-TV and WGNB (FM), in a New Year address to listeners and viewers.

Col. McCormick, enlarging upon the accomplishments, past and future, of the *Tribune's* broadcast subsidiaries, said the company "did well" in TV in 1952, and hoped to do better. And, he added, "We'd better do better in radio."

Speaking of progress made and records broken, he said "We have trained ourselves in new skills and taught ourselves new techniques in the very complicated field of audio-video communication."

KEYSTONE Broadcasting System's New Year party for agency people given at KBS Chicago headquarters included these radio-TV men (l to r): Martin Fritz, Buchen Co; Clarke Trudeau, Beaumont & Hohman; Ed Fitzgerald, J. Walter Thompson Co.; William Wilson, Young & Rubicam; Jack Fisher (seated), M. M. Fisher Assoc.; Dave Williams, Geoffrey Wade Adv.; Julian Grasewicz and Fred Norman, Grant Adv.

BUFFALO HEARING
Explores N. Y. Educational TV

FIRST in a series of public hearings examining the role of television as an educational medium was held last Tuesday in Buffalo under the auspices of the New York State Temporary Commission on the use of television for educational purposes. Another session will be held in New York on Wednesday and a final one in Albany Jan. 21.

Thirty-eight persons spoke at the Buffalo hearing in favor of a New York State Board of Regents plan to construct a state network of 10 educational TV stations. Only opposition came from Charles A. Suchan Jr., executive secretary of the Business & Civic Assns. of the Tonawandas Inc., who conceded that educational television was desirable but urged consideration be given to the taxpayer who would bear the expense.

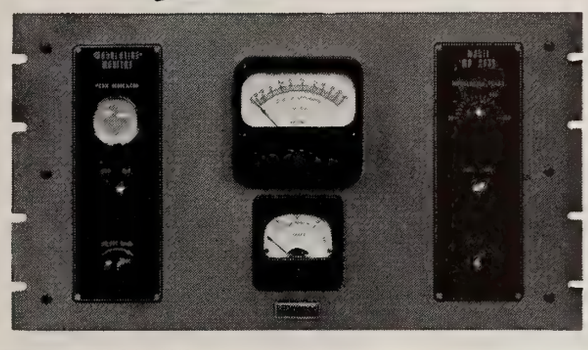
The Temporary State Commission, set up by Gov. Thomas E. Dewey, must present its report to the legislature by Feb. 10. The Board of Regents has until June 2 to convince the FCC that it can implement plans to operate the six stations for which FCC has approved construction permits.

WPTF NEWS BEAT
Reports Plane Crash

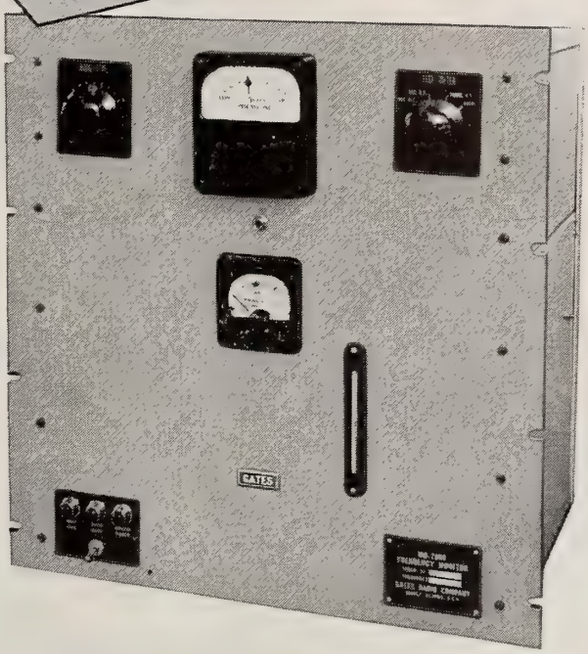
WPTF Raleigh claims it scored a clean news beat on the crash of an Air Force C-47 in dense woodland 15 miles outside that city Jan. 3, when Special Events Director Phil Ellis got out of bed at 4:20 a.m. to track down the story.

Bill Jackson, who opens the station, noticed a brief wire report originating from the Raleigh-Durham airport that a plane had crashed in an unknown location near Raleigh, and routed Mr. Ellis from bed. By 5 a.m. Mr. Ellis was at the airport. Then hearing a highway patrol report giving a clue to the crash location he hurried to the area and joined a search party which found the wreckage at 7:30 a.m. in heavy fog and driving rain.

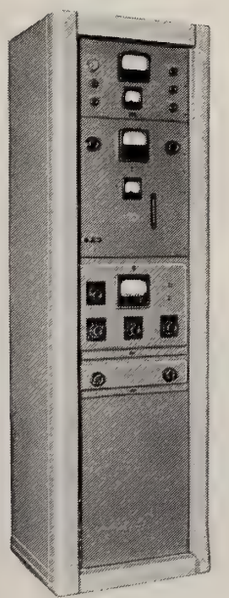
Mr. Ellis, who was the only newsman on the scene, according to WPTF, sped back to the station, put a report on the air at 7:48, and wrapped up the story with a regular newscast at 7:55.



RFE's Lang to Talk



ROBERT LANG, director of Radio Free Europe, will address the luncheon session of the Chicago Federated Advertising Club Jan. 15 at the Morrison Hotel, in a talk on the work being done via RFE to reach people behind the Iron Curtain.



BILL SILBERT has been signed as m.c. of new *Let's Go Bowling*, Saturday show on WABD (TV) New York.

Educated TV-Radio

FIRST SPONTANEOUS practical demonstration of what commercial TV and radio, with their established audiences, can do for education occurred last week in Baltimore.

The story is a simple one: Schools were forced to close by a city-wide maintenance strike. Most of the city's radio and television stations, quick to recognize the opportunity to serve, stepped into the breach. With the Board of Education preparing material and furnishing teachers, a regular schedule of classes was maintained.

The public reaction has been tremendous.

At the same time the New York State Temporary Commission on Educational Television is holding hearings exploring the "role of TV as a teaching medium." From first reports they are hearing a group of well-coached witnesses, all of whom see the "great need" for noncommercial educational television. Only a scattered and unorganized few have pleaded the case for the taxpayer.

It is hard to see how proponents of educational TV can overlook the Baltimore example. If colleges and universities would set up laboratories to train personnel and plan educational programs in cooperation with commercial stations all of the advantages of teaching by television could be accomplished at relatively minor expense.

Agriculture colleges train experts in farming. Mining schools turn out our most accomplished mining engineers. Why not state-financed training in teaching by radio and television? This pattern is set. The cost to the taxpayer would be practically nil.

Delivered From Exile

IF THE decision of Speaker Joseph W. Martin Jr. to readmit radio and television to House committee hearings can be taken as symptomatic of the 83d Congress' attitude toward these media, broadcasters (and the U. S. public) can be grateful that there is a new command on Capitol Hill.

The ban which Mr. Martin revoked and which the then Speaker of the House, Sam Rayburn, summarily imposed 10 months ago was an inexcusably reactionary action. The new Speaker's reversal of his predecessor's ukase repatriates radio and television from intolerable exile.

It would appear from this action that in this Congress radio and television may receive more sympathetic consideration than in former years. The opportunity exists to obtain relief from several problems other than that of obtaining equal access to news-making procedures.

Chief among these are the problems created by the contradictory and restrictive laws and regulations governing political broadcasting. The Congress will reconsider at least two corrective measures that were introduced in the last session, the O'Hara bill which was reintroduced last week and the Horan bill which is scheduled for resubmission.

In our view neither of these would satisfactorily resolve the dilemmas that obtain when campaigns are in progress, but better legislation has a chance of passage if broadcasters will assist in its preparation.

It seems promising that broadcasters can make more progress toward their goal of equality of freedom in this Congress than in others of recent times.

George Did It

THE firing and rehiring of George S. Kaufman, dyspeptic panelist on *This Is Show Business,* illustrates the grave need for resolution of the growing conflict between commercial aspirations and artistic responsibility in TV.

As everyone knows by now, Mr. Kaufman was fired by the American Tobacco Co., sponsor of the show, after "several hundred" letters were received protesting one of his remarks on a pre-Christmas telecast. The letter writers interpreted as sacrilegious his expressed hope that it would be one show on which no one sang "Silent Night."

Last week he was rehired by CBS-TV to appear on the program after the present sponsor's contract runs out, a decision announced by the network after his dismissal was protested by about the same number of people whose complaints had led to his ouster by American Tobacco Co.

Undeniably, CBS-TV acted with commendable independence in restoring to grace a personality who had been stamped as controversial by an important advertiser. To exercise such independence is not easy.

Nothing is terrorized so quickly as a sponsor with a large television investment to protect. It is up to telecasters to immunize themselves against the frights that a flurry of letters can induce among their customers.

Old Pro

FRANK WHITE, an old pro, takes over the presidency of NBC at what is obviously a critical period. It will mean a new era of brisk competition on a business basis.

Frank White knows the broadcasting business, having been part and parcel of it for 16 years. He came up through the accounting end. He appreciates the value of a buck. In 1949 he took over the helm of Mutual, when querulous people figured a fourth live radio network couldn't survive. It was the only radio network to improve its position during that frenzied "TV Revolution" period.

Three years ago Joseph H. McConnell brought a fresh viewpoint to NBC as its president. He had been a successful lawyer and had served with RCA in executive capacities. That was a critical time too. Mr. McConnell encountered a number of basic problems, notably in relation to rates and competition. Mr. McConnell, who could have remained in the top RCA organization, elected to join Colgate-Palmolive-Peet, one of the best customers or radio and TV. His NBC experience will serve him well.

For many months there has been talk about network operation being unprofitable and about fundamental changes in concept, which might see networks selling their services as do press associations in the news field. Some of this talk has gone so far as to speculate upon the eventual sale by RCA of its radio, and possibly its television network. This we question.

Rather, we feel that the RCA board, acting at the behest of RCA-NBC Board Chairman David Sarnoff, made these new moves to strengthen and solidify its network services. Certainly Gen. Sarnoff, whose vision in the development of the electronic media has been all but clairvoyant, didn't select Frank White to preside over the liquidation of the world's first network operation.

Instead, we see in NBC's latest move, a project to strip off the fat and the fanciful, in the realization that the network business—both radio and TV—will become more rugged in the months ahead and, admitted that they are the most powerful media extant, it takes salesmen to sell them.

our respects to:

LESTER EDWIN WADDINGTON

IN FIVE years at Miles Labs., Lester Edwin Waddington has learned the tricks of selling very competitive items of relatively low cost and high turnover, and has added a few of his own.

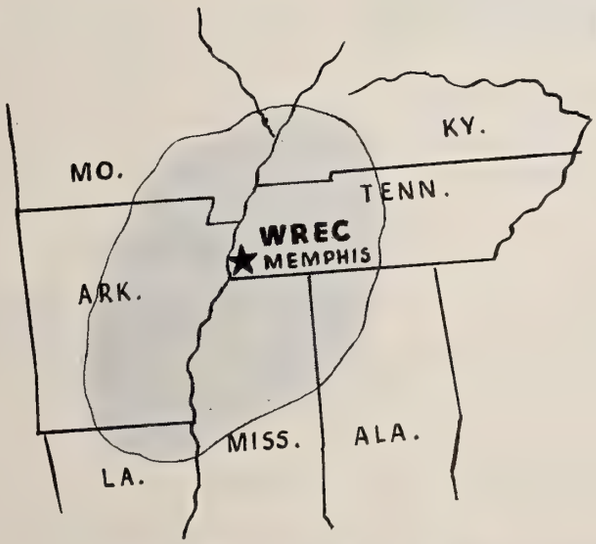
Assistant advertising manager of the Elkhart, Ind., company and product supervisor on Bactine, Mr. Waddington has worked in all media for the internationally distributed line, but has specialized in broadcasting as radio and television director.

The line was started with Alka-Seltzer, and slowly grew with development of One A Day vitamins; Tabcin, an anti-histaminic compound; Bactine, an antiseptic, bactericide, cleanser and deodorant, and Nervine, in both liquid and tablet form.

Radio, with its high saturation of all U. S. homes, has long been the keystone on which the advertising budget has been built. In 1951 the company reportedly spent nearly $8½ million on major media. Of this sum, an estimated $6½ million went to network radio, and more than one-half million dollars to network TV.

Mr. Waddington supervises programming as well as the scheduling of radio and television buys, which is a Miles pattern. That pattern calls for saturation of all possible audience segments with shows encompassing all tastes, ranging the gamut of daytime serials, variety, comedy, news and music. Time periods for shows and spots also are scattered in an effort to reach a maximum audience and the consumer market.

This kind of radio, Mr. Waddington says, is necessary because of the nearly 100% distribution of Miles products. Multi-weekly mentions are required to continue to move a high-volume impulse item from the druggists' shelves.



Alka-Seltzer, despite its universal consumer acceptance and high distribution, needs a sustained program of frequent mentions, he says. "We, of course, watch our ratings relative to audience coverage and program cost, in order to obtain the best possible homes-per-dollar ratio."

Mr. Waddington, who was named radio-TV director in 1949 after joining Miles in 1947 as assistant advertising manager, has been aided in his television tasks by an avid interest in photography, which he began as an enterprising youngster engaged in making his own pinhole cameras and enlargers. From the Elkhart headquarters of the company, he supervises all productions and commercials,

(Continued on page 85)

All stops are out when you hit the Memphis Market via the WREC route. Memphis No. 1 Station has the power and prestige to cover every town and hamlet. High quality programming appeals to the audience in metropolitan and rural areas. One schedule gets BOTH when you select the station where all your best customers meet. (WREC has the highest Hooper rating of any Memphis Radio station). The cost? 10% LESS per thousand listeners than in 1946.

BROOKS ELECTED
Is Named Allied Executive

ELECTION of William F. Brooks, former NBC vice president, as executive vice president and a director of Allied Public Relations Assoc. was announced last week by the president and board chairman, David B. Charnay.

Mr. Brooks

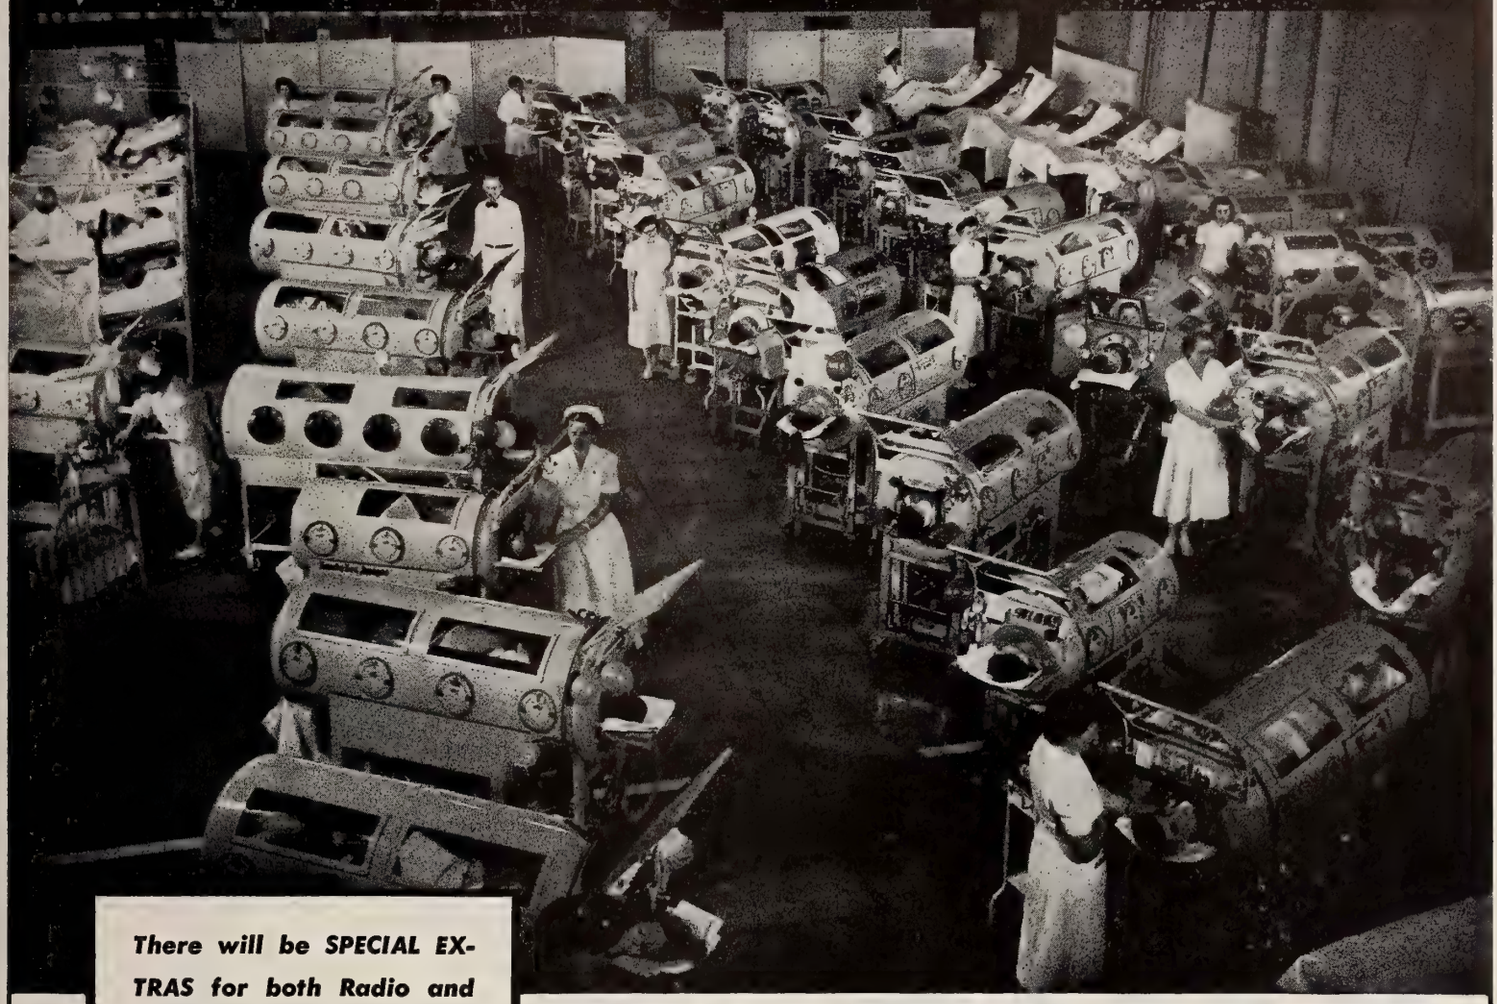
Mr. Brooks will supervise the company's services at its home office, 745 Fifth Ave., New York, and in Washington, Chicago and Los Angeles, and also will direct an expansion program, the announcement said.

Allied specializes in commercial and industrial accounts. Mr. Brooks, who has been operating his own public relations firm since leaving NBC last fall, continues to serve as special consultant on public relations to NBC and other organizations.

WYATT QUITS
Leaves Forjoe for Clark

WILLIAM RALEIGH WYATT has resigned as vice president in charge of the midwest division of Forjoe & Co., station representative firm, and will join George W. Clark Inc., representative, as vice president in charge of the eastern division. Mr. Wyatt will headquarter in New York.

He was associated with Forjoe since 1947, when he joined the New York staff as a salesman. He transferred to Chicago in 1949 as manager and an officer of the company. Mr. Clark, who headquarters in Chicago, has named John Stewart manager of television sales in the New York office, where he has worked since the company was organized a year ago. George W. Clark Inc. also maintains offices in Los Angeles and San Francisco.



CBS IN MEMPHIS
Maier, Holtshauser Named

MEMPHIS office of CBS Radio and Television Spot Sales and CBS-TV Film Sales has set up separate units for radio and TV. H. W. Maier Jr., account executive, was named manager of CBS Radio Spot Sales, and H. H. Holtshauser, manager of radio spot sales office there since 1948, was appointed manager of CBS-TV Spot Sales and Film Sales.

The change was announced last Monday by J. Kelly Smith, administrative vice president of CBS Radio, and Merle Jones, CBS-TV vice president in charge of owned stations and general services.

WILSON W. WYATT, personal campaign manager for Illinois Gov. Adlai Stevenson during his Presidential campaign, has been chosen by WHAS Louisville, Ky., as Man of the Year.

SNADER CASE

Rosenbaum Is Arbitrator

TANGLED litigations involving Snader Telescriptions Corp. and Snader Telescriptions Sales Inc., have taken a new turn as former judge Samuel R. Rosenbaum, Philadelphia and New York attorney and trustee of the music performance funds, was brought in as sole arbitrator to solve the long standing differences between the directors.

All court action has been stayed and those involved in the various suits and counter-suits on file have agreed to abide by his decisions.

Hearing of testimony which started Jan. 2 in Judge Rosenbaum's Beverly Wilshire Hotel suite in Beverly Hills, was expected to last one week, with decisions to be rendered in about three weeks.

Controversy centers on sale of Snader Telescriptions to Ben Foye of Studio Films Inc., which Louis D. Snader charges his partners Alexander Bisno and Samuel Markovitch negotiated without consulting him and other directors of the firm. Mr. Snader sued in Los Angeles Superior Court to halt sale of these and other film properties. He also named among defendants United Television Programs, UTP president Gerald King, and 103 limited partners in STS [B•T, Dec. 15]. Mr. Snader further asked that the partnership be dissolved.

air-casters

LESLIE F. DIEBL, Muzak Inc., to WISN Milwaukee, as program director replacing **JACK RAYMOND,** now public service director at station.

LARRY HIGGINS, staff announcer, WMPS Memphis, Tenn., to KRCH Hot Springs, Ark., as program director.

NCAA UNBENDING

National Football TV Policy Is Firm

By J. FRANK BEATTY

COLLEGE football will be telecast next autumn on a controlled basis but regional desires of the TV audience will be given a better break.

Intent of National Collegiate Athletic Assn. to maintain its monopoly was apparent late Friday as the annual convention prepared to vote on recommendations of its TV Committee. The convention was held at the Mayflower Hotel, Washington, D. C., starting Thursday. It was scheduled to wind up last Saturday noon.

Interest in football telecasts dominated the sessions. Majority insistence on a one-network middle-of-the-road policy following along the lines of the 1952 program was heard in most of the discussions.

NCAA outlined a general football policy for the year as it prepared to vote Friday but several major developments marked the convention. Among these were:

● Postponement of a specific policy pending court action in the Dept. of Justice suit against pro football.

● Floor catfight over right of minority groups to oppose TV Committee's report.

● Big-money session at which delegates heard promises of fabulous riches via subscription TV.

● Behind-scenes resentment over failure of NCAA to invite NARTB or Sports Committee of Radio-Television Mfrs. Assn. to roundtable which included "remarks by TV industry representatives."

● Charge by DuMont Network that NCAA's plan is "collusive" and commits colleges to a monopoly based on "fear rather than sound judgment" (see story page 60).

● Demand by Notre Dame and U. of Pennsylvania that colleges be given the right to make their own arrangements for TV.

The report of NCAA's TV committee dealt at length on the problem of legality. Joseph L. Rauh Jr., NCAA counsel, sat at a three-day committee meeting and directed preparation of the final report. Arguing that the 1952 football plan was reasonable and didn't violate any laws, the report showed NCAA's official concern over the suit against the National Football League, to be heard June 26 by the Federal District Court in Philadelphia.

This suit will be used by the Dept. of Justice as a test case and NCAA will give "careful consideration" to the court's action. The committee recommended that "plans for 1953 be not finally formulated and adopted by the NCAA until this decision is available" unless there is delay in court action.

"We believe that the NCAA should at all times be in full compliance with the law of the land and to this end should comply with any relevant decision of a district court unless and until it is appealed and reversed by the Supreme Court," the committee said.

A favorable decision for pro football, charged with conspiracy and antitrust violations, would be equally favorable to NCAA, it was contended. If unfavorable, NCAA's policy would depend on the judge's reasoning. A holding that any group action to limit TV is illegal would probably apply equally to NCAA, it was added. The committee claimed the pro football restrictions were "much greater than those imposed on telecasting by the 1952 NCAA plan or likely to be imposed in any future plan."

Television of some sell-out games in 1952 and removal of the 1951 "blackout" were cited.

The committee voiced pleasure at results of controlled television. "Under the NCAA limited program," it was stated, attendance losses "have been held to four points. The limiting of college football telecasts during the last two years has thus saved a probable loss of about 10% in attendance in television areas—and this figure is, if anything, a minimum statement because of declines in real income and student enrollment."

Colleges lost about 13% more in attendance in TV areas than in non-TV areas during 1950, it was noted. Paid attendance in 1952 was about the same as in 1951, it was

(Continued on page 60)

CONTINUED program of limited football TV was recommended to National Collegiate Athletic Assn. at Washington meeting by 10-man NCAA TV Committee. Front row (l to r): Asa S. Bushnell, Eastern Conference commissioner; Walter Byers, NCAA executive director; Robert A. Hall, Yale, committee chairman; Willis O. Hunter, Southern California; Kenneth L. (Tug) Wilson, Big Ten commissioner. Back row: Jeff Coleman, U. of Alabama; Howard Grubbs, Southwest Conference commissioner; E. L. Romney, Mountain States commissioner; Reaves E. Peters, Big Seven commissioner. Not in photo, J. Shober Barr, Franklin & Marshall.

ELEVEN TV GRANTS

FCC's First in '53

By LARRY CHRISTOPHER

COMPRISING the first television grants of 1953, FCC last Thursday announced authorization of construction permits for 11 new stations, including one noncommercial, educational outlet.

Among the commercial CP recipients is Rep. Richard W. Hoffman (R-Ill.). His WHFC Chicago received a grant for uhf Ch. 26, the first post-thaw permit for that city.

Other new grants included the first commercial permit for Kansas, two uhf permits for Houston, the second uhf permit for Atlantic City and the third uhf authorization for Pittsburgh.

Ranging widely through both the city priority Group A and Group B temporary processing lines, the Commission's actions swelled the total of post-thaw new station grants to 186. This includes 11 noncommercial, educational authorizations. Total authorized stations in the U. S. is now 294. Of these 126 are on the air.

New station grants of 1953 are:

Madison, Wis. (City priority Group A-2, No. 30) — Monona Broadcasting Co. (WKOW), granted construction permit for uhf Ch. 27, effective radiated power of 87 kw visual and 47 kw aural, antenna height above average terrain 610 ft.

Stockton, Calif. (Group A-2, No. 53) —San Joaquin Telecasters (KSTN), granted uhf Ch. 36, ERP 145 kw visual and 78 kw aural, antenna 310 ft.

Springfield, Mo. (Group A-2, No. 57) —Springfield Television Inc. (KGBX), granted vhf Ch. 3, ERP 61 kw visual and 31 kw aural, antenna 520 ft. Subject to condition that prior to issue of CP, Lester L. Cox must sever all connections with KWTO Springfield. Comrs. E. M. Webster, Frieda B. Hennock and Eugene H. Merrill voted for letter of further inquiry. Previously granted at Springfield: KTTS-TV, vhf Ch. 10, planning April commencement.

Atlantic City, N. J. (Group A-2, No. 66)—Matta Enterprises, granted uhf Ch. 52, ERP 20.5 kw visual and 11 kw aural, antenna 360 ft. Authorized earlier, now operating: WFPG-TV, uhf Ch. 46.

Hutchinson, Kan. (Group A-2, No. 142)—Hutchinson TV Inc., granted vhf Ch. 12, ERP 115 kw visual and 58 kw aural, antenna 620 ft.

Ithaca, N. Y. (Group B-1, No. 85)— Cornell U. (WHCU), granted uhf Ch. 20, ERP 215 kw visual and 110 kw aural, antenna 1,220 ft.

Ithaca, N. Y.— U. of New York State, granted noncommercial, educational uhf Ch. *14 (reserved), ERP 205 kw visual and 105 kw aural, antenna 1,290 ft. Comrs. Rosel H. Hyde and George E. Sterling did not participate. Comr. E. M. Webster dissented. Grant is seventh to New York State U.

Chicago (Group B-2, No. 167) — WHFC Inc. (WHFC), granted uhf Ch. 26, ERP 220 kw visual and 110 kw

Engineering condition. (Comrs. Hyde and Sterling not participating, and Comr. Webster dissenting on the basis of his previous dissents in certain noncommercial educational TV grants.) [This is the seventh noncommercial educational TV grant to the U. of the State of New York, the previous ones being for Albany, Binghamton, Buffalo, Rochester, New York City and Syracuse.] Estimated construction cost $251,500. Post Office address State Education Dept., Albany, N. Y. Studio location State College of Agriculture. Transmitter location Conn. Hill, 10 mi. SW of Ithaca. Geographic coordinates 42° 23′ 12″ N. Lat., 76° 40′ 10″ W. Long. Transmitter and antenna GE. Legal counsel Fischer, Willis & Panzer, Washington. Consulting engineer Francis E. Almstead, Albany, N. Y. Principals include the Regents and Commissioner of Education of the State of New York. [For application, see TV Applications, B•T, Aug. 4.] City priority status not applicable; noncommercial, educational grant.

ITHACA, N. Y.—Cornell U. (WHCU). Granted uhf Ch. 20 (506-512 mc); ERP 215 kw visual, 110 kw aural; antenna height above average terrain 1,220 ft., above ground 440 ft. Estimated construction cost $335,500, first year operating cost $150,000, revenue $120,000. Post Office address Michael R. Hanna, WHCU, Savings Bank Bldg., Ithaca. Studio location Savings Bank Bldg. Transmitter location Connecticut Hill, Newfield, N. Y. Geographic coordinates 42° 23′ 13″ N. Lat., 76° 40′ 10″ W. Long. Transmitter and antenna GE. Legal counsel Cohn & Marks, Washington. Consulting engineer Howard G. Smith. Commercial operation proposed, but educational programs planned. Grantee has operated WHCU since 1921. **Michael Hanna** is general manager. [For application, see TV Applications, B•T, July 14.] City priority status: Gr. B-1, No. 85.

ATLANTIC CITY, N. J.—Matta Enterprises. Granted uhf Ch. 52 (698-704 mc); ERP 20.5 kw visual, 11 kw aural; antenna height above average terrain 370 ft., above ground 391 ft. Engineering condition. Estimated construction cost $159,500, first year operating cost $300,000, revenue $250,000. Post Office address 1223 Braddock Ave., Braddock, Pa. Studio location to be determined. Transmitter location 208 North Maine Ave. at intersection of Bader Ave. and Maine Ave. Geographic coordinates 39° 22′ 15″ N. Lat., 74° 24′ 54″ W. Long. Transmitter and antenna RCA. Legal counsel Scharfeld, Jones & Baron, Washington. Consulting engineer A. D. Ring & Co., Washington. Principals include equal (50%) general partners **William G. Matta** and **G. C. Matta,** engaged in real estate management, coal stripping and operating of picnic grounds, and each ⅓ owner of WLOA Braddock, Pa., and applicant for new TV station (uhf Ch. 61) in Akron, Ohio. [For application, see TV Applications, B•T, Dec. 15.] City priority status: Gr. A-2, No. 66.

PITTSBURGH, Pa.—Agnes J. Reeves Greer (WKJF). Granted uhf Ch. 53 (704-710 mc); ERP 260 kw visual, 130 kw aural; antenna height above average terrain 530 ft., above ground 426 ft. Engineering condition. Estimated construction cost $337,632, first year operating cost $225,000, revenue $225,000. Post Office address 238 Spruce St., Morgantown, W. Va. Studio and transmitter location 1715 Grandview Ave., Pittsburgh. Geographic coordinates 40° 26′ 28″ N. Lat., 80° 01′ 34″ W. Long. Transmitter and antenna GE. Legal counsel Dow, Lohnes & Albertson, Washington. Consulting engineer George C. Davis, Washington. Sole owner **Agnes J. Reeves Greer,** chief owner of WAJR-AM-FM Morgantown, W. Va., WDNE Elkins, W. Va., and WJER Dover, Ohio, president and holder of controlling interest in Greer Steel Co., Morgantown, Preston County Coal & Coke Co., Cascade, W. Va., and West Virginia Newspaper Pub. Co., which publishes two newspapers in Morgantown and a third in New Martinsville, W. Va. [For application, see TV Applications, B•T, Oct. 6.] City priority status: Gr. B-4, No. 180.

HOUSTON, Tex.—Uhf Television Co. Granted uhf Ch. 23 (524-530 mc); ERP 175 kw visual, 88 kw aural; antenna height above average terrain 510 ft., above ground 540 ft. Engineering condition. Estimated construction cost $430,000, first year operating cost $376,000, revenue $300,000. Post Office address 14th Floor, Magnolia Bldg., Dallas, Tex. Studio and transmitter location 4600 Calhoun Road, Houston. Geographic coordinates 29° 43′ 27.2″ N. Lat., 95° 20′ 13.9″ W. Long. Transmitter and antenna RCA. Legal counsel Ross K. Prescott. Dallas. Consulting engineer Guy C. Hutcheson, Arlington, Tex. Principals include **R. L. Wheelock, W. L. Pickens** and **H. H. Coffield,** each ⅓ partner and each independent Texas oil operator. Same partners at one time each owned ¼ of KPHO-TV Phoenix, Ariz., and each had part interest in KEYL (TV) San Antonio, Tex., aggregate of which constituted control of KEYL (TV). Same group also is applying for TV stations in New Orleans, La., Corpus Christi and Dallas, Tex. [For application, see TV Applications, B•T, June 30.] City priority status: Gr. B-4, No. 183.

HOUSTON, Tex. — KNUZ Television Co. (KNUZ). Granted uhf Ch. 39 (620-626 mc); ERP 100 kw visual, 60 kw aural; antenna height above average terrain 520 ft., above ground 540 ft. Estimated construction cost $347,679, first year operating cost $360,379, revenue $286,260. Post Office address P. O. Box 2135, Houston, Tex. Studio and transmitter location 4702 Austin St. Geographic coordinates 29° 43′ 48″ N. Lat., 95° 22′ 53″ W. Long. Transmitter and antenna RCA. Legal counsel Cohn & Marks, Washington. Consulting engineer Weldon & Carr, Washington. Principals include President **Max H. Jacobs** (40%), 26% owner of KNUZ. Vice President and Treasurer **Irvin M. Shlenker** (40%), chairman of the board and owner and trustee of substantial stock interest of Houston National Bank; Vice President and General Manager **David H. Morris** (5%), general manager of KNUZ; Assistant Treasurer **Douglas B. Hicks** (5%), 26% owner of KNUZ; Secretary **Bailey A. Swenson** (5%), 24% owner of KNUZ and Assistant Secretary **Leon Greer** (5%), 24% owner of KNUZ. [For application, see TV Applications, B•T Oct. 13.] City priority status: Gr. B-4 No. 183.

MADISON, Wis.—Monona Bcstg. Co (WKOW). Granted uhf Ch. 27 (548-554 mc); ERP 87 kw visual, 47 kw aural antenna height above average terrain 610 ft., above ground 596 ft. Estimated construction cost $319,450, first year operating cost $250,000, revenue $250,000 Post Office address 215 West Washington Ave., Madison 3, Wis. Studio location to be determined. Transmitter location 4 mi. SW of Madison on Piper Road. Geographic coordinates 43° 03′ 06″ N. Lat., 89° 27′ 50″ W. Long. Transmitter, antenna and studio equipment RCA. Legal counsel Fly, Shuebruk & Blume, Washington. Consulting engineer Walter F. Kean, Riverside, Ill. Principals include President **Stewart Watson** (3.84%), 1st Vice President **E. B. Rundell** (8.25%), 2nd Vice President **George W. Icke** (6%), Treasurer **E. C. Severson** (10.75%) and Secretary **B. W. Huiskamp** (7.97%). [For application, see TV Applications, B•T, Aug. 25.] City priority status: Gr. A-2, No. 30.

EXISTING STATIONS CHANGES GRANTED

Group D

KPIX (TV) SAN FRANCISCO, Calif.—KPIX Inc. Granted modification of construction permit for 100 kw visual, 50 kw aural; antenna height above average terrain 1,140 ft.

KRON-TV SAN FRANCISCO, Calif.—The Chronicle Publishing Co. Granted 100 kw visual, 50 kw aural; antenna height above average terrain 1,310 ft.

WNHC-TV NEW HAVEN, Conn.—The Elm City Bcstg. Corp. Granted 316 kw visual, 158 kw aural; antenna height above average terrain 720 ft.

WHBF-TV ROCK ISLAND, Ill.—Rock Island Bcstg. Co. Granted 100 kw visual, 50 kw aural.

WJBK-TV DETROIT, Mich.—Fort Industry Co. Granted 100 kw visual, 50 kw aural.

WHEN-TV SYRACUSE, N. Y.—Meredith Syracuse Television Corp. Granted modification of construction permit for 190 kw visual, 100 kw aural; antenna height above average terrain 960 ft.

WSYR-TV SYRACUSE, N. Y.—Central New York Bcstg. Corp. Granted 100 kw visual, 50 kw aural; antenna height above average terrain 1,000 ft.

Granted CP Modifications

WICC-TV BRIDGEPORT, Conn.—Southern Connecticut & Long Island Television Co. Granted modification of construction permit (which authorized 81 kw visual, 46 kw aural), for 180 kw visual, 91 kw aural.

WKNX-TV SAGINAW, Mich.—Lake Huron Bcstg. Corp. Granted modification of construction permit (which authorized 1 kw visual, 0.6 kw aural) for 19 kw visual, 10 kw aural, with condition that there be no adverse effect upon WKNX-AM.

WNOK-TV COLUMBIA, S. C.—Palmetto Radio Corp. Granted modification of CP (which authorized 680 kw visual, 340 kw aural), for 780 kw visual 390 kw aural; antenna height above average terrain 620 ft. (from 590 ft.)

KDUB-TV LUBBOCK, Tex.—Texas Telecasting Inc. Granted modification of construction permit for 31 kw visual, 15.5 kw aural, antenna height above average terrain of 1,000 ft. to change to antenna height above average terrain of 820 ft.

WSLS-TV ROANOKE, Va. — Roanoke Bcstg. Corp. Granted modification of construction permit for 250 kw visual, 125 kw aural, antenna height above average terrain of 1,973 ft., to

(Continued on page 58)

COMPATIBLE TESTS

NTSC to See Results

COMPATIBLE color TV—on which an all-industry technical committee has been working since 1950—may be forthcoming as a practical working system by the end of this week.

Full meeting of the National Television System Committee is scheduled for Friday in New York. At that time, final results of tests by more than a dozen panels will be submitted for acceptance by the full committee.

Steps thereafter are uncertain. Although the NTSC will undoubtedly finalize the compatible color system standards which have evolved over the two years that they have been under study, a further period of field testing by all manufacturer-members is believed necessary. This will take, it is believed, another three months.

At that time—about April—NTSC will be ready to go to the FCC. It is the hope of some of the NTSC leaders that the Commission will permit a full and unpartisan report, including demonstrations and papers, without rule-making considerations.

Just how the compatible system will be submitted to FCC for rule-making was still uncertain. Policy on that subject is due to be discussed by the TV Committee of RTMA at a meeting in New York early next month. Some manufacturing observers feel that NTSC should not be a party to rule-making, but should occupy a position similar to the 1941 NTSC which submitted standards for black-and-white TV.

CBS's Position

Compatible color proponents are, however, under some pressure to bring forth their findings for FCC consideration. Two weeks ago, CBS, which won the FCC's approval for its non-compatible field sequential color system in 1950, urged that the color question be determined one way or the other in 1953 [B•T, Jan. 5].

CBS's statement said that although compatibility was desirable, it still believed that its system was "the only practical, workable and inexpensive color system."

CBS began telecasting color shortly after the favorable FCC decision was upheld by the Supreme Court but was forced to halt when the National Production Authority banned the manufacture of color TV apparatus. That ban will probably be dropped this year, since most material shortages have been overcome.

Only two points remain at issue for NTSC to decide, it was learned. One is the place in the color triangle to standardize on—whether the color standards should be narrow blue or orange cyan. The other is whether the proposed standards should be tailored to perform automatically with every TV set that has been produced since 1946.

During the year of testing by various manufacturers, with the assistance of half-dozen TV stations, some difficulties were discovered in the NTSC tentative specifications issued last year. These have all been overcome, it was learned.

Although NTSC's technicians express great confidence in the compatible system which has been evolved, the question of apparatus is still an uncertainty.

One big problem, according to some TV technicians, is color picture tubes. Only color tubes being made are by RCA and Chromatic Television Labs. The latter, half-owned by Paramount Pictures Corp., showed its latest development last month [B•T, Dec. 29, 1952].

In addition to the work various manufacturers have done for NTSC, all are working on their own in the development of apparatus—receivers, circuits, etc. This is the competitive aspect of the compatible color TV situation. All such work is labeled confidential by the various companies, which do not intend to share their secrets with the others.

The New Grantees' Commencement Target Dates

‡ On the air, operating commercially. * Educational permittee.

HERE are post-thaw TV grantees and the dates on which they expect to commence operation. Channels authorized, network affiliation and national representative, where signed, are given.

LEN NASMAN (l), sales manager, WFMJ-AM-TV Youngstown, Ohio, and Dave E. Carroll, president, Coca-Cola Bottling Co. of Youngstown, sign first TV program contract for *Kit Carson*, half-hour film series. WFMJ-TV is slated to begin operation soon.

BIG UHF YEAR

Seen by RCA Victor's Baker

PREDICTION of a big year for uhf in 1953 came last week from Henry G. Baker, vice president in charge of the RCA Victor home instrument department.

The forecast came as Mr. Baker announced his company's final item in special uhf equipment—an automatic 16-channel combination vhf-uhf rotary tuner for RCA Victor TV sets.

Mr. Baker said all RCA uhf equipment now is in quantity production, including uhf transmitters and antennas, transmission line, receiving antennas, combination vhf-uhf tuner sets and uhf selectors for use with vhf-only sets.

He said all 25 new TV set models announced by RCA Victor will be available either with a vhf-only tuner or, for approximately $50 more, with the new combination vhf-uhf tuner, which is interchangeable with the vhf-only tuner in the 1953 sets and in earlier deluxe and "Super Set" models.

TELEPROMPTER

Service To Be Offered

DISTRIBUTION of Teleprompter, the prompting device used at the 1952 Presidential conventions, will be made by a service being offered through the RCA Service Co., according to an announcement by RCA Victor Div. last week.

Already begun in New York and Philadelphia, the Teleprompter service will be extended to major cities throughout the country, a spokesman said. Besides its current wide use in the video and motion picture industries, the device will be offered to speakers at conventions, sales meetings, merchandise presentations and public events, according to RCA Victor. Speakers will be offered one or more Teleprompters plus a master control operator.

TV Grants

(Continued from page 56)

change to antenna height above average terrain of 1,960 ft., and transmitter location to west side of U. S. 211 atop Poor Mt.

GRANTED SPECIAL TEMPORARY AUTHORIZATION

WKAB-TV MOBILE, Ala.—Pursley Bcstg. Service. Granted special temporary authorization for commercial operation on uhf Ch. 48.

WKBN-TV YOUNGSTOWN, Ohio—WKBN Bcstg. Corp. Granted special temporary authorization for commercial operation on uhf Ch. 27.

WJAC-TV JOHNSTOWN, Pa.—WJAC Inc. Granted special temporary authorization to continue commercial operation on vhf Ch. 6 through extension of completion date (originally extended from Oct. 3, 1952, to Jan. 3, 1953) to March 11, 1953. [WJAC-TV is existing, pre-freeze station, due to shift from vhf Ch. 6 to vhf Ch. 13, and holds permit for special temporary authorization on vhf Ch. 13 with RCA transmitter, power of 500 w output visual.]

WBRE-TV WILKES-BARRE, Pa.—Louis G. Baltimore. Granted special temporary authorization for commercial operation on uhf Ch. 28.

KTSM-TV EL PASO, Tex. — Tri-State Bcstg. Co. Granted special temporary authorization for commercial operation on vhf Ch. 9.

NEW APPLICATIONS

Listed by States

† Indicates amended (pre-thaw) application re-filed.

MOBILE, Ala. — WKRG - TV Inc. (amended), vhf Ch. 5 (76-82 mc); ERP 100 kw visual, 50 kw aural; antenna height above average terrain 520 ft., above ground 460 ft. Estimated construction cost $664,888, first year operating cost $547,640, revenue $642,877. Post Office address 205 Government St., Mobile, Ala. Studio location to be determined. Transmitter location on Cottage Hill Road, 0.58 mi. west of intersection with Azalea Road. Geographic coordinates 30° 39′ 12″ N. Lat., 88° 08′ 59″ W. Long. Transmitter and antenna RCA. Legal counsel McKenna & Wilkinson, Washington. Consulting engineer Commercial Radio Equipment Co., Washington. Principals include President **Kenneth R. Giddens** (20%), **Shirley Rester** (10%), **T. J. Rester** (10%), **The President and Trustees of The Spring Hill College in the County of Mobile** (6.66%), Chairman of the Board **Alfred F. Delchamps** (4.44%), Vice President **Joseph H. Little** (6.66%) and 14 others with minority interest. City priority status: Gr. A-2, No. 16.

PEORIA, Ill.—WMBD Inc., vhf Ch. 8 (180-186 mc); ERP 316 kw visual, 158 kw aural; antenna height above average terrain 543 ft., above ground 442 ft. Estimated construction cost $538,369, first year operating cost $428,819, revenue $512,662. Post office address 212 South Jefferson St., Peoria 2, Ill. Studio location 212 South Jefferson St. Transmitter location 1 mi. south of Groveland, Ill. Geographic coordinates 40° 34′ 35″ N. Lat., 89° 32′ 03″ W. Long. Transmitter DuMont, antenna RCA. Legal counsel Dow, Lohnes & Albertson, Washington. Consulting engineer Craven, Lohnes & Culver, Washington. Principals include President and Treasurer **Charles C. Caley** (66.67%), vice president, general manager and 25% owner of WMBD-AM-FM Peoria and 25% owner of WDZ Decatur, and Vice President **John E. Fetzer** (33.33%), president and 52% owner of WKZO-AM-TV Kalamazoo, Mich., and WJEF-AM-FM Grand Rapids, Mich. (Applicant seeks FCC approval of assignment of license of WMBD Peoria from Peoria Bcstg. Co., and this application is contingent upon FCC approval of that assignment. (See FCC Roundup, p. 87.) City priority status: Gr. A-2, No. 24.

† **INDIANAPOLIS, Ind. — Crosley Bcstg. Corp.,** vhf Ch. 8 (180-186 mc); ERP 316 kw visual, 158 kw aural; antenna height above average terrain 1,000 ft., above ground 995 ft. Estimated construction cost $801,750, first year operating cost $1,000,000, revenue $500,000. Post office address Crosley Square, 140 West 9th St., Cincinnati 2, Ohio. Studio location to be determined. Transmitter location SE corner at intersection of South Post Road and Raymond St. Geographic coordinates 39° 44′ 17″ N. Lat., 86° 00′ 21″ W. Long. Transmitter and antenna RCA. Legal counsel Hogan & Hartson, Washington. Principals include Chairman of the Board **James D. Shouse,** President **R. E. Dunville,** Secretary **R. S. Pruitt,** Vice President and Treasurer **K. T. Murphy,** Vice President **Harry M. Smith,** Vice President **William P. Robinson** and Vice President **John T. Murphy.** Sole owner of 100% of stock of applicant is **Avco Mfg. Co.,** New York. Applicant is licensee of WLW WLWT (TV) Cincinnati, WINS New York, WLWD (TV) Dayton and WLWC (TV) Columbus, and seeks FCC approval of application for transfer of control of WLTV (TV) Atlanta, Ga., from Broadcasting Inc. [B•T, Jan. 5, Dec. 15, 1952]. City priority status: Gr. B-4, No. 187.

COMPLETING arrangements for new series of live boxing bouts on ABC-TV beginning Jan. 24 are (seated, l to r) Bill Stern, sportscaster; Harry P. Wurman, president Bayuk Cigars Inc., the sponsor, and John P. McDonald, Bayuk assistant general sales manager; standing (l to r) are Jesse T. Ellington, president, Ellington & Co. agency; Ray Arcel, vice president, New York Boxing Guild, and Charles R. Marshall, Ellington vice president.

HATTIESBURG, Miss. — Mississippi Electronics Co., vhf Ch. 9 (186-192 mc); ERP 2.54 kw visual, 1.27 kw aural; antenna height above average terrain 412 ft., above ground 437 ft. Estimated construction cost $110,000, first year operating cost $70,000, revenue $135,000. Post office address Hattiesburg, Miss. Studio and transmitter location on Highway #11 to Laurel, about 3 mi. north of city limits. Geographic coordinates 31° 21′ 48″ N. Lat., 89° 16′ 26″ W. Long. Transmitter and antenna RCA. Consulting engineer William E. Benns Jr., Washington. Principals include President **Dorsey Eugene Newman** (46%), 51% owner of Cargo Air Charter Service, part time program coordinator for WVOK Birmingham, Ala., and ⅓ partner in WBHM Homewood, Ala.; Vice President **William E. Benns Sr.** (29%), 20% owner of WVOK and construction supervisor and architect, Birmingham, and Secretary-Treasurer **Julian Skinner Jr.** (25%), attorney and partner in Jasper (Ala.) law firm of Bankhead & Skinner. Messrs. Benns and Skinner also have interest in application for new TV station in Greenville, S. C. [B•T, Sept. 29, 1952]. City priority status: Gr. A-2, No. 173.

† **ST. LOUIS, Mo.—220 North Kingshighway Inc.,** vhf Ch. 11 (198-204 mc); ERP 316 kw visual, 158 kw aural; antenna height above average terrain 1,009 ft., above ground 998 ft. Estimated construction cost $766,500, first year operating cost $900,000, revenue $1,000,000. Post office address 220 North Kingshighway. Studio location Lyn Theatre, 3631 Grandel Square. Transmitter location on east side of Hamilton Ave. between Columbia and Elizabeth Avenues. Geographic coordinates 38° 36′ 51″ N. Lat., 90° 17′ 07″ W. Long. Transmitter and antenna RCA. Legal counsel Barnard Koteen, Washington. Consulting engineer George C. Davis, Washington. Principals include President **Sam Koplar** (5%), Vice President and General Manager **Harold Koplar** (45%), Treasurer **Janet Jeanette Koplar** (10%), Secretary **Lillian Koplar Shenker** (20%) (Mrs. Shenker is wife of Morris Shenker, attorney) and **Betty Koplar Bennett** (20%). Applicant operates Park Plaza Hotel and has controlling interest of Chase Hotel. City priority status: Gr. B-4, No. 179.

BILLINGS, Mont.—Rudman-Hayutin Television Co. (amended), vhf Ch. 8 (180-186 mc); ERP 12.2 kw visual, 6.1 kw aural; antenna height above average terrain 390 ft., above ground 187 ft. TV SETS UP 38%
In 7th FR District

SURVEY of the Seventh Federal Reserve District by the Federal Reserve Bank of Chicago indicates a jump of 38% in TV set installations as of Nov. 1, 1952, over those as of the same date a year before. Seventh district includes Iowa and most of Illinois, Indiana, Michigan and Wisconsin.

The 34% district increase compares with a 31% increase for the nation.

Free Inaugural Music

JAMES C. PETRILLO, president of the American Federation of Musicians, said in Chicago last week that music will be provided free by band and orchestra members performing during Gen. Dwight Eisenhower's Jan. 20 Inauguration. Mr. Petrillo said music was supplied without charge by the union at inauguration ceremonies of Franklin Delano Roosevelt, and that he was happy to make the same offer to the Republican winner.

Alexander Film Meet

DISCUSSION meetings planning for increased sales activity occupied the greatest part of the Alexander Film Co.'s 1953 sales convention last Monday through Friday at Colorado Springs, Col. Field officials and salesmen at the convention took up as a major topic the firm's advancement and development in production and sale of television film commercials.

EDUCATIONAL TV
More Outlets in Calif.

URGING California's legislature to adopt legislation and appropriate money to insure adequate statewide educational television, the State Board of Education recommended that at least four additional video channels be procured.

This action, adopted Jan. 2, follows a pattern set at Gov. Earl Warren's Conference on Educational Television held at Sacramento last month [B•T, Dec. 22, 1952] and attended by more than 2,000 leaders in education, business, agriculture, labor and television.

The board, acting unanimously on a resolution backing the TV educational plan, authorized Roy E. Simpson, Superintendent of Public Instruction, to take steps to secure the four channels and "more if they are required." It further urged "full and complete" utilization of the present eight channels allocated by the FCC.

The resolution also suggested that because of limited time before FCC's June 2 deadline to utilize channels set aside, an extension be requested. At present, one noncommercial TV educational station is under construction in Los Angeles.

INP Assistant General Manager Bauer examines newspictures being received by facsimile. ➤

HILL BAN EASING
Decision Left To Committees

FOR the first time in 10 months, TV covered a House committee hearing last week. Two newsreel companies "shot" the hearings on air crashes held by the House Armed Services Committee. The films were aired on TV.

A roundup of some House committee chairmen indicated that the concurrence of Speaker Joseph W. Martin (R-Mass.) to permitting committees to make up their own minds was having its effect.

Last February, then Speaker Sam Rayburn (D-Tex.) banned radio mikes and TV cameras as well as newsreels and tape recorders from House committee hearings.

Although Speaker Martin's announcement reversed Speaker Rayburn's decision, Rep. Patrick J. Hillings (R-Calif.) submitted a resolution (H Res 21) which would authorize each committee to judge for itself whether the broadcast media should be permitted to cover its sessions.

Mr. Hillings resolution, in the form of an addition of a new rule to the House's regulations, reads:

All hearings conducted by committees or their subcommittees may be broadcast by radio or television or the proceedings may be reproduced by recording or photography if so authorized by a majority of said committee or subcommittee. Such broadcast, photography, or recording shall be subject to such conditions as the committee or subcommittee by majority vote may prescribe.

Already announced as favoring radio or TV coverage, to some degree, are such House committee chairmen as the following:

Rep. Harold H. Velde (R-Ill.), Un-American Activities, who said he would permit some radio and TV participation with other news media to help "educate" the public. He also expressed the belief that the broadcast of some of his committee's hearings would "enhance" the Un-American Activities Committee's prestige by showing the public that its hearings were conducted fairly.

Rep. Kenneth B. Keating (R-N.Y.), subcommittee investigating Justice Department, who said he thought radio and TV coverage would be proper for subjects of "general public interest."

Rep. Robert W. Kean (R-N. J.), subcommittee investigating income tax scandals, who said, "I don't object to tape recordings for radio broadcasting and I have no objection to television, provided it can be done without bright lights. Bright lights tend to make a show of the thing and destroy the dignity of Congress."

Adverse Comment

Not enthusiastic was Rep. Samuel K. McConnell Jr. (R-Pa.), Labor Committee. He thought witnesses tended to concentrate on "mugging in front of the cameras" instead of on testimony.

The Senate has always permitted its committees to decide for themselves whether their hearings should be broadcast or televised. Not long ago, Sen. Joseph R. McCarthy (R-Wis.) said he favored radio-TV coverage of the investigations subcommittee of the Government Operations Committee.

In the last session of Congress, Sen. Pat McCarran (D-Nev.), then chairman of the Senate Judiciary Committee, offered a resolution (S Res 319) to bar the broadcasting services from Senate committee hearings. It was never taken up by the Rules Committee and died with the adjournment of the 82d Congress.

'TODAY' FACSIMILE
NBC-TV Begins Use

USE of facsimile to speed delivery of newspictures for telecast was to begin this morning (Monday), with presentation by the NBC-TV program *Today* of spot news photos received in the studio from International News Photos via facsimile equipment developed by Hogan Labs.

Agreement between INP and NBC for the facsimile transmission service of still photos for *Today* and NBC's other TV news programs was announced Thursday by Seymour Berkson, general manager of INS and INP, who termed the service "a new milestone in the adaptation of modern electronic devices to TV showmanship, designed to add further dramatic visual impact to TV news presentations."

The NBC facsimile service may well be the forerunner of the adoption of facsimile as a means of serving TV stations and networks on a national scale, replacing INP's present leased picture wire service, according to Charles Bauer, assistant general manager of INP. If development and production of the necessary equipment proceeds on schedule, this service should be ready to go in about a year, he said.

Speed Factor Cited

Speed is perhaps the foremost advantage of the facsimile service, Mr. Bauer said, pointing out that a picture taken with a polaroid camera delivers a positive print in about a minute. This print can be sent on a leased line to the nearest INP regional headquarters office for immediate distribution to INP's TV clients. Each station news editor can make an immediate decision as to whether he wants to use the picture, without need for preliminary processing such as is required by the standard process of sending photos by wire.

Other advantages are that the facsimile receiver does not require continual monitoring, that the dull surface of finished prints is ideal for telecasting without the reflections inherent in glossy prints and that facsimile permits the transmission of captions and other news copy along with the pictures and not by separate wire as is done currently. Mr. Bauer believes that eventually TV stations will get their full national service news as well as picture service by facsimile, which has the added virtue of reproducing copy exactly as sent.

Mr. Berkson also reported an expansion in INP's TV news service. Effective Jan. 5, the New York TV news desk went on a 24-hour basis, under the direction of Fred Methot. With this arrangement, INP is able to provide background pictures and information on important persons and events as well as the usual spot news coverage, Mr. Methot explained. His staff now can suggest feature stories and treatment to TV stations and develop them if desired, he said.

NCAA Unbending in TV Policy

(Continued from page 55)

stated, "but colleges facing TV competition remained 16% below their average pre-television 1947-48 base, while colleges which were not exposed to television competition drew 10% larger audiences than they did in 1947-48.

"It is extremely significant that under the continued NCAA program of limited football telecasts, colleges with TV competition were generally able to maintain their 1951 levels of paid admissions, despite a 40% increase in TV set ownership, and the extension of network television of football games to many areas in the south, southwest and mountain states which were not affected by TV competition in 1951." Colleges in TV areas held their 1951 levels but failed to share in gains recorded where TV was not a factor, it was stated.

The report quoted Nielsen data showing an average rating (% of sets tuned to NCAA program) of 38.2 for the season. Top figure was 50.4 for the UCLA-USC game. Average share-of-audience was 67.1% for 11 games.

Hall Reviews Report

NCAA's Thursday afternoon roundtable was opened by Robert A. Hall, of Yale, chairman of the TV Committee. As chairman he reviewed the committee's report and its effort to meet a difficult situation. He cited General Motors research showing that 96.9% of those who expressed views on the 1952 TV schedule were pleased. A new TV committee will be named, he said, and it will soon start hearings. The final plan, due perhaps in the late spring, is subject to approval by a two-thirds referendum.

As he concluded a eulogy of NCAA's democratic processes, Ralph Furey, of the NCAA Eastern Conference, denounced DuMont Network for "lobbying" and flooding the convention with "propaganda." He claimed the DuMont information, quoting a large number of sports writers in opposition to NCAA's plan, was "not factual."

Francis Murray, U. of Pennsylvania athletic director, submitted a minority report calling for freedom of choice by each college in making TV arrangements. He proposed a fund be built up from TV revenues, with receipts apportioned among colleges suffering from telecasts and among needy students. He opposed sponsorship of football TV by alcoholic beverages or other products not deemed desirable.

Mr. Murry termed "slanderous" the charge that colleges would be "tempted" to get TV revenues. The problem is "control of proselyting, not television," he claimed. He listed figures contesting the National Opinion Research Center's survey data on TV's impact, criticizing use of 1947-48 as base years.

Ed Krause, Notre Dame athletic director, agreed with Mr. Murray that football and TV are "good elements in American life" and called for "more rather than less football on TV." Like Mr. Murray, he charged the current NCAA policy has no regard for what the public wants to see. Both agreed the public interest should be the controlling factor.

NCAA's control is artificial, not natural, Mr. Krause said.

NCAA's controlled TV cost the university $600,000 in 1951 and a million dollars last season, he concluded.

Bob Finnegan, ABC network, first person from the industry to speak, said ABC wanted to be put on record against the NCAA football TV policy, predicting it eventually will turn to unrestricted telecasting. "NCAA whets the appetite for football television, not football," he said.

Tom McMahon, DuMont athletic director, replying to Mr. Furey's charges that the network "propaganda" was not factual, said, "We exercised the American privilege to speak for what we believe and acted within our rights." He recalled that Dr. Allen B. DuMont had risen from a Brooklyn cellar laboratory to his present industry position because of the advantages of free competition.

Rev. Joyce's Opinion

Paul Sheatsley, of NORC, said Mr. Murray had cited distortions of its survey data on TV's impact.

Rev. Edmund P. Joyce, vice president of Notre Dame, suggested the TV Committee had used "bad wording" in its report by charging Notre Dame and Pennsylvania had attacked motives "of their fellow members to bring discredit upon a program which had the backing of an overwhelming majority of the NCAA."

His suggestion brought Chairman Hall to the podium with a slashing attack. The chairman said the committee considered the language "a temperate statement of what had been apparent to us." Most of the "minority" speakers took their seats to the accompaniment of fast rebuttal from the chair.

Three spokesmen appeared for subscription television—Paul McNamara, Telemeter Co.; James M. Landis, spokesman for and a director of Skiatron Electronics & Television Corp., developer of Subscriber-Vision, and Ted Leitzell, Zenith Radio Corp., for Phonevision.

The TV committee wrapped up its views in a series of conclusions and recommendations. These were prepared for submission to the NCAA business session Friday afternoon.

TV continues a "serious threat" to college football as well as the overall athletic program because of its "damaging impact" on the gate, the committee contended in arguing for continued supervision on a national plan. It conceded, however, that such a plan should recognize regional problems.

Danger of "premium financial and publicity benefits" for a few colleges was presented as an argument against unlimited TV. Lacking a formula for national distribution of TV proceeds the committee strongly insisted on the rule allowing a college only one network appearance a season. Thus a "middle course of moderation and reasonableness was advocated."

A 600-word resolution cited the NORC studies and their showing of "a serious adverse effect" on the gate as well as the danger that a few colleges would grab TV publicity and money. It said the membership favors the one-appearance rule and claimed the 1952 plan provided a major game every Saturday, reducing but not eliminating "the adverse effect of television."

Delayed TV is gaining wide popularity, it was argued, and subscription TV "will necessarily have an important bearing on the college football situation, and, if properly supervised, can be operated to football's advantage."

National action is needed, the committee contended. As to the legal problem, the resolution stated, "NCAA fully recognizes the overriding importance of the colleges of the nation at all times being in full compliance with the laws of the land and, to that end, the NCAA has obtained the legal opinion of outstanding counsel and of law teachers that its actions have at all times been in full compliance with the laws of the land."

Sports Semantics

TELECASTING policy of the nation's colleges should avoid extremes, judging by the report of the TV Committee of National Collegiate Athletic Assn. The committee submitted this masterpiece of rhetorical ingenuity in its report: "The future of NCAA policy lies, neither in a complete ban on live television at the one extreme nor in unrestricted live television at the other extreme, but rather in the middle course of moderation and reasonableness."

NEWSPAPER POLL

NCAA Opposition Mirrored

OVERWHELMING opposition to the National Collegiate Athletic Assn.'s 1952 "limited" college football TV plan was expressed by fans participating in the *Chicago Herald-American* poll that ended Jan. 3, it was disclosed last week.

Final results of the poll, circulated also by DuMont TV Network, an outspoken opponent of NCAA's TV program last year, showed that 6,296 (35%) favored "unlimited" TV; 5,966 (33%), small fee TV; 5,011 (28%), regional TV, and 783 (4%), "limited" TV.

NCAA's position with respect to readers' polls repeatedly has been that such inquiries mirror the preferences of sports fans while the NCAA is set up to protect the interests of its 372 member colleges.

WITTING SCORES

NCAA Grid TV Control

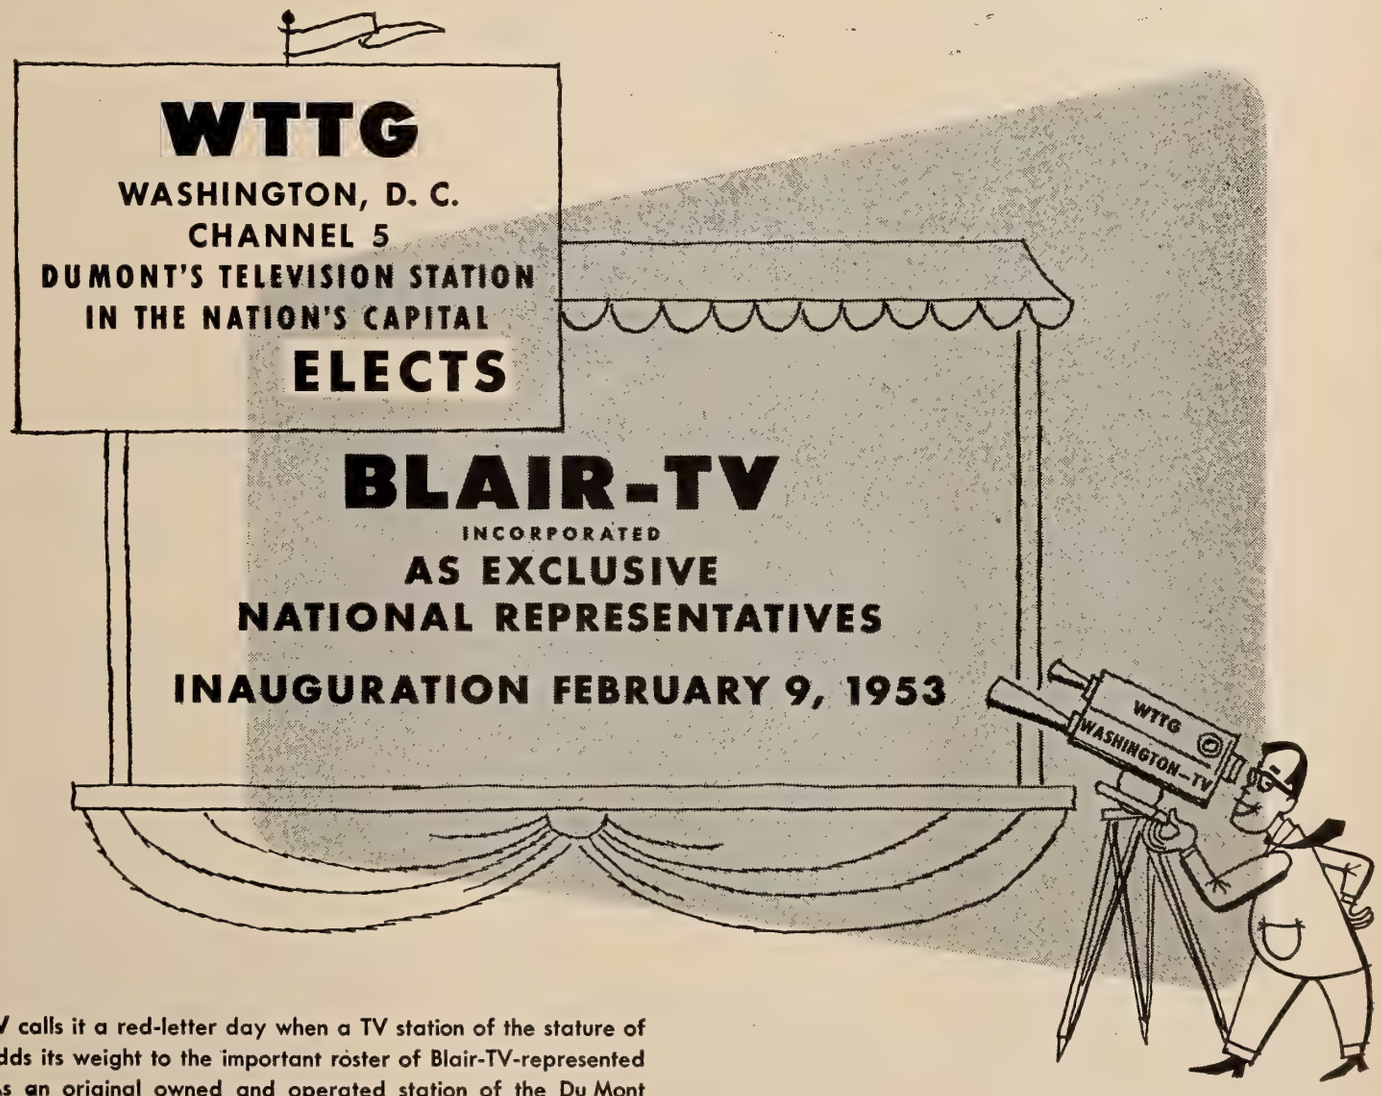
MONOPOLISTIC control of football TV by National Collegiate Athletic Assn. may lead to court action, Chris J. Witting, managing director of DuMont Television Network, predicted Thursday in calling for freedom of decision by colleges and freedom of game choice by the public.

DuMont was chastised Thursday by NCAA's top brass for "flooding" the NCAA's Washington convention with "propaganda" (see main NCAA's story page 55). The network had issued a press release quoting comments of sports writers.

NCAA's TV Committee submitted a proposed policy that would commit colleges "to another year of monopoly" through collusive action in restraint of trade, Mr. Witting claimed.

He said the TV Committee asked NCAA to pass a resolution "which, among other things, would direct member institutions not to make any commitments, arrangements or contracts for the televising of college football games until later in the year. Adoption of that portion of the resolution, we believe, would prove most embarrassing to every college president and every college trustee whose institutions happen to be members of the NCAA."

Mr. Witting contended the committee "sought to convey the impression that a 1953 TV program would be formulated by a new committee after hearing all 'interested' parties and that the new program would then be submitted to members for a vote. The fact is that the committee's recommended resolution so completely fences in the area of operation for 1953 and so commits the NCAA to another year of monopoly that the only thing left for the new committee to decide is which teams will play on the restricted schedule and who will get the money."



By holding out to NCAA members "the wholly unrealistic spectre of a possible monopoly of television networks by a few institutions," he claimed, the committee is using "fear" rather than sound judgment to attain objectives DuMont feels are illegal.

"If the NCAA persists in its efforts to thwart the public interest," Mr. Witting said, "it will be most surprising if the Dept. of Justice or an outside agency does not take the necessary court action to protect the interests of the public and those educational institutions which find themselves the victims of NCAA coercion."

WABI-TV Names

WABI-TV Bangor, which plans to make its debut Jan. 31 on Ch. 5, last week announced appointment of the George P. Hollingbery Co. as national sales representative. Murray Carpenter is general manager of the TV station as well as its AM affiliate.

MEET THE NEW REPRESENTATIVE-ELECT TO WASHINGTON-TV

BLAIR-TV calls it a red-letter day when a TV station of the stature of WTTG adds its weight to the important roster of Blair-TV-represented outlets. As an original owned and operated station of the Du Mont Network, WTTG has for the past five years presented a popular combination of local and network shows. Its early dominance of the Washington market (America's 9th metropolitan market) has paid handsome dividends in terms of an impressively large and faithful following.

Coverage . . . programming . . . aggressive, far-sighted management have provided BLAIR-TV with a sales platform the alert advertiser will want to investigate now. For the full story, phone any BLAIR-TV office today.

In Houston KPRC-TV Serves!

During 1952, KPRC-TV extended its services to encompass telecasts from early morning to midnight . . . more than 17 hours out of each 24 . . . more than 6250 hours on the air during the year.

The Houston area's tremendous and constantly growing number of set-owners experienced every possible type of television entertainment in 1952 . . . plus well over 600 very important hours and well over 11,000 announcements devoted exclusively to community interests and public welfare.

Literally hundreds of religious and educational institutions, agricultural, governmental, safety and civic organizations, and other groups wholeheartedly dedicated to the betterment of community living, participated in these public service programs.

With the close cooperation of these groups and their individual workers, KPRC-TV has been able to express, in concrete terms, its desire to serve successfully the people of Houston and the Gulf Coast area.

The owners, management and staff of KPRC-TV wish to offer their sincere appreciation to all of these participating groups, and to re-dedicate themselves to the service of the community.

'Lucy' in Front of Rating Parade

(Report 250)

AMERICAN Research Bureau December 1952 ratings listed *I Love Lucy* and Arthur Godfrey's *Talent Scouts* in the No. 1 and 2 spots, respectively, and ARB Director James W. Seiler said the two shows, plus *Your Show of Shows*, were among ARB's top 10 every month scheduled during 1952 except for vacation periods. December ratings, compared with those in January at beginning of 1952, follow:

JANUARY 1952

	Program	Rating
1	Red Skelton (NBC)	49.5
2	Talent Scouts (CBS)	47.2
3	Star Theatre (NBC)	46.2
4	Show of Shows (NBC)	44.9
5	I Love Lucy (CBS)	44.0
6	My Friend Irma (CBS)	40.5
7	Blue Ribbon Bouts (CBS)	40.3
8	Comedy Hour (NBC)	40.0
9	Cavalcade of Sports (NBC)	39.7
10	Kraft TV Theatre (NBC)	38.0

DECEMBER 1952

	Program	Rating
1	I Love Lucy (CBS)	73.5
2	Talent Scouts (CBS)	60.4
3	Godfrey & Friends (CBS)	57.4
4	You Bet Your Life (NBC)	49.5
5	Comedy Hour (NBC)	47.0
6	Dragnet (NBC)	43.5
7	What's My Line? (CBS)	41.6
8	Television Playhouse (NBC)	41.0
9	Our Miss Brooks (CBS)	38.6
10	Show of Shows (NBC)	38.3

'Lucy' Leads Dec. Videodex Report

TOP 10 network television programs for December listed by Videodex Reports are as follows:

	Program	No. of Cities	% of TV Homes
1	I Love Lucy (CBS)	62	59.5
2	Godfrey & Friends (CBS, 8:30 p.m.)	58	50.0
3	Godfrey's Talent Scouts (CBS)	22	46.6
4	Godfrey & Friends (CBS, 8 p.m.)	54	44.2
5	Groucho Marx (NBC)	62	43.9
6	Dragnet (NBC)	40	43.8
7	Your Show of Shows (NBC, 1st hour)	56	40.3
8	Buick Circus Hour (NBC)	48	37.5
9	Colgate Comedy Hour (NBC)	60	37.4
10	Red Skelton (NBC)	56	33.7

	Program	No. of Cities	No. of TV Homes (000)
1	I Love Lucy (CBS)	62	11,667
2	Godfrey & Friends (CBS, 8:30 p.m.)	58	9,446
3	Groucho Marx (NBC)	62	8,590
4	Godfrey & Friends (CBS, 8 p.m.)	54	8,236
5	Your Show of Shows (NBC, 1st hour)	56	7,426
6	Colgate Comedy Hour (NBC)	60	7,150
7	Dragnet (NBC)	40	6,757
8	Red Skelton (NBC)	56	6,464
9	All-Star Revue (NBC)	58	6,346
10	Buick Circus Hour (NBC)	48	6,030

Daytime TV Habits Reported in L. A., S. F.

DAYTIME TV is heard in two-thirds of Los Angeles and San Francisco TV homes at least once, Monday through Friday, according to a report on "The Audience Potential of Daytime Television" made by ARB-Teleque for clients at year's end.

Based on an analysis of the American Research Bureau survey made in November in the two California cities, the report shows nearly half of the homes tune in every day for five days and only about one in ten tune in one day only.

One significant fact is that daytime audiences in both cities are

(Continued on page 66)

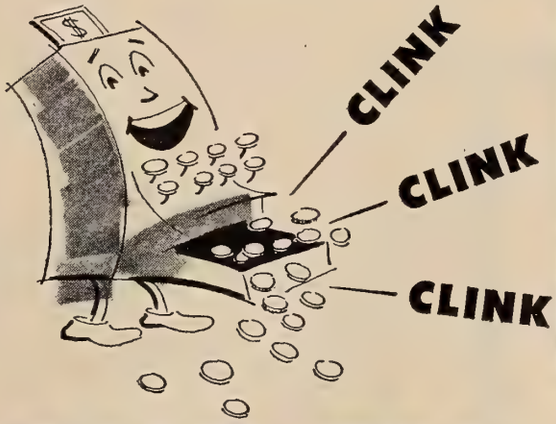
Total Stations on Air 125* Total Markets on Air 74* Total Sets in Use: 20,131,773

* Includes XELD-TV Matamoros, Mexico

Editor's Note: Totals for each market represent estimated sets within television area. Where coverage areas overlap set counts may be partially duplicated. Sources of set estimates are based on data from dealers, distributors, TV circulation committees, electric companies and manufacturers. Since many are compiled monthly, some may remain unchanged in successive summaries. Total sets in all areas are necessarily approximate.



IT TAKES

TO GET

AND WHIO-TV HAS IT FOR YOU!

Here are the salesmen who have what it takes to move your product here in the Dayton market—where the pay check ranks up with the nation's highest, and that ever-lovin' folk music keeps it circulating.

You won't find a higher-powered sales force anywhere than our star-studded roundup of Ernie Lee, Kenny Roberts, and the Trail Hands. See National Representative George P. Hollingbery for market data, ratings and availabilities.

DAYTON, OHIO • whio TV AM FM

Telestatus

(Continued from page 64)

alike in two basic respects: (1) The number of homes tuning to daytime video during the week and (2) the regularity with which these homes view.

The report shows nearly all viewing of daytime television is during the afternoon with only about four in ten homes viewing during the morning. In both cities homes tuning to daytime TV averaged about 6.9 hours viewing during the week.

* * *

12 Million Viewers Saw 'Birth'—ARB

TELEVISED birth of a baby last month on NBC-TV's *March of Medicine* was seen by nearly 12 million viewers in over 5 million homes in 37 cities, according to American Research Bureau figures released by Director James W. Seiler.

ARB estimates some 11,592,000 viewers, with nearly 35% of sets in various areas tuned to the program. The audience breakdown was 38% men, 51% women and 10% children. Program was telecast Dec. 2 as part of the regular twice-weekly series sponsored by Smith, Kline & French Labs.

* * *

Chicago Leads L. A. In Live Originations

CHICAGO has moved into second place, ahead of Los Angeles, as origination point for live network television programs, according to Ross Reports on Television published today (Monday).

The research firm issues a monthly index of network TV program originations based on a single week's sampling. Current figures are based on advance network schedules for the week of Jan. 11-17.

New York outdistances all cities with 135¼ hours of live and film programming (122¼ live) set for the sampling period. Chicago has scheduled 18 hours (17 live) and Los Angeles 19 hours (11 live).

Other city totals are: Washington, 6¼ hours (6¼ live); Philadelphia, 7 hours (4¼ live); Cincinnati, 5 hours (5 live); St. Louis, ¾ hour (¾ live), and Baltimore and Pittsburgh, ½ hour each, both live.

Survey of network TV programming by Ross Reports indicates that during the Jan. 11-17 index week, NBC will lead all networks in program service to affiliates with 69½ hours of programming (56½ hours live). CBS-TV will transmit 61¾ hours (53¼ live); DuMont, 32¾ hours (31¾ live), and ABC, 28¼ hours (16½ live).

The firm said that all approximations are based on advance schedules and do not reflect last minute programming revisions.

* * *

Golf Coverage Technique Devised at KECA-TV

DEVISED to augment TV coverage of golf tournaments is new technique by Stuart Woodman Phelps, director with KECA-TV Los Angeles, whereby all the strategic golf plays are brought into focus in one picture. It was premiered on the telecast of the 27th annual L. A. Open Golf Tournament, Jan. 5-6. Cables in double the normal amount were laid underground to connect audio and video channels. Four cameras were utilized. Mr. Phelps directed from a special master control headquarters on the links.

'SHOW BUSINESS'

Kaufman Back by Demand

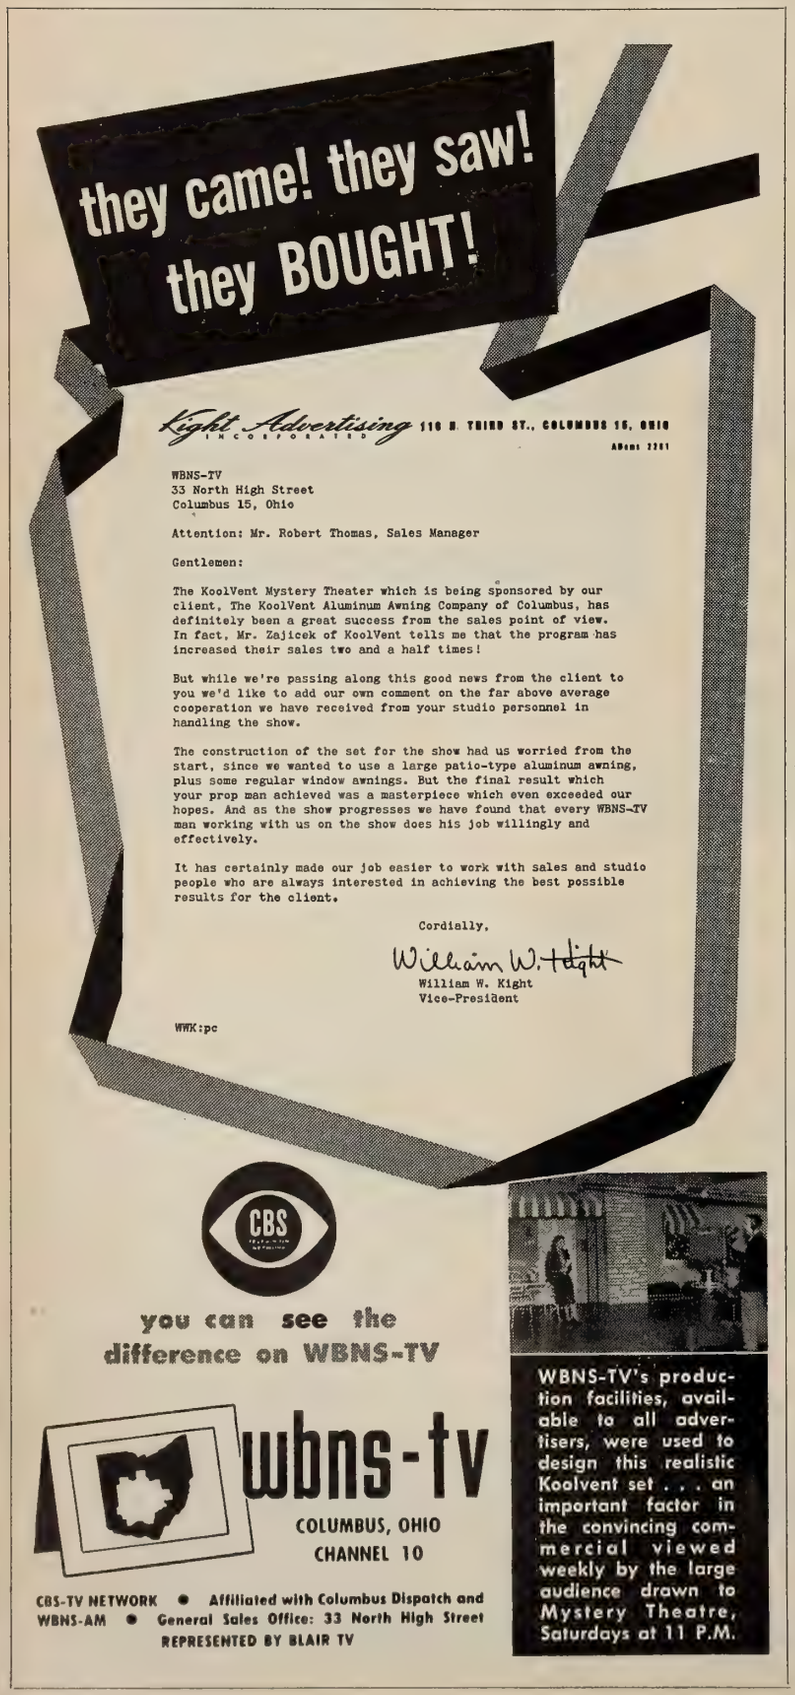
PLAYWRIGHT George S. Kaufman, dropped from the regular panel of American Tobacco Co.'s *This Is Show Business* because of protests against a remark he made on the Dec. 21 program, will return to the show—by popular demand—when the show becomes a sustainer Jan. 24.

The number of protests against the dropping of Mr. Kaufman was reported by CBS-TV spokesmen as having greatly exceeded the number of protests (about 500) against the remark he made.

The original protests were directed aginst Mr. Kaufman's observation, on the pre-Christmas program, that they should "make this one program on which no one sings 'Silent Night.'" Complaints were based on interpretations of the remark as being "anti-religious" and in "bad taste."

Among the protests that broke with disclosure that Mr. Kaufman had been dropped was one lodged by the Rev. Dr. Truman B. Douglass, chairman of the Broadcasting and Film Commission of the National Council of Churches, who wrote CBS Board Chairman William S. Paley that Mr. Kaufman's remark was "more expressive of religious sensitiveness than of any spirit of derision."

Dr. Douglass said, "The real sacrilege is the merciless repetition of 'Silent Night' and similar Christian hymns by crooners, hillbillies, dance bands and other musical barbarians."



He also objected to the dropping of Mr. Kaufman on protests from a minority of the audience: "It would seem to me," he said, "that before CBS accepted these self-appointed defenders of sanctity as ultimate arbiters of good taste in the realm of religion some attempt might have been made to obtain the opinion of responsible representatives of religious bodies."

Mr. Kaufman himself had said that his "was not wittingly an anti-religious remark. I was merely speaking out against the use and over-use of this Christmas carol in connection with the sale of commercial products."

American Tobacco Co.'s decision to replace the show, which alternates the 7-7:30 p.m. Sunday spot with the Jack Benny program, was reached before Mr. Kaufman made the quip that set off the furor. Effective Jan. 24, the program will be seen Saturday, 9-9:30 p.m., with Mr. Kaufman, Clifton Fadiman and Sam Levenson among the regulars.

Consolidated Sales

COMPLETION of 28 new sales in the past two weeks by Consolidated Television Sales, filmed TV distribution firm, was announced today (Monday) by Peter M. Robeck, general manager.

CROSLEY TV DIV.

11-Month Report Issued

GROSS SALES for the three-station television division of Crosley Broadcasting Corp. for the 11-month fiscal period ending Oct. 31, 1952, totaled in excess of $4.4 million—topping the $3 million gross of Crosley's WLW Cincinnati and $730,000 gross for WINS New York during the same period.

Financial details of the Crosley operations were disclosed in the formal application reported filed with FCC last week for consent to purchase WLTV(TV) Atlanta for $1.5 million from 25 prominent local citizens [B•T, Dec. 15, 1952].

Concurrently, Crosley tendered to the Commission its amended new-station applications for vhf Ch. 11 at Toledo and vhf Ch. 8 at Indianapolis. The Avco Corp. subsidiary had applications pending in those cities prior to the lifting of the freeze last spring.

Crosley's present TV outlets include WLWT (TV) Cincinnati, WLWC (TV) Columbus and WLWD (TV) Dayton, all Ohio. In addition to these and its 50-kw clear channel WLW and 50-kw independent WINS, Crosley operates several international short-wave stations which are a part of the Voice of America.

Since FCC rules prohibit a single licensee from controlling more than five TV stations, Crosley would be faced with giving up the alternate bid should either of the Toledo or Indianapolis applications be approved and the WLTV transfer consummated after Commission consent.

Last 'Pre-Freeze' Station

The last of the "pre-freeze" and the 108th station to commence operation, WLTV has been on the air since Oct. 1, 1951. In its 13th month of operation, WLTV reported it had gone into the black [B•T, Nov. 17, 1952].

The 25 local citizens comprising Broadcasting Inc., the WLTV licensee, had acquired the station for $525,000 from the Atlanta *Journal* and *Constitution*, licensee of WSB-TV Atlanta. Third operating Atlanta station is WAGA-TV, owned by Storer Broadcasting Co.

WLTV, an ABC affiliate, is assigned Ch. 8.

Final negotiations for the sale were handled by James D. Shouse, chairman of the board of Crosley and vice president of Avco, and William T. Lane, WLTV general manager, who is expected to continue in his present post.

Avco already has a business interest in the South through its appliance manufacturing plant at Nashville.

The Broadcasting Inc. stockholders who would sell their holdings to Crosley, in addition to General Manager Lane, include President Walter C. Sturdivant, owner of Montgomery Knitting Mills of Summerville, Ga., Clement C. Evans, Alfred Kennedy Jr., Harris Robertson and Arthur Montgomery.

WLTV's financial statement, dated Nov. 30, 1952, and submitted with the transfer application, reported a net loss from operations for 1952 in the amount of $126,995.05. No monthly breakdown of finances was given.

Current assets reported were $156,434.48 and fixed assets $635,519.12. Of the latter, land totaled $48,604.31, machinery and equipment $429,905.26 (depreciated value), studio and technical equipment $136,517.25 (depreciated value). With deferred charges of $6,602.14, total assets came to $798,555.74.

The report gave current liabilities of $37,806.06 and long term indebtedness of $150,000, latter due Trust Co. of Georgia. Total of $360,000 in preferred stock and common stock of $504,100 issued.

The application showed that in 1951 WLTV was operating 53.5 hours weekly and in 1952, 63.9 hours per week.

Commercial programs totaled 39.1% of the time, with network commercial 22.5%.

Financial statement for Crosley Broadcasting Corp., included with the WLTV transfer application, showed gross sales of $8,492,324.63 for the 11 month fiscal period ending Oct. 31, 1952. With deduction of $149,345.56 as rebate provision, net sales totaled $8,342,979.07.

For the period, the report showed gross sales for the WLW division totaled $3,052,156.48; WINS division, $733,879.49; inter-company sales of talent, $42,890.69, and inter-company sales of time, $227,384.69. Gross sales for the TV unit totaled $4,436,013.28.

Profit after provision for federal income taxes was reported as $800,956.36, or 9.6% of net sales.

The report listed operating expenses of $5,132,868.70 for this period, plus general and administrative expenses of $1,417,055.16.

The Crosley balance sheet showed an earned surplus balance as of Nov. 30, 1951, of $2,455,779.17, which was adjusted to $2,756,735.53 following addition of the current net profit and deduction of $500,000 paid in dividends.

The balance sheet disclosed total assets of $5,895,483.44, comprised of the following: current assets, $2,886,252.06; investments, $183,685; fixed assets, $1,797,302.63; goodwill (WINS), $867,847; deferred charges, $160,396.75.

Current liabilities were listed at $1,587,671.44, including $1,282,079.90 for taxes. Stock outstanding was given at $1,450,000.

Tobey Asks Delay in ABC-UPT Merger

(Continued from page 23)

Sen. Tobey's proposed hearings would be the ABC-UPT merger, it was thought unlikely that the FCC Commissioners would permit themselves to be interrogated on the case. The Commission has carefully over the years refrained from discussing pending matters with Congress. Legally, it cannot go beyond the record.

But in this case Sen. Tobey's message spoke of discussing possible legislation regarding the prohibition of motion picture and TV mergers. Consequently, it was felt that the Commissioners' ideas on the merger could be presented.

Consensus in a 1948 hearing on whether a blanket rule should be promulgated by the FCC to bar applicants with histories of anti-trust violations—which bore most heavily on motion picture interests—was that no general rule should be applied, but that each case should be taken up individually. The ABC-UPT merger, with its related issues concerning Paramount Pictures' anti-trust history, was the first such case following the FCC policy decision.

Oral argument before all seven commissioners saw only the Broadcast Bureau attorneys oppose the examiner's initial decision in toto.

Hearing Division Chief Frederick W. Ford argued that the merger tended to monopoly. He declared that both radio and TV and motion pictures competed for audiences, and that in addition further conflicts might crop up if and when theatre - TV and subscription - TV come of age.

Ford Decries 'Urgency'

Mr. Ford also decried the "urgency" of a decision immediately and declared that further delay would not be adverse to ABC's future.

To the argument that ABC and UPT would continue as separate entities, Mr. Ford quoted from the 1941 FCC Report on Chain Broadcasting that "two arms of a company cannot compete. . . ." This was in reference to the Blue and Red Networks of NBC. ABC is the successor to the Blue Network, which the FCC forced NBC to relinquish in 1943. It was sold to Mr. Noble for $8 million.

FCC attorney Max Paglin argued that the transfers of the radio-TV properties from the old Paramount Pictures to the new producing company was a voluntary action and required prior FCC approval. The applications were filed a few days before the new companies came into existence in January 1950, and were tagged as involuntary transfers. Paramount contended that the 1949 Consent Decree forced it to divide itself into producing and theatre-owning companies and thus was an involuntary action. Involuntary transfers do not require prior FCC approval.

FCC attorney James Juntilla argued that Paramount controlled Allen B. DuMont Labs. by virtue of 25% ownership of DuMont stock.

DuMont is actually and practically controlled by Dr. DuMont, attorney William A. Roberts emphasized in his presentation on the control issue. He cited various instances where the DuMont interests had acted counter to the Paramount directors' wishes. He stressed that Dr. DuMont and his associates actually run the company, that the Paramount directors—they occupy three out of the eight board memberships and represent the Class B stock wholly owned by Paramount—represent an investor's interest rather than an operating interest.

In answer to questions from FCC commissioners, Mr. Roberts acknowledged that Delaware law (DuMont is a Delaware corporation) provided for a type of negative control, but he strongly urged the Commission to look at the actual operating history of the company which, he said, was "dominated" by Dr. DuMont and his associates.

Roberts' Answer

In reply to Miss Hennock, Mr. Roberts said that DuMont feared that it would not be able to compete with the AB-PT company because of its size and its purchasing power in the film, talent and story fields.

However, he acknowledged that DuMont would not feel too badly about the merger if it were permitted to expand its TV station ownership from its present three to the FCC's limit of five. He suggested, however, that the Commission include conditions in its approval of the merger. The conditions, he explained, would inhibit the new company from exercising domination by virtue of its size and relationship to motion picture producers.

DuMont TV Network accounted for about 15% of the estimated $75 million gross of Allen B. DuMont Labs., Mr. Roberts revealed.

It was at this point that Miss Hennock suggested that with TV's economic conditions improved since the ABC-UPT merger was completed, it was no longer necessary to speed final Commission decision on the matter. The FCC had been urged to hasten its final decision, not only by ABC which was feeling the pinch of declining business early in 1952, but also by its affiliates.

Paramount Pictures attorney Paul A. Porter stressed that Paramount's interest in DuMont was that of an investor. He disclosed that Paramount's 25% holdings in DuMont were about 20-25% of Paramount's net assets. This accounted for the calibre of the Paramount directors on the DuMont board (Barney Balaban, Paul Raibourn and Edwin Weisl), he told Miss Hennock in answer to her interrogation.

In answer to another question from Miss Hennock, Mr. Porter said that the subject of DuMont opposition to the ABC-UPT merger had never been taken up by the DuMont board. This was, he said, an indication of Dr. DuMont's control of his company.

History of Paramount Pictures' involvement in anti-trust litigation was traced by Mr. Porter. He stressed that no anti-trust actions had been brought against Paramount since the Consent Decree and the formation of the new Paramount Pictures Corp.

Answering the Broadcast Bureau and DuMont charges that the merged ABC-UPT company would restrain TV in favor of its exhibition business, UPT attorney Duke Patrick stated that such a charge was false. In the first place the merged company would be cutting its own throat, he said. In the second place, there still would be competition from other TV networks—NBC, CBS and DuMont, he declared.

The fact that one of the companies involved in the merger was a motion picture company gave the Commission no right to discriminate against it, Mr. Patrick averred. He cited the history of

MERGER FACTS

Background of Case

ALTHOUGH the most significant part of the many-sided Paramount case is the ABC-United Paramount Theatres Inc. merger, in reality it involves also (1) the qualifications of Paramount Pictures Corp. and of UPT to hold licenses, (2) the renewals and licenses of KTLA (TV) Los Angeles, WBKB (TV) Chicago and WSMB-AM-FM New Orleans, (3) the transfer of ownership of those three properties from old Paramount Pictures Inc. to the new producing company for KTLA and to UPT for WBKB and WSMB, (4) whether Paramount Pictures controls Allen B. DuMont Labs. through 25% ownership of DuMont stock, (5) the licenses and renewals of DuMont-owned WABD (TV) New York, WTTG (TV) Washington and WDTV (TV) Pittsburgh, and (6) the sale of WBKB to CBS for $6 million after approval of the merger.

The various facets of the Paramount case were ordered to hearing by the Commission in mid-1951. One of the chief issues was the anti-trust activities of the parent Paramount company. Hearings began in January 1952 and ran for 90 hearing days to the end of August. Early in August, the FCC, in the interests of speeding up the case, instructed the examiner to delete from the record all references to anti-trust matters prior to 1948. A fully favorable initial decision was issued by the examiner last November [B•T, Nov. 17, 1952]. The oral argument last week by the FCC *en banc* was ordered after the Broadcast Bureau and DuMont filed exceptions to the examiner's proposals.

the newspaper anti-discrimination clause in the McFarland Bill, told how that provision had been dropped during the conference on the bill because the conferees stated that the Commission had no power to discriminate against any business.

In reference to the anti-trust issues, Mr. Patrick pointed out that UPT had never been sued for anti-trust violations since it was organized in 1950.

Unique situation arose when Comr. Webster questioned whether the transfers were voluntary or involuntary, asked permission to interrogate Mr. O'Brien. Witnesses are not usually questioned during oral argument before an administrative agency. Huddle of participating attorneys ensued, but UPT counsel decided not to put Mr. O'Brien on the stand.

Comr. Webster stated that he was forced to infer from the record that Paramount Pictures had a choice of various methods of complying with the Supreme Court divestiture decision and chose to make a business decision without regard to FCC regulations regarding transfers.

Mr. Patrick took personal responsibility for advising Paramount Pictures to file its applications for involuntary transfers.

Miss Hennock's questioning of Mr. Patrick emphasized that she held objectionable that UPT was the largest theatre chain in the U. S. (it will own 600 theatres following completion of the divestiture program), that it spends $30 million a year on film rentals, that movies compete with TV for audience, that TV has affected movie attendance.

In answer to a question regarding conditions on the grant of the merger from Comr. Eugene H. Merrill, Mr. Patrick stressed that the promises made by UPT and ABC executives during the hearings were binding and that the approval did not have to be conditioned in any way.

McKenna's Plea

A spirited plea for urgency in coming to a final decision was made by ABC attorney James A. McKenna Jr. In answer to questions from Comrs. Hennock, Sterling and Bartley, he recounted the history of ABC's financial plight, related the efforts it had made to gain new capital leading up to the merger agreement with UPT.

Miss Hennock kept hammering that the changed financial climate in TV—with the lifting of the freeze — deprecated the need for haste in arriving at a final decision. Comrs. Sterling and Bartley were interested in whether ABC had been forced to curtail its service to affiliates and whether, if the merger was approved, the network could begin to furnish more commercial programs to its affiliates.

Miss Hennock expressed the fear that the whole TV industry would be taken over by motion picture interests.

Greater Love Hath . . .

HEARKENING to the laments of Walter Compton, general manager of WTTG (TV) Washington, Allen B. DuMont Labs. outlet in the national capital, regarding the demands made on his time in demonstrating to prospective TV station owners the WTTG plant operation, William E. Ware, president of KSTL St. Louis, after a recent visit to WTTG, went away with a feeling of such profound sympathy that he caused to be made up and presented to friend Compton a plaque, "in appreciation" of Mr. Compton's efforts "on behalf of the Future TV Owners of America."

VOD FINALISTS

12 Students Considered

NAMES of 12 high school students picked for the final screening in the sixth annual Voice of Democracy Contest were announced Thursday by Chairman Robert K. Richards, NARTB assistant to the president and public affairs director. A panel of national judges will pick the four national winners, to be announced early in February.

The finalists were chosen from a field of a million entries from 30,000 high schools competing in the broadcast script writing and voicing competition. The contest is sponsored annually by NARTB, Radio-Television Mfrs. Assn. and U. S. Junior Chamber of Commerce.

The four national winners will receive $500 college scholarships and all-expense trips to Washington and Colonial Williamsburg plus radio-TV receivers donated by RTMA.

Awards will be presented Feb. 18 at the annual VOD luncheon at the Mayflower Hotel, Washington.

Judges are: Dr. Ralph Bunche, Director, Dept. of Trusteeship, United Nations; Joseph Johnson, president, Carnegie Endowment for International Peace; Charles Kuralt, a national winner, 1948-49 Voice of Democracy Contest; Henry R. Luce, publisher of *Life*, *Time* and *Fortune* magazines; Rev. G. Bromley Oxnam, Bishop, Methodist Church; Theodore S. Repplier, president, Advertising Council; Dr. Susan B. Riley, president, American Assn. of University Women; John D. Rockefeller III; Anna Rosenberg, Assistant Secretary of Defense; Eric Sevareid, news analyst, CBS; Paul A. Walker, chairman, FCC; Judith Waller, director of education, NBC.

Justice Tom C. Clark of the U. S. Supreme Court, is honorary chairman of the contest.

Finalists are:

Frank Lammedee, 17, San Marino, Calif.; Thomas J. Walsh, 17, Washington, D. C.; Fred Williams, 16, Palatka, Fla.; Robert Davies, 17, Maui, Hawaii; Janet Jeanne Clowers, 17, St. John, Kan.; Carol Deer, 16, Baton Rouge, La.; Philip C. Shepardson, 18, Williston Academy, Easthampton, Mass.; James Thomas Marshall, 17, Las Vegas, Nev.; Adelaide Nacamu, 14, Peekskill, N. Y.; Robyn Cotner, 17, Wilmington, Ohio; Frank T. White Jr., 17, Spartanburg, S. C.; Frank Edward Self, 17, Dallas, Tex.

Baltimore School Strike

(Continued from page 25)

the education venture, John E. Surrick, vice president and general manager of the station, said that "radio received a challenge and a unique opportunity to provide public service in the finest sense of the word. We have met the challenge, and thus far our efforts to ease a critical situation have been highly successful."

WFBR maintained a 55-minute daily schedule for teachers and cancelled "some local and network commercials to make suitable time available, but this is an emergency and our fullest cooperation is freely given," Mr. Surrick explained.

WWIN also placed its facilities at the disposal of the Dept. of Education, with a 15-minute daily period devoted to air classes. Among other stations offering full-hearted cooperation and participating in the Board of Education's plan were WBAL WBMD WCAO WCMB WITH and WSID.

The pattern in the Baltimore experiment was set on short notice. The Board of Education evolved a schedule for radio and TV classes and appointed about 15 teachers to give classes in either media, depending on their broadcasting experience and aptitudes.

Pupils Attend Air Classes

Pupils reported to their schools each morning—but only long enough to pick up assignments and return home for air classes. They weren't required to listen or view programs, though their parents were urged to encourage them, but extra credits were held out for reports turned in. Pupils were advised beforehand what stations to dial for particular subjects.

Teachers held class in radio-TV studios, generally with a live audience of a dozen or more students and a small blackboard—the set furnished to look as much like a classroom as possible. With a live audience teachers felt they were better able to impart knowledge.

In the opening class for elementary pupils—a science program about thermometers—youngsters in the studio appeared unaware of the existence of WBAL-TV cameras.

School and TV authorities generally feel Baltimore has first claim as a school television pioneer, with a low bow to WBAL-TV for its continuing interest in that field. The station is credited with submitting a television-in-the-classrooms plan three years ago. Telesets were installed in schools as a supplement and soon two hours of programming per week was underway regularly.

One obvious advantage of such a plan, educators point out, is that it assures an appreciable audience, especially for specialized courses which involve experimental equipment. Another benefit, seen by some far-seeing educators, is the possible easing of the teacher shortage now facing schools.

No, No, Perkins!

It's all in the

BROADCASTING Yearbook

. . . you won't need any T squares, graphs, slide rules or geiger counters to get all the information you want and need in this business of broadcasting.

No sir! It's all in the 1953 BROADCASTING Yearbook.*

Don't delay—order today. Single copies are $5.00. Or you may subscribe to BROADCASTING • TELECASTING for a full year and get 52 weekly issues, the 1953 BROADCASTING and the 1953 TELECASTING Yearbooks for only $11.00. You save $6.00.

* Publication dates: BROADCASTING Yearbook, mid-January; TELECASTING Yearbook, mid-February.

Eleven More Grants Begin '53

(Continued from page 55)

aural, antenna 600 ft. Pre-freeze operating vhf stations: WBKB (TV), Ch. 4; WNBQ (TV), Ch. 5; WENR-TV, Ch. 7; WGN-TV, Ch. 9.

Pittsburgh (Group B-4, No. 180)—Agnes Jane Reeves Greer (WKJF-FM), granted uhf Ch. 53, ERP 260 kw visual and 130 kw aural, antenna 530 ft. Pre-freeze operating station: WDTV (TV), vhf Ch. 2. Post-thaw uhf grantees: Gallaher, Berry & Woodyard, Ch. 47; Telecasting Co. of Pittsburgh, Ch. 16.

Houston, Tex. (Group B-4, No. 183) —Uhf Television Co., granted uhf Ch. 23, ERP 175 kw visual and 88 kw aural, antenna 510 ft. Pre-freeze operating station: KPRC-TV, vhf Ch. 2. Post-thaw noncommercial, educational grantee: KUHT (TV), vhf Ch. 8.

Houston, Tex. (Group B-4, No. 183) — KNUZ Television Co. (KNUZ), granted uhf Ch. 39, ERP 100 kw visual and 60 kw aural, antenna 520 ft.

In other TV actions last week, the Commission made final its earlier proposals to transfer vhf Ch. 13 from Macon to Warner Robins, Ga., and to substitute uhf Ch. 27 for Ch. 42 at Abbeville, La. [B•T, Dec. 8, 1952].

The use of Ch. 13 at Macon would have violated by about a mile the required minimum co-channel spacing with WAFM-TV Birmingham, Ala., operating on Ch. 13. WMAZ Macon last week amended its application for the channel so as to specify Warner Robins.

Spacing Problem Eliminated

The Abbeville correction eliminates a problem of sub-standard assignment spacing affecting uhf Ch. 38 at Lafayette, La.

The Commission last week further proposed to substitute uhf Ch. 65 for Ch. 29 at Newton, Iowa, and to substitute Ch. 69 for Ch. 39 at Bogalusa, La., to correct allocation errors.

WOAY Oak Hill, W. Va., petitioned the Commission last week to allocate vhf Ch. 4 to Fayetteville, Va., the 1950 population of which was 1,952. However, the petition noted there are seven nearby towns with populations of more than 2,000 persons. Fayetteville is 19.7 miles from Beckley, W. Va., nearest city listed in the Commission's allocation table, and the proposed Ch. 4 allocation would not affect any other assignment, the station said.

Meanwhile, the U. S. Court of Appeals at Philadelphia on Monday, at the request of WWSW Pittsburgh, dismissed the station's appeal of the Sixth Report and Order in which the Commission declined to allocate vhf Ch. 4 to Pittsburgh [B•T, Jan. 5]. Since FCC has since allocated Ch. 4 to nearby Irwin, Pa., WWSW felt withdrawal of the appeal would expedite new TV service to the Pittsburgh area.

Concerning its uhf Ch. 27 grant, WKOW Madison hopes to commence operation by mid-summer using RCA equipment. Headley-Reed Co., representing WKOW, also will handle WKOW-TV.

Rep. Hoffman's WHFC Chicago, uhf Ch. 26 grantee, has no commencement date estimate at this time.

No commencement date has been estimated for Mrs. Greer's WKJF-TV Pittsburgh, granted uhf Ch. 53, according to her son-in-law, Dyke Racey of WAJR Morgantown, W. Va., another Greer station. RCA equipment has been specified, he said, with delivery of a 1 kw transmitter promised in March. GE antenna will be used.

D. P. Carey, president of Hutchinson TV Inc., vhf Ch. 12 grantee at Hutchinson, Kan., reports plans to begin operation in about six months. No equipment has been acquired.

Lester L. Cox, president of the vhf Ch. 3 grantee at Springfield, Mo., Springfield Television, plans to have the new station on the air in six months. RCA equipment, ordered a year ago, was committed for delivery in 30 days, he said. Mr. Cox was required by the Commission, as a condition of the grant, to give up his small holding in KWTO there, headed by his father, Lester E. Cox, who also is identified in ownership of KCMO Kansas City.

The TV application was amended a week ago and the younger Mr. Cox took his father's stock in Springfield Television. The amendment, in effect, dissolved the TV "marriage" of KGBX and KWTO.

William G. Matta, head of WLOA Braddock, Pa., and of Matta Enterprises, uhf Ch. 52 grantee at Atlantic City, plans commencement as soon as RCA equipment can be obtained and installed.

Dave Morris, general manager of KNUZ Houston, uhf Ch. 39 grantee, reported he is negotiating with all manufacturers in order to get on the air as quickly as possible. Target date of two months is desired, he indicated. National representative will be Forjoe & Co.

KEYT (TV) Santa Barbara, Calif., mid-November vhf Ch. 3 grantee, announced last week it has retained Pereira & Luckman, architectural firm which designed the $30 million CBS Television Center in Hollywood, to plan and supervise construction. KEYT estimates on-the-air date in May.

Colin M. Selph, KEYT president, said the studios and offices will be located on Mesa Hill, 420 ft. above the center of the city, while the transmitter site will be atop 4,100-ft. TV Peak in the Santa Ynez mountain range.

Clark Hogan, manager of WOSH-TV Oshkosh, Wis., granted uhf Ch. 48 in late November, reported that if the station's transmitter arrives on its promised date, the station will be on the air by April 15.

WTVI (TV) Belleville, Ill., adjacent to St. Louis and granted uhf Ch. 54 in mid-November, has opened sales offices in Boatmen's Bank Bldg., St. Louis. Belleville executive offices are to be completed in March and May 1 is commencement target date. Federal equipment will be used.

EMPIRE STATE
Tower Problems Discussed

PROBLEMS of installing the Empire State Bldg.'s "Communal Television Transmitting System," as handled by Local 3, IBEW, are discussed in the Jan. 2 issue of the *AFL News-Reporter*.

Among aspects pointed up in the article are the tower's de-icing system and its faculty as a "king size" lightning rod.

The de-icing or sleet-melting system requires 76 kw power for 200 individual heater units. System is automatically controlled by a humidistat — thermostat device which turns on power when ice formation conditions exist. The IBEW said that the lightning rod assembly already is pitted and fused at 100 or more spots where lightning bolts have struck.

INAUGURAL BALL
Networks to Pool TV Pickup

POOLED TV pickup of the Inaugural Ball Jan. 20 was agreed to by top network executives at a meeting with Inaugural Committee Chairman Joseph C. McGarraghy last week.

Although it was agreed ball activities would not be sponsored, it was understood no objections were interposed to institutional commercials preceding and following the TV pickup.

Plan is to pick up the ball at 11 p.m. for one hour, with 30 minutes from the National Guard Armory and 30 minutes from the Georgetown U. gymnasium. The ball is being held in two sections. Which of the local TV stations will do the pickup had not been settled at week's end.

Meeting with Mr. McGarraghy were ABC's Robert H. Hinckley, CBS' Earl H. Gammons, DuMont's Walter Compton and NBC's Frank M. Russell.

WOR-TV TO 88 KW
WPIX (TV) Boost Impending

WOR-TV New York reported last Wednesday it would boost effective radiated power from 22 to 88 kw "immediately" under FCC authority, and expected necessary equipment later this year to permit a further raise to 316 kw ERP, also authorized by FCC. The station, on Ch. 9, said the immediate increase to 88 kw made it "the most powerful station in the country."

WPIX (TV) New York, which was authorized to increase ERP from its present 21.7 to 100 kw, said meanwhile it would make the change as soon as equipment on order from RCA is delivered, and thereby would attain maximum power allowable to it under FCC regulations. WPIX, on Ch. 11, said its coverage area at 100 kw ERP would be 9,400 square miles.

'TODAY' CLIENTS
NBC-TV Adds Nine More

SIGNING of nine new sponsors of segments of NBC's early-morning *Today* television program as announced last week as the Monday-through-Friday show (7-9 a.m. EST and CST) approached its first anniversary (Wed., Jan. 14).

Network officials said the new clients bought a total of 176 five-minute segments of *Today*, the individual purchases ranging from five segments for one advertiser to 65 for another. These nine advertiser are in addition to the 44 who used the show in 1952, spokesmen reported.

The nine are as follows (agencies shown in parentheses):

International Cellucotton Products Co. for Kleenex tissues (Foote, Cone & Belding); General Motors (Kudner Agency); C. H. Masland & Sons (Anderson & Cairns); Willys-Overland Motors (Canady, Ewell & Thurber); Buick Motors Div. (Kudner); Sterling Div. of International Silver Co. (Young & Rubicam); Bendix Home Appliances (Earle Ludgin & Co.); Anson Jewelry (Grey Adv.), and Glamorene Rug Cleaner (Ruthrauff & Ryan).

Cites Mail Response

Asserting that sponsors had realized "outstanding sales results" from the use of *Today*, network spokesmen cited 20,000 mail requests from 33 states in response to a one-time, one-minute offer of free copies of Kiplinger's *Changing Times*, and 13,587 requests for free copies of *Time* magazine within a week after *Time* offered them on a five-minute segment.

Plans for spring, spokesmen said include another "St. Valentine's Day Campaign," similar to last year's in which Pepperell Mfg. Co. recieved more than 2,400 responses to a one-minute offer of a booklet on sheets and blankets.

NBC spokesmen previously had revealed plans to expand *Today* to a coast-to-coast show (see earlier story, page 73).

Tower Light Test

TESTING of daytime air navigation warning light for the proposed 1,747-ft. tower of WFAA-TV Dallas is continuing through the remainder of this month, the station's chief engineer, William C. Ellis, reported last week following submission of request to FCC for 30-day extension of special authority. The high intensity light may solve the daytime marking problem for high television towers [B•T, Dec. 15, 1952]. It is mounted for the test on the south tower of the antenna array of WFAA and WBAP Fort Worth. Government officials and others from Washington are expected to inspect the light late this month, it was indicated.

SAG STRIKE

Talks to Resume Today

SIX-WEEKS-OLD strike by the Screen Actors Guild against producers of filmed TV commercials took a bright turn last week with the announcement that SAG and the Film Producers Assn. of New York will renew negotiation sessions today (Monday).

In a joint statement released Wednesday, SAG and the New York producers declared:

"The Film Producers Assn. of New York and the Screen Actors Guild will resume collective bargaining negotiations at New York next Monday, Jan. 12.

"The Guild and the New York producers association will engage in continuous, open-minded bargaining on all points in dispute in the hope of reaching agreement on a collective bargaining contract covering actors and announcers in television filmed commercials."

In a separate announcement, SAG said that John Dales Jr., national executive secretary of the union, had cautioned all members that the strike will continue until the dispute is settled.

Chances for a settlement were termed "extremely hopeful" by Peter Mooney of Audio Productions, president of FPA. He told BROADCASTING • TELECASTING on Wednesday that each side would have "to give a little and take a little." Although he emphasized there were "many problems" to be resolved.

"We are entering into these negotiations with an open mind," Mr. Mooney said, "and we hold no animosity against the Guild. It's going to take a lot of hard work, but I am extremely hopeful of a settlement."

The nation-wide tieup began Dec. 1 after protracted negotiations between SAG and FPA had broken down, principally over failure to effect an agreement on extra payment to actors for TV commercials that are re-issued [B•T, Dec. 8, 1952].

A settlement between the union and New York producers would presage an end to the strike, it is reported, because 70% of filmed TV commercials are made in New York and a formula achieved there would mould the pattern elsewhere.

SAG's position on the main issue in dispute was that an actor should be repaid his original fee ($70) every time the filmed commercial is re-issued on a network basis (defined as more than one station) and every four weeks when the film is used as a "wild spot"—one used on a network station break or in single locality.

The producers' counter-offer included the use of a commercial on a network (defined as more than 30 stations) for the original payment and a premium for a period of 13 weeks, at the end of which time the fee would be repeated for subsequent use.

film report

Sales . . .

Contracts involving $1,521,000 were signed by **Reub Kaufman**, president of **Guild Films Inc.**, **Don Fedderson**, executive vice president and general manager of **KLAC-TV** Hollywood, and **Liberace**, pianist-star of his own weekly half-hour KLAC-TV program. Under the agreement 177 half-hour programs, starring **Liberace**, will be filmed and distributed nationally by Guild in 1953. Half of the financing, or $750,000, will be borne by the distribution firm. A producer-director is yet to be appointed, but **George Liberace** will continue as musical director for his brother. Each program is budgeted at $13,000, which covers all talent fees. Negotiations are in progress for distribution arrangements on other KLAC-TV programs.

* * *

Block of 119 feature films has been jointly acquired by **KTTV (TV)** and **KLAC-TV** Hollywood from **Hollywood Television Service**, subsidiary of **Republic Pictures**. Produced after 1946, for the most part, the films will be telecast jointly by the two stations "because the block of films involved was too large for one station to absorb." The purchase was negotiated by **Richard A. Moore and Donald Fedderson**, general managers of KTTV (TV) and KLAC-TV, respectively, and **Earl R. Collins** and **Morton Scott**, president and vice president respectively, of Hollywood Television Service.

* * *

Paramount Television Productions Inc. puppet-adventure program, *Time for Beany*, has been sold to the following stations:

WCBS-TV New York, 26 weeks, telecast at 8:15 a.m., Monday through Friday; **KHQ-TV** Spokane, Wash., 13 weeks, also five times weekly; **WGN-TV** *Chicago* (renewal), 13 weeks; **WEWS (TV)** Cleveland, 13 weeks, and **WHBF-TV** Rock Island, Ill., 13 weeks.

Paramount's *Wrestling From Hollywood* has been sold to the following advertisers and stations:

National Brewing Co., 52 weeks, on **WSLS-TV** Roanoke, Va.; **Falstaff Beer**, 52 weeks, on **KTBC-TV** Austin, Tex.; **KROD-TV** El Paso, Tex., 26 weeks, program to be carried participating; **WFAA-TV** Dallas (renewal), 13 weeks; **WCAU-TV** Philadelphia (renewal), 13 weeks, and **WWJ-TV** Detroit (renewal), 13 weeks.

* * *

An agreement has been reached between **Consolidated Television Sales**, New York, and **WABD (TV)** New York granting the station exclusive New York third and fourth-run rights to *Front Page Detective*, film series featuring Edmund Lowe. WABD carried the series of 39 half-hour programs on its first run in New York, sponsored by the Wine Growers Guild, and also the second run, sponsored by Rayco seat covers. The contract for third and fourth-run rights covers period from Feb. 1, 1953, through April 1955.

* * *

Los Angeles Brewing Co., Los Angeles (Eastside Beer), started weekly half-hour *Foreign Intrigue* on **KNBH (TV)** Hollywood, for 52 weeks from Jan. 8. The series, filmed in Europe, stars **Jerome Thor**. The agency is **Warwick & Legler Inc.**, Los Angeles.

* * *

Globe Bottling Co., Los Angeles (Wilshire Club Beverages), starts weekly half-hour filmed *Gene Autry Show*, on **KNXT (TV)** Hollywood, for 26 weeks from Jan. 16. A CBS-TV film package, the series is produced by **Flying A Productions**, Hollywood. Agency is **Factor-Breyer Inc.**, Los Angeles.

* * *

Owl Drug Stores, Los Angeles, starts a Monday through Friday half-hour program, *Owl Startime with Gene Norman*, on **KHJ-TV** Hollywood, for 52 weeks from today (Jan. 12). The show features disc m.c. **Gene Norman** with three-and-a-half filmed musical shorts from **Snader Telescription Library**. Agency is **Milton Weinberg Adv. Co.**, Los Angeles.

* * *

Louis Milani Foods Inc., Los Angeles, started weekly half-hour filmed program, *Milani Theatre of Family Favorites*, on **KRON-TV** San Francisco, for 13 weeks from January 4. The series, produced by **Gil Ralston**, is distributed by **Reynolds Productions**, Beverly Hills. Agency is **Leonard Shane Agency**, Los Angeles.

* * *

Langendorf United Bakeries Inc., San Francisco, starts weekly half-hour filmed program, *The Range Rider*, on **KNXT (TV)** Hollywood, for 52 weeks from Jan. 27. A CBS-TV film package, the series is produced by **Flying A Productions**, Hollywood, and stars **Jack Mahoney**. Agency is **Biow Inc.**, San Francisco.

Availabilities . . .

Charles Michelson Inc., New York, will enter the television field with an open-end spot announcement library service for TV stations. The firm, one of the pioneer radio transcription producers, announces that marketing will begin Feb. 1. Among the one-minute TV spots

IN SYRACUSE . . .

TELEVISION SUPPLEMENTS RADIO

. . . Does NOT Replace it as a Source of Entertainment and Information

Syracuse is a two-TV-station city. According to Niagara Mohawk Power Company monthly surveys, 71% of the homes in the Syracuse area have TV sets. According to the calamity howlers, radio in Syracuse should be a dead duck. But two separate *surveys of television homes* (October and December 1951) show that radio is alive and vigorously kicking. (Details, including methods of sampling, free on request.) Here are the combined results:

Number of Homes Called	Number of TV Homes	TV Homes Only Average Hours per Day		
		Radio	TV	Both
1467	986	3.07	4.52	7.59

The Survey Also Showed:

1 – An average of 2.4 radios per TV home.

2 – 61 radios purchased *after* the homes had television.

3 – Average of 4.4 hours per day of radio listening in non-TV homes.

Comparative loss of radio-listening time in TV homes — only 30%. Here is PROOF that TV has NOT replaced radio in Central New York — merely provides another means of reaching this rich market.

CBS-TV WORKSHOP

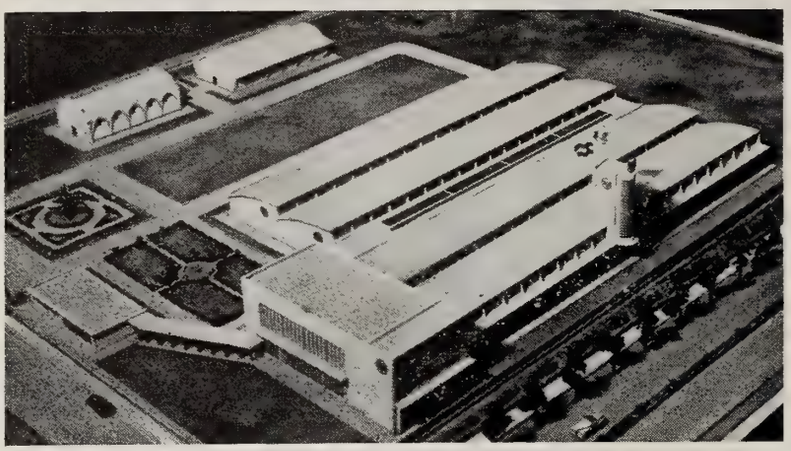
Planned for Ministers

PLANS for an all-day TV workshop to show ministers and lay associates from the North and Middle Atlantic states how they can make maximum use of television facilities were announced last week by CBS-TV.

Sig Mickelson, CBS-TV director of news and public affairs, said the clinic—part of a week-long communications workshop being conducted under the auspices of the Broadcasting & Film Commission of the National Council of Churches of Christ in America, and one of a series scheduled under the commission's sponsorship [B•T, Dec. 29, 1952]—will demonstrate and explain what is involved in putting a show on the air. It will be held Jan. 29 in CBS-TV's Grand Central studios in New York.

The production of CBS-TV's *Lamp Unto My Feet* program will be shown and analyzed.

Agenda for the clinic, which is being arranged and coordinated by staff producer Bill Workman of the network's public affairs department, includes a welcome and introduction by Mr. Mickelson and speeches and question-answering by the following:



Isabel Redman, producer of "Lamp Unto My Feet"; R. G. Thompson, director of technical operations; E. Carlton Winckler, director of production; James Connors, director, TV production control; Michael J. Foster, director of press information; James C. Shattuck, director of TV editing; Paul Wittlig, director of new effects development; Richard Hopkins, manager of scenic design and construction; Anthony Boschetti, manager of procurement, wardrobe and makeup; H. Grant Theis, manager of film service operations; Gilbert DeStefano, manager of stage lighting; and Judd Whiting, director of "Lamp Unto My Feet."

Hollywood Ad Club

DISCUSSION of "Southern California Radio During 1953" will be led by Norman Nelson, managing director of Southern California Broadcasters Assn., at a Feb. 2 luncheon meeting of Hollywood Ad Club, that city. Robert J. McAndrews, commercial manager of KBIG Avalon and past president of the club, will be chairman.

RCA TO BUILD IN SPAIN

Folsom Announces Plans for $500,000 Plant

FACTORY RCA proposes to build near Madrid and part of surrounding grounds are shown in model.

* * *

PLANS to build a new factory in Spain to produce TV home receivers, phonograph records and record players were announced last Tuesday at a news conference by Frank M. Folsom, president of RCA.

The proposed plant, Mr. Folsom said, will be erected on a 322,000-square-foot site overlooking Madrid, on the main highway to Barajas Airport and the city of Barcelona. He added that it will be completed this year at a $500,000 estimated cost.

Arrangements were made in cooperation with Gabriel Soria, president and managing director of Industria Electronica S.A., associate RCA company in Spain. Mr. Soria, who attended the news conference in New York, said Spain does not have television at the present time but noted that preparations are underway to introduce it some time in 1954.

In describing the venture, Mr. Folsom said the factory initially would concentrate on making 45-rpm records and record players. It would expand into TV, he continued, when Spanish developments in the field progressed.

Mr. Folsom said RCA in this enterprise has entered into a partnership with local business leaders. Besides Mr. Folsom and Mr. Soria, other directors of the new company are Antonio Soria, who has handled RCA product distribution in Spain for the past seven years, and Meade Brunet, a vice president of RCA and managing director of the RCA International Div. Chairman of the Board of Industria Electronica is Demetrio Carceller, formerly Spain's minister of Industry and Commerce.

Commenting on the new company's plans, Mr. Folsom declared:

"This is a significant enterprise, because Spain opens great cultural as well as economic resources to us. We have discussed our plans with Gen. Franco, and we are gratified by his interest in this project, which will help the Spanish worker as well as the Spanish artist."

Mr. Soria, who has been studying American production methods at RCA plants in the U. S. and Canada, said the factory will "embody all of the latest techniques possible for good working conditions and efficient production." He said some Spanish workers would be sent to the U. S. for training in RCA factories.

LBS SUIT

Date May Be Moved Up

LIBERTY Broadcasting System's $12 million anti-trust suit in Chicago against major league baseball clubs is expected to be moved up to May. Attorneys for both sides asked last week to postpone the court date from Jan. 19. Neither side was ready to present evidence or begin the formal hearing in Chicago Federal District Court on the date assigned.

Attorneys for Liberty and the ball clubs still have several depositions or formalized pre-court testimony to take before trial proceedings can begin.

LOBBYIST REPORT

NARTB Executives Liste

HIERARCHY of NARTB reporte as lobbyists in third quarter 19 report to Congress, among oth radio-TV names listed in the *Co gressional Record* last week.

Reporting for NARTB were Ha old E. Fellows, president; Just Miller, chairman and general cou sel; Thad H. Brown, TV D partment manager; Vincent Wasilewski and Abiah A. Churc attorneys, and Ralph W. Hard government relations director. M Hardy reported he receiv $4,375.02 for the third quarter 1952 and spent $660.59 for the ni months of last year.

Among others of interest to t broadcasting industry reportin under the lobby registration la were:

Arnold, Fortas & Porter, for AR Inc., received $5,000 for quarter, spe $439.81 for nine months of 1952.

Jack Bryson, Motion Picture Ass of America, received $6,280.79, spe $4,345.90.

Clear Channel Broadcast Servi spent $1,244.96. Also Ward L. Qua received $3,750, spent $1,103.96.

Earl H. Gammons, CBS vice pres dent, spent $349.50.

General Electric Co. spent $51,644.3

John M. Littlepage for America Tobacco Co. [receipts and expeditur not listed].

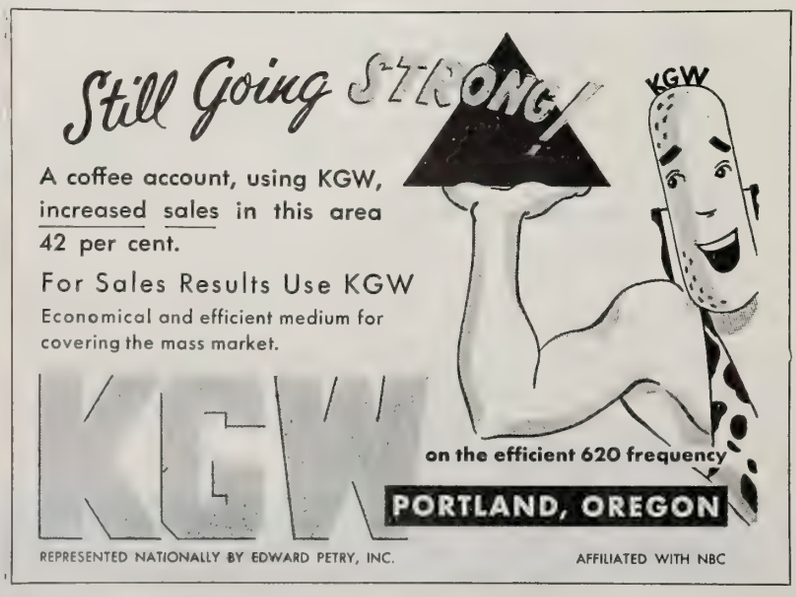
Glen McDaniel, former presiden Radio-Television Mfrs. Assn. [receip and expenditures not listed].

Francis M. Russell, NBC vice pres dent, spent $621.55. Also George Wheeler, NBC, spent $83.50.

Henry B. Weaver, Henry H. Glass and Thomas M. Cooley II for Phil Corp. [receipts and expenditures n listed].

Edward K. Wheeler, for Shore Lin Oil Co., spent $19.88. Also Wheeler Wheeler, for Contract Carrier Confe ence, received $1,500, spent $25.70.

AD COUNCIL POSTS



Nunn, Eller Reappointe

ADVERTISING COUNCIL has re appointed Wesley I. Nunn, adver tising manager of the Standard O Co. (Indiana), Chicago, and Russe Z. Eller, advertising manager o Sunkist Growers Inc., Los Angele as volunteer coordinators of publi service advertising campaigns con ducted by the council.

In making the announcement las week, Howard J. Morgens, counc chairman and vice president i charge of advertising for Procte & Gamble Co., Cincinnati, note Mr. Nunn has served in that ca pacity since 1946 and Mr. Elle since 1942.

Young Composers

TWELVE winners were announce last week in the 1952 competi tion for Young Composers Radi Awards. Prizes from $100 to $1,60 were given to secondary, colleg and graduate students for winnin manuscripts. Carl Haverlin, presi dent of BMI and national chairma of YCRA, also announced that th 1953 competition began Jan. 1.

MERRILL POSER

Commissioner's Status Moot

LEGAL complications surround FCC Comr. Eugene H. Merrill, recess appointee, as he contemplates his governmental future.

According to White House sources, Comr. Merrill can serve until the first (1953) session of the 83d Congress concludes. Unless, that is, another Presidential nominee is sent to the Senate by President Truman (whose term ends at noon, Jan. 20) or President-elect Eisenhower.

Comr. Merrill was nominated last Oct. 6 after Congress had adjourned, to fill the unexpired term of ex-Comr. Robert F. Jones, who resigned in the late summer to enter law practice. This term runs until June 1954.

If no nomination is sent to the Senate by President Truman or his successor, Comr. Merrill is qualified to serve until the end of the first session of the 83d Congress, presumably late in 1953. If he is to be paid all that time, however, his name must be sent to the Senate within 40 days after Jan. 3, when the new Congress convened.

Should the new Administration withdraw a Merrill nomination and send up a new name for the FCC post, Comr. Merrill's term would end at the time a new nominee (if confirmed by the Senate) took the oath of office. If the Senate failed to act on a new nomination, Comr. Merrill would remain in office though his pay status would be in issue.

As a practical matter, the White House does not send up any nominations before the President's State of the Union message has been read to Congress a few days after it convenes.

Should Comr. Merrill continue in office under his recess appointment, the exact date at which his term ends in 1953 would become a controversial question should Congress quit via the recess routine instead of adjourning *sine die*.

TV APPLICATIONS

Passed Over by FCC

THE following mutually exclusive applications for new television broadcast stations have been passed over by FCC in order to expedite the processing of uncontested TV applications:

GROUP A

Ohio Valley Bcstg. Corp., Clarksburg, W. Va., Ch. 12.

Clarksburg Bcstg. Corp., Clarksburg, W. Va., Ch. 12.

The Curators of the University of Columbia, Mo., Columbia, Mo., Ch. 8.

KMMO Inc., Columbia, Mo., Ch. 8.

Rudman-Hayutin Television Co., Billings, Mont., Ch. 2.

Billings Television Co., Billings, Mont., Ch. 2.

Montana Network, Billings, Mont., Ch. 2.

Albany Bcstg. Co., Albany, Ga., Ch. 10.

Southeastern Bcstg. System, Albany, Ga., Ch. 10.

Herald Publishing Co., Albany, Ga., Ch. 10.

EXAMINING newly-installed UP Telephoto Service at WOW-TV Omaha are (l to r) Bill McBride, newscaster; Ray Clark, news and special events director; Lyle DeMoss, assistant general manager, and Jack Harenberg, Central Div. chief engineer for UP Newspictures.

MAJOR TV SHOWS

Simon Sees 75% on Film

ABOUT 75% of all major TV shows will have switched to film by the end of 1953, Al Simon, head of Al Simon Productions, predicted at a Hollywood Ad Club luncheon meeting in the Hollywood Athletic Club last Monday.

Speaking as a member of a motion picture-television panel discussion, he emphasized that programs can be produced better and cheaper on film than on a live basis.

He further predicted that with many technical personnel shifting from motion pictures to video, Hollywood will become even more important as a TV production center.

Carl Leserman, executive vice president of International Telemeter Corp., and a panel member, foresaw adoption of some form of subscription TV in two to three years. His firm plans to introduce subscription TV experimentally to the Palm Springs, Calif., area by early March.

Klaus Landsberg, vice president of Paramount Television Productions Inc., and general manager of KTLA (TV) Hollywood, moderated the luncheon meeting.

Sherrill Corwin, head of Metropolitan Theatres Corp., California chain, said he would "hate to think" what would happen to movie theatres "if subscription TV comes to pass," but added that once the FCC grants theatre TV a channel of its own "theatre TV cannot be stopped."

John A. Vizzard, executive of the Assn. of Motion Picture Producers, asserted that TV will not put motion pictures out of business.

Direct Mail Ads

DOLLAR volume of direct mail advertising during the first 11 months of 1952 reached a total of $1,070,741,139, a gain of 9½% over the total for the same period of 1951, Frank Frazier, executive director of the Direct Mail Adv. Assn., reported last week. He put the November 1952 total at $101,-134,574, about 4% above the figure for the same month in 1951.

Chicago Fightcasts

INTERNATIONAL Boxing Club has arrived at a happy medium in Chicago and will inaugurate a new television plan Jan. 28. The club has arranged to schedule two six-round events and one 10-round main event bout at the Chicago Stadium. Only the six-rounders will be telecast so that the major attraction will continue to keep box office figures high. Performers in each of the six-round matches will receive $1,000 for their fighting, along with the publicity attendant to television.

'TODAY' EXPANSION

NBC-TV Works on Details

NBC authorities are working on plans to extend the network's two-hour early-morning *Today* television program from coast-to-coast, spokesmen reported last week. Show observes its first anniversary this month.

Answering speculation that the program might be abandoned, they also said it definitely is scheduled to continue through the year. A method being considered for getting it to the West Coast, it was said, is the tape recording technique developed and demonstrated by Bing Crosby Enterprises. *Today*, which started Jan. 14, 1952, and features Dave Garroway, currently is carried in 40 cities throughout the East and Midwest and as far west as Omaha. It is broadcast Monday-Friday, 7-9 a.m. EST and CST.

WNHC-TV Changeover

WNHC-TV New Haven hopes to make its changeover from Ch. 6 to Ch. 8 and boost visual power output from 18 to 316 kw, already authorized by FCC, by about mid-July, the station said last week. Aldo De Dominicus, general manager and secretary-treasurer, announced receipt of FCC authorization and reported plans for the change.

Strictly Business

(Continued from page 20)

the stake of each, he went South. They planned to camp by tent until they found a radio station that considered them as good as they considered themselves.

They tried a station at Tulsa but they failed to impress. A second try (at KOME Tulsa), and they were put to work writing shows, selling them, running elevators, sweeping floors and announcing Tulsa football games. Salary was $22 a week.

His radio career was interrupted by the war and service in the army as a private. In 1943 he married his college sweetheart, the former Marcille Nickell. Shipped overseas soon after, he saw action with the Thunderbirds (45th Infantry Div.) at Anzio and in France. He was wounded and captured by the Germans in January 1945, spending the duration in a prison camp north of Munich. He lost his right leg during the war. When he left the army he was a major.

To Mr. Barnes the advertising formula is radio and television as a combination. But he maintains that TV will never replace sister radio.

"Film is TV's salvation," he says, adding that live video will become more popular for daytime programming.

The Barnes' home is in Los Angeles' Parklabrea district where his wife doubles as housewife and TV actress. He still pursues his interest in sports, baseball, football and golf in which he shoots in the 90s. A more relaxing pastime is contract bridge.

He is a Mason, a Shriner, and a member of the Greater Los Angeles Press Club, Hollywood Ad Club and the Los Angeles Athletic Club.

EXCLUSIVE contract has been signed between WNAC-TV Boston and Walter Brown, president of Boston Garden, to telecasting rights for WNAC for all Boston Celtics basketball events held in Boston Garden or Boston Arena in the current season.

allied arts

H. SCOTT KILLGORE appointed director of government sales of Emerson Radio & Phonograph Co., N. Y.

WTVB POLICY

Single Rate Continued

WTVB-AM-FM Coldwater, Mich., last week announced continuance of its single rate card policy, despite its power increase. WTVB, which until recently operated with 1 kw daytime, now operates with 5 kw fulltime.

Basic hourly rate is $60, with the minute spot rate at $7.50. WTVB-AM-FM is sold also in combination with WSTR Sturgeon, Mich., on a single rate card basis. Both WSTR and WTVB are under the general managership of E. Harold Munn Jr.

EMSCO Derrick & Equipment Co., Houston, Tex., has changed its corporate name to Emsco Mfg. Co.

HOUSTON BAN

Protests Are Mountin

NARTB and the Radio-Televisi News Directors Assn., among oth groups, were drawn into a contr versy last week over Houst Mayor - broadcaster Roy Hofhein ban on radio-TV coverage of ci council proceedings.

Formal complaint was filed wi the two associations and also t Texas Assn. of Broadcasters a Sigma Delta Chi, professional jou nalism fraternity, by KNUZ Hou ton. The station, along with KPR had sought to tape-record the cou cil's first meeting [AT DEADLIN Jan. 5].

Last Monday the city counc began to waver on its restrictio on broadcasts, tape-recordings a telecasts of council sessions.

Mr. Hofheinz advised KNUZ a KPRC the council would reconsid the ban at its next session Wedne day. The broadcaster-mayor sa he still opposed tape-recording a televising of meetings where cit zens speak before the council.

The Houston mayor asked t two stations to submit their vie on what portions of sessions shou be barred. KNUZ itself has he that there should be no restrictio save in instances where a citize may request that his voice not b recorded.

Ban Is Surprise

Mayor Hofheinz and the eigh man council, much to the surpris of radio newsmen, imposed th news blackout Jan. 2, about an ho after they were sworn into offic for a two-year term. Observe noted that Mr. Hofheinz, owner KTHT Houston, KSOX Harlinge and other properties, achieve prominence by smuggling KTH microphones into secret committe sessions during the Republican Na tional Convention last July.

In suggesting the ban after bot KNUZ and KPRC had arranged t cover the first meeting, Mr. Hof heinz said he did not feel council men "should be forced to becom performers, either commercial o sustaining." He added that even i such privileges were granted, the should be accorded all stations. H also felt that "crackpots" woul tend to appear just because o radio.

KNUZ immediately protested th action and spotted it on local news casts. News Editor Crawford polle listeners of *Dateline Houston,* re porting 90% backing the station' position. He felt that Houstor citizens unable to attend counci meetings were entitled to hear th highlights at a more convenien hour and discounted the "crackpot' theory. Mr. Crawford noted tha KNUZ had broadcast portions o previous sessions.

Aside from protesting to NARTB RTNDA, TAB and Sigma Delta Chi, the station urged listeners t state their position. Mr. Crawford also solicited the views of othe Houston stations.

TV SEMINAR
Fellows, Bronk to Speak

EARLY dinner of the third annual Regional Television Seminar at Baltimore Feb. 27-28 will feature as keynote speakers NARTB President Harold E. Fellows and Johns Hopkins U. President Detlev W. Bronk.

The annual TV seminar, originated by WAAM (TV) Baltimore for college students of the East and Southeast who are considering TV careers, is arranged and sponsored by American U. (Washington, D. C.), Johns Hopkins U. (Baltimore), U. of North Carolina, Temple U. (Philadelphia) and the U. S. Office of Education.

Attendance, which is limited to 110 collegians, is not restricted to students at the colleges repersented in the seminar's steering committee, according to officials, who said registration "will be noted in the order received."

Also scheduled for the two-day meeting at WAAM and Johns Hopkins U. are a career panel, "What Can I Do in Television?" a studio demonstration and a panel discussion, "Television Programing: Live vs Film." The 1953 seminar convenes at 2 p.m. Feb. 27 and adjourns at 4 p.m. Feb. 28.

LEES' TELECAST
Termed Big Success

TOP executives of James Lees & Sons Co., Bridgeport, Pa., last week praised the company's closed circuit theatre telecast of a national sales conference Dec. 8 as an "outstanding success." Telecast was carried in 18 motion picture houses in 17 cities [B•T, Dec. 15].

Based on study of reports from each city, Lees president James L. Eastwick commented:

"The Lees Carpet Tele-Session was exceptionally successful. It enabled the chief executives of our company to talk directly to thousands of our customers, stockholders and our sales organizations in every part of the country with efficiency and effectiveness. . . ."

Telecast was carried over the facilities of Theatre Network Television (TNT). Arrangements were made by a subdivision of TNT, Theatre Tele-Sessions, organized to present business meetings via closed circuit theatre television. This subdivision is headed by Victor M. Ratner, director.

UHF CONVERSIONS
Will Be Counted

WTVI (TV) Belleville, Ill., which plans to begin operation May 1 on Ch. 54, reported last week that it made arrangements with the Union Electric Co. of Missouri to keep an accurate count of uhf conversions in the same manner the firm has been keeping account of TV sets sales in St. Louis for the past six years.

Distributors will report movement of converters and converted receivers.

Film Report

(Continued from page 71)

available are announcements for banks, appliance dealers, used car dealers, breweries, laundries, bakeries, retail jewelers, women's wear stores, furniture dealers and introductions to special sales. There also will be weather reports. The service will be available to stations on an annual subscription basis and new releases will be furnished monthly to subscribing stations. The firm reports that the service will enable many local advertisers to order television spots and be charged only for time, as against the current practice of paying both production and time charges.

Production . . .

Arrow Productions Inc., Hollywood, has started production on six half-hour programs in the second group of *Ramar of the Jungle* TV films. Plans are underway for three of the already completed films to be edited into a feature length motion picture for theatrical distribution, under title of "African Adventure," according to executive producer **Leon Fromkess.** Same procedure will be followed for the new group of films to be released theatrically as "Adventure in India."

* * *

Sovereign Productions, Hollywood, is completing "Hired Mother" and "Ride the River," half-hour films in the new CBS-TV series for **General Electric.** Starred in the former are **MacDonald Carey, Laraine Day and Gigi Perreau** with **Tim Whelan** directing. The latter features **Broderick Crawford** and **Skippy Homeir** with **Sheldon Leonard** directing. **Gil Ralston** and **Arthur Ripley** are in charge of production.

* * *

Screen Gems Inc., Hollywood, is completing "The Old Man's Bride," half-hour film to be included in NBC-TV *Ford Theatre* series. **Victor Stoloff** is directing from a script by **Jerry Gruskin.**

Random Shots . . .

Association Films, New York, offering TV stations free safety films on investments, fire, highways, exercise, driving and traffic. Inquiries may be directed to the company's TV department, 347 Madison Ave., New York 17.

* * *

Consolidated Television Sales, TV film sales and distribution firm, has moved its Philadelphia office to 512 Jefferson Bldg., 1015 Chestnut St. New telephone number: Market 7-6369. **Mort Brandes** is the firm's representative in Philadelphia.

Film People . . .

Marshall Grant, film producer with Ruthrauff & Ryan Inc., New York, and formerly a producer with Universal-International Pictures, joins **Gross-Krasne Inc.**, Hollywood, as an executive producer. Firm films CBS-TV's *Big Town* and is shooting some experimental programs for CBS-TV's *Lux Video Theatre.*

* * *

Charles E. Denney Jr. has joined the staff of **Paramount Television Productions**, subsidiary of Paramount Pictures Corp., New York. Mr. Denney's first assignment will be a study of the social and economic aspects of local, as compared with national, television programming in the Los Angeles market under the supervision of Klaus Landsberg, general manager of KTLA (TV).

* * *

Michel Kraike, formerly with Edward Small Productions, Hollywood, has been signed by **Screen Gems Inc.**, that city, as a producer on NBC-TV *Ford Theatre* film series.

* * *

Joyce Cook, story department, Revue Productions, Culver City, to **Frank Wisbar Productions**, Hollywood, as story editor on NBC-TV *Fireside Theatre* film series.

* * *

Ralph M. Baruch, WABD (TV) New York account executive in spot sales, to New York office of **Consolidated Television Sales**, filmed television programming sales and distribution firm, as sales representative.

* * *

Michael Kraike, producer with Edward Small Productions, N. Y., to **Screen Gems**, New York as a producer on *Ford Theatre* series.

* * *

Rev. James K. Friedrich, president of **Cathedral Films**, Burbank, and advisor on audio-visual aids to Church Divinity School of the Pacific, is starting a cross-country tour of 19 cities with the company's new feature length film, "I Beheld His Glory." It is to be made available to churches and religious organizations and released for televising only between Good Friday and Easter. Budgeted at $100,000, the motion picture was shot in both black and white and color.

* * *

Stanley Meyer, producer on NBC-TV's *Dragnet* for Mark VII Ltd., Burbank, father of son, Michael Anthony, Dec. 31.

* * *

Stanley Frazen, supervising editor on CBS-TV's *George Burns and Gracie Allen Show* and NBC-TV's *I Married Joan*, father of girl, Marcy, Dec. 25.

LARGE window display in Providence's Union Station set up by WHIM in that city, was seen by an estimated 170,000 travelers during the month of December according to the station. Station constructed the display to feature products advertised on the air, and to present its story to passengers using the city's only railroad station. Officials of the Junior Chamber of Commerce revealed the high count upon completion of a traffic survey.

WPTF OFFERS AWARD

TO STIMULATE more support for the 1953 March of Dimes campaign in North Carolina, WPTF Raleigh is offering $100 to the North Carolina county which contributes most to the drive this year. All money collected will go back to the county from which it came. The $100 award will be used in the winning county's fight against polio.

THEATRE USES TV

FOUR-STAR Theatre, Los Angeles motion picture house, started a two-time half-hour program, *Academy Critics*, on KTTV (TV) Hollywood. During telecasts, Jan. 10 and Jan. 17, the theatre's current film, "The Star," was plugged by means of film clips, discussion and questions from panel selected from studio audience. Packaged by Watson-Rand Productions, the program, if successful, will be continued to stimulate theatre attendance. Agency is Emerald Agency, L. A.

NEWS SIMULCAST

FIRST news simulcast to originate in the San Antonio area will be launched this week by WOAI-AM-TV San Antonio. The 15-minute show will be seen and heard every evening at 10 p.m. with Frank Matthews as newscaster. Sponsors are Joske's of Texas, a department store, Lone Star Brewing Co. and Farm & Home Savings and Loan Assn.

WLEC BOOKMARK

BOOKMARKS are being used by WLEC Sandusky, Ohio, as a monthly promotion for the Ohio Bell Telephone Co., sponsor of *Ohio Story*. Distribution is made to the local Ohio Bell office, the public library and to all sponsors on WLEC with their monthly billings. Bookmarks list programs in the *Ohio Story* series, as well as news of other WLEC shows.

FASHION PREVIEW

PREVIEW of spring fashions of leading designers are being aired on WGH Norfolk, Va., from New York by Mildred Alexander, WGH women's director. Mrs. Alexander is spending two weeks in New York where she is originating her daily broadcasts. Among other special features, a round-table discussion of trends in women's apparel will be broadcast in which fashion designers will participate.

SHOW PROMOTES SELLING

DAYTON, Ohio, which claims leadership in the field of training and development of famous sales executives, went a step further during the past year with the use of WLWD (TV) facilities in that city. The Dayton Sales Executive Club, in cooperation with the station, presented a weekly show to build better public relations toward better selling. Sunday program, called *Selling America*, promoted better selling by showing the opportunities in selling as a profession. Show will continue throughout 1953.

'CALLING ALL CARS'

NEW car every week is no luxury for Tom Armstrong of WGAR Cleveland. Mr. Armstrong, who handles the station's *Calling All Cars* program on which he reviews a new car each week, finds Cleveland auto dealers happy to make a car available for him. WGAR relates that the program which serves as a sounding board for the Cleveland automobile market has stirred Akron dealers to start a similar show.

INAUGURATION TELECAST

GREATER Miami televiewers saw the entire ceremony of Gov. Dan McCarty's inauguration in Tallahassee, Fla., on Jan. 6 on WTVJ (TV) Miami. Ceremonies were filmed by the station's news department and shown the same day. Event was handled by Ralph Renick, news director, and Norman Werthman, cameraman.

TV QUIZ GAME

TV quiz game, *Shadow Stumpers*, which debuted in Baltimore, Md., three years ago, makes its Washington, D. C., premiere on WTOP-TV on a regular weekly basis. Disc Jockey Eddie Gallaher will preside over a panel comprising representatives of local clubs and organizations each Sunday at 3 p.m. Idea is for members to guess identity of objects from silhouette shadows, with valuable prizes awarded to home viewers. Brent Gunts produces *Stumpers*, which was a regular feature of the CBS-TV *Garry Moore Show* for 18 months. Program is being promoted as package with spots, ads and other material through Robert M. Gamble Jr. Advertising, local agency, and also will serve as public service vehicle for local organizations.

COMMUNITY SERVICE

FULL-page ad was run in the *Houston Post* on Dec. 31 by KPRC-TV Houston, outlining the station's services to its community in 1952. Listed in the ad were the religious, national, educational, community, agricultural and safety organizations which had used time on KPRC. Copy also stated that "more than 17 hours out of each 24 . . . more than 6,250 hours on the air during the year" were devoted to community service.

PAMPHLET PRECEDES DEBUT

HERALDING the debut of WKNB-TV Hartford this month is a pamphlet describing the central Connecticut and southwestern Massachusetts area the station will serve. Pamphlet claims the station will have a potential viewing population of some 2,368,342 persons in an area that has an effective buying income of $4,135,798,-768.

HOME-CLASSROOM PROGRAM

WNYC-AM-FM New York and WNYE (FM), Board of Education station, last Monday carried what officials said was the first program broadcast simultaneously to pupils in classrooms and children and parents in their homes. Broadcast featured an address by New York's superintendent of schools, Dr. William Jansen, direct from the control room of the Civil Defense shelter area in his office in Brooklyn. Purpose of the broadcast, according to WNYC spokesman, was to "show the flexibility of communications from the superintendent's office during strikes, storms and other emergencies."

NAEB FOLK SERIES

NETWORK of National Assn. of Educational Broadcasters began a new radio series over 61 stations across the country on Jan. 4 featuring Lou Ford in *Folk Songs and Footnotes*. Show was heard last year by Boston audiences on WBUR-FM, Boston U. outlet where Mr. Ford was program director. Show highlights little-known and authentic folk music of foreign countries, along with a commentary on the origin of the folk music.

WCHN BIRTH NOTICE

NEW outlet in Norwich, N. Y. WCHN, sent out a "birth notice" to announce its debut. Card stated that "the new baby will speak its first words on Jan. 1, 1953," and urged the reader to listen in to the newest member of the Norwich family of industries.

CORONATION CONTEST

CORONATION Contest, which will send the finalist and her escort to London for that event, will get underway today at WKRC-TV Cincinnati. Contest will center around cartoons appearing on WKRC, and will last for 15 weeks. Each week a semi-finalist will be chosen. Contest will be conducted on a new weekly show, *Coronation Court*, panel quiz program involving travel, geography and the Coronation itself. A Coronation Ball will be held during the last week to determine the winner.

SURPRISE PACKAGE

SOME birthday cakes recently sent out by CKVL Verdun, to advertising agencies in Toronto and Montreal, contained a lucky disc, with note to return to the station for a prize. Advertising agency executives who sent the disc back, when they found it in the cake, were astounded to receive a crate the size of a small chesterfield sofa, containing everything from beer to pills to clothing advertised on the station. Samples of everything advertised on the station, except motor cars, were included in the gift box received by agency executives.

LUNCHEON TV

NEW noontime program designed to interest youngsters home from school at lunch has been started on WPTZ (TV) Philadelphia. The show, *Lunch With Uncle Pete*, features Pete Boyle and old time silent comedy films. Mr. Boyle comments on the films which are backed by organ music. On the basis of a report from city schools that some 600,000 children are at home each noon hour from 11:30 a.m.-1:30 p.m., show has been scheduled by the station from 12:15-12:45 p.m.

AAA MEETING

Broadcasting Hosts Named

OST chairman for radio and tele-sion broadcasters at the annual nvention of the Southwestern sn. of Advertising Agencies Feb. -14 in Fort Worth [B•T, Dec. , 1952], will be Harold Hough, ector of WBAP-TV that city.

Performing the same function r radio and television national presentatives will be Joe Evans Free & Peters' Fort Worth of-e, according to Rowland Broiles, esident of Rowland Broiles Co. lv. of Fort Worth and convention neral chairman.

The media men will be guests of AA members at the Feb. 14 eeting and luncheon. Speaker at e luncheon will be Dean J. E. cCarthy of the U. of Notre Dame llege of Commerce.

Other speakers at the three-day nvention will include Frederic mble, president, American Assn. Advertising Agencies; August lson, AAAA staff member; ank Japha, executive secretary, ational Advertising Agency Net-rk, St. Louis, and Harley How-tt, media director, Fitzgerald dvertising Agency, New Orleans. SAAA officers are: President, aul Lago, president of Lago & hitehead, Wichita, Kan.; vice esident, Charles Crosson, presi-nt of Charles Crosson & Co., ouston.

ONG PLUGGER

Rebuffed by WDIA

ERT FERGUSON, co-owner and neral manager, WDIA Memphis, st week rebuffed attempts of a ng plugger to buy his way into e station's programming.

He answered a letter signed by a r. Joe Davis of New York, noting r. Davis sent a letter to WDIA's oduction director at his home ad-ess enclosing a check for $5 hich "you say is the amount you opose to pay him per week in e beginning in order to have him e" that the records "you are pro-oting are played regularly on this ation." The check was brought to s attention immediately, Mr. erguson said, adding:

" . . . Words are hardly adequate express my opinion of anyone ho endeavors to promote records such a manner and you may be re that as long as you have any-ing to do with [that company's] cords, none will ever be played on is station except under the pres-re of such extreme popularity at it would be poor programming omit them from our schedule. our check is being returned here-ith. . . ."

EW St. Louis received an award ec. 27 from St. Louis Jazz Club for ation's "contribution to the further-g of traditional jazz." Station pre-nts weekly jazz show, *New Orleans eritage.*

APPOINTMENT of Rep.-elect Alvin M. Bentley (R-Mich.) (l) as vice president of WKNX-AM-TV Saginaw, Mich., was announced at dinner attended by station executives and civic leaders. Shown at head table with Mr. Bentley, who also becomes director of Lake Huron Broadcasting Corp., are William J. Edwards (c), vice president and general manager of WKNX-AM-TV, and Howard H. Wolfe, station manager and secretary-treasurer. Mr. Edwards also reported plans for March opening of WKNX-TV on uhf Ch. 57 and four-day TV Exposition in city's Civic Auditorium [B•T, Jan. 5].

ADVERTEST PLAN

To Incorporate Projects

NEW MARKET research plan designed to meet the needs of advertising agencies and manufacturers has been announced by Advertest Research, Brunswick, N. J. First study will be made in the New York area next March.

To be known as Advertest Combined Research, the plan will incorporate specific projects into one operation at reduced cost and be available to subscribers on a yearly subscription basis. Surveys will be based on personal interviews. Plan grew out of Advertest monthly studies of "The Television Audience of Today" and will be expanded to cover other market regions later this year.

RTES WORKSHOPS

Debate TV Methods' Merits

RELATIVE and competitive advantages of commercial telecasting versus theatre and subscription television will be debated Jan. 15 at the first of a series of evening workshop meetings to be held in NBC's Studio 6-B in New York, under the auspices of the Radio & Television Executives Society. Don McClure, RTES board member, is chairman of the workshops, which will start at 7:30 p.m.

At the opening session, Hugh M. Beville, NBC director of research, and George Nixon, NBC manager of engineering development, will speak for commercial TV. Nate Halpern, president, Theatre Network Television, will represent theatre television, and Paul Raibourn, vice president, Paramount Pictures Corp., will give the case for subscription TV.

On Feb. 12, the RTES workshop will deal with program rating services, with representatives of ARB, Hooper, Nielsen and Pulse as speakers. The March 12 session will take up radio and TV rate cutting, the April 16 meeting the problem of standardizing TV costs and production procedures, and the May 21 workshop a report on getting a uhf station started.

ASCAP INCOME UP

New High Expected for '52

ASCAP will ring up a record-breaking income of more than $16 million for 1952. it has been estimated. All-time high fourth quarter revenue, expected to be well over $4 million and perhaps approach the $4.5 million mark, plays a big part in pushing ASCAP's 1952 income up some 14% over the $14 million in 1951.

Broadcasters have again contributed the largest share of the ASCAP revenue, with advance estimates crediting radio station managements with payments of $9 million to $10 million and TV station operators with about $4 million for the right to use ASCAP-licensed music on the air.

'ARMY HOUR'

Returns to Broadcast Scene

THE award-winning *Army Hour* of World War II days will be revived early next month and beamed to overseas troops through the facilities of the Armed Forces Radio Network, it has been revealed.

Through the cooperation of NBC, the Army Dept. will produce a weekly 30-minute tape-recorded program, to be distributed overseas to some 69 AFRN stations. Documentary-musical format of the World War II *Army Hour*, which won a Peabody award for its excellence, will be retained.

Series will be supervised by the Army Dept.'s Training Information & Education branch, under Maj. Gen. Floyd Parks, with that service supplying the funds. NBC will donate technical assistance and library clips. Plans for the series were outlined by Col. Edward Kirby, radio-TV branch chief, Dept. of Army.

While the programs will be tailored as an information service for servicemen, NBC is expected to air them in the continental U. S. as it did in World War II. The tapes will be released each Sunday, to be used locally that week, and series is tabbed to run "for the duration."

Returning for the revival are Eddie Dunham, NBC producer who handled the original show. He has been named consultant to Gen. Parks. Mr. Dunham has been handling production chores for the *Voice of Firestone*. Ed Herlihy will assume announcing duties.

Mystik Names JWT

MYSTIK Adhesive Products, Chicago, for its Mystik tapes, has named J. Walter Thompson, same city, to handle its advertising effective Jan. 1. The new agency, taking over from George Hartman, also Chicago, will continue TV spot schedules in some 25 markets and a feature film on WNBQ (TV) Chicago. New media schedules have not been set. JWT vice president Ted Weldon is account executive.

MOBILIZATION

Fowler Reports 'Job Ahead'

A PLAN for computing full mobilization needs, including "rock-bottom" civilian requirements, to meet any full-scale war eventuality has been outlined by Defense Mobilizer Henry H. Fowler to President Truman.

Data on resources that would be needed to support a maximum military production program in wartime is being compiled by mobilization agencies, Mr. Fowler reported. Agencies have been asked to break down non-military production into categories of defense-supporting and essential civilian uses.

Mr. Fowler gave his views and conclusions in an eighth quarterly report titled "The Job Ahead for Mobilization." It covers production, resources, manpower, wage-price controls, civil defense and other mobilization factors.

Among points made by the Defense Mobilizer were these:

● Authority in the Defense Production Act for priorities and allocation of materials should be continued beyond June 30 when these controls are due to expire.

● Current lags in defense electronics and other production "are no longer attributable in any large degree to bottlenecks in the flow of materials, components or machine tools."

● Of the various types of electronics-communications devices now in production, 95% are of new design since Korea, constituting a "technological revolution that is still in its early stages."

● "A development holding great promise for the future is the successful use . . . of transistors instead of vacuum tubes."

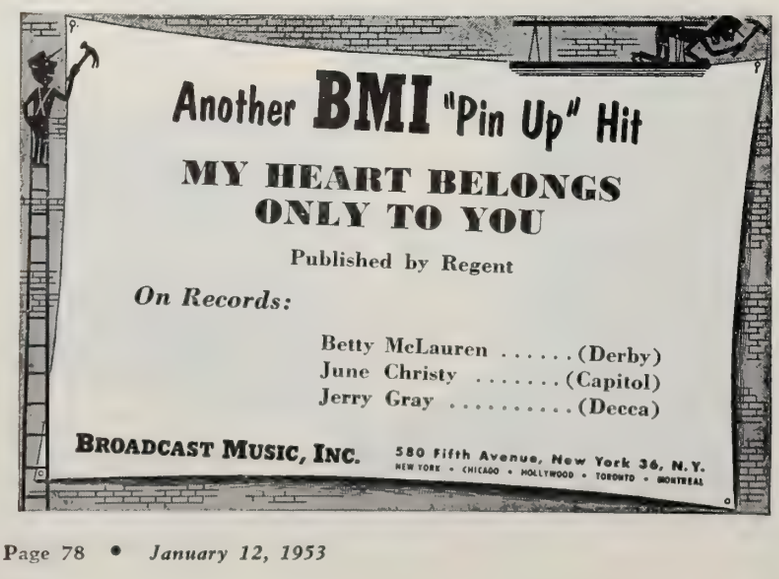
● Further relaxation of the Controlled Materials Plan for copper, aluminum and steel is anticipated in 1953.

● The Conelrad broadcast alert plan "is expected to be in full operation before the end of February." Despite this plan to deny navigational aid to the enemy, civil defense preparedness "is still far below the level of progress achieved in military and industrial mobilization."

● Acute shortages continue among highly skilled technical help in defense and essential civilian activities. Further study should be given to "the occupational requirements of the armed forces and essential civilian activities." Means are under study for expanding and conserving the labor force and improving use of manpower.

● Government power to limit stabilization pressures has been "seriously reduced" by abolition of control of installment credit. Suspension of ceilings on radio-TV receivers and other goods was described as among the "most important" curbs.

WDAF Card Format



NEW WDAF Kansas City, Mo., rate card No. 19, which goes into effect Feb. 1, reverses usual rate card format by listing first the station's lowest rates, Class C time, and listing last its highest rates, Class A time. Thus, according to V. A. Batton, station manager, the prospective advertiser is greeted with station's lowest instead of its highest rates. Credit for the new rate card format goes to H. Dean Fitzer, managing director of WDAF-AM-TV, Mr. Batton said.

U. of Ill. Event

NEW FEATURE of the sixth annual Festival of Contemporary Arts from Feb. 27 to April 12 at the U. of Illinois will be a TV program on contemporary arts which will be produced March 10 at the university studio and screened in an adjoining theatre, according to Dean Rexford Newcomb of the university's College of Fine and Applied Arts. TV equipment and production techniques also will be demonstrated.

ABC-CBC TV Pact

AGREEMENT between ABC and Canadian Broadcasting Corp. on importation of sponsored TV network shows was announced in Canada Dec. 31. Same arrangements were made with ABC as with NBC and CBS announced Dec. 29 [B•T, Jan. 5, 1953]. Unofficially this is understood to be 50% of new station time rates for CBC TV stations at Toronto and Montreal.

SET OUTPUT

FRS Reports Gain in '52

OUTPUT of radio-TV receivers and other household appliances rose substantially late in 1952, the Board of Governors of the Federal Reserve System reported last week.

Surveying general business and financial conditions, the board noted substantial gains, "with television output continuing at unusually high levels in December." Christmas retail sales were reported by FRS as reaching record volume.

In radio output, highest unadjusted index averages in November were in the order named: Small radios, automobile sets, consoles and combinations, and AM-FM console combinations. In TV output, consoles, table and combination sets ranked in that order.

Meanwhile, the Board of Governors announced plans for a 12-city survey of consumer finances during January and February. Interviewers ask consumers their plans to purchase radio and television sets and other durable goods. Particular attention will be paid planned consumer purchases "because of the central position of these industries in the national economy," it was explained.

Cities of Baltimore, Chicago, Boston, Cleveland, New York, Detroit, Los Angeles, Philadelphia, Pittsburgh, San Francisco, St. Louis and Washington, D. C., and their suburban areas will be covered in the study.

TV & EATING

Meck Cites Firm's Survey

NEED for crescent-shaped dining tables fronting a television set and greater parental control over children's viewing habits was outlined in Chicago past fortnight by John S. Meck, president of Scott Radio Labs., from the results of a survey his firm conducted in suburban Wheaton.

Of 300 fifth-grade youngsters interviewed, 63% said their parents let them watch television while eating, and 49% said the entire family watched video during the evening meal.

Mr. Meck said this calls for more parental guidance in program selection, and that "hasty gulping of meals before the TV set is likely to deprive the next generation of one of the greatest pleasures of family life, sprightly dinner-time conversation."

Commenting on the fact that 7% of the youngsters said they had TV in their dining rooms, Mr. Meck said the "only reasonable alternative" to balancing plates on the knee or getting a crick in the neck is a crescent-shaped dining table which would place all diners in front of the video receiver.

JACK GREGSON, m.c. of *Live Like a Millionaire* on ABC, is now serving as host on daily transcribed *John Sebastian Show*, sponsored by Coca-Cola.

PRESS CRITICS

Hit Walker, Hennock Visit

NEWSPAPERS in two widely separated sections of the country have raised editorial hob with efforts by some FCC Commissioners to whip up enthusiasm for non-commercial educational TV.

The *Press Democrat* of Santa Rosa, Calif., editorialized that the FCC "has arrogated to itself the job of trying to stampede the taxpayers of California into signing a blank check for non-commercial educational television."

Referring to recent visits of FCC Chairman Paul A. Walker and Comr. Frieda B. Hennock, the newspaper said that they have "crossed the continent to attempt to propagandize the stampede into major proportions."

Cost Factor Cited

The editorial pointed out that the "true cost picture has neither been determined nor hinted to the public" and that it was likely that if stations were established "programming would go far afield from basic education and become involved with 'do gooder' campaigns of wide scope."

"The Commissioners of the FCC," the newspaper said, "are not hired to attempt to rush Californians, or anyone else, into a venture where costs are unknown, and where nature of programs has not even been worked out, much less approved by the public."

The *Indianapolis Star* has advocated closer cooperation between educational institutions and commercial stations. Pointing out that Indiana U. had arranged with WTTV (TV) Bloomington to telecast an increased schedule of educational programming, the newspaper said:

"Hoosiers will cheer this decision . . . in conquering the problem of educational video. It will mean that an important feature of university training and presentation of educational broadcasts will be accomplished at lowest possible cost through utilizing WTTV's equipment.

Others Asked to Note

"Many another state university currently planning erection of TV stations at tremendous expense to the taxpayers, would do well to cancel their plans and adopt the wiser course chosen by I. U.

"This is assuming, of course, that other state universities are as fortunate as I. U. in having in their cities such progressive and cooperative men as Sarkes Tarzian, president of WTTV, who is to be commended for his generous concord in this endeavor."

ABC-TV's *Ellery Queen* program (Wed., 9-9:30 p.m. EST) received an award from *Parade* magazine for "public service in the national effort to combat crime." Presentation was made on program by *Parade* editor Jess Gorkin.

On All Accounts

(Continued from page 12)

resident Roosevelt.

His handsome appearance and rained speaking voice brought him o Hollywood in 1942 under a one-ear Warner Bros. movie contract. ollowing a film assignment in Air Force" and other movies, he ook a course in commercial avia-ion and received his pilot's license n late 1943.

New York City was his next port f call and Mr. Crago joined ABC s announcer. Assignments includ-d such programs as the *Boston ymphony, Washington Story* and ewscasts for *This Week Around he World.* He also covered the Jnited Nations sessions at Hunter ollege for ABC.

A transfer to the network's Iollywood headquarters occurred n November 1947 and for the next ew years his assignments va-ied in both radio and TV. At ABC e met newswriter Leonard Shane, who established an agency in 1950. Ir. Crago joined him two years ater.

Billings Soar

Reluctant to boast about the oung agency's annual billing, Mr. rago said it is in seven figures, 5% of which goes to radio and V. He looks to a substantial in-rease in those media during 1953.

Agency accounts include such dvertisers as Retail Clerks' Union, ocal 770 (AFL) which sponsors weekly half hour public service rogram *770 on TV* on KTTV (TV) Iollywood with Mr. Crago as noderator. Other major accounts ith a high budget percentage al-otted to TV and radio are Louis Iilani Foods Inc., Cock & Bull everages (ginger beer) and sev-ral local advertisers.

Mr. Crago believes that all media omplement each other. It is his rm conviction that television will ave a stimulating effect on the ompetition for the advertising ollar.

Emphasizing the importance of radio as a medium and cautioning that it must not be overlooked, he says TV is a challenge to every other medium in every major advertisers' budget.

"There is no more danger of TV driving radio out of business than there was 25 years ago when the cry went up that radio would sound the death knell of black and white. TV just opens one more avenue of information to the public."

He contends the smart advertisers will trust to the good judgment of their agencies in the selection of the right medium for the product to be promoted.

The Cragos—she is the former Mildred Beranek—were wed Jan. 25, 1936. With William Jr. and Mildred, aged 12 and 10 respectively, they make their home in suburban Sherman Oaks. Mr. Crago's hobbies are golf, flying and sailing.

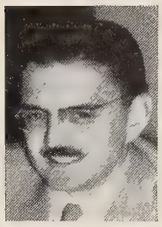
FIGURING in Intermountain Network promotions are President Meyer (r) and Executive Vice President Paige. ➤

COMEDY PLAN

NBC-TV Marks Anniversary

FIRST anniversary of NBC-TV's Comedy Development Plan, a subdivision of the network's New Program Development Dept., was celebrated by a special quarter-hour program titled *A Chance to Show,* Sunday, Jan. 4 (5:30-45 p.m. EST). New Program Development Dept. is under the direction of Merritt (Pete) Barnum, with Bill Gargan Jr. heading the Comedy Development Plan.

Under auspices of the plan, new comedians and entertainers who are professionals but who have never appeared on television are given a chance to audition on alternating Thursday evenings before NBC-TV producers, directors and executives. The Comedy Development Plan offers an opportunity for a showcase with appropriate material.



Under Mr. Barnum's jurisdiction, the New Program Development Dept. is planning to develop new dramatic shows similarly.

EIGHTH Annual West Coast Exhibition of Advertising Art will be held by the Art Directors Club of Los Angeles, Feb. 25 through March 11. Medals and certificates of merit will be awarded in 12 classifications.

INTERMOUNTAIN

New Promotions Announced

GEORGE C. HATCH has been advanced from president of Intermountain Network Inc. to chairman of the board of directors, it was announced after a meeting of the board Dec. 22 at the regional network's Salt Lake City headquarters.

Mr. Hatch

In other changes, all were effective Jan. 1, Intermountain Network's board elevated Lynn L. Meyer, vice president, to president, and named Jack Paige, vice president, as new executive vice president.

The board added Thomas Kearns Jr. as vice president and elected Arch L. Madsen, co-owner of KOVO Provo, Utah, and KEEP Twin Falls, Ida., as a new director.

Mr. Meyer, who has been associated with Intermountain Network more than 10 years, previously was in the broadcasting and advertising agency field at Minneapolis-St. Paul.

Mr. Paige, who joined the regional network in November 1949, previously had been associated with MBS in executive capacities.

Intermountain, which claims to be one of the largest regional networks in the country, covers 11 states in the intermountain West and serves 61 affiliates.

The network's sales for 1952 showed an increase of 18% over 1951 and Intermountain predicts its 1953 business outlook will continue upward. During the past year Intermountain opened a Denver sales office under supervision of Kenneth Palmer, former commercial manager of KVER Albuquerque. Majority of Intermountain affiliates also are affiliated with Mutual.

PRO FOOTBALL

Media Aids Ticket Sales

CASH SALES of 3,101 professional football season tickets—at $19.80 each—were directly attributable to the impact of radio and television last month when the National Brewing Co. used its programs in Baltimore to promote the sale of tickets to next year's games.

More than 600 tickets were sold the first day that Bailey Goss on WMAR-TV Baltimore made the announcement. The following programs, all sponsored by National Brewing, helped the sale of tickets: *National Review, Wrestling with Bailey Goss, National Amateur Time,* and *Hollywood Offbeat,* all on WMAR-TV, and *The National Sports Parade* on WBAL Baltimore.

Kenyon & Eckhardt, New York, is the agency.

STERLING DRUG

FTC Complaint Dismissed

COMPLAINT charging Sterling Drug Inc., heavy broadcast advertiser, and its agency, Ruthrauff & Ryan, both New York, with alleged misrepresentations for Ironized Yeast Tablets was dismissed by the Federal Trade Commission last Thursday.

The respondents have discontinued the ad claims and revised statements relative to the therapeutic effectiveness of the preparation, the commission noted. FCC said it felt "that the interest of the public would not be served in continuing the proceeding." Whether the statements were made in radio and TV continuities was not revealed.

CBS Adds KSWB

ADDITION of KSWB Yuma to the CBS Radio Network as a bonus station to KOOL Phoenix, effective today (Monday), has been announced by William A. Schudt Jr., national director of station relations for CBS Radio. Total CBS Radio affiliates now number 217. Owned and operated by the Maricopa Broadcasters, of which Gene Autry is president, KSWB will begin operations today. It will operate unlimited time on 1240 kc with 250 w. James Cox is general manager.

1953 KINESCOPES

Thees Sees Heavy Demand

INCREASED demand will bring all-out production and steady sales of TV picture tubes during 1953, according to a prediction by L. S. Thees, general sales manager of RCA Victor's Tube Dept.

He said the expected manufacture of 6¼ million new TV receivers and a renewal demand for 3¾ million kinescopes will place a serious strain on the industry's tube factories and that the shortage will be "even more serious" unless the industry abandons its usual practice of curtailing production during summer months.

He said the shortage may not be felt keenly until after the second quarter of 1953, and suggested a steady, full-production load on a 12-months basis.

Mr. Thees said present trends indicate more than 70% of 1953-produced TV sets will have picture tubes larger than 19 inches in size, and said existing manufacturing facilities "are not yet geared" to produce enough large tubes. This is because industry heretofore has been geared to produce smaller picture tubes, he said, citing 1950's production of eight million kinescopes.

CUMMINGS SUIT

Filed by Producer Greene

PUNITIVE damages of $100,000 and $19,200 for loss of salary were sought in a suit filed last Monday in Los Angeles Superior Court by producer Mort Greene against actor Robert Cummings. Mr. Greene, who resigned a month ago as producer on NBC-TV's *My Hero* film series, starring the actor and packaged by Don Sharpe, charges Mr. Cummings induced Mr. Sharpe to cancel their work agreement.

Mr. Greene last month had filed a $19,000 breach of oral contract suit against Mr. Sharpe, Mr. Cummings, Mrs. Cummings and the Golden Key Trust [B•T, Dec. 22, 1952]. Simultaneously, Mr. Greene had filed an attachment against Mr. Sharpe, seeking payment for the remainder of an alleged 48 weeks work contract.

EAST GERMANY

Berlin Station on Air

DIRECT transmissions from a new television center in East Germany were launched Dec. 21 with a two-hour test program in observance of Soviet Premier Josef Stalin's 73d birthday.

Details of the new TV Center in Berlin were revealed by the Office of the Public Affairs Adviser, Bureau of German Affairs, U. S. Dept. of State.

Transmissions until Dec. 21 had been limited to relay of film and still fare. Live programs emanate from TV studios in Adlershof. According to plans outlined by Hermann Zilles, head of the center, the building will have four studios and a hall with 75 seats for public shows.

CANADA LISTENING

Sunday P. M. Habits Va

TWICE yearly survey of Sunda afternoon listening habits in Ca ada shows that the percentage listening varies with the size the city. Toronto, second large city in Canada, shows a very lo percentage of sets-in-use, whi Halifax, a much smaller city, sho more than a third of the sets in t city are turned on.

The report, prepared in Ap and December by Elliott-Hayn Ltd. Toronto, used 10 markets f the survey: Halifax, Montre English, Montreal-French, Ottaw Toronto, Hamilton, Winnipeg, R gina, Edmonton and Vancouve The report is made for each st tion between noon to 5:30 p.m and lists sets-in-use, program ra ings, and percentage of listene by half-hour program periods.

It is of interest to note that western Canada, where Americ network shows are carried in t late afternoon hours, highest se in-use figures and program ratin are shown for American netwo comedy programs.

Our Respects To

(Continued from page 48)

cooperation with Geoffrey Wade, icago agency.

He set up a television commer- l laboratory there, where ex- rimental sound films are pro- ced for testing by the Schwerin search Corp., New York. The udio is equipped with a 16 mm mera and synchronized tape re- rded sound, field lighting and re- rding power. Technicians and eative personnel produce stop- tion, animation and small live- tion films. Test results enable e firm to spot "more efficient" mmercials.

In 1950, Les Waddington added oduct supervisor on the new ctine to his other duties. He pervised all advertising and pro- tion in introducing the anti- otic to the medical profession d to consumers.

Mr. Waddington wandered into dio for the first time when at- ding Iowa State in Ames. His ucation was financed by work as musician and between 1933 and 37 he soloed and appeared with e Sax-O-Four on such stations KFAB Lincoln, WOW Omaha d KOIL Council Bluffs.

He was born Feb. 27, 1913, in naha. After studying music and e-engineering at Municipal U., enrolled at Iowa State, from ich he was graduated in 1937 th a bachelor of science degree mechanical engineering. He jored in aeronautics and in- strial management, and earned teaching certificate in education d psychology.

Joins Instrument Firm

His first job out of college was th the C. G. Conn instrument mpany in Elkhart, one of the rld's largest, where he worked an experimental acoustical en- neer for four years.

His musical and engineering ap- udes led to his early promotion a design engineer in 1941, and chief design engineer in 1945. remained at this job, designing e company's entire line of in- ruments, until 1947 when he went Miles Labs.

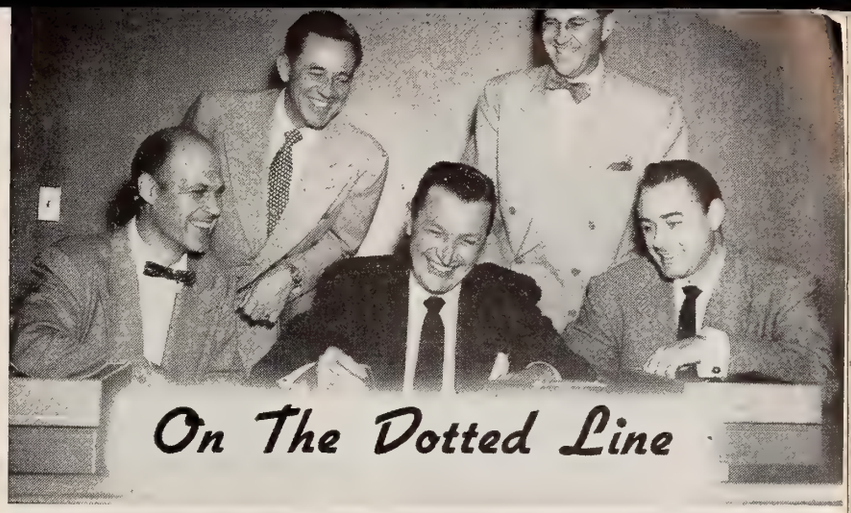
Mr. Waddington's merchandising perience with Conn was trans- red to Miles, where all radio d TV purchases are merchan- ed for each salesman, who uses n personal promotion with drug- ts. The company has more than 0,000 dealers and 500 jobbers the U.S., and distributes its oducts throughout the world. port advertising is handled by bert H. Otto agency, New York.

Miles currently is networking rt Massey on CBS Radio and ual, *Hilltop House* on CBS dio, *One Man's Family* and *News the World*, both on NBC radio, plemented with national TV t. Network TV has been pped, although the company has d it.

Miles sponsored its first radio w, *Songs of Home Sweet Home*, on WLS Chicago in January 1932, adding the famed WLS *National Barn Dance* a year later. Since then it has used these network vehicles successfully: *Lum 'n' Abner*, *Quiz Kids* (AM-TV), *Bob and Ray*, the *Alec Templeton Show*, *Queen for a Day*, *Ladies Fair* and Edwin C. Hill.

Mr. Waddington keeps time free for many family, social and civic activities. His wife is the former Emma Howe. They have two youngsters, James Howe, 11, and Janet Lee, 9. He and his son have launched a long-range boat building project, starting with an eight-foot pram kit boat, and this winter will begin construction of a cabin outboard cruiser designed by Mr. Waddington. They plan to take it on expeditions along the upper Mississippi and on the Lake of the Ozarks.

The family is boat-happy, he says, becuase they usually spend their vacations with Mrs. Waddington's parents at Saybrook, Conn., on Long Island Sound. Both Jim and Janet are active in Scout work and their father serves on the district committee of the local council.



He is former president of the local Kiwanis Club, for which he directed the Elkhart Music Festival two years; co-producer and director of the Railroad Centennial in 1951, sponsored by the Chamber of Commerce, and a member of the Elkhart Concert Club and Knife and Fork Club.

Mr. Waddington is a registered professional engineer, a member of Alpha Sigma Lambda and Adelante fraternities, the American Federation of Musicians and the Assn. of National Advertisers, in which he has worked on the radio and television, motion picture, magazine and research committees.

Ralph Judge Elected

RALPH JUDGE, sales manager of H. N. Stovin & Co., Toronto station representative firm, was elected 1953 president of Radio Representatives Assn. at its annual meeting at Toronto Dec. 30. He succeeds Norm Brown, Radio Time Sales Ltd., Toronto. Other officers elected were Alex Bedard, Radio Representatives Ltd., vice-president; Bill Mitchell, All-Canada Radio Facilities Ltd., secretary; Bruce Butler, Joseph Hardy & Co., treasurer, and A. A. McDermott, Radio & Television Sales Inc., publicity director.

BILL COSTELLO, CBS Radio White House correspondent, has been named a member of the six-man 1953 Screening Committee for the foreign study and research fellowship program administered by the Ford Foundation board on overseas training and research. The committee will choose approximately 100 persons for fellowships.

Harvester.

HIGHPOINTS IN '52

Jolliffe Lists Top Ten in Radio Electronics, TV

TOP 10 achievements in radio-electronics and television during 1952, as listed last week by Dr. C. B. Jolliffe, vice president and technical director of RCA, were as follows:

1. Extension of TV service through the lifting of the TV station "freeze" and the opening of uhf.

2. Progress in development and application of the transistor, tiny electronic device which performs many of the functions of electron tubes.

3. "Successful field tests of the RCA compatible color television system and tricolor tube, embodying standards recommended by the National Television System Committee. These tests, conducted over NBC facilities, resulted in the refinement of equipment and the acquiring of valuable experience in color TV programming."

4. Extension of electronics and television for such industrial and defense uses as metal detection, radio heating, electronic metering.

5. Coming into wide use of microwave communications systems in this country and abroad.

6. Improved sound recording techniques, new phonograph record players and introduction of "EP" (extended play) 45-rpm records.

7. Emergence of theatre television, providing large-screen viewers of top sporting events and musical production in nearly 100 locations from coast-to-coast.

8. Introduction of the portable TV camera-transmitter — the "walkie-lookie"—by RCA to facilitate coverage of news events. Its debut was at the national political conventions in Chicago.

9. Opening of RCA's first trans-Pacific TEX radio teleprinter exchange service, between San Francisco and Honolulu, emphasizing "the importance of this direct two-way communications system in commerce and government."

10. New and greatly improved radar installations for maritime and aviation uses.

HALPIN REPORTS

Multiple TV Set Trend

TREND to two-television homes was reported by D. D. Halpin, general manager of the receiver division of Allen B. DuMont Labs., at the opening of the winter furniture shows in Chicago's Merchandise and Furniture Marts last week.

Mr. Haplin said the television trend is similar to that of radio, which expanded set usage into other rooms than the living room in the 1930s, and he estimated two to three million of the 22 million sets now in use are in multiple-set homes. Only 2% of families buying new receivers are turning in old sets, he said.

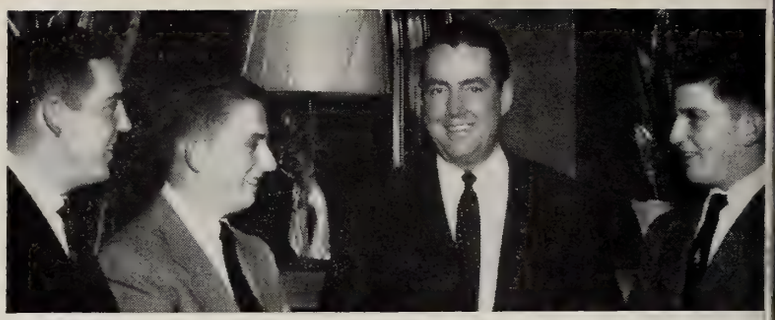
Television has caused a boom in living room furniture sales, said W. E. S. Griswold Jr., president of W & J Sloane Co., New York City. Thomas I. Levitt, president of Boutell Bros., Minneapolis, and new president of the National Retail Furniture Assn. said few furniture stores carry TV sets because the markup is not enough to make a profit.

Among exhibitors of radio and TV sets was Raytheon Television and Radio Corp., which showed its entire line and introduced three 21-inch video models with equipment for phonograph installation.

RAND ADVERTISING

Debt Settlement Attempted

COUNSEL for Joseph Warner, president of Rand Adv. Agency, New York, reported last week he is attempting to work out a settlement for some 125 creditors which have claims estimated at $35,000 against the agency.



Benjamin Cohen, New York attorney representing Mr. Warner, said the agency has gone out of business and that Mr. Warner has no personal assets. According to Mr. Cohen, most of the debts are to radio stations and representative firms for radio time bought by the agency. He reported that he had held a creditors' meeting at his office Dec. 31, at which he had explained Mr. Warner's financial status and had offered his services to firms interested in a settlement. Accounts that the Rand agency handled included Staminal and the Perfume Sales Co., both New York.

Carr Appointed

THOMAS S. CARR, veteran broadcaster and public relations advisor, last week was appointed executive secretary to Maryland Gov. Theodore McKeldin. The post pays $6,000 a year. From May 1947 to Aug. 1951, Mr. Carr served as administrative assistant and vice president-station manager of WANN Annapolis, Md. Since 1951 he has been in the public relations field.

Morton's Promise

A PROMISE that the Voice of America will supply truth to clear away the Communist "fog of fraud and distortion" was given by VOA Director Alfred H. Morton in a New Year's Day message to overseas listeners. Mr. Morton, TV consultant and former network executive who assumed the VOA post last fall, said the U. S. State Dept. shortwave radio arm would "continue to bring you the truth as free men see it" and extended friendly greetings on behalf of the American people.

TWO SONS of Irving E. Rogers (2d from r), president and treasurer of H dreth & Rogers Co. (WLAW-AM-FM Boston), have been elected to executi posts with the *Lawrence* (Mass.) *Eagle-Tribune*, published by their fath [B•T, Jan. 5]. L to r: Irving E. Rogers Jr., assistant business manager, a Allen B. Rogers, assistant treasurer of the *Eagle-Tribune;* Mr. Rogers Sr., a another son, Alexander H. (II). Latter passed up radio-newspaper field organize and direct a construction firm. WLAW was founded on Dec. 1 1937, by Alexander H. Rogers, the boys' grandfather.

NPA CHANGES

Electronics Div. Split

APPOINTMENT of Donald S. Parris as acting director of the Electronics Division of the National Production Authority was announced last Thursday by H. B. McCoy, NPA acting administrator.

Mr. Parris, who has been serving as deputy assistant in the division, succeeds Richards W. Cotton, who returned to Philco Corp. effective last Saturday. Mr. Cotton, who is assistant to the president of Philco, will retain his post as chairman of the Electronics Production Board.

At the same time, NPA's Electronics Division underwent a realignment first revealed last month [B•T, Dec. 15, 1952].

The Electronics Division last Monday was divided into two branches—Production, comprising equipment and component sections, and Program & Requirements, covering CMP (the Controlled Materials Plan) and expediting functions.

Mr. Parris, a veteran of Commerce Dept. and NPA operations and an electronics specialist, also will serve as acting chief of Program & Requirements. R. D. Parker of NPA, formerly with Western Electric, heads up Production. Section includes J. Bernard Joseph, a specialist in broadcast equipment. Lee Golder, chief of the radio-TV section and formerly with Magnovox, has resigned.

WEISS TO ADDRESS

Chicago TV Council

PSYCHOLOGICAL sales for agency clients will be discussed by Edward H. Weiss, president of Weiss & Geller, Chicago, at the next luncheon meeting of the Chicago Television Council Jan. 21 at the Sheraton Hotel.

Mr. Weiss will discuss the Toni Co. in particular since his agency recently took over the bulk of the Toni billing after resignation of the account by Foote, Cone & Belding, also Chicago. Council President George Heinemann, program director of WNBQ (TV) Chicago, has designated the meeting "Boss' Day," asking council members to "bring your boss if you aren't one."

GAMES BY METER

May Shape Baseball on T

BELIEF that major league bas ball will move in the direction metered television in 1953 w voiced last week by Walter O'Malley, president of the Broo lyn Dodgers.

Mr. O'Malley said he thoug "this year will see baseball ma important progress in the solutio of what most of us call the tel vision mystery." He predicted th "before long" fans will pay a f to see a major league game on T

CHICAGO TO PROB

Television Program Conte

TELEVISION program content scheduled to get a going-over the Chicago City Council, with i dustry representatives, educato and the public testifying at hea ings to be called by a Council Su committee on Television.

The subcommittee, organized la Thursday after a meeting of t judiciary committee, is headed Alderman Patrick P. Patrone. I will work with six other alderme one of whom is John J. Hoellen w introduced a resolution late la month which started the video i vestigation.

Hearings of an informal natu are expected to begin next we Alderman Patrone said. Leaders all segments of the industry fr stations to companies may called.

Alderman Hoellen, in his resol tion noted a "shocking increase teen-age crime" in Chicago in t past year, and the existence of connection between the showing . . . crime films [on TV] and t shocking increase" in teen-a crime.

At the council committee hea ing Thursday, Police Chief Tim thy O'Connor testified that, in I opinion, there could be a very clo relationship between the inciden of crime by youngsters in Chica and the television shows air there.

GOLD medal has been awarded WJAR-TV Providence, R. I., for el tion night coverage in annual 19 *TV Guide* reader poll completed December.

Non-Docket Actions . . .

TRANSFER GRANTS

WIRA Fort Pierce, Fla.—Indian River Bcstg. Co. Granted transfer of control from Douglas Silver and O. L. Peacock to **Chanticleer Bcstg. Co.** for $62,450. Transferee is licensee of WCTC-AM-FM New Brunswick, N. J. Granted Jan. 8.

WJR-AM-FM Detroit, Mich.—WJR: The Goodwill Station Inc. Granted relinquishment of *de jure* control by Mrs. Frances S. Richards, individually and as Executrix of Estate of George A. Richards, deceased, to **C. Russell Feldman** and **L. R. Jackson,** Trustees for George A. Richards Life Insurance Trust, et al., through sale of 12,740 shares of stock (2.4%) for $9.125 per share, or $116,252.50 cash, payment to be made by Trustees from funds of Life Insurance Trust. Before transfer Mrs. Richards had 24.91% of stock as individual and 26.12% as Executrix of Estate; after transfer she has 22.45% of stock as individual and 26.12% as Executrix of Estate. Messrs. Feldman and Jackson had 5.81% of stock; after transfer they have 8.27% of stock together. Granted Jan. 8.

KHBR Hillsboro, Tex.—Hill County Bcstg. Co. Granted assignment of license from partnership consisting of R. W. Calvert, W. N. Furey and Ross Bohannon, to **Ross Bohannon,** tr/as Hill County Bcstg. Co. because Mr. Bohannon has contributed $22,629 and the two partners $6,100 each to the partnership, the interests of the two assigned partners are being sold to Mr. Bohannon for $20. Granted Jan. 8.

New Applications . . .

AM APPLICATION

Haines City, Fla.—KWK Inc., 540 kc, 10 kw daytime DA; two tower array, each tower 350 ft. above ground, located 6.4 mi. WNW of Haines City, Fla. Estimated construction cost $116,815, first year operating cost $184,000, revenue $191,000. Applicant is licensee of KWK St. Louis, Mo. Filed Jan. 7, 1953.

TRANSFER REQUEST

WMBD Peoria, Ill.—Peoria Bcstg. Co. Assignment of license to **WMBD Inc.** through sale of 510 shares of stock for $441.17 per share, or total of $225,000. Principals in assignee include President **Charles C. Caley** (66.67%), now 25% owner of WMBD, and vice president and general manager of station, and **John E. Fetzer** (33.33%), president and 52% owner of WKZO-AM-TV Kalamazoo, Mich., and WJEF - AM - FM Grand Rapids, Mich. Assignors include Carl P. Slane, who will sell 86 shares of stock for $37,941.08, Frances P. Slane, who will sell 212 shares of stock for $93,529.46, and Elizabeth P. Talbott, who will sell 212 shares of stock for $93,529.46. Assignee is applicant for new TV station in Peoria, contingent on FCC approval of this assignment first [See TV Applications, pg. 58]. Filed Jan. 8.

GE Renewals

REGULAR renewal of license has been granted by the FCC to General Electric Co. stations WGY and WRGB (TV) Schenectady, following several years of operation on temporary extensions of license. Renewal action had been delayed, as in the case of certain other radio and TV outlets, while the FCC reviewed its policy concerning firms which have been involved in anti-trust proceedings.

LONG MICROWAVE

GE Presents to Pipeline Firm

FORMAL presentation of what is said to be the world's longest private microwave radio system was made last week by GE to Transcontinental Gas Pipe Line Corp. in Washington.

Presentation took the form of a master key given by GE's Dr. W. R. G. Baker to Transcontinental's President Claude A. Williams.

The 1,840-mile pipeline microwave communication system, established with 59 links between Falfurrias, Tex., and Newark, N. J., operates at 2 mc and contains the equivalent of 12 telephone channels. Entire system was built by GE and operational tests were completed last month. It now is operating with seven of the 12 channels, providing radio-telephone facilities for operation and maintenance of the pipeline.

Additional voice communications may be added later by utilization of the five unused channels. Possibility also exists that the unused channels may be employed for carrying signals to control motors, to read meters, open and close valves and perform similar tasks.

Kudner 1952 Billings

KUDNER AGENCY Inc.'s broadcast billings amounted to an estimated $15 million in 1952, placing it in a three-way tie for 11th place among agencies in that respect, Lennen & Newell and Ted Bates Inc. also having billed at the $15 million level in radio and television [B•T, Jan. 5]. The Kudner billings —estimated at approximately $10.2 million in television and $4.8 million in radio—were omitted inadvertently from Broadcasting • Telecasting's Jan. 5 listing of leading radio-TV agencies.

Monarch's New Buy

MONARCH Wine Co., Brooklyn (Manischewitz wine), will sponsor *I Am the Law* film series on DuMont's owned stations — WABD (TV) New York, WTTG (TV) Washington and WDTV (TV) Pittsburgh — on Monday, 8-8:30 p.m. EST for 26 weeks starting Feb. 16. Agency is Donahue & Coe, New York.

WKOW RENEWED

Atlass Group Withdraws

FCC last Wednesday removed from hearing and granted renewal of license to WKOW Madison, Wis., after the Monona Broadcasting Co., licensee, had taken action Nov. 10, 1952, to terminate its business relationship with Atlass Amusement Co.

Question of whether WKOW had acquired CBS affiliation by hiring Atlass Amusement Co. as management consultant had been implied by FCC on May 15, 1951, when the Commission set aside its April 15, 1951, grant of license renewal to WKOW and placed the station on temporary license.

The Commission on Nov. 7, 1951, designated for hearing WKOW's application for renewal of license and on Sept. 25, 1952, denied WKOW's petition of March 28, 1952, asking that its application for renewal without hearing be reconsidered.

The FCC had asked for information on why WKOW cancelled its affiliation contract with MBS early in 1950 and affiliated with CBS in May 1950. H. Leslie Atlass Sr. is CBS Central Division vice president and general manager of CBS-owned WBBM Chicago, and also owns 19% of WIND Chicago. His son, H. Leslie Atlass Jr., is president and with his sister and brother, owner of Atlass Amusement Co., and is program director of WIND. Ralph Atlass, brother of H. Leslie Atlass, is vice president and general manager of WIND, controls WLOL Minneapolis, and KIOA Des Moines. He also is a director of WMCA New York.

In a second petition for reconsideration on Dec. 1, 1952, WKOW informed the FCC that the station and Atlass Amusement Co. had terminated their business relationships. The petition stated that WKOW had purchased from Atlass Amusement Co. principals "all of the stock held by them" in WKOW.

In the petition, WKOW said it "has not in the past relinquished to Atlass Amusement Co. any of its rights or responsibilities relating to control" of WKOW and that "there is no possibility" that Atlass "will enjoy any semblance of control . . . in the future."

FM Saturation

BECAUSE of FM saturation in Washington, FCC last week proposed to remove Class B Channel 238 from Baltimore and add it to Washington. Unique action would allow suburban WBUZ (FM) Bradbury Heights, Md., to change from Class A to Class B operation. All 10 usable Class B channels are in use in Washington while Baltimore is using only 4 of the 11 allocated to it. The 11th Class B channel allocated to the Capital cannot be used by WBUZ because of interference to WUST-FM Bethesda, Md., the other Class A station in the Washington metropolitan area.

SALES executives of WONS Hartford, Conn., meet with five used car dealer to discuss plans for new phone-quiz show. L to r: Seated, Arthur Mossberg Arthur Motor Sales (Studebaker); Cy Kaplan, WONS sales manager; Jo Wiley, Manchester Motor Sales (Oldsmobile); Martin Sayet, Fitzgerald Motor (Ford); standing, James Cannon, Packard-Windsor (Packard); Harold LaBie Fitzgerald Motors; Phil Zoppi, WONS sales representative; Herber Jester, W Hart Buick (Buick). Dealers have banded together to bolster used car sales Program, *Auto Tune Derby*, is aired Monday through Friday at 6:30 p.m

WDAF Placed on Grid by Justice

(Continued from page 23)

Co. management referred to the broadcast aspects:

The Government seeks to have the Star divest itself of both its radio and television stations although Congress has repeatedly refused to pass legislation conferring such powers. The Star went on the air for the first time in 1922, among the first five radio stations in the U. S., long before there was even a station in New York for instance. We pioneered in this field because we felt it was an opportunity to serve our community. We took a financial beating for years. We were one of the first five stations that constituted the original NBC network, being the westernmost outpost at the time. The Government on radio complains of a rate practice prevailing in years only 1933 to 1937, long since abandoned. Not until now —two weeks before the end of the Truman Administration has any governmental agency challenged our conduct of radio.

The Government seeks to have the Star divest itself of its television station, WDAF-TV. The same opportunity was open to any other applicants to go into the television field when we did. The facts are losses then being suffered by television were so terrific, everyone hesitated to take the risk. The Star believed Kansas City was entitled to television service and chose to pioneer this new service as it had in radio, and expected to take terrific losses. Fortunately, it turned out the other way. Goodness knows, the outgoing Administration certainly wouldn't have given the Star any preference or favors on a license if there had been anybody else ready to take the risk.

Mr. Roberts added that "our business practices, covering nearly three-quarters of a century, have been an open book, still are, and conform to the law and good morals."

The publishing executive thus reiterated his comments of last June when the possibility of anti-trust action first was raised. At that time the firm was ordered to produce all corporate records and contracts of the *Star* and WDAF-AM-TV since Jan. 1, 1926.

Combination Rates

Mr. Roberts told BROADCASTING • TELECASTING then that no practice of combination rates between any of the two newspapers and radio-TV properties was involved. He noted that 173 U. S. newspapers use the practice whereby advertisers buy space in two newspapers under common ownership.

The original subpoena called for all contracts signed by the publishing firm, including those of WDAF-AM-TV; pacts for news services and features, and all advertising contracts for the past 26 years.

Sec. 313 of the Communications Act on which the government based its revocation request reads as follows:

. . . Whenever in any suit, action, or proceeding, civil or criminal, brought under the provision of any of said laws or in any proceedings brought to enforce or to review findings and orders of the Federal Trade Commission or other governmental agency in respect of any matters as to which said Commission or other governmental agency is by law authorized to act, any licensee shall be found guilty of the violation of the provisions of such laws or any of them, the court, in addition to the penalties imposed by said laws, may adjudge, order and/or decree that the license of such licensee shall, as of the date the decree or judgment becomes finally effective or as of such other date as the said decree shall fix, be revoked and that all rights under such license shall thereupon cease: PROVIDED, HOWEVER, That such licensee shall have the same right of appeal or review as is provided by law in respect of other decrees and judgments of said court.

Prior to enactment of the McFarland amendment to the Communications Act last year, broadcasters were placed in so-called "double-jeopardy," with the FCC authorized *per se* to revoke licenses of broadcasters previously convicted in court of anti-trust violations.

McGranery Comment

Commenting on the anti-trust action, Atty. Gen. McGranery described it as "another in the Anti-Trust Division's series of cases to restore to businessmen the right to advertise freely in media of their own choosing." He cited the Supreme Court-AP case, observing that "freedom to keep others from publishing is not guaranteed by the Constitution."

Newell A. Clapp, Acting Assistant Attorney General of the division, stated: "Advertising plays an important role in our free enterprise system and is essential to the success of competing newspapers and broadcasting stations. It is vital that advertising channels not be closed by private combinations."

The indictment further alleged that the defendants "refuse and threaten to refuse to accept advertising, or discriminate as to space, location or arrangements of advertising if the advertiser uses competing media, or a larger ad in competing media"; that the company's rate structure for local display advertising provides for tie-in sales which exclude advertisers from using other media; that national and classified advertisers are required to buy ads in both the *Star* and *Times;* that subscribers are forced to pay for delivery of the *Times*, the *Star* and the *Sunday Star* in "forced combination"; and that news carriers are required to refrain from delivering competing media.

The Star Co. also publishes the *Weekly Star Farmer*. Until last July the company was the only publisher of daily newspapers of general circulation. At that time the Kansas City News-Press Co. began publication of a daily tabloid-sized paper.

With respect to advertising rates, The Star Co. said:

The basic theory underlying both the indictment and the civil complaint of the Government is that the *Star* has attempted to create a monopoly in this territory. Anybody with the slightest knowledge of business knows that the greatest factor in forcing consolidations and the involuntary discontinuance of newspapers, which is all very regrettable, is the Government itself. The tax burden has become so terrific only the strongest papers can stand up under it. Newspapers have had to increase both subscription and advertising rates in a mad race to keep up with costs. As rates go up, advertisers necessarily concentrate their spending in the papers that do the best job for them. All the anti-trust suits in the world will not stop this trend unless the Government itself can get taxes down. This trend is eliminating newspaper competition. Almost as big a factor has been the tremendous increase in newsprint prices, equipment costs and labor costs. Those are the major factors that are creating situations which the Government seems to be complaining of.

WDAF took the air in 1922 and WDAF-TV in 1949. The television outlet, now described as a valuable adjunct profitwise to the newspaper properties, formally opened a $1.5 million plant last June. WDAF-TV is the city's only video outlet. The four radio stations besides WDAF are KCKN KCMO KMBC and WHB.

The Supreme Court's ruling is likely to pass judgment on common newspaper practice of combination unit rates for advertising. In the Times Picayune Co. case, the court upheld a complaint filed by the *New Orleans Item.*

Observers noted that in the Kansas City case, there were no "competing media" there before July, despite references in the indictment. It was also pointed up that the subpoena action was launched a month earlier. Nub of the charges was seen as the "special discounts" provision covering The Star Co.'s three newspapers.

Political Implications

With the source of the complaint undisclosed, there was speculation that the anti-trust suit was politically inspired, as contended by the publishing firm itself. The anti-trust case will be one of nearly 150 to fall in the hands of the Eisenhower administration this month.

In the New Orleans dispute, the court held that the Times Picayune Co. attempted to "monopolize" a segment of the afternoon newspaper general and classified advertising field represented by advertisers who could not buy space in the firm's *Evening States* and the rival *Item.*

The radio properties of the Times-Picayune Co. (WTPS-AM-FM) were not directly involved, however, as are the broadcast properties in the Kansas City fracas. Only other recent case touching on radio-TV stations was that of the *Lorain* (Ohio) *Journal* and *Mansfield* (Ohio) *Journal* which were convicted of violating anti-trust laws. They were cited for advertising practices tending to "destroy" WEOL Elyria by refusing to sell space to advertisers who bought time on the station [B•T, Dec. 17, Oct. 22, 1, 1951].

Libel Bills

(Continued from page 38)

candidate or not, should be permitted to defame an innocent man or his family. That's the crux of this matter.

"Personally, I don't think the Horan amendment is legal. You can't absolve radio or TV stations from the consequences of defamation. No court would uphold that point of view.

"Radio or TV stations are an instrumentality, just as newspapers are. Do you know of anyone who would exempt newspapers from liability for libel?"

Reiterating that his greatest interest is in protecting innocent victims of defamation, Mr. O'Hara also suggested a situation where a penniless, irresponsible candidate might impugn the reputation of his opponent yet go scot-free because he has no assets.

Rep. Horan takes the position that since the law forbids censorship of political candidates' speeches, then Congress which passed that law ought to take the broadcasters off the hook by exempting them from damages. Last week he planned to confer with Ralph W. Hardy, director of NARTB's Government Relations Department, then resubmit his bill. NARTB has supported his bill.

Among other bills proposed in the first week of the new Congress:

Rep. Joseph R. Bryson (D-S.C.) reintroduced HR 1227 which would ban advertising of alcoholic beverages on radio or TV.

Rep. Carroll D. Kearns (R-Pa.) recommended a fine of $100 and/or 30 days in jail as penalty for using the U. S. flag for advertising purposes (HR 139). Rep. Eugene J. Keough (D-N. Y.) recommended registration of trade marks using words, "White House," be prohibited (HR 72).

A number of bills to repeal the 20% tax on motion picture theatre admissions was introduced. Among them were HR 188 by Rep. Victor Wickersham (D-Okla.), and HR 6 by Rep. John D. Dingell (D-Mich.).

Rep. Kearns also introduced H Res 26 which calls for a continuance of the Gathings Select Committee investigating pornographic books and magazines.

Other bills included several calling for a new Commission on the Organization of the Executive Department.

RULES CHANGES

Proposed by FCC

NUMEROUS changes, mostly editorial and corrective, were proposed by FCC last week with respect to portions of the Commission's rules and standards for AM, FM and TV.

In the AM rule changes, Sec. 26, the sunrise-and-sunset table, would be deleted and FCC would prescribe the time of operation in the individual station's license in accordance with a standardized procedure proposed in Sec. 3.79.

Another proposal affecting FM and TV rules, the Commission would amend its rules to provide a more specific and uniform method for computing the height of an antenna above average terrain. The proposed method is based on eight evenly-spaced radials starting with true North and would expressly specify the method for treating radials which extend over large bodies of water or foreign territory.

at deadline

SPURIOUS EMISSION PROBLEM IS STUDIED

COOPERATION of radio-TV manufacturers on solving spurious emissions interference problem urged Friday by Dr. W. R. G. Baker, vice president of General Electric Co. and director of RTMA Engineering Dept., at industry-wide conference in New York. He termed problem real and serious and warned against potential government inspection if not solved.

Glen McDaniel, RTMA general counsel, said FCC has power to regulate spurious emissions. If courts rule otherwise, Commission would be given authority through legislation, he said. RTMA President A. D. Plamondon Jr. said interference from transmitters and receivers limits additional radio-TV channels and that suppression would aid business.

Dr. Baker called meeting after FCC asked JTAC to study problem. He pledged RTMA support and announced formation of three task forces: on receivers, headed by Kenneth Chittick, RCA; on transmitters, by James Keister, GE, and one by D. G. Fink, Philco Corp. to coordinate JTAC-IRE-FCC work.

WSTV FILES COMPLAINT

REQUEST that FCC take action to force Storer Broadcasting Co. to elect which of two pending TV applications it intends to pursue was made Friday by WSTV Steubenville, Ohio, applicant for Ch. 9 there. Request was in form of motion for Commission to take prompt action on petition filed last July. Basis for WSTV petition is fact that Storer owns four TV stations (WJBK-TV Detroit, WSPD-TV Toledo, WAGA-TV Atlanta and KEYL (TV) San Antonio) and under FCC rules is limited to total of five. Therefore WSTV avers Storer should not be permitted to have two TV applications on file—for Steubenville-Wheeling market and for Miami.

KIMBALL BACK AT GT

DAN A. KIMBALL, Secretary of Navy who steps down Jan. 21, has been re-elected vice president and director of General Tire & Rubber Co., positions he gave up when he accepted post of Assistant Secretary of Navy in 1949. Mr. Kimball also was director of MBS, but whether he will return to that post will not be determined until April meeting of network. General Tire, which owns majority stock of MBS, also owns and operates Yankee and Don Lee networks, as well as New England and West Coast stations and WOR-AM-FM-TV New York.

AGRONSKY HEADS GALLERY

MARTIN AGRONSKY, ABC commentator, was elected president and chairman of executive committee of Congressional Radio-TV Galleries at meeting Friday in Washington. He succeeds Hollis Seavey, MBS. Others elected were Richard Harkness, NBC, vice president and vice chairman; Bill Costello, CBS, secretary, and Joseph F. McCaffrey, MBS, treasurer. Members of executive committee include above and Julian Goodman, NBC-TV; George J. Marder, UP Radio, and Ann Corrick, Crosley.

Meeting set Feb. 7 for annual Radio Correspondents Assn. dinner, also agreed to submit change of name to Radio & Television Correspondents Assn. to membership vote.

TRUMAN NAMES MERRILL

PRESIDENT TRUMAN submitted Friday to Senate name of Comr. Eugene H. Merrill, Utah Democrat, for remaining two years of term of former Comr. Robert F. Jones. (See early story page 73.) Nomination, one of two score, is considered formality since Senate not likely to confirm any of President Truman's nominees. Mr. Merrill was given recess appointment last October following resignation of GOP Comr. Jones.

LEBHAR HAS HOPES FOR TV

BERTRAM LEBHAR Jr., director of WMGM New York and nearing completion of negotiations for purchase of station and its FM affiliate from Loew's Inc. for $2 million (earlier story page 27), intends to apply for TV channel immediately if deal goes through, it was learned Friday. (New York City government and WNEW New York already have filed for Ch. 31, only one available in city, and WOV and WHOM New York have announced they will file jointly.)

It also was reported that, although Mr. Lebhar is offering advertisers and others investors several plans for investment in new corporation—and reportedly is getting favorable reaction—he would retain full operating control. With WMGM (formerly WHN) for 14 years as director of sales and director of station, he has built it into sports specialist which, over past six years, has had gross billings exceeding $2 million per year.

ANOTHER 540

ANOTHER request for newly-opened 540 kc channel filed with FCC last week when KFBM San Diego submitted application for frequency with 5 kw fulltime, DA-1, for San Diego. Earlier in week KWK St. Louis filed for same frequency, 10 kw daytime, DA, for Haines City, Fla. (see application, page 87). KFMB, now on 550 kc with 1 kw fulltime, DA-1, expects change to 540 kc will cost $41,500; estimates annual operating cost after change as $205,000, revenue as $220,000.

KARM SALE

SALE of 50% interest in KARM Fresno, Calif., by sole-owner Hattie Harm for $60,000 to General Manager Clyde Coombs was disclosed in application filed with FCC Friday. FCC earlier granted sale of KROY Sacramento by Mrs. Harm and Mr. Coombs for $425,000 to C. L. McCarthy, manager KGO San Francisco, and associates [B•T, Dec. 29, 1952].

GONE ARE THE CALLS . . .

LAST "TV" call letter assignment possible in W call series was made by FCC Friday to Gallaher, Berry & Woodyard, Pittsburgh uhf Ch. 47 grantee. It is WTVQ (TV). And according to Edwin P. McVey, FCC's call letter expert, TV combinations in K call series "are going fast." Mr McVey is assignment clerk in Application Control Section, Authorization Analysis Division, Safety & Special Radio Services Bureau.

PEOPLE . . .

JACK W. SMOCK, vice president, Foote, Cone & Belding, N. Y., to Los Angeles office of Young & Rubicam as vice president and manager of that office, effective March 1. At that time, E. E. SMITH, present L. A. manager of Y&R, returns to New York office.

A. V. B. GEOGHEGAN, vice president in charge of media relations of Young & Rubicam, New York, named co-chairman of plans board and will serve in that capacity with Louis N. Brockway, executive vice president of agency. In his position on board, he replaces C. L. Whittier, who retired from agency as of first of year.

APPOINTMENT of ABC sportscaster BOB FINNEGAN as assistant to JOHN T. MADIGAN, ABC-TV director of news, special events and sports, is being announced today (Monday). Mr. Madigan also announced appointments of JOHN DUNN as managing editor of ABC-TV's *All-Star News* program; MARY LAING, as acting supervisor of ABC's WJZ-TV New York newsroom, and CLAIRE B. WIRTH, as administrative assistant in department. All appointments take effect immediately.

RODGER S. HARRISON, Sterling Silversmiths Guild of America, to J. M. Mathes Inc., N. Y., as account executive.

DOROTHY KENNEDY, McCann - Erickson, N. Y., to copy department of Sullivan, Stauffer, Colwell & Bayles, that city.

MARVIN POTTS, art director at Foote, Cone & Belding, Chicago, elected vice president.

TV APPLICATIONS

TOTAL new and amended television station applications rose to 13 Friday (earlier applications, page 58), with late Friday evening filing of request for uhf Ch. 33 in Miami. Applicant, new to radio-TV, headed by New York home builder Sherwood R. Gordon. His attorney: Florida ex-senator Claude Pepper. Other application filed last week from KOWL Santa Monica, Calif., seeking uhf Ch. 52 (assigned to Corona, Calif.).

NEW APPLICATIONS

Santa Monica, Calif.—KOWL Inc. (KOWL), uhf Ch. 52, ERP 107 kw visual, 57.8 kw aural; antenna height above average terrain 2,910 ft., above ground 190 ft. Estimated construction cost $206,660, first year operating cost $225,000, revenue $260,000. P. O. address: Pico Blvd. at the Ocean, Santa Monica. Studio location to be in Corona; transmitter atop Mt. Wilson. RCA equipment. Sole stockholder in applicant: **Arthur H. Croghan**, who has 5.6% interest in WJBK Detroit. City priority status (for Corona, Calif.): Gr. B-1, No. 139.

Miami, Fla.—Television Coroporation of Greater Miami, uhf Ch. 33, ERP 20.78 kw visual, 10.39 kw aural; antenna height above average terrain 407 ft., above ground 424 ft. Estimated construction cost $218,472, first year operating cost $235,000, revenue $220,000. P. O. address: 37 N. E. 1st Ave., Miami. Studio and transmitter location 500 Biscayne Blvd. RCA equipment. Principals include **Sherwood R. Gordon** (70%), Shadow Lawn Homes Inc. (builders and developers), New York City, and Dorna Cleaners & Launderers Inc., West Hempstead, N. Y.; **Edna W. Gordon** (20%), wife of Mr. Gordon, and **Louis A. Wildman** (10%), Wilbar Photo Engraving Co. and Higwill Matrix Co., both New York. City priority status: Gr. B-4, No. 194.

LOUIS HAUSMAN NAMED

LOUIS HAUSMAN, CBS Radio administrative vice president, named to 16-man planning committee for 10th anniversary Brand Names Day conference to be held April 15 at Waldorf-Astoria, New York. He will supervise entertainment plans in cooperation with Lester Gottlieb, CBS vice president in charge of network programs.

the RIGHT COMBINATION *for maximum performance at minimum cost*

NO SPLICES. As always, plastic-base Audiotape in 1200 and 2500 ft reels is guaranteed *splice-free.*

NO FRICTION SQUEAL. Perfected anti-friction process eliminates annoying tape squeal—prevents "tackiness" even under extreme temperature and humidity conditions.

MINIMUM DISTORTION. Audiotape's oxide coating is especially formulated to give *maximum undistorted output.* Comparative tests show its marked superiority in this respect.

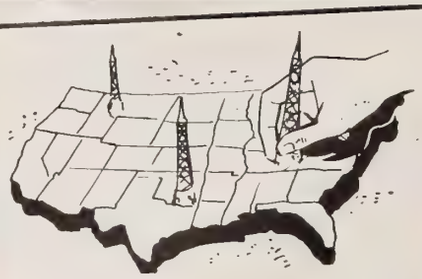
MAXIMUM UNIFORMITY. All 7" and 10" reels of plastic-base Audiotape are *guaranteed* to have an output uniformity within ±¼ db—and a reel-to-reel variation of less than ±½ db. And there's an actual output curve in every 5-reel package to prove it!

PRECISION TIMING. Improved reel design with 2¾" hub reduces timing errors by eliminating the tension and speed changes formerly encountered at the beginning and end of the winding cycle. Ratio of OD to hub diameter is the same as the standard NAB 2500 ft reel.

CONSTANT PITCH is another advantage of the new reel design resulting from the more uniform tape speed throughout the winding cycle.

SLOWER ROTATIONAL SPEED, due to larger hub diameter, minimizes vibration and avoids possible damage to tape on fast forward and rewind.

REDUCED HEAD WEAR can also be expected, because the maximum tape tension is materially decreased.



audiotape gives you all these advantages at no extra cost!

* Trade Mark

This new 1200 ft plastic reel with 2¾" diameter hub is now being supplied on all orders for 7" reels unless otherwise specified... at no increase in price. Remember—with Audiotape, there's only *one* quality—the finest obtainable! Audiotape is available in all standard size reels from 150 to 5,000 feet.

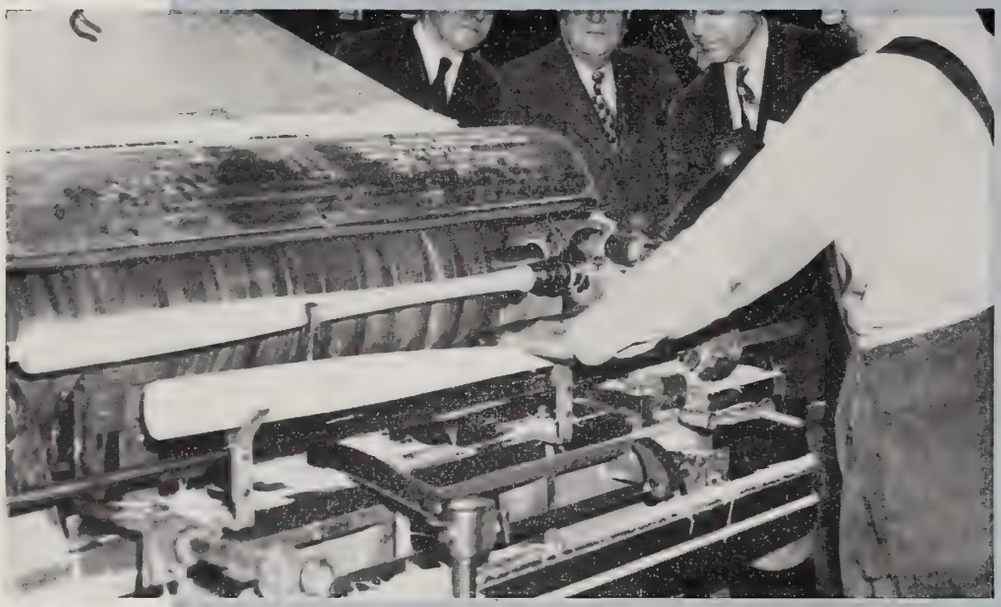
Like babies go for rattles

Just like babies go for rattles, local merchants go for W-I-T-H in Baltimore. W-I-T-H carries the advertising of twice as many of them as any other station in town. These smart retailers know that W-I-T-H produces low-cost results. Because W-I-T-H delivers more listeners-per-dollar than any other radio or TV station in town.



W-I-T-H can produce low-cost results for you, too. Get your Forjoe man to give you all the details.

IN BALTIMORE W-I-T-H

TOM TINSLEY, PRESIDENT • REPRESENTED BY FORJOE AND COMPANY

Go where there's GROWTH...

Bats and Burley

Everybody knows of famous "Louisville Slugger" bats, made in the world's largest bat factory at Louisville. Bats and other diversified wood products (furniture NOT included) rank fourth in importance among all Kentucky industries. Wood products sales in 1951 totalled $105,000,000, an increase over 1939 of more than 438%.

Equally famous is Kentucky's burley tobacco. The 1951 tobacco income was 222 million dollars, representing a gain of over 300% in 12 years. Kentucky leads the nation in farm income gains.

Go where there's GROWTH..

GO WHAS! No other station—or group of stations—in this market can match the audience delivered by WHAS seven days a week; morning, afternoon and night.

your new

Here is the first issue of your new **BROADCASTING • TELECASTING.** It is restyled from cover to cover. There are no gimmicks or frills. News content isn't curtailed; in fact, coverage is expanded feature-wise.

We had no concerted subscriber demand for a change. We undertook the job to give you a better, easier-to-read paper. This is in recognition of the changing times and the rapid growth of the fields we serve.

1st issue, Oct. 15, 1931

People are busier. There are more of them in this business of radio and television broadcasting on both sides of the rate card. More people do more things and make more news. Good housekeeping and prudent management dictate that this news should be presented in orderly fashion.

As you thumb through this issue, you'll detect a new body-type face. It is Times Roman. It was selected because it provides maximum clarity with no boost in size. It is as new as the transistor.

There are three columns instead of four on the news pages. The headlines are more meaningful. Every "lead" story is highlighted in a blurb which gives you the substance in a twinkling. There are no "jumps"—each story reads through to completion.

The book is side-stitched, utilizing ingenious new automatic binding equipment installed by our printers, the National Publishing Co., here in Washington.

Feb. 15, 1933

The stock is heavier and whiter.

These are the mechanical changes, which keep abreast of the most modern techniques of the graphic arts.

Editorially, the newsmagazine is departmentalized, except for lead stories. You will find the same kind of news in the same relative position each week. The index on Page 12 is your infallible guide.

There is the new fully-integrated Feature section beginning on Page 75. Here are the "How To" articles; stories on successful campaigns; by-lines by people who have something to say; pieces on good business practices; new ideas.

(The new mechanical production process will make it possible to get reprints with little or no time lag. Overall production will be faster.)

Physically, this issue is a far cry from Vol. 1, No. 1, published on Oct. 15, 1931, at the bottom of the depression. We were a semi-monthly then, and our average issue ran 48 pages. (Now the average, without YEARBOOKS or the MARKETBOOK, runs 100 pages per week.) Then our staff totaled six as compared with today's 60. Radio's gross volume was $60 million. The 1952 figure, for radio and television, will eclipse $1 billion.

Nov. 26, 1945

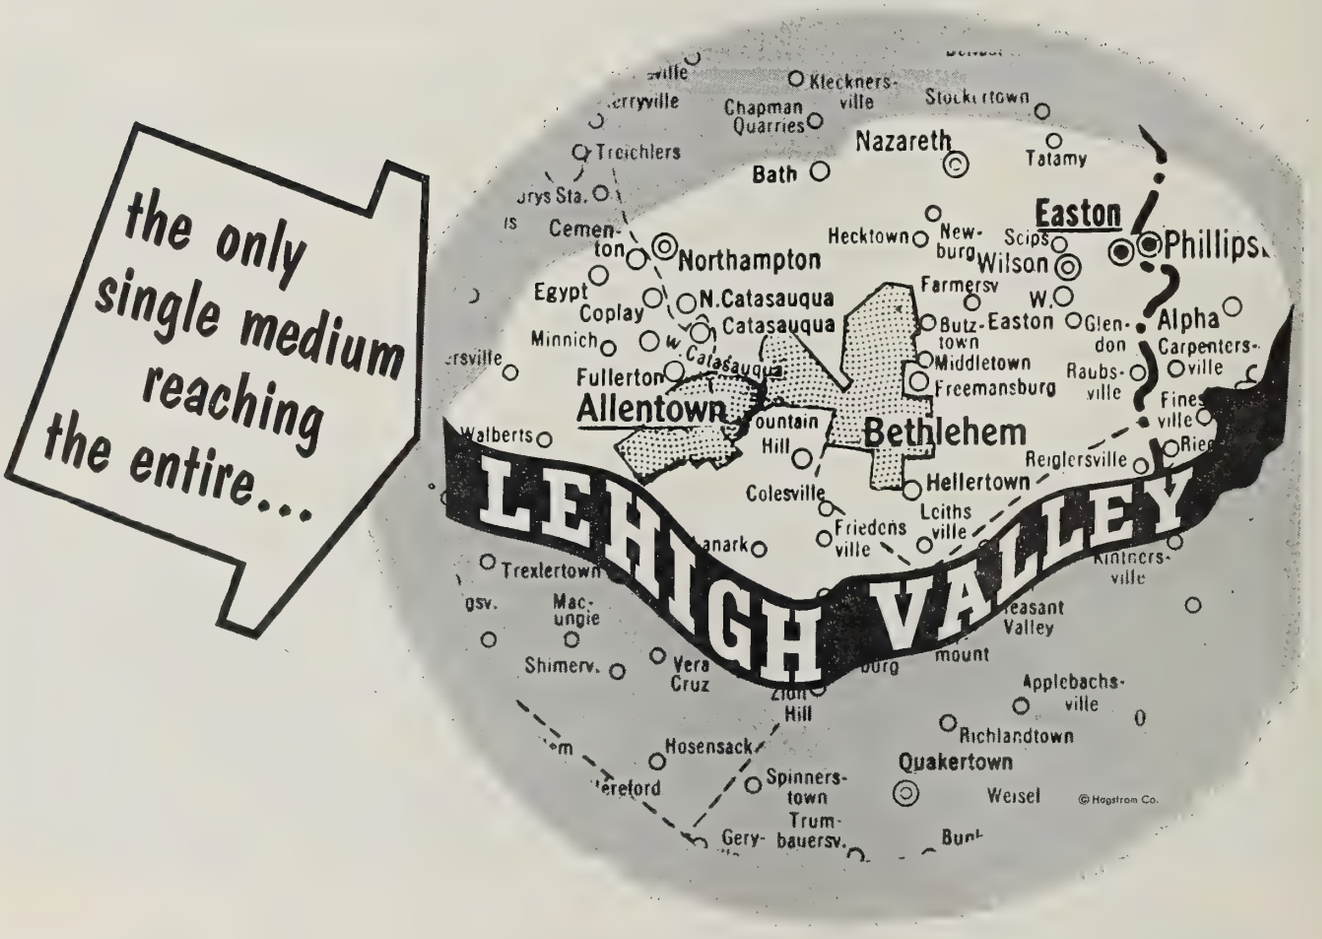
In founding "BROADCASTING, the News Magazine of the Fifth Estate," our aspiration was to make it the written voice of the spoken medium. Our principal aim was to fend off the thrusts of the Government ownership advocates, who had succeeded in enslaving radio almost everywhere else in the world. The success of the broadcast media was to be our success.

Today, our constant duty is precisely what it was then but with frontiers unlimited. We try to keep our readers the best informed in any art, profession or industry. Editorially, we call our shots as we see them.

We are mindful of our responsibilities and of your trust in us. You radio and television broadcasters, advertisers, agencies, engineers, artists, writers, producers, directors, manufacturers, syndicators, suppliers—and, indeed, Government in good times and bad—have created and developed these magnificent arts. We have been privileged to report this running story over these past 22 eventful years—the greatest success story of them all.

With this restyled newsmagazine we do not alter our editorial policy, philosophy or objectives. We have simply undertaken to give you a better paper. There are rough spots mechanically, which will be sandpapered and burnished as we hit our stride.

Editorially it's unchanged. The same excellent staff is producing it. We like it.



We hope you agree.

Sol Taishoff

closed circuit®

REUNION of old Mutual team of Frank White and William H. Fineshriber Jr. at NBC, where Mr. White assumed presidency Jan. 2, is in immediate offing. Mr. Fineshriber, executive vice president of MBS, reportedly is resigning to join NBC about end of February as vice president and general manager of radio and television networks, reporting to John K. Herbert, vice president in charge of radio-TV networks. Vice president-general manager post was kept open when Mr. White left it to become president.

★ ★ ★

IMMINENT departure of William H. Fineshriber as executive vice president of MBS to join NBC, may mean Thomas F. O'Neil, MBS chairman and president, will take over immediate operating duties of network. His righthand bower in MBS and WOR-AM-TV operations is Glenn Taylor, vice president of General Teleradio, MBS-WOR-Yankee-Don Lee parent company, and former General Tire executive.

★ ★ ★

MOURNFUL predictions that expansion of TV station coverage across country will soon reach proportions beyond ability of advertising to support are not being taken as seriously as in former months. Market researchers point to increased advertising expenditures paralleling growth in national income, predict that further rises in years immediately ahead will be enough to support TV on full national scale without need to siphon funds from other media.

★ ★ ★

MORE AND MORE reports of out-and-out blackmail in filing of TV applications are being heard in Washington. It works this way: Formidable applicant is all alone on channel. New company is formed and files what amounts to strike application. Word gets to qualified applicant that business can be done and payoff is asked for either in cash or in stock interest. FCC is aware of this but apparently doesn't know what to do about it. (See editorial, page 122.)

★ ★ ★

THERE MAY be veritable snowstorm of opinions in ABC-United Paramount merger decision by FCC but with five or possibly six of seven members reaching same conclusion (approval on all counts) but via different routes. Because case breaks down into half-dozen different components, it's likely that several members may not see eye-to-eye on same problem. But so far as is indicated, only Comr. Hennock will be all-out dissenter.

★ ★ ★

THERE WON'T BE decision by FCC on ABC-UPT until week of Jan. 26 at earliest. That's because Comr. Hennock, in serving notice to FCC of her intention to dissent, asked for three weeks from Jan. 5 oral argument to prepare her views. Miss Hennock expected to take off against merger as one that ties together Paramount and DuMont, as well as ABC and UPT, and also Paramount's half-ownership of Telemeter (pay as you go) and Chromatic Labs. (Lawrence color tube). She lumps in DuMont's three TV stations with ABC's five and Paramount's KTLA, arriving at nine stations—as in same orbit, thereby in violation of the five-station limit. Most, if not all, of her colleagues disagree.

★ ★ ★

PRELIMINARY results of first installation of automatic AM remote control operation equipment (no engineers at transmitter) under FCC experimental grant are reported most encouraging. Equipment has been installed by KEAR San Mateo, San Francisco Bay area, operating on 1550 kc. If experiments develop as predicted, significant aid will be afforded many small stations and way will be opened also for larger ones under emergency conditions with automatic equipment.

★ ★ ★

STATION representatives wish radio station operators would make up their minds promptly whether or not to adopt single day-night rate. They report agency time-buyers reluctant to sign contracts at present rates so long as there is chance they will be lowered, fear decision may be postponed until advertising appropriations have been allocated to other media with rates currently more stable.

★ ★ ★

SIGNS appearing around networks that crackdown tactics will replace wrist-slapping if ad-libbing comedians insist on interjecting impromptu and off-color remarks despite firm bans.

★ ★ ★

MINDFUL of precedent set by Baltimore's broadcasters during strike that closed schools in that city [B•T, Jan. 12], New York TV and radio station operators Friday were planning to preempt daytime hours and make them available to Superintendent of Schools Jansen and his staff should threatened strike of building maintenance personnel force shut-down of New York schools.

★ ★ ★

ALL-RADIO Affiliates Committee, formed in heat of first impending round of network radio rate cuts two years ago, will meet at Clearwater on Feb. 7, immediately after NARTB board sessions, to ponder its fate and, depending on that decision, consider possible lines of future activity. Industry-wide meeting of affiliates who formed and supported committee is expected in conjunction with NARTB's Los Angeles convention, with Committee Chairman Paul W. Morency, WTIC Hartford, insisting this time he will make good his determination—expressed year ago but overruled by affiliates—to step down from chairmanship due to press of other business.

IN THIS ISSUE

LEAD STORY

Will the Republican administration clean house at the FCC? The answer probably will come this week. If it's to be a thorough shake-up, chances are a new chairman will be brought in from outside. If the change is to be less drastic, Vice Chairman Hyde may be moved up. *Page 27.*

ADVERTISERS & AGENCIES

A dozen advertisers are buying spot schedules for spring, and two others are about ready with their plans. *Page 30.*

Blatt's department store, Atlantic City, reports the latest results of its change from newspapers to radio as a basic advertising medium. The record: bigger sales, more out-of-town customers and a 22% increase in charge accounts. *Page 28.*

FACTS & FIGURES

More than 20% of the paid political time on TV networks during the 1952 campaign was broadcast in the last three days before the election. *Page 32.*

INAUGURAL

Radio-TV coverage of tomorrow's Inauguration of Dwight D. Eisenhower will carry the proceedings to more people than have seen all other Inaugurations combined. Oath and Inaugural address will be sustaining coverage, but broadcasts of other events will be sponsored. *Page 37.*

GOVERNMENT

FCC grants 11 TV stations, to make a total of 197 authorizations issued since the freeze was lifted. About 700 applications await processing. *Page 42.*

EQUIPMENT

Compatable color TV system specifications are approved by the National Television Systems Committee. But before the group of representatives of leading manufacturers applies for FCC approval, perhaps three or four months of field testing must be done. *Page 72.*

FEATURES

Feature Section begins on *Page 75.*

The case for live television. *Page 77.*

Antell's pitch on radio and television. *Page 80.*

How to expand and improve the use of television by department stores. *Page 84.*

UPCOMING

Jan. 22-24: Canadian Broadcasting Corp. Board of Governors, Ottawa, Canada.

Jan. 24-25: Retail Advertising Conference, Conrad Hilton Hotel, Chicago.

Jan. 26: Continuance of Theatre-TV allocations hearings, FCC, Washington.

(Other Upcomings, see "For the Record")

The Purpose of Advertising
is to get

RESULTS

Evidence of WLS position as a result producing medium for advertising is found in the impressive group of advertisers who, like those listed below, use the station consistently year after year. They and many others have found that listener loyalty to WLS extends to the station's advertisers —and that midwest people *buy* the products they hear about on WLS. Listener loyalty produces advertising results.

ABC Affiliates Urge Action on Decision

CALL for ABC affiliates to urge Senate Interstate and Foreign Commerce Committee members not to permit Congressional hearing to delay ABC-United Paramount Theatres merger decision, sounded by ABC Advisory Committee Chairman Roger W. Clipp (WFIL Philadelphia) in wire to all affiliates Jan. 13, has already brought action.

Quick check of half dozen members of Committee Friday afternoon showed they already had received wires. Among them: Sen. Homer E. Capehart (R-Ind.), two-three wires, letters; Sen. Warren G. Magnuson (D-Wash.), two wires, one letter; Sen. Andrew F. Schoeppel (R-Kan.), ten wires and letters, also one or two long distance telephone calls; Sen. Dwight Griswold (R-Neb.), one telegram.

Mr. Clipp's telegram to all ABC radio affiliates called attention to BROADCASTING • TELECASTING Jan. 12 story on Sen. Charles W. Tobey's intervention, referred to fact application had been before FCC for 19 months. Mr. Clipp also said:

In my judgment, the merger would increase competition within our business and benefit the industry and the public. . . . It seems imperative to me that the membership of the committee understand the consequences that are resulting from the long delay in this decision. Naturally each ABC affiliate will have to decide whether or not it desires to take action, but after reviewing the situation as detailed in the trade press, I feel it my duty as chairman of your Advisory Committee to send you this message.

L'HEUREUX OPEN-MINDED

TREK to office of Robert D. L'Heureux, newly appointed chief counsel of Senate Interstate and Foreign Commerce Committee, has already begun by proponents and opponents of ABC and United Paramount Theatres merger, urging their views on man who will be Sen. Charles W. Tobey's right hand assistant. Mr. L'Heureux, who hails from New Hampshire, same as Sen. Tobey, has already seen several of parties, is open-minded on subject, wants to get full facts so Sen. Tobey can hold hearing quickly.

Tea Council to Spend $1,500,000 on Promotion

U. S. TEA industry and three major tea-producing countries—India, Ceylon and Indonesia—agreed to spend $1,500,000 annually to promote sale of tea here. Tea-producing countries and industry will be partners in non-profit corporation to be called Tea Council of United States of America, replacing former Tea Council. First chairman will be Robert B. Smallwood, president of Thomas J. Lipton. Tea council has used radio-TV spot campaigns in fall and spring (see story page 30 on Cuba sugar spot radio drive).

SPRAGUE AIR FORCE UNDER SECRETARY

ROBERT C. SPRAGUE, president of Sprague Electric Co., North Adams, Mass., and former head of Radio - Television Mfrs. Assn., will be named Under Secretary of Air Force, it was confirmed Friday at President-Elect Eisenhower's New York headquarters.

MR. SPRAGUE

Appointment of Robert W. Burgess, former economist and actuary of Western Electric Co., as Director of Census, succeeding Roy V. Peel, was announced Friday.

Mr. Sprague, 65, is graduate of U. S. Naval Academy. He served with Navy until 1928 when he retired and founded company he heads. As Air Force Under Secretary, he will succeed Roswell L. Gilpatric, New York attorney.

Mr. Sprague brings to his new military post extensive experience in connection with tooling up of electronics industry for defense program, development of new material and conservation of scarce metals. He has been in close touch with Pentagon and has been key factor in connection with electronics gear used in modern military planes.

Active for years in RTMA affairs, he was elected president in 1950, serving as both president and board chairman until Glen McDaniel assumed presidency in 1951. He continued as board chairman until election of A. D. Plamondon Jr., Indiana Steel Products Co., in 1952 as both president and chairman.

Besides sponsoring and organizing Joint Electronics Industry Committee to serve as advisory liaison with military, he was member of many groups working with government. His parts manufacturing enterprise is one of most successful in electronics field.

Mr. Burgess, 65, is closely familiar with Census Bureau functioning. He has served in advisory capacity with the Bureau of Labor Statistics and is nationally known as authority on business techniques, economics and statistical methodology. He had served with Western Electric 28 years before retiring last July. Director Peel has been on leave from U. of Indiana, where he is member of faculty.

• BUSINESS BRIEFLY

BOSCO TO APPOINT ● Bosco Co., New York (flavored drink), TV advertiser now handled by Robert Orr & Assoc., expected to appoint Ruthrauff & Ryan, New York, as its advertising agency, effective shortly.

FORD PLANS ● Frederick Lewis Allen and his wife, Agnes Rogers, will write and Leland Hayward will produce Ford Motor Co.'s two-hour, two-network television anniversary program in June.

13-WEEK RADIO-TV ● Penick & Ford Ltd., New York (My-T-Fine desserts), is planning spot campaign in 30 radio markets and about 18 television markets, effective mid-February for 13 weeks.

P & G PLACING ● Procter & Gamble, Cincinnati, for Ivory Flakes, placing 52-week spot announcement radio campaign in scattered list of markets. Agency is Compton Adv., N. Y.

EARLY MORNING RADIO ● Sinclair Refining Co., New York, scheduling early-morning radio spot announcement campaign to start early in March and run through end of year. Agency is Morey, Humm & Johnstone, N. Y.

CHICLE BACK ● American Chicle Co., New York, on behalf of its Dentyne chewing gum is returning to radio with spot campaign which Dancer-Fitzgerald-Sample, N. Y., is placing effective Feb. 9 until early June.

ONE-MINUTE RADIO ● Virginia Dare Wine, N. Y., through David Mahoney, N. Y., buying one-minute radio spots in and around programs that appeal to male audiences, starting Feb. 9 in scattered 75 markets.

WYATT & SCHUEBEL NAMED ● Langlin, Wilson, Baxter & Persons, of Houston, to appoint Wyatt & Schuebel, N. Y., as its television and radio department, effective immediately.

GENERAL FOODS BUYS ● General Foods Corp., New York (Post Toasties, Calumet), starting *Robert Q. Lewis Little Show* on CBS Radio, Mon.-Fri., 4-4:05 p.m. EST beginning Jan. 21. General Foods, for same products, also signed for sponsorship of *Rocky Jordan* on Columbia Pacific Radio Network, Fri. 6-6:30 p.m., PST, starting Jan. 23. Agency: Foote, Cone & Belding, N. Y.

Stender, Lewis VPs

H. GILBERT STENDER and William H. Lewis Jr. elected vice presidents of Benton & Bowles, New York. Mr. Stender has been with agency since 1934, Mr. Lewis since 1951.

Santa was snowed under in sunny WAGA-land . . .

The 56 darker counties outside of Metropolitan Atlanta (Fulton, DeKalb and Cobb counties) accounted for 38% of the total response. In each of those counties the ratio of mail to population was at least 20% of the ratio for Metropolitan Atlanta, which accounted for 7,158 or 53% of the total response. White counties account for 9% of the total response.

13,624 LETTERS IN 19 DAYS!

Maybe it was Miss Atlanta, Santa's helper, or the old chap himself, played by our own Tom Doster—or the chance of having him read their letters on WAGA-TV that caused an average of 717 kids a day to write. But the fact is: this 15-minute show, Monday through Friday at 6:15, pulled a total of 13,624 responses from 133 counties in 5 states between November 28 and December 24.

For audience . . . for coverage . . . for results . . . let WAGA-TV play Santa Claus to your sales program every day in the year.

Ford Grant Earmarked For Chicago Educational TV

FORD FOUNDATION has promised $150,000 to buy transmitting equipment for non-commercial, educational TV station in Chicago. That, plus $175,000 already budgeted by Chicago Board of Education for studios and facilities, may be enough to put station on air. Biggest problem yet unsolved is how to finance operations. Plan is to solicit contributions from public, business concerns and philanthropic foundations.

Non-profit corporation which would build and operate station on reserved Ch. 11 is expected to be incorporated soon with cooperative participation of 11 organizations, including schools and cultural groups. One condition of Ford grant: Title to equipment bought with $150,000 grant would remain in foundation's name for at least five years.

KTLA Request Refused

REQUEST of KTLA (TV) Los Angeles that FCC "take such action as it deems necessary" to permit KTLA (TV) to simultaneously rebroadcast Presidential Inauguration coverage on local NBC, CBS and ABC owned TV outlets, was turned down by Commission Friday. In telegram to Klaus Landsberg, vice president of Paramount Television Productions Inc., KTLA (TV) licensee, FCC said Commission "has considered your complaint and the responses [of the networks] and does not find that any action is warranted."

Mr. Landsberg's complaint, dated Jan. 7, told Commission his rebroadcast request was refused by NBC and other networks had not replied. KTLA (TV) offered to share line and microwave charges for event, explaining no facilities were available for its own use. Copy was sent to Rep. Harry R. Sheppard (D-Calif.). Networks, in reply to FCC inquiry, explained refusal did not deprive anyone of service while ABC-TV observed grant of request would cause "wasteful duplication and loss of audience for KECA-TV to the detriment of those making possible the wide dissemination of this program."

DuMont Billings Up

DuMONT TV network had gross billings of $10,531,839 for 1952, increase of 35.6% over 1951 gross, Chris J. Witting, director and general manager, announced Friday. Food advertisers accounted for largest billings, aggregating $2,756,901, with drug advertisers second with $2,073,547, followed by beverage sponsors, $992,614; appliance advertisers, $905,134; tobacco clients, $903,810.

General Foods Corp. was top DuMont client in 1952, followed by Drug Store Television Productions, Larus & Brother Co., Curtis Publishing Co., Wine Corp. of America, Serutan Co., American Chicle Co., Mennen Co., Admiral Television Corp., International Shoe Co. Ranking agencies placing business with DuMont last year were: Benton & Bowles, Product Adv. Corp., Warwick & Legler, BBDO, Weiss & Geller, Franklin Bruck Adv. Corp., Lennen & Newell, Dancer-Fitzgerald-Sample, Kenyon & Eckhardt, N. W. Ayer & Son.

KIEVE TO GOP POST

ROBERT S. KIEVE, copywriter at CBS Television, named special assistant to Emmet J. Hughes, administrative assistant to President-elect Dwight D. Eisenhower. With CBS and CBS-TV since 1950, Mr. Kieve served under Mr. Hughes at U. S. Embassy in Madrid from 1943 to 1947, was program director of WGVA Geneva, N. Y., 1947-1950.

KOB Hearing Set

HEARING on extension of special service authorization of KOB Albuquerque, N. M., for operation on 770 kc, scheduled Jan. 26 before Examiner James Cunningham, has been postponed to Feb. 11, FCC reported Friday. Examiner denied petition of WBZ Boston for continuance until April 1.

5 New Applicants

LATE last week five more applicants filed for new television stations at FCC (earlier applications, page 116). They were:

Fort Smith, Ark.—Razorback Television Co., vhf Ch. 5; ERP 33 kw visual, antenna height above average terrain 398 ft. Construction cost $280,450, annual operating cost $146,600, revenue $168,000. Owner of applicant is Burnett Estes, owner of Shaw & Estes (general contractors), Dallas.

Boston, Mass. — Greater Boston Television Corp., vhf Ch. 5; ERP 100 kw visual, antenna height above average terrain 508 ft. Cost $458,000, operating cost $600,000, revenue $700,000. Stockholders include Joseph A. Dunn (4.76%), president of WORL Boston, Richard Maguire (4.76%), 10% owner of WORL, and 19 other 4.76% stockholders, all Bostonians.

Poland Springs, Me.—Mt. Washington TV Inc., vhf Ch. 8; ERP 106 kw visual, antenna height above average terrain 3,817 ft. Cost $450,000, operating cost $400,000, revenue $450,000. Stockholders include Horace Hildreth (35.2%), 50% owner WABI-AM-TV Bangor, Me., and president of Bucknell U., Lewisburg, Pa.; John W. Guider (11.8%), 99% owner of WMOU-AM-FM Berlin, N. H., and president of Hill Building Corp., Washington, D. C.; WTVL Waterville, Me. (11.8%), Granite State Network (WKBR-AM-FM), Manchester, N. H. (6%), and Tyrone Corp. (investments) (35.2%), Pittsburgh.

Trenton, N. J.—Peoples Bcstg. Corp., uhf Ch. 41; ERP 18.45 kw visual, antenna height above average terrain 385 ft. Applicant is licensee of WTTM Trenton, N. J., WOL-AM-FM Washington and WRFD Worthington, Ohio.

Beloit, Wis.—Beloit Bcstg. Co., uhf Ch. 57; ERP 20.82 kw visual, antenna height above average terrain 235 ft. Cost $216,000, operating cost $142.000, revenue $178,000. Applicant is licensee of WGEZ Beloit.

NEW 18 LB. CAMERA

"REVOLUTIONARY" new TV camera, weighing 18 pounds and incorporating features — including pictures of equivalent quality — of 351-pound standard field camera chain to be used by ABC-TV in Inauguration coverage Tuesday, network announced late Friday. It sends pictures by shortwave and is first camera to be used which does not employ cable, ABC said. Called "Peek-a-View," it was made available to ABC by Dage Electronic Corp., Beach Grove, Ind.

PEOPLE

CALEB COFFIN, 44, advertising manager and director of public relations for E. R. Squibb & Sons Inc., died Thursday in his home in New York after illness of several months. He joined Squibb in 1945 after war-time service with U. S. Air Force, from which he was discharged as lieutenant. He had served previously as account executive with John Price Jones, fund raising organization.

DAVID R. FENWICK, Los Angeles account executive for Calkins & Holden, Carlock, McClinton & Smith, New York, has been elected member of Presidents Associates of Occidental College.

LEON MEADOW, Ted Bates & Co., N. Y., to Harry B. Cohen Adv., same city, as writer.

EDGAR KOBAK, owner of WTWA Thomson, Ga., business consultant and president, Advertising Research Foundation, will be keynote speaker at all-day meeting of New York chapter, American Women in Radio & Television, Jan. 31 at Hotel Astor. His topic: "Of mice and women in broadcasting and telecasting."

JOHN HARGREAVES, 30, assistant night operations supervisor at NBC, died in fall from his 10th floor apartment in New York Friday when he apparently was overcome by smoke or panic from fire in his home. He joined NBC as page in 1942, and worked in music library before assuming present post.

Paley Urges Sept. 1 Campaign Kickoffs

LARGELY on basis of television's growth, shortening of presidential campaigns by moving national political conventions from July to about Sept. 1 was advocated by William S. Paley, CBS board chairman, in speech prepared for delivery Saturday night. He was to address Poor Richard Club in Philadelphia, which gave him club's gold medal achievement award—his second—for "contribution to the strength of the nation through his service to government."

SAG Settlement Close?

EARLY SETTLEMENT of Screen Actors Guild's strike against producers of TV filmed commercials was viewed as possibility Friday as negotiators ended five straight days of talks in New York. Spokesman for producer hinted progress had been made in negotiations but said he could offer no statement. Parties agreed last week to renew negotiations to settle seven-week-old dispute [B•T, Dec. 12, 1952].

Network to South Bend

NETWORK TV facilities were made available to WSBT-TV South Bend Friday by connecting it to Cleveland-Chicago circuit, AT&T announced. Bell system nationwide TV network now serves 116 stations in 73 cities.

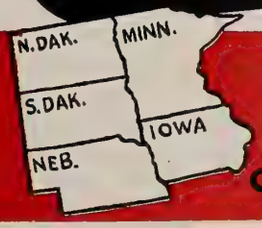
One will get you twenty thousand in

Big Aggie Land

WNAX's $3.5 Billion Countrypolitan Market

YOUR CLASS A CHAINBREAK on WNAX reaches a potential audience of 20,000 radio homes for $1. The potential approaches actuality because WNAX is heard 3 to 7 times a week in 80% of Big Aggie Land's homes.



One of the reasons for such acceptance is the Farm Service Dept. It airs 53 programs every week; its personnel travel 50,000 miles annually, reporting on all activities of interest to farm listeners. Its Farmstead Improvement Program caused "face-lifting" throughout Big Aggie Land—and earned the approval of just about everybody.

ONE OF THE world's richest agricultural areas, Big Aggie Land is 267 counties in Minnesota, the Dakotas, Nebraska and Iowa—a million radio families with at least two things in common: money to spend ($3½ billion annual retail purchases); and the habit of listening to WNAX (which averages more than 3 times the share-of-audience of any competing station).

As a market, Big Aggie Land is surpassed only by metropolitan NYC and Chicago. One station—and only one—delivers these countrypolitan riches—solidly. That's WNAX, where you belong for economical selling. For proof, check with our national reps, the Katz Agency.

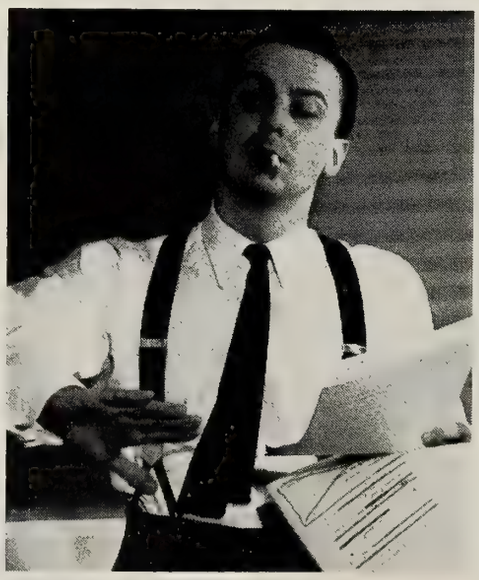
STUDIO ONE



"Studio One"—"The Trial of John Peter Zenger," CBS-TV, Jan.12.
Sponsor: Westinghouse Electric Corp.
Agency: McCann-Erickson Inc.
Producer: Fletcher Markle.
Director: Paul Nickell.
Editorial Supervisor: Vincent O'Connor.
Story: Irve Tunick.
Cast: Eddie Albert, Marion Seldes, Frederic Worlock, Jacques Aubuchon, J. W. Austin, Leslie Barrie, Frank Wilson, Carl Frank, Ian Martin, Murray Matheson, Henry Barnard.

IN THE light of the continuing surveillance against possible encroachments on its hard-won freedoms, it was fitting that the American press recall its indebtedness to a humble German printer in observing National Printing Week.

It also seems peculiarly proper that television—newest member of the communications family and now seeking its own level alongside established printed media—should give added impetus to the recounting of the heroic struggle of John Peter Zenger for freedom of expression.

CBS-TV's revival of this pre-Revolutionary War drama, it should be reported at the outset, was an artistic and technical triumph—one in the highest tradition of its *Studio One* productions.

Within the art form of the television drama, the Westinghouse play unfolded with admirable restraint and luster under the skillful hand of Fletcher Markle, not to ignore for a moment the superb casting. For Mr. Markle it represented a distinct achievement worthy of accolades once accorded Worthington Miner, former *Studio One* producer.

FLETCHER MARKLE
Producer, *Studio One*

Some viewers may have found it difficult to project actor Eddie Albert into the title role, remembering his portrayal in "Brother Rat" and other light-hearted endeavors. But Mr. Albert is equal to the characterization, partly because of the underdog nature of his role and the sterling performances by others in heavier sequences.

The *Studio One* televersion opens prior to Zenger's establishment of the *New York Weekly Journal* (the city's second newspaper), and after his apprenticeship with William Bradford on the *Gazette* in November 1733. There is popular dissatisfaction with the *Gazette*, a virtual government organ, and with Mr. Bradford, who also served as the King's Printer for the Province of New York.

Assisted financially by those opposed to Gov. Cosby, the humble Zenger renounces his early indifference to any thought of launching a popular newspaper in conflict with the ruling power.

The cameras faithfully record Zenger's momentary inner conflict, the urging of backers and the start of the *Weekly Journal*. But it is when the scenes shift to the Governor's quarters that *Studio One's* production blossoms into first-rate drama—thanks to a brilliant portrayal of Cosby by Jacques Aubuchon.

The play unfolds forcefully in these scenes: Zenger's arrest in his printing shop in 1734; his appearance before and denunciation of Gov. Cosby; discussions between the tyrant Cosby and his vain attorney-general, Delancey; the prison scene with Zenger and his wife, and—as the denouement—the persuasive jury speech by Zenger's attorney, Andrew Hamilton (graphically played by Frederic Worlock), who comes out of retirement to handle the case.

Mr. Hamilton methodically refutes the concept that "the greater the truth, the greater the libel" and redefines truth as a justifiable defense, while admitting allegations that the Zenger *Weekly-Journal* was scandalous, malicious and seditious. It is here, and rightfully so, that the camera is trained closeup to best advantage as Hamilton defies a court interpretation of libel and carries Zenger's case to the jury which acquitted him.

It is this reviewer's opinion that *Studio One's* version of the trial—and particularly Mr. Worlock's portrayal—will rank among the high points of television drama, this or any year.

* * *

THE GHOST OF HAMLET

Episode in "One Man's Experience" Mon.-Fri., 11:45 a.m.-noon on DuMont TV Network.
Producer-Director: Lawrence Menkin.
Adaptor: Jay Bennett.
Cast: Jack Manning.

SOONER or later, someone was bound to do "Hamlet" as a daytime serial. The most famous of Shakespeare's tragedies is, when one stops to think about it, an almost perfect model of a soap opera plot.

Here is murder, brother murdered by brother. Here is avarice, the murderer inspired by a longing to inherit his brother's kingdom and by lust (here is sex) for his brother's wife.

Here, most requisite of all, is the bewildered central character, caught in a web of troubles not of his own making, the hapless victim of the "slings and arrows of outrageous fortune." Here is psychiatry, the son seeing his father's ghost, hearing it demand that he avenge his father by murdering his uncle.

Here is plot and double plot, the play within the play to catch the guilty off guard and force a confession, the accidental murder by the hero of his sweetheart's father, driving the sweet young girl to suicide and her brother and lover to fighting over her grave. Only the final scene, where a fencing match is turned to mass murder through the introduction of poisoned foils and poisoned cup, would be avoided or altered to save today's sudsy hero for new adventures.

Even that did not bother Jay Bennett, writer of the TV script "The Ghost of Hamlet" presented five mornings a week, 11:45 a.m. to noon, on the DuMont TV Network. For this presentation was one of a series, each complete in itself, telecast under the generic title of *One Man's Experience*, which can go on forever re-

JACK MANNING
Hamlet in a trench coat

gardless of what happens to any particular set of characters. Normally, each drama runs its course in a single Monday-to-Friday week. For "Hamlet" the time was extended to two weeks.

The basic difference between *One Man's Experience* and other TV serials is that the complete story is presented by a single character, who on a bare stage enacts the central role and narrates the story, an idea of high economic appeal in these days of general complaint over the rising costs of TV production. As produced by Lawrence Menkin, each day's episode opens with a long shot of an actor, trench coated but hatless, crossing the studio against a background of stacked flats, while the announcer proclaims: "From the naked stage of a television studio, an actor comes into your living room."

The actor, Jack Manning, as Hamlet, gave the customary resume of the plot to date, followed by the formal opening title and credits. (The opening commercial would also go there if the program were sponsored.) Then, in slacks, pullover and shirt open at the throat, Hamlet plunged into the day's action, reciting the story in modern English, larded with many pertinent and all the familiar lines from the play itself.

With such a role and with his face in close-up much of the time, Mr. Manning deserves full credit for playing it straight and resisting the temptation to overact. Mr. Bennett also merits high praise for a script which kept the involved plot line intelligible to the lay viewer without unduly offending any Shakespearean students in the audience. Mr. Menkin, too, rates commendation for presenting in the informal manner appropriate to this daytime series a drama usually staged with the full panoply of costumes, scenery and special effects.

But for all that, the fact remains that "Hamlet" was not conceived as a one-man show. Its characters are kings, queens and nobles, whose accustomed background is pageantry and pomp; its plot deals not with common but with royal intrigue; it calls for velvet and ermine and a grand setting, not slacks and a bare stage.

So while Messrs. Menkin, Bennett and Manning are to be complimented on a project that was interesting, challenging and courageous, the outcome could not honestly be called a complete success. It was, however, an experiment well worth undertaking and it is good to learn that DuMont plans to repeat the two-week serial "The Ghost of Hamlet" early in February.

* * *

THE BOB HOPE SHOW

NBC Radio, Mon.-Fri., 11:45-12 Noon EST; Wednesday, 10-10:30 P.M. EST.
Sponsor: General Foods Corp.
Agency: Young & Rubicam Inc.
Star: Bob Hope.
NBC Program Manager: Harry Bubeck.
Producer-Director: Bill Lawrence, morning shows; Jack Hope, evening shows.
Announcer: Bill Goodwin.
Writers: Howard Blake, Freddie Fox, Mort Lachman and Chuck Stewart, on morning shows; Larry Marks and Norman Sullivan on evening shows.

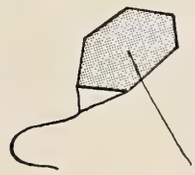
BOB HOPE is a package now, a day and night personality not much different from the character who has been regaling radio audiences for 15 straight years.

As in the Year One of Hope, who started in radio in 1932 and has been on regularly since 1938, he relies heavily on the topical gag, the self-promotional gag, the girl gag, the gag in general, and Bing Crosby.

His daytime programs, a quarter-hour of nonsense heard 11:45-12 noon Monday through Friday on NBC, started in November. His evening show, a half-hour each Wednesday, also on NBC, is linked to the morning series both by contract (an estimated $2 million a year for the package) and by format.

The main difference between the quarter-hour morning show and the half-hour evening show is 15 minutes. Like those that made and kept him a favorite, both sizes are compounded of gags, guests and gags. It's still a pleasant combination, the way he does it.

Day or night, he starts off with the usual staccato-fire of wisecracks. On the morning this reviewer was paying attention, the latest Hope motion picture—"Road to Bali"—was, as seems to be the case more often than not, tossed into the laugh mill and wrung dry, along with the comic's customary concern with taxes: "I wouldn't mention it, except I have a government to support." Then the Crosby jokes: "This is probably our last 'Road' picture—unless Bing gets a new girdle, the next one will have to be a freeway."



And so on.

Both morning and evening shows are transcribed, and many of the longer ones are to be done before military audiences, which certainly are a Hope show's best showcase. Last week it was at Fort Ord, Calif., and the audience was more than obliging. Friend Crosby's appearance as a guest helped, but friend Hope was getting his laughs anyway.

BOB HOPE
Now day and night

some spots are better

For the best spot, at the right time, at the right place

than others

Boom or bust . . . it's all in the way you plot the spots. And it's a story with a happy ending every time you use the television stations represented by NBC Spot Sales.

These stations take a personal interest in making your spot TV advertising a sales success. Their merchandising activity, for instance, has paid off for advertisers in nine leading markets. Direct mail . . . point-of-sale displays . . . on-the-air and newspaper promotions . . . calls on key outlets by local TV personalities . . . all these and more help sales curves climb.

By every measure, spot TV advertising is your best media value today. Just call your NBC Spot Salesman now and you'll be all smiles when you plot the spots on your next sales chart.

our respects

to SIMON GOLDMAN

SEVERAL years ago a youngish-looking speaker, partially hidden behind a huge pair of horn-rimmed glasses, stood on the stage of the Eighth Street Theatre in Chicago. His audience was a group of fellow broadcasters, some of whom must have wondered why this quiet-speaking lad had been selected to tell them how to run their business.

Before Simon (no middle name) Goldman had uttered a half-dozen paragraphs, his NAB convention audience was listening attentively. These veteran broadcasters were told to get off their posteriors and get out on the street where neglected retail dollars were waiting to be plucked. They were told that local industries—even the heavy ones—were good prospects for station business. The speaker even suggested that every program on a station's schedule should be built for sponsorship.

The compelling logic and tireless energy of the WJTN Jamestown, N. Y., general manager, abetted by a genial personality, have carried him to national prominence as member of a number of NARTB (nee NAB) committees. Locally he's prominent, too—so prominent that it would probably take a foot or so of column space just to list the organizations.

Stresses Local Activity

This local activity is part of his business philosophy. Si Goldman contends that every station should give liberally of its time and facilities to local projects. He feels just as strongly that every station executive and employe should be active in civic work. This philosophy obviously pays because WJTN and its manager have long been known far beyond the western New York area as an outstanding example of local station operation.

Si Goldman is strictly a New York Stater. Born in Carthage, N. Y., Jan. 18, 1913, he attended primary and high school in that city. In 1931 he entered Syracuse U., majoring in advertising and adding a radio course under Dean K. G. Bartlett. He was graduated in 1935 *magna cum laude*.

That first taste of radio on the campus led him into the offices of WSYR Syracuse as merchandising manager. A few months later he became sales manager of WJTN and he has been there ever since, aside from a brief turn at WSYR in 1938 and a tour of Army duty during World War II.

WJTN named him general manager in 1940, following a few months later with a vice presidency and directorship. In 1943 he enlisted in the Army, serving in Europe 18 months as a member of the Communications Div. of the 12th Army Group. Returning to Jamestown after 2½ years in the service, he resumed his position as WJTN vice president and general manager.

When the industry's trade association decided to set up a division devoted to small market station activities, Simon Goldman was named a member of the Small Market Stations Executive Committee. That was in 1946. A year later he became its chairman and was active at the special small market station portion of the 1947 NAB convention at Atlantic City.

He was named to the NAB Radio Committee in 1949, becoming its chairman in 1950. Last autumn he was elected secretary of Broadcast Advertising Bureau. He is a member of BAB's Executive Committee.

Saluted at Syracuse Sessions

Syracuse U. honored Mr. Goldman in 1949 by selecting him from a field of 500 alumni for "outstanding work in the management field of radio." This citation was awarded on the first annual Radio Journalism Day of the university.

The list of Si Goldman's activities starts with the Community Chest, of which he is vice president. He has headed various divisions and groups of the chest for many years. He is chairman of the Business Development Commission of the Jamestown Chamber of Commerce and is a board member of the local YMCA, Jamestown Girls Club and Chautauqua County Fair Assn.

Other affiliations, many in an official capacity, include Jamestown Advertising & Sales Club, Red Cross, Kiwanis Club, and director and past president of Little Theatre of Jamestown. An enthusiastic golfer, he belongs to Moon Brook Country Club and last summer attained a lifelong dream—a hole in one. He's quite a sailor, too, and belongs to Chautauqua Lake Yacht Club. He is a former city men's doubles champion in badminton and also held the mixed doubles championship.

In 1948 he married Meurice Finer. They have a two-year-old son, Richard Michael.

Mr. Goldman is one of the early and enthusiastic advocates of programming as against spots. He decided years ago to concentrate on getting advertisers into programs, with spot rates priced high and limited in number. Many of these spot buyers can be converted to programs, however, he points out.

One of his outstanding Jamestown feats in the '40s was to get every department store in the city on WJTN, the largest spending as much as 80% of its budget on radio, the second 50% and the third 80%. This selling of local retail and wholesale accounts provides a stimulus that is felt all the way up to the manufacturer, he argues.

OPEN MIKE

Here It Is

EDITOR:

. . . A bouquet for your publication. I read it from cover to cover every week, and a quick shuffle through our agency's Monday mail is always first on the docket.

I don't see how you can improve it very much, so I'm awaiting the appearance of the "new" B•T next week with a great deal of interest.

George Brenard
Radio Director
Hugo Wagenseil & Assoc.
Dayton

* * *

Text for Today

EDITOR:

I came upon a few verses from the Bible which for prospective television station operators present more truth than poetry. I thought you and your readers might get a kick out of them.

Luke 14:28-30 "For which of you intending to build a tower, sitteth not down first, and counteth the cost, whether he have sufficient to finish it? Lest haply after he hath laid the foundation, and is not able to finish it, all that behold it begin to mock him, saying, 'This man began to build and was not able to finish'."

Ain't it so?

Hugh A. Smith
V. P. & Gnl. Mgr.
KXA Seattle

[EDITOR'S NOTE: Does this passage, which Mr. Smith quotes correctly, entitle Luke to be patron saint of television station builders?]

* * *

Bang

EDITOR:

. . . It would be appreciated if . . . any advertising agency or organization that mailed anything to . . . WMIK [would] check with us on any business mailed during the week of Jan 5 . . . .

Maurice K. Henry
General Manager
WMIK Middlesboro, Ky.

[EDITOR'S NOTE: The truck delivering mail to Middlesboro the afternoon of Jan. 9 blew up and its cargo was destroyed.]

* * *

High Rentals

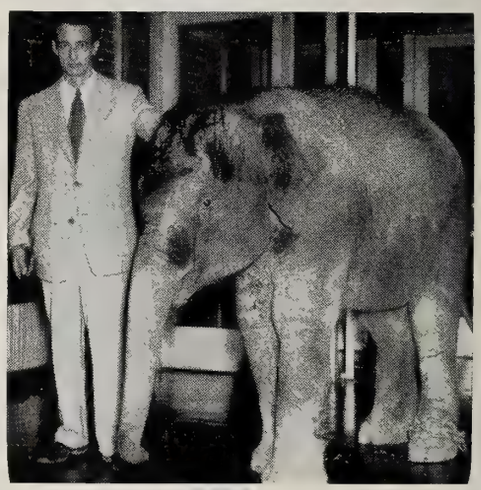
EDITOR:

. . . We have found a substantial new source of income for AM, FM and TV stations which is largely untapped, and, believe it or not, it's income that does not require one cent of expense on behalf of the station. You are undoubtedly familiar with the expansion of various radio services used for dispatching taxicabs, trucks, etc. The power limitations on the crowded frequencies are extremely strong, so the only possibilities of increasing coverage are through additional antenna height.

In many cities the highest point in the area is an AM, FM or TV tower . . . . By contacting those who have such radio services as well as companies which sell mobile radio equipment, it is possible to secure a considerable number of very favorable lease agreements providing for the location of these antennas on the regular AM, FM or TV transmitting tower.

When properly installed, a number can be used with no interference whatsoever with the primary service or with each other . . . .

Please don't get the idea that I am in any way minimizing the original purpose for which the tower was built. However, I think it is very poor business to close our eyes to a considerable source of income which involves no expense whatsoever . . . .



Edward A. Wheeler
President
WEAW (FM) Evanston, Ill.

* * *

Animal Act Again

EDITOR:

Just a few weeks ago, WBZ-TV borrowed a baby elephant from the world-famous Chase Animal Farm, for the television program, *Animal Fair*. Because none of the freight doors were wide enough, this "baby" (2,000 pounds) had to be escorted through the main

lobby to the television studio. With the elephant in the picture is the owner of the animal farm. [For *Animal Fair* story, see page 86.]

I guess this ought to top the other animal stories in your recent "Open Mike" columns.

Joe Cullinane
Publicity Director
WBZ-TV Boston

* * *

Ownership

EDITOR:

On page 90 of the Jan. 12 edition of BROADCASTING • TELECASTING under the new TV applications heading, it is stated that Arthur H. Croghan an applicant for uhf television at Santa Monica, Calif., . . . is . . . the owner of a 5.6% interest in WJBK Detroit. This is erroneous. As I believe you know, Storer Broadcasting Co. is the sole owner of WJBK-AM-FM-TV in Detroit . . . .

John B. Poole
Secretary
Storer Broadcasting Co.
Detroit

[EDITOR'S NOTE: In routine processing, B•T failed to correct a statement made officially in the application that Mr. Croghan filed with the FCC.]

* * *

Help Wanted

EDITOR:

Anonymously, I would like to expound on a deplorable situation which doubtless is shared by other members of the broadcasting family.

Each week your columns carry many alluring advertisements of available positions—too often with the tag: "Send complete details first letter with disc and photo, Box so-and-so."

Has it been the experience of others who answer these ads to find that after careful preparation of the required credentials no answer whatever is forthcoming? . . .

The station involved should not only acknowledge the application but should advise the

applicant one way or the other and also return the photo, tape, etc. . . .

Thanks for B•T. It tops my kilocycles.

Name withheld

* * *

It Was Wonderful

EDITOR:

. . . This is an excellent time to compliment you upon the excellent service rendered the industry by BROADCASTING•TELECASTING. As I see it, your material is outstanding and you may be sure I will continue to be among your regular readers.

As a result of the "Strictly Business" column, I heard from many old friends. It was wonderful.

S. J. Reulman
Pacific Coast Manager
The Katz Agency Inc.
San Francisco

* * *

Capital Offense

EDITOR:

This is a suggestion for your "style sheet"—as a New Year's Resolution:

Whenever you print the noun—
Radio-TV,

Please spell "Radio" with a capital "R"—thus giving Radio the courtesy of capitalization, as Television is "TV."

It's a big little thing to do; but it will help!

Don Davis
President
WHB Kansas City, Mo.

[EDITOR'S NOTE: Since "television" is not capitalized when spelled out, it would be inconsistent to capitalize "radio." However, B•T will continue to capitalize "AM," the abbreviation for radio, as it capitalizes "TV."]

* * *

Demotion

EDITOR:

An error in the [Jan. 12] BROADCASTING • TELECASTING . . . states that James Leonard has been appointed to the post of sports director for WLWC Columbus.

. . . The original release announced the appointment of James Crum to this position. James Leonard is general manager of WLW-C and announced James Crum's new post . . . .

Louis A. Gallop
Director, Client
Service Dept.
WLWC (TV) Columbus, Ohio

[EDITOR'S NOTE: B•T's apologies to Mr. Leonard and to Mr. Crum, who is pictured below.]

What makes a tree grow?

That question is an easy one . . . up to a certain point. Botanists will tell you the tree gets energy from the sun so that it can convert nutrients and moisture into growth. They call the process photosynthesis.

But ask just *how* the process operates, what actually happens in the plant's cells . . . and they can only shake their heads. That is still one of nature's secrets that has so far eluded the probing of science.

The effects of radiation on living cells is one of the subjects under study in the Biology Department of Brookhaven National Laboratory, on Long Island, founded by leading universities under contract with the Atomic Energy Commission. Brookhaven's primary aim is to produce new knowledge of the atom, the basic building block of the physical world. Working alongside the physicists, chemists and other scientists at Brookhaven are botanists, geneticists and medical scientists, whose interest lies in the application of atomic tools to the quest of new knowledge in their own respective fields.

Equipment Brookhaven scientists are using in their studies of the atom includes the cosmotron. Nothing like the cosmotron has ever existed before. Its main element is a gigantic doughnut-shaped magnet 235 feet in circumference, and built of Bethlehem steel. We made the 288 individual blocks that compose the magnet at our plant at Bethlehem, Pa., and shipped them to Brookhaven, where Bethlehem engineers put them together to form the complete magnet.

Scientists at Brookhaven are placing great reliance on the cosmotron to help them in their task of further unlocking the mysteries of the atom, and in applying that new knowledge for the benefit of mankind.

BETHLEHEM STEEL

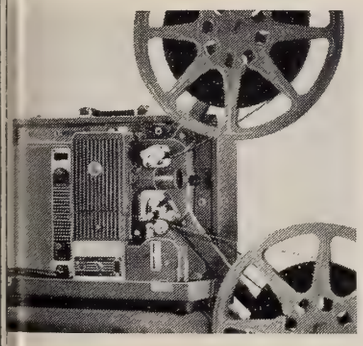
WHEN A BIG CONTRACT HINGES ON A SHOWING...

Here's how to project your TV previews

Important money rides on a film preview for a client, whether the client is local or national.

That's why it makes sense to screen your shows and commercials at their very best in image and sound quality. You can do it with the projector which has set a new standard of performance in the 16mm. field . . . the Eastman 16mm. Projector, Model 25.

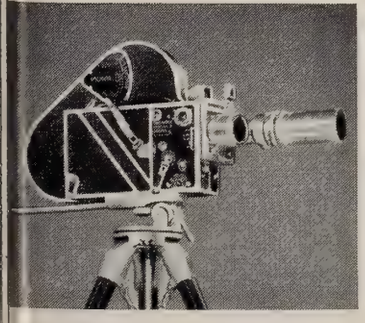
Its new-design principles include a special sealed-in-oil bath movement which transports films surely, easily, and quietly. This movement, and the main projector mechanism, blower, and reel arms are all driven by separate but synchronized motors. Operation is smooth, dependable, trouble-free.



Images appear on the screen superbly brilliant, sharp from edge to edge. Projected by Lumenized Kodak Projection Ektar Lenses *f*/1.5 (choice of five focal lengths), they represent the finest optical system ever designed for 16mm. projectors.

Sound is amazingly faithful. The Model 25's sound drive is so stable it eliminates mechanical flutter. And whatever the film, you can always focus sound optics for optimum reproduction.

These are some of the reasons the Model 25 is being used for previewing films in so many TV stations, including network originating stations. Your Kodak Audio-Visual Dealer will be glad to give you complete details on this remarkable projector . . . ask him, too, about the Pageant, Kodak's new portable 16mm. sound projector, and about the superversatile Cine-Kodak Special II Camera—or use the coupon.



The Eastman 16mm. Projector, Model 25

is available in both tungsten (shown above) and high-intensity arc models. Designed for permanent installation, it is portable with minor disassembly.

The 16mm. Kodascope Pageant Sound Projector

is popular with TV salesmen for showing TV films in clients' or advertising agencies' offices. Top tonal and picture quality among portable sound projectors; "lifetime" lubrication.

The 16mm. Cine-Kodak Special II Camera

ideal for filming commercials, news events—most any TV assignment. Amateur in ease of operation, its built-in ability to make fades, dissolves, multiple exposures, animations, and other features establish it as professional in scope.

RADIO STATION REPRESENTATIVES
50,000 WATTS • CBS RADIO STATION OKLAHOMA CITY

on all accounts

AL SIMON'S career affords persuasive evidence it pays to be a jack of all TV trades.

He is president of Al Simon Productions and is associate producer of the filmed CBS-TV *Burns & Allen Show* and the NBC-TV *I Married Joan*. He finds time to film TV commercials for various accounts and occasionally produces a pilot film such as the *Mickey Rooney Show*, and he also writes for TV and for magazines.

A Columbia U. School of Business graduate in 1932, Mr. Simon later was awarded a Doctor of Jurisprudence degree from New York U. He was an Alpha Epsilon Pi.

Mr. Simon entered radio after writing a few years for such magazines as *Colliers, Cosmopolitan, Coronet, American* and *This Week*, and he became associated with major programs, including *Truth or Consequences*. Radio assignments brought him to Hollywood in 1946 and two years later he was in TV. He helped set up the TV version of *Our Miss Brooks* and later was associate producer on CBS-TV's *I Love Lucy*. He also produced film commercials for Procter & Gamble on the NBC-TV *Red Skelton Show*.

Selling Is Basic

He believes people in his field are basically in selling—not making entertainment—and feels every penny must help make the product attractive, both to sponsor and viewer. He thinks time and money spent on artistic sets and lighting are wasted because details are lost on home screens.

A former New Yorker, Mr. Simon believes the TV trend is toward a Hollywood point of origin, especially filmed video: "Hollywood, for example affords plenty of studio space in which a producer can retain his basic sets at a reasonable cost," he says. He thinks certain types of labor and other production costs generally are lower in Hollywood.

On the *Burns & Allen Show* and *I Married Joan* his jurisdiction is on budgets, film, production personnel and other physical phases. At Al Simon Productions, however, his scope covers every item.

A man who works at a fast tempo, Mr. Simon recently started a series of film shorts to aid the U. S. Treasury Dept. in promoting savings bonds. Leaning toward filming of commercials, he plans several additional film series.

Mr. Simon and his wife, the former Judy Rutherford, and son, David Anthony, 3, live in suburban Brentwood, 20 minutes from Hollywood.

WILL GOP CLEAN HOUSE? FCC FATE UP THIS WEEK

There's strong demand for full-scale reorganization under the soon-to-be appointed chairman, with new talk of "drafting" former Comr. Robert F. Jones. But another group endorses promotion of Vice Chairman Rosel H. Hyde. Lew Weiss and Charles Garland are running briskly for those two upcoming vacancies.

THE EISENHOWER Administration is expected to decide this week the fate of the FCC —whether there will be a stem-to-stern housecleaning with a newcomer as chairman or whether widely-endorsed Vice Chairman Rosel H. Hyde will be promoted.

Official word was lacking from GOP New York headquarters, but there were widespread reports as the week ended predicting the "draft" of former Comr. Robert F. Jones for the chairmanship. This was not denied in GOP councils, but Mr. Jones himself was noncommittal. He had resigned last October to enter communications law, and prior to that it had been freely predicted that he would be in line for the chairmanship under a Republican Administration.

Comr. Jones, who had been the most outspoken of the Republican minority on the FCC during his five-year tenure, is held in high regard by his erstwhile Republican colleagues in Congress. He served for a decade as a Congressman for the Lima, Ohio, district.

Staff Reorganization

If Mr. Jones is asked by the GOP high command, it would not surprise observers to see him accept the call as a "good Republican" but probably for a short term during which he could direct the staff reorganization being insistently demanded by patronage-hungry party members. That might even be for the five months that remain of Chairman Paul A. Walker's term, because the Democratic chairman can be retired by the incoming President through the mere device of issuing an executive order. The other vacancy is that of Mr. Jones' original term, which expires June 30, 1954. It is now held by Eugene F. Merrill, Utah Democrat, who is a Truman recess appointee.

The demand for a reorganization of the Commission is premised on a staff memorandum submitted to Eisenhower headquarters alleging that there's nothing good about the agency, that it is infested with left-wingers, and that it needs a house-cleaning. Implicit in this, it is understood, is the view that an existing FCC member—Mr. Hyde for example—would not be disposed to purge the FCC staff to the extent deemed necessary. The specification is for a "real Republican" strong, vigorous and of sufficient courage to clean out the staff if need be.

On the other hand, if the "orderly transition" proponents prevail, it will see the elevation of Mr. Hyde, an Idaho Republican and a career man, to the chairmanship, buttressed by two "strong appointments" for the vacancies, to aid him in the reorganization task. Both the General Counsel's office and the Broadcast Bureau are specifically mentioned as in need of "purging," with the elimination of employes "blanketed in" without competitive civil service examinations during the early days of the Roosevelt Administration.

Should Mr. Jones be unavailable, and should the "chase the rascals out" zealots prevail, then an "outsider" could well get the chairmanship nod. In the forefront, despite some known opposition, is understood to be Lewis Allen Weiss, former head of Don Lee and former Mutual chairman, whose home is in Los Angeles. He served as deputy director of NPA until last year, and has strong political as well as industry support. Although not now an avowed candidate for the chairmanship, Mr. Weiss is actively in pursuit of an appointment, and endorsements are piling up at both Ike's Commodore Hotel headquarters and at the Republican Committee headquarters in Washington. He originally was a candidate for the chairmanship, which is filled by the President from among the qualified FCC members.

Garland Is Strong Candidate

Coming up strong as a candidate for one of the vacancies is Charles Garland, general manager of KOOL Phoenix, and a 30-year veteran of radio. A former Illinois Republican worker, he has the established endorsement of Republican National Committeeman Eugene C. Pulliam, Indiana and Arizona publisher and owner of WIRE Indianapolis. Sen. Homer Capehart (R-Ind.) also is said to be supporting him, along with Ray S. Donaldson, Washington attorney for Radio-Television Mfrs. Assn., and the Senator's erstwhile executive assistant. The Garland campaign was particularly active last week but it was thought unlikely that both he, as a resident of Arizona, and Mr. Weiss, as a California resident, would be named in view of desired geographical representation.

Mr. Pulliam met with General Ike in New York last Friday morning, and is understood to have endorsed Mr. Hyde for the chairmanship and Mr. Garland for one of the vacancies.

Meanwhile the field of active candidates had not diminished. Thad Brown Jr., director of television operations and counsel to the TV Board of NARTB, was understood to have substantial political as well as industry endorsement. His mother is Mrs. Howard A. Coffin, a Republican National Committeewoman from the District of Columbia and a member of the Eisenhower Inaugural Committee. Mr. Brown's father, the late Thad Sr., was a member of both the Federal Radio Commission and the FCC, from 1932 until 1940.

Clark Is Mentioned

There was some thought being given to the appointment of an attorney familiar with common carrier aspects of regulation to the FCC, notably in the light of the expected departure of Chairman Walker, who had been head of the Oklahoma Corporation Commission. Mentioned in this regard is Owen Clark, a 39-year-old lawyer, living in Yakima, Wash. He had served for a time as chairman of the State Public Utilities Commission but is now in private practice of law. He was active in the Eisenhower Presidential campaign in Washington.

Former Congressman Albert M. Cole of Holton, Kan., still is being urged by some of his friends to seek one of the FCC vacancies. He is said to have this under advisement. Mr.

ROBERT F. JONES
Slated for draft?

CHARLES GARLAND

General Manager, KOOL Phoenix

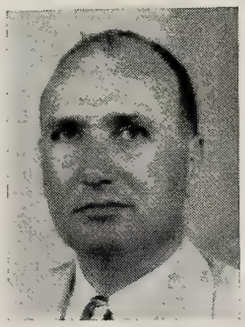
Cole now is serving as director of the personnel division of the Republican National Committee and presumably will be asked to remain in a high executive position with the committee when Wesley Roberts, a fellow Kansan and his former campaign manager, assumes the chairmanship of the committee in succession to Arthur E. Summerfield, who becomes Postmaster General. Mr. Cole, 51, is an attorney and is held in highest esteem by his erstwhile Congressional colleagues.

Eisenhower Consulted

The question of the FCC appointments has been taken up with Gen. Eisenhower, it was ascertained last week. He was represented as feeling that there is need for reorganization, not only of the FCC, but of many agencies in Washington. There is some question in his mind, one informant said, about elevating "career men" on the ground that they would not be disposed to clean house to the extent required.

The depth to which consideration has gone was indicated in one report that screening officials of the Republican Committee are interviewing candidates for top staff positions, including that of General Counsel. One prospect interviewed, it was asserted, is a practicing attorney in Detroit. It is accepted as a foregone conclusion that Benedict P. Cottone, present General Counsel, will resign shortly after the inauguration this week.

One highly placed Eisenhower aide said the high echelon entertained doubts about having any "tired Republicans" carried over from New Deal-Fair Deal bi-partisan commissions, take over any of the independent agency chairmanships. Countering this view, however, was the feeling that in the case of the FCC, for example, Mr. Hyde should take over the chairmanship, with the assistance of two new "strong" appointees, at least at the outset of the new Administration.



Much Support for Hyde

There appeared to be considerable support for the Hyde promotion. It was regarded as logical. It would also give the Administration an opportunity to observe FCC operations for a while. The importance of keeping the television processing lines open is recognized. This factor, more than any other one, it was thought, might bring the "orderly transition" approach, through promotion of Mr. Hyde.

BLATT'S ACCENT ON RADIO IN MEDIA SWITCH TOLD NRDGA

NRDGA hears how an Atlantic City department store, facing increasing daily newspaper rates, changed over to radio for 18 months, tailoring programs, spots to reach selected audiences. Result: Bigger sales, more out-of-town customers and a 22% jump in charge accounts. (For earlier stories on the store's success with radio see B•T, Aug. 4, 1952; Sept. 3, 1951.)

SUCCESS of an advertising program by the M. E. Blatt Co., Atlantic City department store, that relies heavily on radio and uses no daily newspaper space at all was described last Tuesday by Murray L. Klahr, Blatt's advertising and sales promotion manager. He spoke at a session of the National Retail Dry Goods Assn. convention in New York.

Mr. Klahr

The NRDGA's 42d annual meeting was held Monday through Thursday at the Hotel Statler.

Summing up Blatt's emphasis-on-radio policy in effect for the past 18 months, Mr. Klahr declared:

"The M. E. Blatt Co. is firmly convinced now that radio has a definite place in our future planning. We know now that we can sell all types of merchandise by the use of radio. We know now that radio gives us the coverage we need and we know now that to use radio successfully, any retailer must use radio and I really mean use it! We dabbled in radio for years before July 1951 with mediocre success but since that time radio has received a fair portion of our budget. And as we know now, when we used radio by necessity, it really did a sales job."

Blatt's Heavy Radio Plunge

Speaking in a panel discussion that considered the overall topic of "How to Profit from the Revolution in Advertising," Mr. Klahr explained that Blatt's heavy plunge into radio resulted from a re-examination of daily newspaper rates. He noted that between 1948 and 1951, major Atlantic City dailies introduced several rate increases. After a close appraisal of the entire picture, Mr. Klahr added, Blatt's decided the newspapers' rates were "entirely out of line with the coverage offered in the store's trading area."

In outlining Blatt's radio plans, Mr. Klahr pointed out that programs were tailored for specific audiences and stressed that this consideration weighed heavily in the success of the company's advertising program. Listed on Blatt's schedule on three radio stations, according to Mr. Klahr, are an average of 175-200 30-second and one-minute spots a week, 12 five-minute newscasts a day, seven days a week; one to three daily participations on a popular woman's program; a two-hour disc jockey show from beach-front hotels six times a week during the summer, and special events broadcasts from time to time.

As examples of pinpointing programs and advertising toward selected audiences, Mr. Klahr singled out the *Concert Hall* program on which Blatt's promoted women's finer hosiery, shoes and television sets and the Easter parade broadcast used to stimulate sale of ready-to-wear accessories.

The switch to heavy emphasis on radio in July 1951 brought immediate results, Mr. Klahr declared. He said the store sold 60 dozen $1.98 garment bags in one week by use of a few spots a day on three radio stations, adding:

"The M. E. Blatt Co. had no precedent for this kind of sales response in all its years of newspaper advertising."

Opens New Market

Mr. Klahr credited radio with opening a whole new market to the department store business—the out-of-town shopper. He said Blatt's charge account and delivery records showed that since July 1, 1951, there has been "a substantially greater volume of sales from this out-of-town traffic than ever before."

"There has been a 22% increase in new, regular charge accounts and we attribute the increase to radio's greater penetration and wider coverage," Mr. Klahr asserted. "This new market helps not only us, but the entire business community of Atlantic City."

Blatt's bold step in discontinuing daily newspaper advertising has resulted in inquiries from retailers all over the country, asking if they should adopt a similar policy, Mr. Klahr said. He declared his reply always has been that it might not be wise to cancel daily newspapers completely but that he always has advocated giving radio "a better portion of the advertising budget."

"A better balance between radio and newspaper can surely result in securing better volume at a cost more in keeping with a sensible, sound operation," Mr. Klahr argued.

He added that although Blatt's contemplates returning to daily newspapers sometime in the future, the company "will always make extensive use of radio."

Announcement of the best radio programs sponsored by retailers during 1952 was made by John F. Hardesty, director of local promotion for Broadcast Advertising Bureau, which sponsored the competition jointly with NRDGA. He noted in a brief talk that retailers made "overwhelming use" of "saturation" spot announcements during the last year, pointing out

they were carried out on a "staggered" basis, as in newspapers, rather than on a small, day-to-day schedule.

Categories and winners:

Programs beamed to a general family audience (large stores): Joske's of Texas, San Antonio, for *Classics in Jazz,* KTSA San Antonio.

Programs beamed to a general family audience (small stores): Bigelow's, Jamestown, N. Y., for *Breakfast With Bigelow,* WJTN Jamestown.

Programs beamed to women's audience (large stores): Sibley, Lindsay, Curr, Rochester, N. Y., for *Tower Clock Time,* WHAM Rochester.

Programs beamed to women's audience (small stores): Linn & Scruggs, Decatur, Ill., for *Something to Talk About,* WDJ Decatur.

Programs beamed to teen-age audience (small stores): Yard's, Trenton, N. J., for *School Scoops,* WTTM Trenton.

Spot saturation campaign (large stores): Joske's of Texas on KTSA KITE KONO KIWW and KCOR, all San Antonio.

Spot saturation campaign (small stores): Betty Lee, Warren, Pa., on WNAE Warren.

Special award for outstanding use of saturation coverage technique: Wolf & Dessauer, Ft. Wayne, on WOW WANE WGL and WKJG, all Ft. Wayne.

Special award for comprehensive use of radio: Rosenbaum Bros., Cumberland, Md., on WTBO Cumberland.

Special award for outstanding coordination with other media: Robert Simpson Montreal Ltd. on CJAD Montreal.

'Ad Woman' Judges Named

JUDGES to select the 1953 Advertising Woman of the Year, who will be honored during the Advertising Federation of America's convention in Cleveland June 14-17, were announced last week by Mabel S. Obenchain, AFA vice president and chairman of the Council on Women's Advertising Clubs. They are: Wesley I. Nunn, advertising manager, Standard Oil Co. of Indiana; Ben R. Donaldson, director of advertising and sales promotion, Ford Motor Co., and Jean Wade Rindlaub, vice president, BBDO, who was the award winner in 1951. Deadline for entries is April 1. Details may be secured from AFA headquarters, 330 W. 42d St., New York 36.

Radio-TV Growth at C & W

CUNNINGHAM & WALSH, New York, last week announced a realignment and enlargement of its radio and television media department.

William G. White, formerly with Joseph Katz Co., Baltimore, joins the agency in the newly created position of assignment manager of radio and television media.

He will work with Newman F. McEvoy, vice president in charge of media, and F. Robert Bauer, manager of radio and television media.

General Foods Buy

GENERAL Foods Corp., New York (Post Toasties, Calumet), has bought Monday-through-Friday, 4-4:05 p.m. EST period on CBS Radio, starting Jan. 21 for 52 weeks. Program is to be announced. Agency is Foote, Cone & Belding, New York.

SMALL AGENCIES TOLD, 'ACT BIG'

A modest agency shouldn't be modest, believes Walter Weir of Donahue & Coe. It should advertise, refuse to do free planning, oppose the advertiser if necessary and ally itself with organizations of fellow agencies, he tells second annual LAA meeting in New York.

IN A SPEECH before the second annual meeting of the League of Advertising Agencies in New York last Friday, Walter Weir of Donahue & Coe, explained how "the small agency can do things in a big way, too."

"I think it is preferable for the small agency to act in a big way to begin with. First, I think it should advertise. I advertised —and out of an investment of less than $5,000 I attracted three accounts directly that brought an even million dollars worth of billing into my agency."

Mr. Weir

Mr. Weir was head of his own agency prior to his affiliation with Donahue & Coe.

"I think," he continued, that the "small agency acts in a big way when it refuses to present speculative layouts and copy —unless they are part of a proposed plan of action based on a study of the advertiser's business and unless they are paid for. No surgeon, consulted for a major operation, is expected to perform a minor operation first on the cuff."

Other Ways for Small Agency

Other ways in which a small agency acts "in a big way," Mr. Weir said, is "when it opposes a move on the part of an advertiser which it honestly feels is not to the advertiser's benefit," and "when it belongs to an organization such as this."

Officers for 1953 were installed at the meeting: Louis E. Reinhold, Richmond Advertising Service Inc., as president; Max B. Pearlman of the M. B. Pearlman agency, as executive secretary; S. Duane Lyon of S. Duane Lyon Inc., Kenneth Rader of the Kenneth Rader Co., and David E. Rothschild of David E. Rothschild Adv., as vice presidents; Charles Ford, Iverson-Ford Assoc., treasurer, and Max Sinowitz, Chelsea Adv., as secretary.

Mennen Series

MENNEN Co., which moves from Newark, N. J., to its new plant in Morristownship, also N. J., early in May, has begun a series of radio broadcasts on WMTR Morristown as part of the company's community relations program. The radio series, *Mennen Bulletin Board,* serves two purposes, according to company officials. One is "to help Morristown residents to know each other better" by presenting news of local civic organizations and club activities on the show. The other is to present institutional messages about the company's operation to help residents get to know the Mennen Co. better.

Comer & Reames Inc. Formed

TWO well-known names in Kansas City, Mo., advertising were joined Jan. 1 with the forming of a new agency, Comer & Reames Inc. Mrs. Comer, who was an active partner with her late husband in the Russell C. Comer Co., is president of the new corporation. Gardner Reames, senior account executive of the Comer company, is executive vice president.

PRESENT for preview of the WCAU-TV Philadelphia program, *Split Seconds in History,* sponored by Gemex Co., during meeting of Gemex watch band dealers in that city, were (l to r): William Lichtenfels, Gemex vice president; William A. Swartman, advertising and sales manager; Robert McCredy, WCAU-TV sales manager; Willard Pleuthner, vice president of BBDO, Gemex agency, and Eugene Prestinari, Gemex president.

DOZEN FIRMS PLAN SPRING SPOTS

Here are details on a dozen advertisers and their spring advertising plans. A BROADCASTING • TELECASTING spot check has revealed that spot radio will be used extensively in these advertisers' campaigns.

PLANS of the Cuban Sugar Growers Assn. for the first time in its history to enlist radio in a 150-market campaign were revealed last week, highlighting extraordinary action in the radio spot field in which one dozen national advertisers were discovered in a BROADCASTING• TELECASTING spot check to have already formulated spring plans, with two others preparing schedules to be available shortly.

At least three of the sponsors, it is known for a certainty, will use 150 markets or more.

The entry of the sugar growers, it was ascertained, is in large measure a result of the Coffee Bureau's and the Tea Bureau's similar institutional campaigns, in which an entire industry rather than a particular brand has been promoted. Starting in April, the sugar campaign will continue for 39 weeks. Cunningham & Walsh, New York, is the agency.

Details on the eleven other advertisers whose early preparations will provoke a new stir of activity in the already active spot field are as follows:

Hillman's Mayonnaise, New York, will launch a national campaign late in April in about 150 radio markets. Benton & Bowles, New York, is the agency. The spot schedule calls for a three-week saturation plan, then a few weeks of hiatus, followed by an eight-week drive completing the compaign.

Electrolux Corp., New York, starts a new spot schedule in 200 radio markets in late February. BBDO, New York, is preparing the schedule.

Grove Labs., for Fitch Shampoo, St. Louis, will be using more than 100 markets in a national campaign starting in March. Contract will extend for 30 weeks. Agency is Harry B. Cohen, New York.

Shulton Toiletries is bringing out a new product, Stick Deodorant for Men and will use about 70 radio markets starting May 18 for 13 weeks. Wesley Assoc., New York, is the agency.

Lever Brothers' Silver Dust will spark a 13-week spring campaign to be followed by a 13-week fall spot radio schedule, to be placed mostly in secondary markets. Agency is Sullivan, Stauffer, Colwell & Bayles, New York.

Mennen Products, New York, through Kenyon & Eckhardt, also New York, is planning to expand its early morning program schedule in about 40 markets. Firm uses 10- and 15-minute early morning radio programs.

Dow Chemical Co., Midland, Mich., for its Saran Wrap (a plastic food wrap), will use women's participation shows in 13 radio markets, six in the east starting today (Monday) and seven in the West starting Feb. 2. MacManus, John & Adams, New York, is the agency.

Amozo Desserts, through Kenyon & Eckhardt, New York, is expanding its present schedule.

Benton & Bowles, New York, is formulating the Conoco campaign, which is expected to break in about three weeks in radio markets.

Colgate-Palmolive-Peet's Super Suds is contemplating a radio campaign slated for a March starting date if approved. Cunningham & Walsh, New York, is the agency.

Crosley TV sets, through BBDO, New York, is still adding radio spot campaigns as new television markets open. Firm uses co-op programs on a saturation basis.

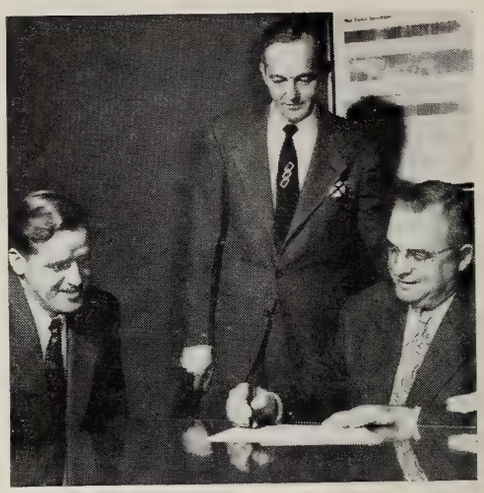
Seydel's 'Segue'

VICTOR SEYDEL, radio and TV director, Anderson & Cairns, seeking a word to stump the artists of the agency at a spelling bee between artists and copywriters, thought of "segue," a radio and TV scripters' term for transition between sound patterns such as one musical theme to another. He checked with Funk & Wagnalls, the lexicographic house. It never had heard of the word. Then Mr. Seydel called Ray Bloch and Dr. Frank Black, CBS and NBC musical directors, respectively. Each gave similar definitions. But Dr. Black informed Mr. Seydel that Funk & Wagnalls had telephoned 10 minutes before to confirm the modern-day application of the term. Result: "Segue" will appear in the next F & W dictionary. Thus, Mr. Seydel may be directly responsible for getting a new radio-TV word into the English language.

Sylvania TV Set Drive

NATIONAL advertising schedule for Sylvania TV sets will be expanded this year, William D. Stroben, advertising and sales promotion manager of the Radio and Television Div., Sylvania Electric Products Inc., announced last week.

Included in the expansion will be co-sponsorship with Wildroot Co. of the half-hour Sunday radio series *The Shadow,* on Mutual network. Mr. Stroben said he felt the extensive radio coverage will do much to saturate areas which will be new or richer TV markets in the future.



The national advertising campaign will be backed by intensified local promotion including radio and TV advertising, Mr. Stroben said.

Roy S. Durstine Inc., New York, is the agency.

Henry T. Ewald, Co-Founder of Campbell-Ewald

HENRY T. EWALD, 67, a co-founder of Campbell-Ewald Co., died Jan. 9 in Detroit of a heart ailment. The agency he helped start grew rapidly with the expansion of the automobile industry. From 1917 until last autumn he had been president of the agency, becoming board chairman last autumn.

Mr. Ewald was a key factor in some of the biggest campaigns in advertising history. He served as board chairman of American Assn. of Advertising Agencies and was a director of Advertising Federation of America and Traffic Audit Bureau. Born in Detroit of German immigrant parents, he entered the agency field with an investment of $3,000. He became Campbell-Ewald president in 1917 when Frank J. Campbell, first president, retired.

TOM HARRISON (l), national spot sales director, WSM Nashville, and Hi Bramham (c), WSM-TV local sales manager, watch as George Doyne of Doyne Adv. agency signs for area Coca-Cola Bottlers and the Neuhoff Packing Co., a subsidiary of Swift & Co., to sponsor broadcasts and telecasts of Vanderbilt basketball games.

NEW BUSINESS

Spot

Kraft Foods, Chicago, next week will introduce new swiss cheese with 13-week test campaign of TV announcements and participations in Miami, Philadelphia and New Orleans. Cheez Whiz cheese spread will be advertised in series of participations and spots in Memphis and Seattle for six weeks from Feb. 1. Kraft will also expand Alaskan schedule of four spots weekly per station in Fairbanks and Anchorage to include Juneau and Ketchikan. Agency: J. Walter Thompson Co., Chicago.

Indiana Bell Telephone Co. has renewed complete 1952 schedule of one-minute spots and station breaks on 22 Indiana AM stations for this year. Television will probably be used also. Agency: J. Walter Thompson Co., Chicago.

Mutual Funds Dept., Kidder, Peabody & Co., members of New York stock exchange, starting participations in *Barbara Welles Show* on WOR New York and *Skitch Henderson Show* on WNBC New York effective today (Mon.), in addition to sponsorship of weekly *Your Money at Work* on WOR. Agency: Doremus & Co., N. Y.

West End Brewing Co., Utica, N. Y. (beer and ale) will sponsor Abbott & Costello television film series in four markets: Utica, Binghamton, Syracuse and Schenectady. Agency: Harry B. Cohen, N. Y.

Consolidated Royal Chemical Corp., Chicago, sponsoring *Roy Acuff Show,* Fri., 8-8:30 p.m. CST, effective Jan. 16 for 52 weeks. Stations carrying show are WSM Nashville, WREC Memphis, WDOD Chattanooga, WSB Atlanta, WBT Charlotte, WAPI Birmingham, WWL New Orleans, WNOX Knoxville and KARK Little Rock. Agency: Ross Roy Inc., Chicago.

Falstaff Brewing Corp., St. Louis, to sponsor *Game of the Day* broadcast of major league baseball games over MBS in some areas of country, starting March 30. In other areas, program to be sponsored on co-op basis, as in past. Agency for Falstaff: Dancer-Fitzgerald-Sample, N. Y.

past. Agency for Falstaff: Dancer-Fitzgerald-Sample, N. Y.

Rexall Drug Co. Ltd., Toronto (Rexall products), has started spot announcements thrice weekly for one year on French-language stations in eastern Canada. Agency: Ronalds Adv. Agency Ltd., Toronto.

Network

Colgate-Palmolive-Peet Co., N. Y., sponsoring *Lorenzo Jones* on NBC Mon.-Fri., 5:30-45 p.m. EST, for 52 weeks, effective Jan. 5. Agency: William Esty Co., N. Y.

Mutual of Omaha, Omaha, Neb. (insurance), sponsoring *On the Line With Bob Considine* for 52 weeks on NBC, Sun., 3:30-4 p.m. EST and on NBC-TV, Tues., 10:45-11 p.m. EST. Agency: Bozell & Jacobs, Omaha.

Colonial Dames Inc., Hollywood (cosmetics), started *The George Fisher Show* on 22 Columbia Pacific Radio Network stations, alternating Tues. and Thurs., 1:15-1:25 p.m. PST, for 26 weeks from Jan. 8. Agency: Geoffrey Wade Adv., Hollywood.

Sunbeam Corp., Chicago (appliances), sponsoring weekly 15-minute Bill Henry news show on NBC-TV seven-station network Sun., 4:45-5 p.m. CT, effective yesterday. Agency: Perrin-Paus, Chicago.

Olympia Brewing Co., Olympia, Wash., renews weekly quarter-hour news broadcast on 41 Don Lee stations for 52 weeks from Jan. 3. Agency: Botsford, Constantine & Gardner, Portland, Ore. **Miles Calif. Co.,** L. A. (Alka-Seltzer), renews 12 times weekly quarter-hour *Alka-Seltzer Newspaper of the Air* for 52 weeks from Jan. 1, and five times weekly quarter-hour *Curt Massey Time* for 52 weeks from Dec. 29, both on 45 Don Lee stations. Agency: Geoffrey Wade Adv., Hollywood.

Ecko Products Co., Chicago, renews 13 quarter-hour segments of *Welcome Travelers* on full NBC-TV network. Agency: Dancer-Fitzgerald-Sample, Chicago.

Sweets Co. of America, Hoboken, N. J., now sponsoring *Tootsie Hippodrome* on ABC-TV Sun., 12:15-12:30 p.m. EST, will expand program to half-hour effective Feb. 1. Agency: Moselle & Eisen, N. Y.

Sun Oil Co., Phila., renews *Three Star Extra* on NBC, Mon.-Fri., 6:45-7 p.m. for 52 weeks. Agency: Hewitt, Ogilvy, Benson & Mather, N. Y.

Mayfair Markets Inc., L. A. (Southern California chain), started *Quick, What's the Answer* on five Don Lee California radio stations, Wed. and Fri., 2-2:30 p.m. PST, for 52 weeks from Dec. 31. Agency: Ad Masters Adv., L. A.

White House Co., N. Y., was to sponsor one-time-only *Hit Record Program* over ABC radio yesterday (Sun.), 9:30-9:45 p.m. EST. Agency: National Mail Order Network Inc., N. Y.

North American Van Lines, L. A., renews alternate weekly first quarter-hour segment of *CBS Radio Newsroom—Sunday Desk* on 19 CPRN stations, Sun., 5:30-5:45 p.m. PST, and *Let's Go Hollywood* on 23 CBS Radio Arizona and Mountain stations, Sun., 1:15-1:30 p.m. PST, both for 13 weeks from Jan. 25. Agency: Caster Assoc., L. A.

Green Giant Co., Le Sueur, Minn., renews *Edward R. Murrow News* on 12 CPRN stations, Tues. and Thurs., 5-5:15 p.m. PST, for 13 weeks from Jan. 27. Agency: Leo Burnett Co., Chicago.

Revlon Products Corp. to sponsor Tuesday telecasts of *Jane Froman's U. S. A. Canteen* on CBS-TV, Tues. and Thurs., 7:45-8 p.m. EST, effective Feb. 10. Agency: William H. Weintraub & Co., N. Y.

Tidewater Associated Oil Co., N. Y., renewing *Broadway to Hollywood* on DuMont, Thurs., 8:30-9 p.m. EST, for 13 weeks starting Jan. 22. Agency: Lennen & Newell, N. Y.

International Shoe Co., St. Louis (Red Goose shoes), renewing *Kids & Company* on DuMont TV Network, Sat., 11:30 a.m.-12 noon EST, for 13 weeks effective Feb. 7. Agency: D'Arcy Adv., St. Louis.

Agency Appointments

Austin-Green Inc., N. Y. (So-Fistik indelible lipstick), appoints Friend, Reiss, McGlone Adv., that city. So-Fistik will start in radio with participating sponsorship of *Jack Lakey Show* three times weekly on WINS New York, beginning today (Mon.).

Durham Chemical Co., L. A. (pesticides and insecticides), appoints Geoffrey Wade Adv., Hollywood **Snowden Hunt Jr.** is account executive.

Hayden, Stone & Co., member of N. Y. Stock Exchange, appoints Albert Frank-Guenther Law Inc., N. Y., for Mutual Fund Dept.

City of Cars, L. A. (used car operation), appoints Irwin Co., Beverly Hills. **Frank Warren, Allen McKee, Hugh Brundage** and **Tavy Kandt** are account executives. Radio-TV will be used.

Robbins Mills Inc., N. Y., appoints Weiss & Geller, New York Inc., same city.

Jules Montenier Inc., Chicago (Stopette and Finesse) through Canadian distributor **Frank Badger Co. Ltd.,** Toronto, appoints Ronalds Adv. Agency Ltd., Toronto.

Mason Farms & Hatchery, Somerville, N. J., appoints Abner J. Gelula & Assoc., Phila.

Steel Furniture Mfg. Co., Baldwin Park, Calif., appoints Tilds & Cantz Adv., Hollywood.

Stop and Shop Super Markets, Boston and New England, names Grey Adv., N. Y.

Louis Milani Foods Inc., L. A. (sauces, dressings, concentrated and dehydrated foods), appoints Arthur Meyerhoff & Co., Beverly Hills. **Jim Ward** is account executive. TV is being used.

Davis Furniture Co., Travel-Chek Inc. and **Blaisdell Mfg. Co.** (automotive accessories), all Long Beach, Calif., appoints West-Marquis Inc., that city.

Aireloom Bedding Co., Alhambra, Calif., appoints Geoffrey Wade Adv., Hollywood. **Snowden Hunt Jr.** is account executive. Radio will be principal medium.

Emmental Cheese Corp. appoints J. M. Mathes Inc. N. Y., for Swissette, Gruyere processed cheese.

Desmond's, L. A. (five store chain of retail men's, women's and boys' clothing), and **J. F. O'Connor,** L. A. and Hollywood (Lincoln-Mercury dealer), appoints Phil D. McHugh Co., L. A. Radio is being used.

The Nielsen "Per Cent of TV Homes Reached in Program Station Areas" gives a relative measurement of the audience obtained by each program in the particular station areas where it was telecast—all TV homes in those station areas ABLE to view the telecast being taken as 100%.

Factors causing differences in performance of programs include not only program appeal but number, strength and popularity of stations; strength of surrounding programs; time of day, etc.

THREE DAYS PRIOR TO ELECTION HAD 20% OF CAMPAIGN VIDEO

Analysis of Publishers Information Bureau reports shows concentrated television tends to influence any voters who might not have made up their minds. Party groups, however, did not make the list of first 10 sponsors.

ALTHOUGH November included only three pre-election days, political forces so intensified their use of broadcast media in a last-minute attempt to convince doubtful voters that their time purchases for Nov. 1, 2 and 3 formed an imposing part of their total campaign expenditures.

Publishers Information Bureau report on purchases of TV network time during November shows $307,133 worth purchased by political groups, more than 20% of the $1,448,092 spent for political TV network time during the entire Presidential campaign.

Opening Days in November

Unlike October, when the Stevenson-Sparkman Forum Committee was the foremost political spender for TV network time, Citizens for Eisenhower was the No. 1 political client in the opening days of November, with gross purchases on the TV networks of $102,367.

No political party or group made the list of top ten TV network advertisers in November, however. As expected, Procter & Gamble Co. heads the roster for the month, the only TV network client to purchase more than a million dollar's worth of time in this medium (see Table I). General Motors Corp. ranked second and Colgate-Palmolive-Peet Co. third. Leading advertiser in each category of advertising on the TV networks is listed in Table II.

Table III showing total combined expenditures of each class of advertiser, lists foods first, followed by tobaccos, toilet goods, laundry soaps and cleansers, and automotive advertising, with the same classes in the same order comprising the first five for both November and January-November 1952. This table also affords comparisons of November and the 11-month period of 1952 with the same periods of 1951.

TABLE I

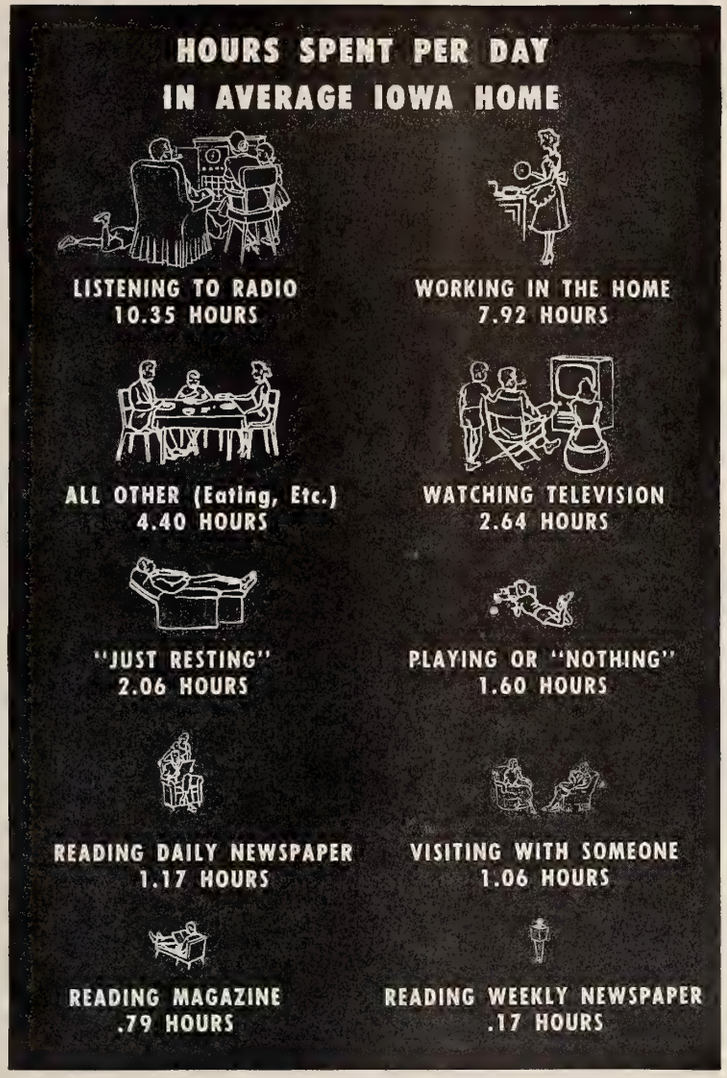
Radio-TV Retail Chains Sales Surveyed by Commerce

SALES of large retail radio chain stores last November were 3% higher than in the same month in 1951 but 2% off the October 1952 pace, the Commerce Dept.'s Census Bureau reported Jan. 9.

In a survey of percentage change in sales of all types of businesses throughout the U. S., the study also compared 11-month figures of 1952 with a similar period the preceding year for large radio stores. It found sales off 1%. The study, though labelled radio, presumably covered firms selling both radio and TV receivers. "Large" stores were defined as those organizations operating from 1 to 10 units and whose dollar volume of 1948 sales ranged between $50,000 and $1 million.

Comparing November, 1952, with (1) November 1951 and (2) October 1952, and (3) the 11 months of 1952 with the same period of 1951, the Census Bureau report also covered sales percentage changes of household appliance and radio stores in these selected areas:



Los Angeles County, Calif.: —5%, —10%, +4%.
San Francisco County, Calif.: +11%, —6%, +9%.
District of Columbia (city of Alexandria and

RADIO LISTENING DOMINATES IOWA HOME LIFE!

—AND WHO IS IOWA'S BEST ADVERTISING BUY!

Radio listening is far and away the most dominant activity in the average Iowa home. Time spent "Working in the Home" is the only close competition!

These facts were taken from the 1952 Iowa Radio-Television Audience Survey. They were compiled from "In-Home Activities Diaries" kept quarter-hour by quarter-hour by 1,164 Iowa families the day following personal interviews by trained researchers.

The 1952 Study proves again that, in Iowa, radio is far more than a leisure-time source of relaxation. Iowans, depend upon radio for news, weather and market reports, for home-making hints and recipes, for music and entertainment, for educational enlightenment and spiritual guidance. *Radio penetrates and reflects Iowa life!*

Dr. F. L. Whan of Wichita University and his staff personally interviewed 9,143 families for the 1952 Study. Their response has furnished much new and authentic data which will be of greatest value to every advertising and marketing man who has a stake in Iowa. Write today for your copy of the 1952 Survey — or ask Free & Peters. It will be sent you *free*, of course.

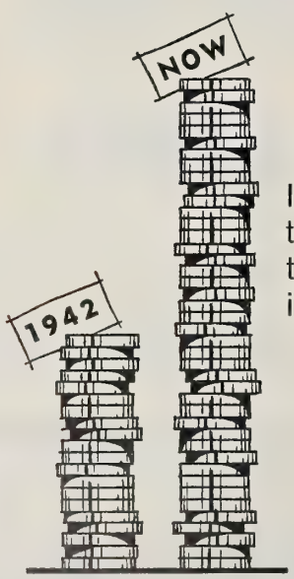
FREE & PETERS, INC.
National Representatives



Nobody needs a slide rule to prove that most advertising *costs* have gone up in the past ten years. But sometimes people overlook the fact that advertising *values* have also zoomed upward!

And more than ever,

RADIO serves you the biggest slice of ADVERTISING VALUE

Radio now delivers the biggest audiences in history.

Yet the cost of using radio has increased far less than any other costs in the advertising business! Here's an illustration—

It now takes $206 to buy engravings that cost $100 in 1942

BUT it takes only $114 to buy time that cost $100 in 1942 .. on **KYW**, the 50,000-watt Westinghouse station that dominates the rewarding Philadelphia market area

In six of the nation's leading markets, Westinghouse stations provide unbeatable advertising coverage.. at a cost-per-listener that makes every dollar count.. for more!

Tube Shipments Decline

SHIPMENTS of TV picture tubes to set manufacturers and factory sales of receiving tubes declined in November from the October level, according to Radio-Television Mfrs. Assn. November picture tube sales to manufacturers totaled 754,060 units valued at $16,651,793 compared to 862,431 tubes valued at $19,761,300 in October. Receiving tube shipments totaled 36,942,664 units valued at $24,554,156 in November compared to 41,880,318 tubes valued at $28,397,281 in October.

TV Is Leading News Source, Advertest Study Reveals

TELEVISION has become the greatest single source of news in TV homes, after trailing other media for the past four years.

This was announced in the latest monthly Advertest Research Continuing Subscription Study, "The Television Audience of Today."

Advertest reported that an average of 99 out of 100 families interviewed in the New York metropolitan area said they regularly watch TV news programs. The popularity of weather programs also was revealed by the study.

Main reasons given by interviewed families for their increased interest in video news is that the viewer is more able to relax while learning of news developments and that the news is presented pictorially. News audience per TV family was 2.8 members.

New U. S. Population Count

TOTAL population of the United States, was about 158,012,000 as of Nov. 1, 1952, according to Roy V. Peel, director of the U. S. Census Bureau. This figure, including armed forces overseas, was about 6,880,000, or 4.6%, over the April 1950 count as recorded in the 1950 census. Total population reached nearly 158½ million Jan. 1, 1953, according to Director Peel.

RADIO, TV TO SHOOT THE WORKS IN COVERING INAUGURATION

Networks mass personnel and facilities in nation's capital as time for ceremonies draws near. Oath and Inaugural address will be covered as public service but most other events will be carried under sponsorship. 70 million to watch on television.

RADIO and television coverage of the inauguration of Dwight D. Eisenhower as President of the U. S. tomorrow (Tuesday) by major networks will present a detailed and comprehensive picture to more people than witnessed all previous inaugurations combined.

Starting at 11:30 a.m. and continuing through 4:30 p.m., radio and television staffs will give the nation an intimate view and report of the procession, the swearing-in ceremonies, reaction of the crowds and dignitaries from all parts of the U. S. and the world.

To cope with the tremendous project, all networks have bolstered their Washington staffs with personnel from New York and other centers. Additional equipment, much of it new, has been delivered to insure full coverage of all newsworthy developments.

The number of TV viewers who will watch the proceedings was estimated by Sig Mickelson, CBS-TV director of news, at 70 million.

According to plans late last week, the timetable on TV coverage calls for all networks to begin at 11:30 and continue until about 4:30 p.m. EST. Late that evening they will cover the Inaugural Ball from the National Guard Armory and the Georgetown U. gymnasium.

Radio coverage will vary according to the network, but will begin at 11:30 a.m. and include parade, swearing-in ceremonies and address, crowd reaction and pickups from the inaugural balls.

Radio-TV networks will carry the 12 noon to 1 p.m. portion—the oath-taking and Inaugural address—and the Inaugural Ball as a public service, unsponsored. Other portions will be sponsored on most networks.

Breakdown of plans according to networks, as announced last week:

CBS

Aside from the public service portions, coverage by CBS Radio will be from 11:30 a.m. to 12 noon, 4-5 p.m., and 11:15-12 midnight and will be sponsored by Packard Motor Co. Agency for Packard is Maxon Inc.

The operation will be supervised by Wells Church, CBS Radio's director of news and public affairs. Robert Trout has been assigned to provide the running story, with pickups from various points by Douglas Edwards, Charles Collingwood, Allan Jackson, Griffing Bancroft, Bill Downs, Joe Wershba, Claude Mahoney, and Edward Morgan.

Mr. Church said nearly 100 persons would be on hand in Washington to write news bulletins, edit copy, and handle technical operations. He indicated an equal number will be stationed at other cities around the world, including Paris, London, Rome, Berlin, Tokyo, and in the U. S. to direct special pickups.

From 4-5 p.m. CBS Radio will broadcast a special program covering the entire story up to that time, including recordings expressing the reaction of legislators, statesmen, and the man in the street. This material will be edited for presentation by Irving Gitlin, who performed a similar chore at the conventions in Chicago last summer.

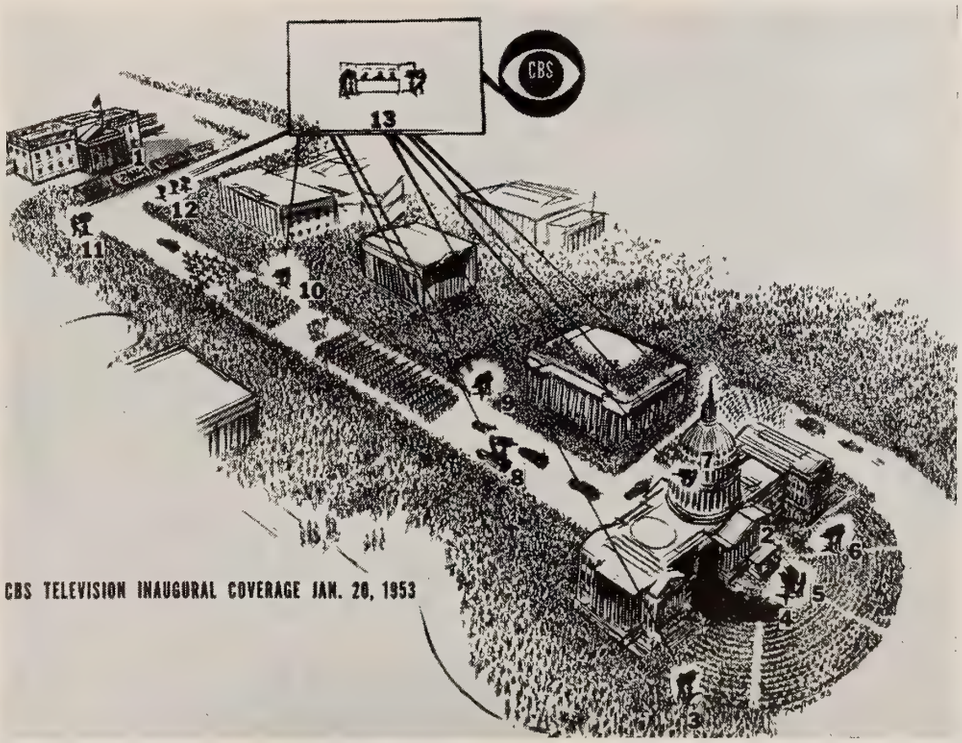
CBS-TV's coverage will be similar to CBS Radio's with the same personnel and schedule, with the exception that CBS-TV plans to remain on the air continuously until 4:30 p.m. Packard also is sponsoring CBS-TV coverage.

The network has planned two pre-inauguration features, *Inauguration Preview*, scheduled for yesterday (Sunday), 4-4:30 p.m., and *Inauguration City*, today, 3:30-4 p.m.

Overall supervision of the network's coverage will be handled by Sig Mickelson, director of news and public affairs.

NBC

NBC has planned its radio coverage from 11:30 a.m. to 2:30 p.m. and TV from 11:30 a.m. to 4:30 p.m. EST. General Motors has bought radio-TV coverage of all main events save the Inaugural Ball. Agency is Kudner Inc., which handled the Republican National Committee advertising activities during the political campaign.



NBC-TV coverage will be supervised by William McAndrew, director of public affairs, and will use over a dozen cameras strategically placed along the parade route from the Capitol to the reviewing stand. Gene Juster will assist him. Cameras will be located at the Apex and Treasury buildings, the Capitol and other points. Television coverage will be paced to the succession of events, while NBC radio will switch pickups as the occasion warrants.

Anchor men for radio-TV coverage will be Morgan Beatty and Clifton Utley, with assistance from a corps of network commentators. Focal TV switching point is the Wardman Park Hotel, home of NBC Washington facilities.

Commentators on radio include George Hicks, W. W. Chaplin and Leon Pearson; on TV, H. V. Kaltenborn, Richard Harkness, Earl Godwin, Merrill Mueller, David Brinkley and Frank Bourgholtzer.

Upwards of 125 staff personnel will work on the coverage, according to Mr. McAndrew. NBC coverage will be highlighted with use of a mobile TV unit (a Cadillac sedan) complete with studio-type electronic equipment and a hand-camera, plus other truck-size mobile units. Camera is smaller than a walkie-talkie used during the conventions and will be used for closeups, particularly of Gen. Eisenhower's reactions in the parade.

GM commercials will be institutional and will shy away from any association between the motor firm and certain aspects of the Inauguration which are bound to crop up (examples, NBC's use of a Cadillac sedan, any

CBS-TV Inauguration coverage will involve more than 150 news, production and technical personnel. These men will be stationed at the swearing-in ceremony and along the parade route at these positions: (1) White House reviewing stand; (2) Inaugural platform at Capitol; (3, 4, 5 and 6) in front of the Capitol; (7) camera on the Capitol rotunda; (8) the CBS-TV mobile TV-camera-car in parade; (9, 10 and 11) along the parade route; (12) battery of three cameras covering the reviewing stand and White House grounds, and (13) master control in WTOP-TV studios where pickups from 14 cameras will be relayed to an estimated nationwide audience of more than 70 million persons.

KOPO-TV will boom your sales message to all the residents of Pima County and southern Arizona via the main track—**POWER!**

OLD PUEBLO BROADCASTING COMPANY
115 West Drachman Street, Tucson, Arizona

another **GENE AUTRY** enterprise

Affiliated with **CBS** *and* **DU MONT** *Television Networks*

TAKING part in ABC-TV cameramen's tests of the network's "white fleet" of Willys-Overland station wagon "miniature studio" jeeps to be used in tomorrow's ABC-TV coverage of the Eisenhower inauguration, are (standing in center) Merle Worster (l), Eastern TV engineering operations manager, and Frank Marx, engineering and general services vice president.

reference to Charles E. Wilson, GM president, etc.). NBC-TV will film all events for later network use.

ABC

Continuous broadcast of the proceedings will be made by ABC radio from 11:30 a.m. to 4:30 p.m. and from 11-11:15 p.m. ABC's sponsor is Willys-Overland Motors, serviced by Ewell Thurber Assoc. From 8-9 p.m. the network will present a special Inaugural Highlights program.

Heading the list of ABC commentators will be Walter Winchell, backed up by John Daly, Elmer Davis, Erwin Canham, Martin Agronsky, Paul Harvey, Quincy Howe, Walter Kiernan, Bryson Rash, Ted Malone, Leo Cherne, Ruth Crane, John Edwards, and Taylor Grant.

The network reported it will draw upon the resources of a staff of 100 specialists and plans to use more than 35 microphones in mobile and fixed positions.

Under the sponsorship of Willys-Overland, ABC-TV's reporting of inaugural proceedings will be the same as ABC radio's. It will run from 11:30 a.m. to 4:30 p.m., but the Inaugural Ball will be covered by ABC-TV for a full hour, 11 p.m. to midnight.

DuMONT

DuMont's coverage, as yet unsponsored, will begin at 11:30 a.m. and continue through 4:30 p.m. and include the ball from 11 p.m. to midnight. WABD (TV) New York, DuMont-owned station, will carry only the 11:30 a.m. to 1 p.m. portion of the ceremonies, covering the procession and the oath-taking and address.

From 10-11 p.m. DuMont will present films of the proceedings of the day.

The network will make its telecast of inauguration events available to WOR-TV New York from 11:30 to 1 p.m.

MUTUAL

Beginning at 11:30 a.m. Mutual will report Inauguration activities until 4:30 p.m. and continue at the Inaugural Ball at 11:30 p.m. Wildroot Co., Buffalo, will sponsor nine special broadcasts, with other segments of Mutual's schedule being made available as cooperative features for local and regional sponsorship.

Wildroot sponsorship will include two pre-inaugural broadcasts today from 10:30-10.35 p.m. and 11:30-11:35 p.m., plus seven Inauguration day segments: At 11:30 a.m., 12:55 p.m., 2, 3, 4, 10:30 and 11:30 p.m. BBDO, New York, is the agency servicing the Wildroot account.

Describing the swearing-in ceremonies for Mutual will be Fulton Lewis Jr. and Fred Fiske. Everett Holles and Hazel Markel will describe the inaugural procession. On-the-street descriptions of the crowd and reaction of spectators will be provided by Frank Singiser, Joseph McCaffrey, Wallace Fanning, Arnold Freeman, Willis Conover, and Ray Morgan.

The network plans to use about 75 persons to handle all details of the assignment.

Ike-Nixon Telecast Feb. 1

POST-INAUGURAL appearance of Gen. Eisenhower and Richard Nixon as U. S. President and Vice President on an American Legion *Back to God* telecast on NBC-TV Feb. 1, 1:30-2 p.m. EST, was announced by the network last week. President Eisenhower will speak from the White House and Mr. Nixon from the Center Theatre in New York, where the event will be held.

Independents and Others Plan Inaugural Coverage

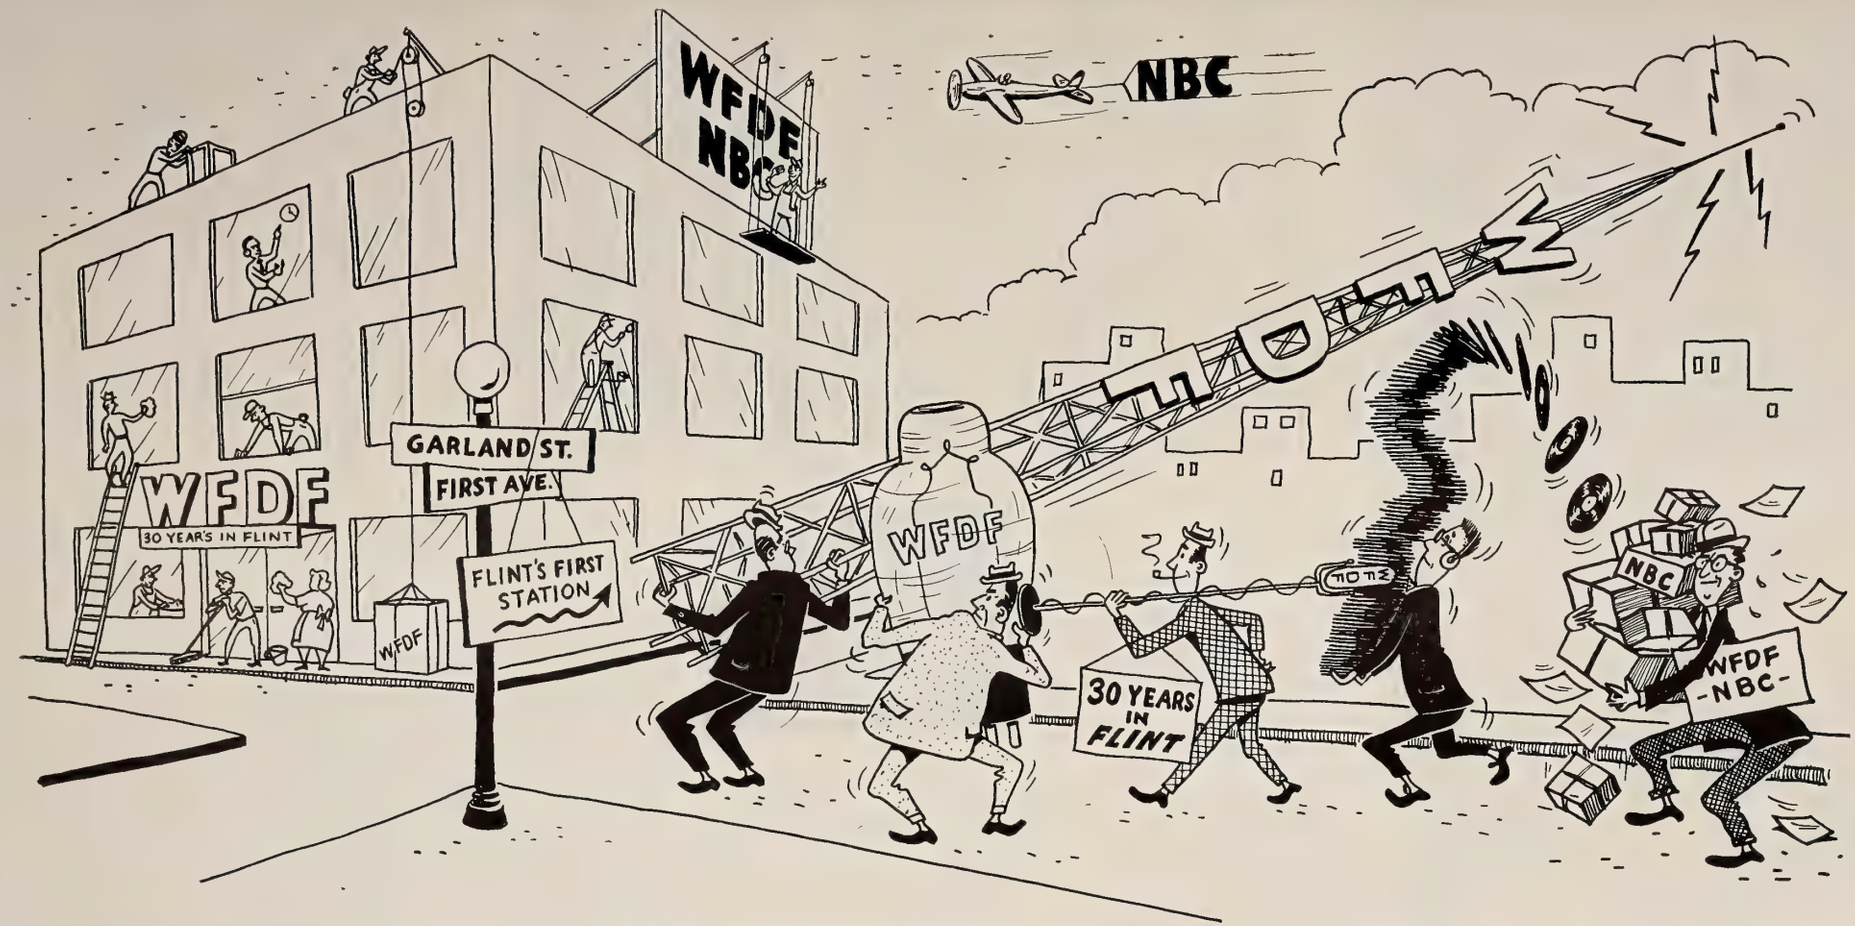
Washington will be a busy place tomorrow for the radio-TV newsmen as well as for the countless politicians who will be in town. The independent station newsmen and the many "special" news reporters will be on hand.

RADIO-TV coverage of the Jan. 20 inauguration of President-elect Eisenhower and Vice President-elect Richard M. Nixon will include a number of independent radio and TV stations as well as the national originations by the networks.

Many Washington broadcast correspondents, as well as special newsmen on assignment for the historic ceremonies, plan to tape record or "shoot" with consumer type motion picture cameras the highlights of Inauguration Day from their seats on Capitol Hill and from other locations.

Only two direct broadcasts by independents have been arranged, according to Congressional Radio-TV Galleries officials. They are WOOK Washington and WKNX Saginaw, Mich. KSD St. Louis has also made arrangements to feed direct broadcasts to its home transmitter, but does not plan to feed the Capitol Hill oath-takings.

Plans for Relay



In addition to independent broadcasters, British Broadcast Corp. and Voice of America have made plans to relay to Britain and the world respectively the memorable occasion.

The following stations among others have received credentials for coverage of the Capitol Hill ceremonies:

WGMS Washington; WGBI Scranton, Pa.; WLAM Lewistown, Me.; KWWL Waterloo, Iowa; WCSH Portland, Me.; WSAY Rochester, N. Y.; WDAS Philadelphia; WGAR Cleveland; WTUX Wilmington, Del.; WDEL Wilmington, Del.; WHGB Reading, Pa.; WERE Cleveland, O.; KCKN Kansas City; WIBW Topeka, Kan.; WJXN Jackson, Miss.; WORD Spartanburg, S. C.; WISC Madison, Wis.; WAPO Chattanooga, Tenn.; Radio Diffusion Francaise; KCNA Tucson, Ariz.; Crosley Broadcasting Co.; KGEZ Kalispell, Mont.; WCFM (FM) Washington; AP Radio; UP Radio.

THIS special camera-mounted Cadillac will be used to augment NBC-TV coverage of tomorrow's inauguration ceremonies. WNBW (TV) Washington's equipment is shown.

THINGS ARE MOVING IN FLINT, MICHIGAN!

FCC GRANTS 11 NEW TV STATIONS; JUNE MAY END UNCONTESTED LIST

Toting up TV grants, the Commission counts 305 authorizations of which 197 received the go-ahead after the freeze. To date 108 pre-freeze and 19 post-freeze stations are on the air of which seven of the latter are uhf. Some 700 applications remain in various stages of processing.

WHILE high FCC sources last week unofficially reported June as the target date for cleaning up virtually all pending uncontested TV applications, the Commission on Thursday announced grants for 11 more new stations, 6 vhf and 5 uhf, including the first TV outlets for Montana and North Dakota.

Only three states remain without TV authorizations—New Hampshire, Vermont and Wyoming—but applications are pending in these states.

This brings to 305 the number of TV stations authorized in the U.S., of which 197 have been granted since lifting of the freeze last April. Of the post-thaw permits, 11 are for non-commercial, educational stations.

As of last Thursday, there were 127 stations on the air, of which 19 represent outlets authorized since lifting of the freeze. Seven of these are uhf stations.

Processing on the city priority Group A-2 line (cities without service) was extended to No. 168, Rochester, Minn., where KROC received vhf Ch. 10.

St. Louis Gets Uhf

Processing on the Group B line (cities with service) did not go as far as the earlier grant to No. 183, Houston, Tex., where two uhf permits had been authorized [B•T, Jan. 12]. Top Group B city last week was No. 179, St. Louis, where Broadcast House Inc. received uhf Ch. 36. Principals in KSTL there have interests in the new uhf grantee.

There are about 700 applications, part in hearing, pending before FCC and awaiting processing.

Here are the new stations approved:

Great Falls, Mont. (City priority Group A-2, No. 108)—Buttrey Broadcast Inc. (KFBB), granted construction permit for vhf Ch. 5, effective radiated power of 8.9 kw visual and 6.5 kw aural, antenna height above average terrain 100 ft. Comr. Frieda B. Hennock dissented.

Fargo, N. D. (Group A-2, No. 114)—WDAY Inc. (WDAY), granted vhf Ch. 6, ERP 70 kw visual and 35 kw aural, antenna 170 ft.

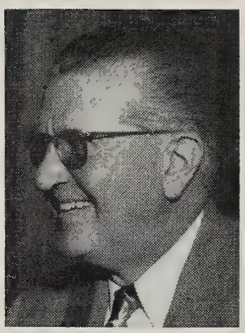
Boise, Ida. (Group A-2, No. 135)—Idaho Broadcasting and Television Co. (KGEM), granted vhf Ch. 9, ERP 32 kw visual and 16 kw aural, antenna 2,050 ft. Previously granted: KIDO-TV, vhf Ch. 7.

Butte, Mont. (Group A-2, No. 144)—Copper Broadcasting Co. (KOPR), granted vhf Ch. 4, ERP 14.5 kw visual and 7.3 kw aural, antenna 350 ft.

Columbia, Mo. (Group A-2, No. 150)—Curators of U. of Missouri, granted vhf Ch. 8 (commercial), ERP 205 kw visual and 105 kw aural, antenna 800 ft.

Billings, Mont. (Group A-2, No. 152)—Rudman-Hayutin Television Co., granted vhf Ch. 8, ERP 12 kw visual and 6.2 kw aural, antenna 390 ft.

Salinas, Calif. (Group A-2, No. 164)—Salinas-Monterey Television Co., granted uhf Ch. 28, ERP 105 kw visual and 60 kw aural, antenna 2,340 ft.



Rochester, Minn. (Group A-2, No. 168)—Southern Minnesota Broadcasting Co. (KROC), granted vhf Ch. 10, ERP 105 kw visual and 54 kw aural, antenna 639 ft.

Dallas, Tex. (Group B-2, No. 155) — UHF Television Co., granted uhf Ch. 23, ERP 220 kw visual and 115 kw aural, antenna 510 ft. Operating: KRLD-TV, vhf Ch. 4; WFAA-TV, vhf Ch. 8.

Louisville, Ky. (Group B-2, No. 156)—Robert W. Rounsaville (WLOU), granted uhf Ch. 41, ERP 240 kw visual and 125 kw aural, antenna 260 ft. Operating: WAVE-TV, vhf Ch. 5; WHAS-TV, vhf Ch. 9. Previously authorized: WKLO-TV, uhf Ch. 21.

St. Louis (Group B-4, No. 179)—Broadcast House Inc. (KSTL), granted uhf Ch. 36, ERP 275 kw visual and 145 kw aural, antenna 580 ft. Operating: KSD-TV, vhf Ch. 5. Previously authorized: WTVI (TV) Belleville, Ill., uhf Ch. 54.

Earl Reineke, president and general manager of WDAY Fargo, vhf Ch. 6 grantee, said he hoped to get on the air as soon as equipment could be installed, observing that the rigid winter might result in delays. RCA equipment is contemplated, he said, and the station hopes to become an NBC affiliate along with its sister AM operation. The WDAY representative is Free & Peters, which is expected to represent the television operation also.

Mr. Reineke

Frank Carman, president of KOPR Butte, vhf Ch. 4 grantee, asserted every effort would be made to place the station in operation as soon as possible. He likewise alluded to the rugged weather in the Butte area. KOPR is an ABC affiliate and Mr. Carman assumes the TV station will be an affiliate of that network. The national representative will be George P. Hollingbery Co.

Mr. Carman, who also heads KGEM Boise, vhf Ch. 9 grantee, said the new Boise TV station—which will transmit from a mountain top—will be placed in operation by fall "if the winter does not close us in." RCA equipment will be used, he said, and ABC affiliation is contemplated along with representation by George P. Hollingbery Co.

David Gentling, general manager of KROC, Rochester, Minn., vhf Ch. 10 grantee, said the station has a target date of April. RCA equipment was ordered in 1948, he asserted. Network negotiations will be undertaken at once. The national representative will be Robert Meeker Assoc. Inc.

Joseph P. Wilkins, president and general manager of KFBB Great Falls, awarded vhf Ch. 5, said changes are contemplated in location and design of antenna, but that every effort will be made to expedite operations. Indicated equipment is RCA, he said, and he looked for affiliation with CBS-TV. The national representative is Weed & Co.

William Ware, president of Broadcast House Inc., vhf Ch. 36 grantee at St. Louis, said DuMont equipment will be used. The estimated starting date, he said, is April 15. Negotiations have not started for network affiliation or national sales representation. Mr. Ware also is general manager and 25% owner of KSTL St. Louis, independent outlet.

On behalf of the U. of Missouri, commercial vhf Ch. 8 grantee, Lester E. Cox, Springfield and Kansas City broadcaster who serves as trustee and advisor to the school, said it is hoped to have the new Columbia station on the air within six months. While equipment has not yet been ordered, RCA is indicated, he said.

The operation will be unique, he said, in that the school plans to function as a laboratory for commercial television operations. It was for that reason the school applied for a commercial facility, he said.

Missouri's Plan

Mr. Cox and Frederick A. Middlebush, president of U. of Missouri, stated:

The U. of Missouri, under today's grant by the FCC for a television station in Columbia, will make use of this new facility for two major purposes.

The first is to serve as a vehicle for carrying the University's educational programs to all parts of the state of Missouri.

The second is to serve U. of Missouri students in a new field of professional and technical training. In this field, students will be given practical experience in television advertising, news dissemination and in all phases of the technical operation of radio and television stations.

In conjunction with the new television station, and as a part of it, it is planned to develop a laboratory for the purpose of developing sound motion pictures of an educational nature for television. The laboratory will also make and furnish films for other television stations in the state, as well as transcriptions for radio stations. Under the University's plan, all radio and television stations within the state will benefit from this grant because the income from commercial programs through the University station, over and above the actual cost of operation, will be ploughed back into the filming and recording of educational programs.

These films will be available for use by radio and television stations throughout the state. The money to build this station has been provided, in the main, through gifts and grants hitherto made to the University and assigned by the Board of Curators for this purpose.

The television committee will now contact the national television networks and will do everything possible to obtain selected network programs so that the best of TV programs can be provided to people in this listening area, together with the educational programs. It is expected that it will be at least six months before the new television station will be in operation.

Through the addition of this new facility, the U. of Missouri will now take its place in the field of radio and television education in a manner similar to that enjoyed by its School of Journalism in the field of press communication.

FCC Stumbling Block

IT TAKES more than equipment to start a radio station—as three persons suspected of stealing broadcast fixtures found to their chagrin last week. The FCC turned down their application for a station license, although the three reportedly had $25,000 worth of stolen equipment in their possession—enough to apply for license.

Now being held for investigation by Middletown, Ohio, police, the trio reportedly stole equipment from stations in Ohio, Kentucky and Indiana. Their plans apparently fell through when the FCC denied their application, it was reported.

Among stations reportedly victimized were WNOP Newport, Ky.; WCMB Connersville, a cable relay station at Osgood, Ind.; WSLM Salem, Ind.; WMVO Mt. Vernon, Ohio, and WORX Madison, Ind.

MEMBERS of NARTB Code Review Board conferred Thursday with Sen. Charles W. Tobey (R-N. H.), Senate Interstate & Foreign Commerce Committee chairman. Front row (l to r): Walter Damm, WTMJ-TV Milwaukee; John E. Fetzer, WKZO-TV Kalamazoo, board chairman; Sen. Tobey; Thad Brown, NARTB. Back row, C. E. Arney Jr., NARTB; Ewell K. Jett, WMAR-TV Baltimore; Harold E. Fellows, NARTB president; J. Leonard Reinsch, WSB-TV Atlanta, vice chairman; Edward H. Bronson, NARTB code affairs director.

TV IS WONDERFUL, TOBEY ASSERTS, BUT HE DEMANDS 'SQUARE DEAL'

In friendly session with NARTB code board, chairman of powerful Senate committee commends the industry for its good programs. But he warns stations and networks they may run into adverse public reaction if they get too commercial or relax ethical standards of their programming.

SEN. CHARLES W. TOBEY, who calls himself "just an ordinary fellow from New Hampshire," will keep a close watch on radio and television programs as he occupies the top government radio regulatory seat.

Long an enthusiastic radio listener and television viewer, the chairman of the powerful Senate Interstate & Foreign Commerce Committee isn't going to miss many electronic tricks —especially if they're off-color or over-commercial.

Chairman Tobey unfolded his TV and radio philosophy Thursday in a meeting with the NARTB Television Code Review Board (see code story page 54).

Senator States Views

The fiery New Hampshire Senator, who rose to nationwide fame through his castigation of criminals in telecasts of the famed Kefauver hearings, has definite views on the role of TV and radio in the nation's life. Moreover, it's obvious at this point that he won't hesitate to express his opinions—good or bad.

Before the NARTB code group could proceed with an explanation of its functions, Chairman Tobey interjected, "Your programs need improvement."

John E. Fetzer, WKZO-TV Kalamazoo, Mich., code board chairman, came back quickly with the answer, "That's the very job we aim to do."

"Television is the greatest medium we ever had, probably the greatest invention in history," Chairman Tobey said. "It's in its infancy. All I want is a square deal."

Mr. Fetzer explained that the code board has been in operation since last March and that TV stations subscribe to it voluntarily.

"What percentage of stations are in it?" Chairman Tobey asked. Mr. Fetzer said a hundred stations subscribe of 110-plus now on the air.

"Some of the stuff is trash," Chairman Tobey said. "At times you fellows seem to be concentrating on dollars, dollars, dollars. If you overdo the commercials, there's danger of bad public reaction. I listen every night. There are many wonderful programs. I enjoy them."

Mr. Fetzer said the code board is making "a conscientious effort to find out what the public wants."

"We study the programs carefully," he continued. "We review programs and commercials. We investigate hundreds of situations. We are making an earnest effort to find out what the public wants and are working out methods of finding out what people think of television service.

"After all, we live by sufferance of the American people. We have adopted this method of self-regulation. It has been in operation less than a year. We are trying to make self-regulation work."

"Something like a student council?" Chairman Tobey suggested.

"No," Mr. Fetzer answered. "It's way above that. It's a serious and voluntary effort by U.S. television stations to improve their product and serve the public interest."

NARTB President Harold E. Fellows detailed some of the code board's functions to the chairman and summarized the professional experience of its members.

Taking part in the conference, besides Messrs. Fetzer and Fellows, were J. Leonard Reinsch, WSB-TV Atlanta, board vice chairman; Walter J. Damm, WTMJ-TV Milwaukee; Ewell K. Jett, WMAR-TV Baltimore; Thad Brown Jr., director of television at the NARTB Robert K. Richards, NARTB assistant to the president and public affairs director; C. E. Arney Jr., NARTB secretary-treasurer; Edward H. Bronson, NARTB director of TV code affairs. Nicholas Zapple, of the Senate committee staff, presented the NARTB group to Chairman Tobey. Mrs. A. Scott Bullitt, KING-TV Seattle, a code board member, was not present.

President Fellows told Chairman Tobey how the code board operates, explaining that its members "sit in judgment on these programs."

Mr. Jett noted that TV networks and stations have their own continuity acceptance departments, with one network having 35 on the staff. "They eliminate thousands of offensive items that might have gone on the air," he said.

"Television's wonderful," Chairman Tobey said. "I wouldn't be without it in my home. I love it. You fellows have a friend in me. Come here any time. You have a friend here. I'm an ordinary fellow from New Hampshire. We're all free men. Anyone can tell me to go to hell. That's his right."

Turning to individual programs, the chairman asked, "What happened to that big fellow Saturday nights—Murray?" He was told Ken Murray would soon be back on the air.

"What happened to *We the People?*" he continued. "Is it the ratings? Can you believe those ratings? I've enjoyed *Amos 'n' Andy* 20 years. Why do they repeat programs? Run out of ideas? I'm just talking out loud." He was told there will be no more repeats on *Amos 'n' Andy*.

"Why don't you get that Sullivan to smile Sunday nights?" the chairman continued. "He's deathlike. Is that a fair criticism?"

As members of the board were leaving, Chairman Tobey repeated his invitation to the board and NARTB staff officers to "come here anytime."

After the meeting, the chairman was asked about his half-hour New York interview with President-elect Eisenhower in New York the day before. He wouldn't get specific, but conceded he might have discussed radio and television. "They're mighty important subjects," he added. Without going into details, he said he had discussed the FCC and many other regulatory agencies with the President-elect. "We covered a lot of ground," he said. "Most everything."

FTC Ad Probers Get New Boss

GOVERNMENT probers who poke through complaints of false advertising in radio, television and other media got a new boss the past fortnight. Appointment of Daniel J. Murphy as director of the Federal Trade Commission's Bureau of Anti-deceptive Practices was announced by FTC Chairman James Mead.

Mr. Murphy succeeds Richard P. Whiteley, named assistant chief of FTC's Litigation Division (under the same bureau). Mr. Murphy's post of assistant director in anti-deceptive practices went to William M. King, who also becomes chief of litigation.

The commission also reported on its activities for last October. Total of 1,049 radio and periodical advertisements were set aside for further study, with 663 channeled to the investigation division and 18 marked for litigation.

RADIO-TV BARRED FROM HEARING

Battle to gain equal treatment with the press is an unceasing one for the radio and TV media. Last week broadcast newsmen were banned by one Senate committee but were promised equality by another.

RADIO-TV was rebuffed last week in an attempt to cover a Congressional hearing, but received some encouragement from the chairman of another committee.

At the same time, Rep. Emanuel Celler (D-N. Y.) introduced a resolution (H Res 86) which would order the House Judiciary Committee to study the rights of witnesses before Congressional committees. He made it clear that the banning of microphones and cameras was one of the "rights" he felt witnesses should have.

Foreign Relations Bans Media

First and major committee meeting of the 83d Congress from which radio and TV as well as other "eye-witnessing" media were refused coverage rights, was the Senate Foreign Relations Committee hearing on the nomination of John Foster Dulles to be Secretary of State in the new Eisenhower Administration.

All media were permitted to participate in the opening phases of the hearing Thursday afternoon, but all except the press were required to depart before the Senators' questions to Mr. Dulles began.

Broadcast media newsmen were told to take the matter of Senate committee hearings coverage up with Sen. William F. Knowland (R-Calif.), chairman of the Senate Republican Policy Committee. Sen. Knowland, through his family, has an interest in KLX-AM-FM Oakland (*Oakland Tribune*).

On the encouraging side of the Congressional coverage picture, Sen. Joseph R. McCarthy (R-Wis.), chairman of the Government Operations Committee and of its Investigations Subcommittee, said last week that the use of radio and TV was discussed at the committee's organization meeting last Wednesday. He said that the matter will be decided "when the occasion arises." Previously, Sen. McCarthy said he favored permitting radio and TV to participate in Investigations Subcommittee hearings.

The Senate permits each committee to decide which media should be permitted to cover its meetings and hearings.

Rep. Celler's resolution calls for the Judiciary Committee, or a subcommittee, to study and draw up a "code of procedures" for the conduct of hearings and examination of witnesses before House committees.

To BROADCASTING • TELECASTING, the Brooklyn Congressman reiterated his opposition to permitting radio mikes and TV cameras—as well as newsreel cameramen and still photographers—to participate in covering House committee meetings. "Radio and television," he said, "are not the proper medium for Congressional committees."

Celler Raises Doubts

Some of the questions Mr. Celler asked were: (1) Why permit slanders and unconfirmed accusations to be broadcast to the public? (2) Who will decide what hearing shall be broadcast or televised? (3) Who is going to decide which advertisers shall be permitted to sponsor the hearings?

Another aspect which troubles Mr. Celler is his feeling that only the most dramatic Congressional hearings will be picked for broadcast coverage. "The most dramatic hearing is not always the most important," he said. "It's the hard-working, quiet committees that do the significant work—and they won't make a good showy radio or television program."

Mr. Celler has expressed himself in opposition to radio-TV coverage of Congressional hearings before.

However, House Speaker Joseph W. Martin Jr. (R-Mass.) has declared he feels it is up committee members to decide whether they wish to permit radio-TV to cover meetings. In this, he reversed a ruling by former Speaker Sam Rayburn (D-Tex.) which banned the broadcast media. Two weeks ago, first TV coverage of a House committee was permitted by the House Armed Services Committee in open hearings on air crashes [B•T, Jan. 12]. Other House committee chairmen also have said they would not object to radio or TV coverage [B•T, Jan. 12].

White Praises Ban Lift

PRAISE for lifting the ban on radio-TV coverage of House committee hearings was voiced Jan. 9 by NBC President Frank White. NBC, with permission of House Speaker Joseph Martin, made public the following telegram sent to Mr. Martin by Mr. White:

"Your decision to authorize committees to open House committee meetings to television and radio coverage if they so desire is greatly applauded by all Americans who understand that an informed public is one sinew of democracy's strength.

"We at NBC have repeatedly urged that television cameras and radio microphones be permitted wherever news is made in order to bring the best possible story of the event to the public, a task for which both broadcasting media are eminently suited. I hope committee chairmen will follow through so that the people will get the full benefit of your decision."

Katyn Forest—A Decade Later . . . . . *AN EDITORIAL*

FEW broadcasters may have understood the significance of a recent report by the Katyn Forest Massacre Subcommittee of the House in which, among other findings, the Congressmen announced there had been an effort by the World War II Office of War Information and the FCC to suppress certain news about that black crime against mankind.

The facts, after all, have become clouded if not forgotten during the passing years. It was in Katyn Forest more than 10 years ago that more than 5,000 of the finest young men of Poland were lined up, their hands tied behind them, and shot. The Nazis said the Soviets did it; the Soviets said the Nazis did it. The Katyn Committee has concluded, after long investigation, that the evidence in this sordid case points to Soviet guilt.

But a collateral conclusion by the committee is that certain officials of the wartime FCC and OWI joined in a move to prevent Polish commentators on U. S. broadcasting stations from expressing their viewpoints about the guilt of the Soviets. Several station managers and foreign-tongue commentators appeared before the Katyn Committee and testified to that effect.

Another who testified before that committee was Robert K. Richards, able assistant to the president of the NARTB. As long ago as 1942, Mr. Richards had reported to the Office of Censorship, where he was a broadcast censor during the war, that the War Problems Division of the FCC and the Foreign Language Section of the OWI were engaged in an effort which, whether by contrivance or not, was usurping the function of the only agency designated to supervise censorship.

Mr. Richards, with Edward H. Bronson—who now is NARTB's director of Television Code affairs and was then also a censor—undertook an exhaustive study of the OWI-FCC procedure. They discovered, and Mr. Richards later testified to the fact before a Select Committee of the House, that the Commission was granting temporary renewals to some foreign language broadcasters who failed to "take a hint" from OWI minions that certain of the station commentators were "undesirable." It was established conclusively that some good American citizens, both native born and naturalized, were removed from the air because of this pressure.

This was total suppression—the complete throttling of opinion—a kind of censorship not even justified in wartime. As a result of the investigation, the courage of certain foreign language licensees and the decisiveness of Byron Price, who was director of censorship, this excursion into the field of program control was broken up.

Mr. Richards and Mr. Bronson would have won no popularity contests among certain licensees and many staff members of the Commission and OWI in 1943 when their findings were publicized. The Select Committee investigation was an ill-starred one—but the latter-day Katyn Forest Committee report has confirmed their findings. Perhaps it is not too late, although a decade has passed, to bow in the direction of these two gentlemen, who may have made a unique contribution to free broadcasting in this nation.

Surely there is an old lesson to be learned anew: That vigilance against program control by Government must be eternal.

Meet BIG MIKE

Meet BIG MIKE . . . the Midwest's biggest entertainer and salesman. BIG MIKE is the pacesetter for an Empire! In this land of plenty . . . too real to be fabulous . . . lives BIG MIKE, physical trademark of the Big Station KFAB. BIG MIKE knows everybody . . . everybody knows BIG MIKE. He's the biggest, most powerful voice in the land. When he speaks . . . people in five states listen . . . they act, they buy. BIG MIKE is the powerful influential, friendly index to a $2,000,000,000 market, a market made up of 2,000,000 busy, friendly people . . . who live and work in the perfect balanced economy of agriculture and industry. Radio Station KTUL
Boulder on-the-park
Tulsa, Okla.

Bud :

I wonder if you and the other members of your sales staff realize just what a fine job your Sales Promotion Manager, George Ketcham and his efficient staff have been doing for KTUL thru' these past ten years.

As you perhaps do not know, I maintain a file in my office for all of the radio stations in our operating area...some seventy-five or eighty stations in all. Thru' the year sales promotion material is received from many of these stations, some of it is good, some is not so good, nevertheless all of this material is filed for future reference.

Ever so often I delve thru' this file and "weed-out" this material to make room for new material. I have been engaged in this activity thru' this past week. I knew I had received a lot of good material from KTUL from time to time, but until this week, I did not realize how much more of this material I had received from KTUL than I had received from any other radio station in our area. Good material too, the kind that fairly "rings the bell" in the time buyer's mind. And since I "uncovered" this experience this week, the thought just occured to me that you and your sales staff might have overlooked the fine job that George has been doing to help them to "sell" KTUL. So, now my friend, you have a reason for this letter. Believe you me, I for one, "bow" to George Ketcham for the help he has given me thru' his many sales promotional pieces, down thru' the years. And, I certainly think he deserves a real "pat on the back" for a job well done.

With every good wish for Ktul's continued success, I am,

Cordially yours,

D.C. Sperry, Advtg. Mgr.

FCC REPORTS ON FISCAL '52

Budget cuts curtailed activity but non-broadcast workload was onerous.

MAGNITUDE of FCC's nonbroadcast workload is pointed up in the Commission's annual report to Congress this week by Chairman Paul A. Walker. The report covers Commission progress for fiscal 1952, the year ending June 30, 1952.

"Because it enters the home, broadcasting commands so much popular interest the average person does not realize that there are now 45 times more nonbroadcast stations than there are broadcast stations, and that the former are equally important to the public interest and convenience," the report states. It explains:

In other words, more than 200,000 radio authorizations are held by public agencies and by private industry and individuals as compared with less than 5,000 stations engaged in program broadcast. The broadcast total includes about 1,200 pickup and studio-transmitter links. The nonbroadcast figures, on the other hand, do not indicate the actual number of transmitters involved, since a single authorization—as in the case of a police or fire department, railroad, taxicab company, etc.—can cover many portable or mobile transmitters. Thus, the safety and special radio services collectively represent nearly 540,000 transmitters operating on the land, on the sea and in the air.

The report notes the increasing use of radio over other methods of communication and explains that today radio is being utilized for about 60 different kinds of services in the U. S.

"As a result," the report says, "the number of radio authorizations on the books of the Commission this year, for the first time, exceeded the 1,000,000 mark."

Highlights of matters concerning broadcasting in fiscal 1952 are considered in the report to include:

● Lifting of the 3½-year TV freeze on April 14, 1952, opening up 70 uhf channels which with the existing 12 vhf channels would allow some 2,000 stations in nearly 1,200 communities.

● Increase of AM station authorizations to 2,420, 35 more than on June 30, 1951, with fewer AM stations being deleted than during either of the previous two years.

● Decrease of only 11 commercial FM station authorizations to total of 648, in contrast with 73, 133 and 155 for the previous three years respectively, while the number of licensed FM stations grew from 534 to 582.

● Proposal to add 540 kc to broadcast band.

● Interference complaints required more than 10,000 field investigations, almost 500 more than in 1951, while 6,817 related to TV (6,002 in 1951). Complaints of interference to AM reception decreased to less than 2,300.

● Number of violation notices for all radio services, issued after monitoring detection, mounted to 10,139—1,360 over 1951, but broadcast notices were not detailed.

● Drastic reduction in number of broadcast station inspection as result of budget cuts and travel limitation—to total of 532 (1,490 station inspections in 1951). For 1952, AM station inspections totaled 444 (compared to 1,242 in 1951) while FM totaled 65 (204 in '51) and TV 23 (44 in '51).

● Enactment in October 1951 of Public Law 200, 82d Congress, implementing the Conelrad plan to prevent use of broadcast signals as "homing" device by attacking enemy forces.

● Enactment on July 16, 1952, of Public Law 554, 82d Congress, known as the McFarland Act, amending the Communications Act and revising Commission operating procedure.

In a section devoted to national defense, the report observes, "The widespread network of communication so essential to the nation's defense also includes broadcasting. Apart from its morale consideration, this service has to play its part in civilian defense through its ability to bring information to the public with instantaneous speed."

Respecting Conelrad, the report points out that "from the standpoint of persons whose equipment is involved, the program has been a voluntary and cooperative one. Thus far, the Commission has given primary attention to the broadcast stations.

"The response of the broadcasters has been excellent. In fact, their assistance has been so productive that the Commission has been able to develop a sound basic plan for altering broadcast stations and controlling their operations . . . to confuse an enemy."

High praise is given in the report for amateur radio station operators and their role in emergency and disaster events. However, the problem of interference to TV reception also is noted. The report states:

Interference to the reception of television broadcasting continues to be a matter of concern to the Commission and to amateurs throughout the United States. The Commission is continuing to conduct studies with a view to clarifying individual responsibilities in cases where the operation of amateur stations causes interference to TV reception; however, definite standards have not yet been adopted. . . .

The Commission's field engineers, individual amateurs, and amateur committees have accomplished outstanding results in clearing many interference cases. Upon investigation, a great number of cases attributed to amateur operation have been found to be due to other causes. In a majority of cases where the interference was due to an amateur station, the inherent sensitivity of TV receivers to frequencies outside the TV channels has been the fault. Usually, simple filtering and shielding applied to the TV receiver has eliminated the interference. In most cases where the radiation of spurious and harmonic emissions by an amateur transmitter in the TV channels has caused interference, the amateurs have been able to satisfactorily eliminate such interference.

An extensive portion of the report is devoted to developments in AM, FM and TV, including a summary of the television freeze and the reallocation proceeding. Curtailment of activity because of budget cuts is noted.

A breakdown of the Commission's fiscal 1952 income and expenditures follows:

Appropriation	
Regular appropriation (salaries and expenses)	$6,116,650
Supplemental	468,900
Total funds available	$6,585,550
Obligations	
Personal services	$5,957,642
Travel	76,370
Transportation of things	13,998
Communication services	152,183
Rents and utilities	48,247
Printing and reproduction	29,225
Other contractual services	62,312
Supplies and materials	137.295
Equipment	107,419
Refunds, awards, and indemnities	20
Total obligations	$6,584,711
Savings, unobligated balance	839
Total	$6,585,550

Three Sales Approved

APPROVAL of the sale of WNER Live Oak, Fla., was among three transfer grants made by FCC last week. Norman O. Protsman, general manager of WNER, bought the station for $40,000. Transfers approved by the Commission:

WNER Live Oak, Fla.—Live Oak Bcstg. Co. Granted assignment of license from John A. Boling to Norman O. Protsman; consideration $40,000 (BAL-1484).

WMAN Mansfield, Ohio—Richland Inc. Granted consent to Ruth Rubin, Executrix of Monroe F. Rubin Estate, to transfer control to Ruth Rubin, et al., heirs. No monetary consideration (BTC-1431).

KRCT Baytown, Tex.—Bay Bcstg. Co. Granted consent to W. B. Bates, et al., to transfer control to Frank W. Sharp (who acquires 55% interest) and W. D. Christmas (who acquires 45%); consideration $29,980 (BTC-1421).

KEN JAMES, host of WOW-TV Omaha's *Cup & Saucer Club*, interviews a special guest, Mrs. Ivy Baker Priest, who becomes Treasurer of the United States in the new administration.

Truman Hopes To Be Back On Radio, TV Hookups

PRESIDENT Harry S. Truman hopes his Thursday night radio-television talk will not be his last broadcast contact with the American people.

Talking to a B•T reporter prior to his final radio-press conference Thursday, the President indicated he has cherished the opportunities to make known his views in a personal manner by reaching the firesides of nearly every home in the nation.

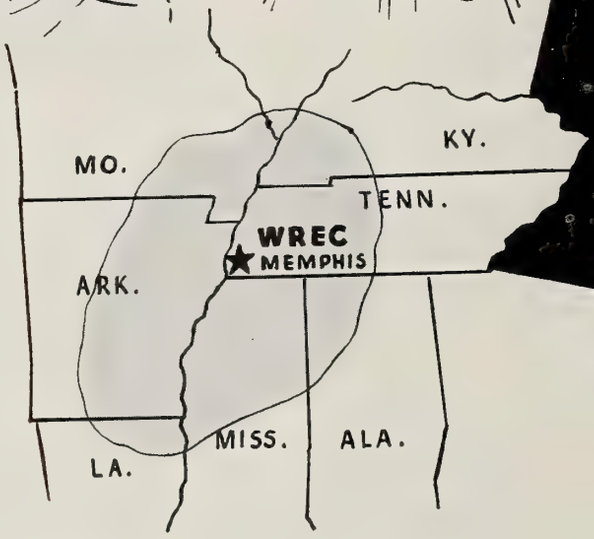
"We're hoping you'll be heard frequently on radio and television after you leave the White House," the President was told.

The Chief Executive replied that he hoped so, too.

Though the President is reported to have received many offers to write his memoirs or appear on radio and TV, he refused at his news conference to give any indication of his plans. He added that no ex-President should take advantage of the prestige of the office by using communications media unfairly. He put President-elect Eisenhower on the spot by suggesting that news conferences provide a necessary contact between the White House and the nation. The President-elect has been quoted as being uncertain about continuance of weekly radio-press sessions.

House Info. Post to Sullivan

NEW Co-Ordinator of Information in the U. S. House is Lawrence Sullivan, former newspaperman and author and since 1936 research assistant to Republican leaders Rep. Bertrand H. Snell (N. Y.) and Speaker Joseph W. Martin Jr. (Mass.).



Mr. Sullivan succeeds Francis M. LeMay of Alabama. Mr. LeMay will remain with the House group as economic research editor. The Co-ordinator of Information acts as a fact finder for House members.

Mr. Sullivan, a native of San Francisco, headed the Hoover Commission's task force on publicity and public relations operation in the federal government. He is an active member of the National Press Club, and was treasurer and member of the board of the Professional Chapter of Sigma Delta Chi, national journalism fraternity.

SENATE COMMERCE GROUP ORGANIZED

Sen. Charles W. Tobey (R-N.H.) as the top man on the Senate Interstate & Foreign Commerce Committee says he will maintain a firm grasp on communications.

ACTIVE interest in broadcasting, as well as other types of communications, will be maintained by Sen. Charles W. Tobey (R-N.H.), the chairman of the Senate Interstate & Foreign Commerce Committee said last week. He said he would be chairman of the Communications Subcommittee, as well as of the full committee. Sen. Tobey already has interceded in the ABC-United Paramount Theatres merger case (see separate story on page 50).

Appointment of Robert D. L'Heureux as chief counsel and director of the Commerce Committee's professional staff also was announced by Sen. Tobey last week. Mr. L'Heureux, who comes to the Commerce Committee from the position of chief counsel of Senate Banking & Currency Committee, like Sen. Tobey is from New Hampshire. He graduated from St. Anselm's College, Manchester, N. H., in 1934; Georgetown U. Law School in 1938. He holds masters in law and arts from Georgetown U. and George Washington U., also Litt. B. from U. of Montreal. Since June 1950 he has been counsel to the Joint Committee on Defense Production. Working with Mr. L'Heureux will be Nicholas Zapple, communications specialist on the staff.

Senate Commerce Committee, which has jurisdiction over broadcasting and the FCC, as organized last week comprises GOP Sens. Homer E. Capehart (Ind.), John W. Bricker (Ohio), Andrew F. Schoeppel (Kan.), John M. Butler (Md.), John Sherman Cooper (Ky.), Dwight Griswold (Neb.) and Charles E. Potter (Mich.), and Democratic Sens. Edwin C. Johnson (Col.), Warren G. Magnuson (Wash.), Lyndon B. Johnson (Tex.), Lester C. Hunt (Wyo.), John O. Pastore (R.I.), A. S. (Mike) Monroney (Okla.) and George A. Smathers (Fla.).

New Committee Faces

New to the committee are Sens. Schoeppel, Butler, Cooper, Griswold, Potter, Pastore, Monroney and Smathers. Lost to the committee were Sens. John J. Williams (R-Del.) appointed to Agriculture and Banking and Currency Committees; Owen Brewster (R-Me.), defeated; James P. Kem (R-Mo.), defeated; Ernest W. McFarland (D-Ariz.), author of the McFarland Communications Act and Majority Leader in the last Senate, defeated; Brien McMahon (D-Conn.), died, and Herbert R. O'Conor (D-Md.), retired.

Sen. Capehart is chairman of the Senate Banking & Currency Committee as well as a member of the Commerce Committee. Sen. Johnson (Tex.) is Minority Leader in the Senate.

Sen. Bricker was the author of a resolution (S J Res 28) in the 82d Congress calling for an FCC study of educational TV.

In other committee assignments in the upper house, Sen. Leverett Saltonstall (R-Mass.) was made chairman of the Independent Offices Subcommittee (FCC appropriations among others) of the Senate Appropriations Committee. This committee is chairmanned by Sen. Styles Bridges (R-N.H.). Among other Senate committee chairmen of interest to broadcasters were the following:

Finance, Sen. Eugene D. Millikin (R-Col.); Foreign Relations (Voice of America), Sen. Alexander Wiley (R-Wis.); Government Operations (including FCC), Sen. Joseph R. McCarthy (R-Wis.); Judiciary, Sen. William Langer (R-N.D.); Labor and Public Welfare, Sen. H. Alexander Smith (R-N.J.), and Rules, Sen. William E. Jenner (R-Ind.).

Sen. Prescott Bush (R-Conn.), until recently a board member of CBS, was named to Banking & Currency and Public Works. Sen. Edwin C. Johnson (D-Col.) was named to Finance in addition to Commerce. Sen. Lyndon B. Johnson, whose wife owns KTBC Austin, Tex., was named to Armed Services as well as Commerce group. Sen. Robert S. Kerr (D-Okla.), who has stockholdings in WEEK Peoria, Ill., and KRMG Tulsa, Okla., was named to Finance and Public Works. Sen. William F. Knowland (R-Calif.), whose family has stockholdings in the *Oakland* (Calif.) *Tribune* (KLX-AM-FM), was named to Appropriations and Foreign Relations.

Congressional Critics Vocal On Govt. 'Star' Suit

CONGRESSIONAL criticism of the government's anti-trust suit against the Kansas City Star Co. (WDAF-AM-TV) mounted last week, with freedom of the press raised as an issue.

Latest critic of the Justice Dept. action and grand jury indictment was Rep. J. P. Hillelson (R-Mo.), a House freshman. He told colleagues that "if and when the *Kansas City Star* is vindicated, then I intend to press to find out if this was politically inspired and those who were responsible for it." If so inspired, he indicated, freedom of the press would be involved.

Rep. Hillelson thus joined Sen. Frank Carlson (R-Kan.) in scoring the allegation that the Star Co. is "monopolizing the dissemination of news and advertising" in Kansas City. Sen. Carlson described the suit as "punitive action" by the retiring Democratic Administration. The Justice Dept. civil suit also asked revocation of the licenses of WDAF-AM-TV, owned by the Star Co. [B•T, Jan. 12].

The publishing firm has less than 60 days to withdraw pleas and enter appropriate motions. Roy A. Roberts, president of the Star Co., and Emil A. Sees, *Star* advertising director, were arraigned on the charges Jan. 9. Their counsel entered pleas of not guilty. The defendants were not required to appear [At Deadline, Jan. 12].

Mr. Roberts has promised the firm will file for a bill of particulars "so that we will know what we have to meet and prepare our defense accordingly," and assured "there will be no unnecessary delay" in bringing actions to a final hearing.

Truman Accepts Resignations Of Secretaries Sawyer, Kimball

ROUTINE resignations of Secretary of Commerce Charles W. Sawyer and Secretary of the Navy Dan Kimball, both identified with radio properties, were submitted to President Truman last week.

Mr. Sawyer, owner of WING Dayton, WCOL Columbus and WIZE Springfield, all Ohio, will return to his broadcast and other interests. Mr. Kimball has been re-elected vice president and director of General Tire & Rubber Co., which owns majority stock in MBS as well as Yankee and Don Lee networks [At Deadline, Jan. 12]. Mr. Truman lauded their accomplishments in accepting the resignations, effective tomorrow (Tuesday).

McCARTHY HITS MADISON TV CP

In letter to the FCC, the Senator protests 'Times' editors' participation.

SEN. JOSEPH R. McCARTHY (R-Wis.) has protested an FCC grant of a TV application by Badger Television Co. for Ch. 3 in Madison.

In a Jan. 8 letter to FCC Chairman Paul A. Walker, the Wisconsin Senator said he wanted to "bring evidence to the Commission showing that it would be against the public interest to have either Mr. Evjue (William T. Evjue, editor of *Capital Times* and president of the applicant) or Mr. Parker (Cedric Parker, city editor of *Capital Times*) exercising any control over a television station."

He asked the Commission to tell him if it wanted his evidence and when it desired that he present it. As of this week he had not received a reply.

Badger Television is a combination of two TV applicants—WIBA and Television of Wisconsin Inc. [B•T, Dec. 22, 1952]. WIBA is owned by the same interests which publish *Wisconsin State Journal* and *Capital Times*, both of which opposed Sen. McCarthy's bid for re-election as well as before.

Other Stockholders

Among the other stockholders in Badger is William E. Walker, who has interests in WMAN Marinette, Wis.; WESK Escanaba, Mich.; KXGI Ft. Madison, Ia., and WBEV Beaver Dam, Wis.

Opposing Badger's application for Ch. 3 is WISC Madison, which is half-owned by the *Superior* (Wis.) *Telegram*.

Meanwhile, Sen. McCarthy has ordered the staff of the Senate Government Operations Investigations subcommittee to look into complaints of "favoritism" and "incompetence" in the FCC from "half-a-dozen" Senators [B•T, Dec. 8, 1952]. Investigating staff comprises Roy M. Cohn, chief counsel, and Robert Kennedy, brother of newly-elected Sen. John F. Kennedy (D-Mass.), assistant counsel. GOP members of the Investigations subcommittee in addition to Sen. McCarthy are Sens. Karl E. Mundt (R-S. D.), Charles E. Potter (R-Mich.) and Everett M. Dirksen (R-Ill.). Democratic members are Sens. Stuart Symington (D-Mo.), John L. McClellan (D-Ark.) and Henry M. Jackson (D-Wash.).

In the first meeting of the Senate Judiciary Committee, which is chairmanned by Sen. William Langer (R-N. D.), it was decided to continue the work of the communist-hunting Internal Security Subcommittee. One of the units of the Internal Security Subcommittee has been investigating red infiltration in the entertainment and radio-TV industries [B•T, Nov. 29, 1, 1952]. Although the Internal Security Subcommittee chairman has not been named, Sen. William E. Jenner (R-Ind.) has indicated that he would head the probers.

Bill on Foreign Identity

REQUIREMENT that foreign agents or those persons representing foreign governments identify themselves as such when broadcasting or writing articles was proposed last week by Rep. Chauncey W. Reed (R-Ill.).

In a bill (HR 1069), referred to House Judiciary Committee, penalty for not so representing themselves in a preface to the broadcast or writing would be a fine of not more than $10,000 or five years' imprisonment, or both.

ABC-UPT MERGER STILL PENDS; FCC STAFF DRAFTING DECISION

The Commission is eying Capitol Hill for word from Sen. Tobey on proposed hearings on motion picture-TV mergers—but won't necessarily hold up its approval of the examiner's initial favorable report.

FATE of the merger of ABC and United Paramount Theatres remained undetermined last week as the FCC:

(1) Awaited word from Sen. Charles W. Tobey (R-N. H.) on when he would hold hearings on the question of motion picture and TV mergers.

(2) Had its staff working on a final decision which in the main was an acceptance of the examiner's initial favorable report.

Sen. Tobey, chairman of the powerful Senate Interstate & Foreign Commerce Committee which has jurisdiction over radio and TV, remains firm in his plan to hold a hearing on the subject, he told BROADCASTING • TELECASTING last Thursday.

Still Opposes Merger

Plans will be made for the hearing this week, he said. He declared that all—or most—members of the Senate Commerce Committee would be invited to sit in on the hearing.

Still opposed to approval of the merger, he restated what he had wired the FCC two weeks ago—that he doubted that the Commission had the legal right to approve it [B•T, Jan. 12].

Vehemently, he claimed that the merger would "vitiate" the anti-trust laws and that it would be against the public interest.

He called the hearing he was planning to hold on the merger "important." He will call ABC, UPT and Paramount Picture officials, he said, as well as FCC commissioners and others.

In response to a question, he said that he had been thinking about a special counsel for the hearing, but that he had not yet made up his mind.

Committee Meets Today

Sen. Tobey said flatly he had not spoken to President-elect Eisenhower about the merger case when he saw him in New York last Wednesday.

The Senate Commerce Committee is scheduled to meet for the first time today (Monday) on the confirmation of Sinclair Weeks to be Secretary of Commerce in the Eisenhower cabinet. It is believed that the Committee will be organized during these sessions or immediately thereafter.

A check with most carryover members of the Commerce Committee indicated that Sen. Tobey had not spoken to anyone but Sen. Edwin C. Johnson (D-Col.) about the merger case. He told Sen. Johnson, who was the Democratic chieftain of the Committee during the 82d Congress, that he was planning on holding a hearing on the subject.

In his Jan. 7 wire to the Commission, Sen. Tobey said that the Senate Commerce Committee would hold a hearing "sometime in the next two weeks" on the ABC-UPT merger. In fact the wire read ABC-"Paramount Pictures" merger.

Sen. Tobey's wire also said that the hearing would be held to determine whether or not legislation chould be prepared to prevent such mergers. He said that the hearing would also consider applications for educational TV channels.

In addition to Sen. Tobey, Sen. William Langer (R-N. D.) also objected to the approval of the merger [B•T, Dec. 8, 1952]. Sen. Langer is the chairman of the Senate Judiciary Committee.

One aspect of the Tobey intervention in the ABC-UPT merger case was made clearer last week. It was learned on best authority that the Commission would not have gotten out its final decision on the case in less than three weeks after the oral argument. Thus, the Commission cannot be said to be holding up the decision while awaiting further word from the New England Senator.

Webster Opinion Expected

Additional aides have been furnished Comr. Frieda B. Hennock, who has maintained that she needed help in preparing her dissent. Also expected to issue some sort of separate opinion is Comr. Edward M. Webster, who apparently is ruffled by the contention of the Paramount parties that their transfers are involuntary.

The General Counsel's office, it was understood, is preparing the majority opinion.

Meanwhile, the FCC last week figuratively threw back at Atty. Gen. James McGranery his suggestion that the Commission deny the merger.

The Attorney General in a Jan. 7 letter to FCC Chairman Paul A. Walker pointed out that approval of the merger might (1) encourage other motion picture theatre owners to merge with radio-TV interests and thus "present serious competitive problems;" (2) block the entrance of new entrepreneurs into motion picture exhibition, radio or TV; (3) give the merged company too great an advantage in purchasing films, and (4) result in the subordination of radio and TV to motion picture theatres.

The FCC's reply was a cold recital of the facts of the case and an insistence that it was still in the "adjudicatory" stage and must be decided on the record. It also pointedly referred to the fact that it would be "unlawful and inappropriate" for the Commission to "entertain contentions advanced by non-participants in the proceeding."

Jones' Denunciation

The latter point was in reference to the Broadcast Bureau's attempt to persuade the Department of Justice to assist it in trying the Paramount case. The Justice Department's refusal to participate caused former Comr. Robert F. Jones to issue a scathing denunciation late in 1951 [B•T, Dec. 10, 1951].

In addition to the merger, the Paramount case involves the sale of WBKB (TV) Chicago to CBS for $6 million after the merger is approved; the finding that Paramount Pictures does not control Allen B. DuMont Labs. through its 25% stockholdings in the latter company; and the transfers of various radio and TV properties from the old Paramount Pictures Inc. to the new UPT and Paramount Pictures Corp.

3 Washington State Issues Affect Broadcast Interests

THE WASHINGTON State Legislature, which convened last Monday, faces at least three proposals important to broadcasters during its current term.

They are: Access for all media to administrative hearings, increased appropriations for state advertising and action toward establishment of educational television stations in at least 17 cities (see story, page 106).

State Sen. Albert D. Rosellini, Democratic floor leader, said he plans to introduce a bill requiring all state administrative hearings to be thrown open to public, press, radio and TV.

The Washington State Advertising Commission, under chairmanship of Loren B. Stone, general manager of KBRO Bremerton, planned to propose that up to $550,000 of receipts from the existing 3% transient room tax be put in a fund for tourist promotion.

The proposal is expected to have the backing of newspapers, radio and television stations, although the funds would be spent in out-of-state advertising.

The state's advertising account for tourist business has been handled in recent years by MacWilkins, Cole & Weber, Seattle agency.

KPLN License Application Designated for Hearing

APPLICATION by Leo Howard trading as Mid-South Broadcasting Co. for a license to cover construction permit for KPLN Camden, Ark. (1370 kc, 1 kw day), was designated for hearing by the FCC last week on issues involving possible misrepresentation of facts on ownership.

The Commission said it wished to determine whether the construction permit granted to Mr. Howard for KPLN, or the rights and responsibilities, "have been transferred, assigned or disposed of, directly or indirectly," without FCC's consent.

The Commission said it wanted information on methods of financing construction and operation of KPLN; on all contracts and agreements between Mr. Howard on one hand and George L. Byars, C. T. Mullins and David Crockett on the other; on their participation, along with Randolph James, in financing and construction, and on ownership of KPLN's physical facilities.

Also sought is information which would enable FCC to determine authority and control by the permittee, whether he concealed facts on his own financial qualifications and whether execution of any contracts violated the Commission's rules and regulations.

Four New AM Grants

FOUR construction permits for new AM stations were granted by FCC last Thursday, and one company was granted a new CP to replace an expired permit. Two of the CPs for new stations are for Indianola, Miss. Total AM stations authorized now is 2,629. New grants:

Indianola, Miss. — Central Delta Bcstg Co. Granted 1380 kc 500 w daytime; engineering condition (BP-8458).

Indianola, Miss.—W. W. Chapman. Granted 900 kc 250 w daytime, engineering condition (BP-8521).

Coudersport, Pa.—Farm & Home Bcstg. Co. Granted 600 kc 500 w daytime; engineering condition (BP-8374). (Comr. Eugene Merrill did not participate; Comrs. E. M. Webster and Frieda Hennock dissented.)

Emporium, Pa. — Elk - Cameron Bcstg. Co. Granted 1340 kc 100 w fulltime (BP-8265). (Comrs. E. M. Webster and Frieda Hennock dissented.)

WANA Anniston, Ala. — Anniston Radio Co. Granted CP to replace expired CP (BP-8119) for 1490 kc 250 w fulltime; engineering condition (BP-8688).

presto change-o

If you're *not* using Presto discs at present, then it's time for a change. The reason, in one word . . . quality! From the meticulous preparation of the aluminum base in the Presto plant to the final play-back in the studio, quality is the byword . . . your assurance of consistent performance, unmatched fidelity of reproduction, long service. That's why Presto is the proven leader in the professional disc field . . . a leader that merits your consideration when you decide that it's time for a change . . . right now.

Long List of Witnesses On Theatre-TV Agenda

FCC will take up policy questions on the movie industry's request for group of exclusive video frequencies.

LIST of theatre-TV witnesses and synopsis of the subjects on which they will testify were submitted to the FCC last week by the Motion Picture Assn. of America and the National Exhibitors Theatre Television Committee.

Also filing were NARTB, AT&T, Western Union and a number of other organizations.

Theatre-TV hearings resume at 10 a.m. Jan. 26 before the Commission *en banc* in the Dept. of Commerce auditorium. They will be concerned with policy questions on the motion picture industry's request for exclusive frequencies for theatre-TV. Preliminary hearing last fall covered engineering and accounting [B•T, Oct. 27, 1952].

At that time, motion picture witnesses asked for 360 mc in the 5925-6875 mc band. As alternatives, the theatre-TV witnesses requested that the closed circuit service be classified as an industrial radio service in the 6575-6875 mc, or that it be given a home in the spectrum above 10,700 mc. The space would be used for three two-channel theatre services. Each channel would be 30 mc.

Accounting witnesses said that a nine-city New York-Washington system would cost between $50 and $60 million to build and about $2 million a year to operate [B•T, Nov. 3, 1952].

Economic Study of Theatre TV

In addition to submitting lists of witnesses and summaries of testimony, the MPAA and NETTC communication also included four exhibits. One was an economic study of theatre TV by Manfred Toeppen, California consultant, and the other three were technical reports.

NARTB called attention to the fact that it intended to participate in the cross-examination of witnesses and to offer rebuttal testimony.

Motion picture witnesses, and their affiliations, are as follows:

Roger Albright, MPAA; Harold Azine, Closed-Circuit Television Co. (former TV chief of Federal Civil Defense Adm.); Rudolph Bing, Metropolitan Opera Co.; Harry Brandt, Independent Theatre Owners of America; S. M. Chartok, Gilbert & Sullivan producer; Robert W. Coyne, Council of Motion Picture Organizations; John Eberson, architect; S. H. Fabian, chairman, NETTC; Benjamin Fine, *New York Times;* Emanuel Frisch, Metropolitan Motion Picture Theatres Assn.; Richard Hodgson, Paramount Pictures; Andrew F. Inglis, McIntosh & Inglis, consulting engineers; Lester B. Isaac, Loew's Inc.; Griffith Johnson, MPAA; Eric Johnston, MPAA; Raymond Klune, 20th Century-Fox.

Also Abe Lastfogel, William Morris Agency; Peter Levathes, 20th Century-Fox; Arthur L. Mayer, producer; Tom Meany, Collier's; Gilbert Miller, producer; Roy V. Peel, U. S. Bureau of Census; Terry Ramsaye, *Motion Picture Herald* and *Daily;* Wilbur Snaper or Trueman Rembusch, Allied States Assn. of Motion Picture Exhibitors; Sidney Schreiber, MPAA; Spyros Skouras, 20th Century-Fox; Mitchell Wolfson, Theatre Owners of America and owner of WTVJ (TV) Miami; Manfred Toeppen, consultant.

Prospective NARTB witnesses are:

Raymond Guy, NBC; Rodney Chipp, DuMont; John Leitch, WCAU-TV Philadelphia; J. E. Mathiot, WGAL-TV Lancaster, Pa., and WDEL-TV Wilmington, Del.; Carlton G. Nopp, WMAR-TV Baltimore; R. J. Rockwell, Crosley Broadcasting Co.; Thad H. Brown, manager of TV Department, NARTB; Neal McNaughten, director of engineering, NARTB.

Ridder to State Dept.?

WALTER T. RIDDER, associated with Ridder Publications which owns stock in WCCO-AM-TV Minneapolis, was mentioned in political circles last week for a possible State Dept. appointment.

Mr. Ridder reportedly was in line for the post of Deputy Assistant Secretary for Public Affairs under the new Eisenhower Administration. At present, he is deputy director of European information for the Mutual Security Agency. If appointed, he would serve with Carl W. McCardle, named Assistant Secretary for Public Affairs (Voice of America, other information activities).

A former newspaperman, Mr. Ridder is a director of Ridder Publications, which holds stock in Midwest Radio and Television Inc. (WCCO-AM-TV) through its interest in Mid Continent Radio-Television Inc. Mid Continent holds a 53% interest and CBS 47% under a merger plan approved last July involving the old WTCN-TV. Ridder interests also own other station properties outright.

New England Group Proposes TV on Mount Washington

A GROUP of Maine and New Hampshire radio station executives, aligned with former Gov. Horace Hildreth of Maine, filed Friday for a new TV station on Ch. 8 atop Mount Washington, N. H.

Filing in the name of Mount Washington TV Inc., the group includes Gov. Hildreth, now president of Bucknell U., as president; William H. Rea and Harold Meyer of WPOR Portland, Me.; William F. Rust, part owner of five radio stations in New Hampshire and manufacturer of electronic equipment; John H. Guider, lawyer and owner of WMOU Berlin, N. H.; Carleton D. Brown, president of WTVI Waterville and WRKD Rockland, Me.; Charles Hildreth, Portland businessman; Theodore Atwood, Portland attorney, and John M. Kimball, Portland broker, all of whom were listed as directors.

Use Pioneer Equipment

It was understood the company plans to use buildings and some equipment from the late John Shepard 3d's pioneering FM operation atop Mount Washington. Spokesmen for Mount Washington TV Inc. said technical personnel assigned to operate the proposed transmitter would have to remain atop the mountain for periods of about 20 days.

The proposed station, officials reported, would give "high-grade" TV service to nearly 1.5 million persons in three states. The transmitter would be located 6,280 feet above sea level and would radiate 106 kw power, maximum for that site under FCC standards. It was estimated that construction and a year's operation of the station would cost $850,000. Affiliation with all major TV networks is contemplated.

Two other applications for Ch. 8—only allocated vhf channel which will work on Mount Washington, according to Mount Washington TV Inc.—already are on file with FCC. Both of these were filed by Lewiston (Me.) stations WLAM and WCOU.

'Ike' Advisors Initiate VOA, Psychological Study

As the new Administration prepared to take office last week, the problem of the U. S. overseas radio arm was commanding top attention. Involved was the future of Voice of America.

A TWO-PRONGED study of U. S. psychological warfare strategy, with special emphasis on the status of the State Dept.'s Voice of America, was underway last week in President-elect Eisenhower's cabinet and advisory circles.

An inquiry was launched by Nelson A. Rockefeller's three-man committee on government reorganization. A survey was contemplated by a new seven-member psychological strategy commission headed by William H. Jackson, New York investment banker.

There reportedly was sharp disagreement between the Rockefeller group and Gen. Eisenhower's other advisors on what should be done with the shortwave radio arm. Congress also is looking into possible reorganization of VOA, and of other U. S. foreign information programs [B•T, Jan. 12; Nov. 24, 1952].

These possibilities were held out last week in the wake of conferences by the Eisenhower cabinet and other advisors:

(1) Realignment of VOA as a separate independent agency. Its present status is a semi-autonomous arm of the State Dept.

(2) Creation of a Foreign Operations Dept. This would include all information and propaganda activities of the State Dept., Mutual Security Agency and perhaps other government departments.

(3) Retention of the Voice and other information operations in the State Dept. as an arm of foreign policy.

Dulles Would Separate

John Foster Dulles, Secretary of State-designate, reportedly favors divorcing VOA from the State Dept. and setting it up as part of an overall foreign office. Mr. Rockefeller has advocated the independent agency setup, or as an alternative, a foreign operations office.

Dr. Milton Eisenhower, brother of the President-elect and member of the Rockefeller group, feels the international information program should be retained in the State Dept.

Gen. Eisenhower has not committed himself beyond going on the record for a stronger information effort. He is expected to announce formation of a special commission under Mr. Jackson, with cabinet officers also appointing members. The special group will survey methods for improving and coordinating psychological strategy.

A staff report of a Senate Foreign Relations subcommittee, which will hold hearings shortly on all U. S. foreign information programs (State Dept., MSA, TCA, Dept. of Defense), has favored a foreign office setup, separating VOA from the State Dept. The subcommittee hopes to meet this week.

The Rockefeller committee has been studying overall reorganization of government agencies and departments, particularly the Defense Dept. Any reorganization plans also might touch on independent agencies, of which one is the FCC.

AN EAR FOR AN ERA,

an eye for an ear

MAN and boy, we've been in radio for thirty years and now we're adding television. Target date is April 1st. We feel a little like the guy who was a human target at the State Fair—his job was to stick his head through a hole in a big canvas and dodge baseballs. Things went along fine for season after season. He became adept as a coyote; it took a mighty fancy shot to bean him. Well, he got beaned proper one day and sat down on a cactus. That gave him an idea. He fixed things up so he could stick his head through the canvas, painted a target on his southern exposure, and behind him folks threw darts.

* * *

The transmitter antenna will rise 833 feet. From it, powered with 100,000 watts, our visual signal on Channel 4 will have an estimated radius of 98 miles, reaching a potential audience of 591,140 people. No, they don't all have TV sets. But give 'em a couple of months or so. Texans move fast.

So does our AM signal—right into our 78-county, 5-state coverage-and-market area which accounts for Amarillo's highest-in-the-nation per capita retail sales figure.

Choose your weapon—baseballs or darts.

REPRESENTED NATIONALLY BY THE O. L. TAYLOR COMPANY

Navy Honors 'Victory'

THREE NBC representatives have received the Navy's Distinguished Public Service Award honoring the network's 26-week TV film series, *Victory at Sea.* Recipients were Robert W. Sarnoff, NBC-TV vice president in charge of film production; Henry Salomon, originator, producer and co-author of the series, and Richard Rodgers, who composed the music. The awards, the Navy's highest to civilians, were presented last Thursday by Navy Secretary Dan Kimball. The Dept. of Defense noted the program won the Sylvania Television "Grand Award" for 1952. The series was produced as a public service by NBC with Navy cooperation.

DEFENSE PLANNERS STUDY SMALL SET

For emergency power failure the answer may be a portable radio receiver.

A POCKET-SIZE radio set tailored to receive special civil defense programs on selected frequencies in the event of a war emergency is under study by the government and set manufacturers, it was revealed last week.

The Federal Civil Defense Administration said it is working with the radio industry to develop a low-cost, mass-produced receiver for public use if regular power supplies fail.

Under study are use of transistors or batteries, or device may be patterned after the old-time crystal sets. Listeners would get civil defense and other emergency information by tuning to 640 or 1240 kc—frequencies set aside under the Conelrad broadcast alert plan designed to deny navigational aid to any enemy planes. They would be clearly marked on each set.

FCDA noted that the public now can rely on some 27.5 million auto receivers and 10 million portable battery sets in the U. S. in case of home power failure. Radio stations also have supplementary power transmission sources. Conehad, utilizing the two frequencies, is slated to become effective about March 1 [B•T, Dec. 8, 1952].

The agency pointed out that 70% of automobiles and 98% of all homes in the country are radio-equipped. Factories are currently installing receivers in 92% of new cars.

Flow of Vital Data

Plan for the new receiver represents another step by FCDA to insure immediate and continuous flow of survival data to the public under air-raid alert or bombing attack conditions. The device is in the development stage, with FCDA officials hoping to interest manufacturers in production. It is felt sets could be sold for as little as $2 each.

On another front, FCDA has urged state and local directors to form Broadcasters Advisory Committees to help organize and operate local emergency broadcast plans. Experienced radio-TV executives will be asked to volunteer as key staff members in each CD area.

Advisory bulletins sent to local CD directors outline Conelrad mechanics and background suggest scripts for programming on AM stations participating in the project. (FM and TV stations would be blacked out in the event of an alert.)

ETHICAL AGONIES CONFRONT NARTB

Broadcast Standards of Practice is undergoing quiet revision but with TV the story's much different. Public and media complaints show resentment against over-commercialism as well as transgressions of decency. Pitchmen and religion are trouble sources.

THE two self-regulating codes of NARTB—radio and television—are starting to get their lumps but the industry's trade association is taking positive steps to keep electronic ethics above reproach.

Last week the NARTB Television Code Review Board tore into a stack of complaints that included everything from camera angles on bosoms to the enthusiastic pitches of Charles Antell Inc. and its assorted proprietary enterprises (see Charles Antell story page 80).

The other NARTB code group—Standards of Practice Committee—moved forward in its job of rewriting the 1948 radio code. This group held a Monday-Tuesday meeting at NARTB Washington headquarters.

With public and media interest focused on television programs, the radio code group is undertaking its major task quietly and without industry attention.

The TV code board, on the other hand, directed attention to the steps it is taking. Actual operations of the board as it contacts stations, networks and other program sources are kept under wraps since it is felt public revelation of individual cases would destroy the board's ability to halt objectionable telecasts and deal successfully with those who violate the code. TV code board chairman is John E. Fetzer, WKZO-TV Kalamazoo, Mich.

Next Sessions in April

Two meetings have been held by the radio code committee since mid-autumn. The group, headed by John F. Meagher, KYSM Mankato, Minn., will meet again just before the NARTB convention at Los Angeles April 28-May 1. It may have a complete revision ready for consideration by the NARTB Radio Board in June.

A high spot in the TV Code Review Board's meeting was an interview with Sen. Charles W. Tobey (R-N. H.), chairman of the Senate Interstate & Foreign Commerce Committee. Sen. Tobey described TV as "the greatest miracle since Christ turned water into wine" (See Sen. Tobey's radio-TV philosophy, page 43). He commended the TV board for "the good programs on television."

Three problems held the TV code board's attention—length and content of commercials; curtailment of pitch-type telecasts and commercial religious programs.

The first two problems are somewhat interlocking. Many complaints have been received about pitches of some sponsors, a subject that inspired the board last Oct. 1 to call for a revision of material to bring it within the time limits and good taste requirements of the code.

Film versions of pitches were scanned by the board last week, with claim made that some have been revised to come within the code. The board advised against "excessive repetition" of single releases of such programs and reminded code subscribers they are expected to adhere to this language:

> . . . Each television broadcaster should refuse his facilities to the advertisement of products and services, or the use of advertising scripts which the station has good reason to believe would be objectionable to a substantial and responsible segment of the community.

Edward H. Bronson, director of TV code affairs whose job is to monitor the industry, receive complaints and execute the board's directives, was instructed to develop "a standard formula or procedure for checking television programs and advertisements against the code provisions."

Walter J. Damm, WTMJ-TV Milwaukee, offered a motion calling for a careful study of the whole area of commercial length and content. At present the code limits commercial time (3 minutes in 15). The board approved the idea unanimously. The resolution says in part:

> In radio, it is comparatively simple to "count and time" the voicing of words and phrases descriptive of an advertiser's product. Television, through its new and novel techniques, makes this difficult, and, in addition, through the audio presentation of words and phrases descriptive of an advertiser's product, presents the additional factors of the presentation of trade marks, reproduction of packages videowise, and also the problem of the name trade marks and pictures of packages in background in connection with the visual presentation of entertainment features of the program.

The board authorized a staff study of station and network practices, feeling more information is needed before anything can be done about efforts of code subscribers to tailor their advertisers to the code.

In its search for a better feeling of the public pulse, the code board is about ready to adopt a new code seal as approved in December by the NARTB Television Board of Directors.

The religious problem has been aggravated by intra-church feuding between orthodox and evangelical groups. The latter want NARTB to cut out of the TV code this language, "A charge for television time to churches and religious bodies is not recommended."

The code board, noting misunderstandings in interpreting the language, advised code subscribers that individual station managements should determine their own policy in light of local conditions.

The TV code board plans to meet again in late April and expects to make a presentation to the Los Angeles convention.

NARTB Membership Drive Producing Results

MEMBERSHIP in NARTB, both radio and television, has been moving upward, according to President Harold E. Fellows. The membership drive among AM-FM stations, conducted by William T. Stubblefield, station relations director, produced 27 new members in 10 days, he said.

Leading NARTB areas is District 5, of which Thad Holt, WAPI Birmingham, is director. The district produced 12 new members, with Georgia providing 10. State chairman in Georgia is James Woodruff, WRBL Columbus.

Some 80 broadcasters in the 17 districts comprise the membership group working under Mr. Stubblefield's direction.

Fifteen TV stations have joined NARTB since late November, Mr. Fellows announced.

TAFTS BUY WTVN FOR $1.5 MILLION

In Ohio transaction last week Edward Lamb's Columbus TV station was bought by the Taft family interests. The Tafts also have a controlling interest in the Cincinnati Times-Star that owns the WKRC outlets.

SALE of Edward Lamb's WTVN (TV) Columbus, Ohio, for $1.5 million cash to the Taft family interests of Cincinnati was announced last week by Mr. Lamb and Hulbert Taft Jr., executive vice president of WKRC-AM-FM-TV Cincinnati, owned by the *Cincinnati Times-Star* and in turn controlled by the Taft family.

Formal application for FCC consent to the sale is in preparation and may be filed with the Commission late this week. It is expected that the license of WTVN will be assigned from Picture Waves Inc., owned by Mr. Lamb, to a new corporation composed of Taft family principals in Radio Cincinnati Inc. (WKRC) and the *Times-Star*.

President of Radio Cincinnati is Hulbert Taft Sr., publisher of the *Times-Star* and cousin of Sen. Robert A. Taft (R-Ohio). David Taft is secretary of Radio Cincinnati while Robert A. Taft Jr. is general counsel.

Lamb Is Consultant

In addition to the $1.5 million cash consideration, the prospective new owners of WTVN have retained Mr. Lamb as consultant to the Columbus TV station for 10 years at an annual retainer of $12,500.

WTVN (TV) began operations in August 1949 on vhf Ch. 6. A fortnight ago it received permission from FCC to increase effective radiated power from 19.8 kw visual to full 100 kw [B•T, Jan. 12].

Its transmitter is located atop the LeVeque-Lincoln Tower in downtown Columbus, while studios and offices recently were moved to the Television Center at 753 Harmon Ave.

WTVN (TV) presently has monthly earnings of between $25,000 and $30,000, it was reported.

In addition to WTVN (TV), Mr. Lamb owns WICU (TV) Erie, Pa., and is permittee of the newly authorized WMAC (TV) Massillon, Ohio. He also owns WTOD Toledo, WIKK Erie and WHOO Orlando, Fla.

It was understood that the disposition of WTVN (TV) would leave Mr. Lamb free to prosecute his TV applications at Toledo and Portsmouth, Ohio, and Orlando.

Negotiations with Mr. Lamb have been underway for several months, it was stated, and the agreement was signed Jan. 10 in his Toledo law office (see picture). R. C. Crisler & Co., Cincinnati radio-TV station brokerage firm, acted for the seller.

"Our decision to seek a TV station in Columbus seemed to us logical," Hulbert Taft Jr. said. "We are an Ohio corporation. As our near neighbor and state capital, Columbus has many political, economic and cultural aspects which are common with those of our own city.

"In Cincinnati, throughout our years of radio and TV operation, our first concern has been to take a responsible and constructive part in all phases of our community life. We hope to do the same thing in Columbus. We shall consider the operation of WTVN (TV) a great challenge. Our two principal goals will be to improve greatly the entertainment and educational values of its programs and to widen the scope of its public service."

Reassures Personnel

Mr. Taft also issued a statement to present employes of WTVN (TV) assuring them that they will be asked to remain with the station when and if the application for assignment of license is approved.

Radio Cincinnati had its beginnings in 1939 with the purchase of WKRC from CBS by the *Times-Star*. The station was separated from the *Times-Star* and set up as a separate corporation in 1948, though Radio Cincinnati is principally owned by the *Times-Star*.

Radio Cincinnati has been a pioneer in both radio and TV. It established WKRC-FM there in 1947, the initial Transit Radio outlet. WKRC-TV was established in 1949. It is to be one of the first stations to erect the new type 12-bay Superturnstile antenna and it hopes to be the first outlet in Cincinnati area to go high power, planned in about a month.

The transfer papers are being prepared by Bernard Koteen, Washington legal counsel for the Taft interests, and Fly, Shuebruk & Blume, representing Mr. Lamb.

COMPLETING contract for sale of WTVN (TV) Columbus, Ohio, to Taft family for $1.5 million cash are (l to r): Frank C. Oswold, administrative assistant to Edward Lamb, WTVN owner; Mr. Lamb, who also has other radio-TV interests; Hulbert C. Taft Jr., executive vice president of Radio Cincinnati Inc., licensee WKRC-AM-FM-TV Cincinnati; Richard C. Crisler, vice president of Transit Radio, and Robert A. Taft Jr., general counsel for buyers.

Drops 'Pitch' Advertising

KFMB-TV San Diego is dropping some $50,000 annual revenue by turning down "heavy pitch" and "bait type" commercials, Howard L. Chernoff, general manager, said last week. He said viewers' confidence in advertisers on KFMB-TV's Ch. 8 and advertising in general will not be jeopardized by the station.

More and more stations who in early years "had fallen prey" to this "super, high-pressure 'pitch' and its misleading 'bait' commercial," Mr. Chernoff said, "recently have swung to the point of view that it will be better not to accept that kind of dollar."

WKY's Sugg Elected

P. A. SUGG, general manager of WKY-AM-TV Oklahoma City, has been elected to the board of directors of the Oklahoma Publishing Co., parent company of the stations, it was announced last week. The firm publishes the *Daily Oklahoman, Oklahoma City Times, Farmer-Stockman* and *Mistletoe Express*. Mr. Sugg has been manager of WKY since Jan. 1, 1946, and directed operations which put WKY-TV on the air June 6, 1949.

Miller Takes WBBM Post; WCBS Names Untermeyer

APPOINTMENT of William F. (Bill) Miller, sales manager of WCBS New York, to the same post with CBS-owned WBBM Chicago was announced last week by H. Leslie Atlass, vice president in charge of CBS Radio's Central Div.

Henry Untermeyer, CBS Radio Spot Sales, was named to succeed Mr. Miller as sales manager of WCBS Radio effective today (Monday), simultaneously with Mr. Miller's assumption of his WBBM duties, WCBS Manager Carl S. Ward reported.

At the same time the appointment of C. Gilman Johnston, former assistant sales manager of WBBM, as account executive with CBS Radio Spot Sales in New York was announced by Wendell B. Campbell, general manager of Radio Spot Sales.

Mr. Untermeyer **Mr. Miller**

Mr. Miller joined CBS as a salesman for KMOX St. Louis in June 1949, became KMOX's eastern representative in April 1951, and was named WCBS Radio sales manager a year later.

Mr. Johnston, with CBS for seven years, also started with KMOX as a salesman. He served CBS Radio Spot Sales in various capacities before moving to WBBM as eastern sales representative. He was named WBBM assistant sales manager in August 1951.

Mr. Untermeyer joined WCBS in 1937, and has been program operations manager, staff director, director of special features and account executive, joining CBS Radio Spot Sales in May 1950.

Utah Meet Set Jan. 26

LEGISLATIVE matters affecting broadcasters and TV problems will highlight the annual meeting of the Utah Broadcasters Assn., Jan. 26 in Salt Lake City's Newhouse Hotel.

KDYL-TV --NOW 30,000 WATTS --FROM 8,900 FEET!

An aerial view of America's most powerful channel 4 transmitter—KDYL-TV's new mountain top development! From a 200 foot tower on an 8,700 foot mountain peak, KDYL-TV's 30,000 watts of radiated power now more than doubles the market. This total height of 8,900 feet now extends television coverage to virtually the entire state of Utah plus portions of Southern Idaho, Western Wyoming and Eastern Nevada, serving a population whose effective buying power is nearly a billion dollars yearly.

Get your share of business in this huge intermountain market. Write today for availabilities.

WSM-TV REPORTS SUCCESS IN ITS BOOSTER TEST

In further experiments held this month, WSM-TV used a booster station 70 miles from its Nashville transmitter to reach the area around Lawrenceburg, Tenn. This is an account of the findings.

OPTIMISTIC report on the results of its TV booster station in Lawrenceburg, Tenn., 70 miles from Nashville, was made last week to the FCC by WSM-TV Nashville.

Report was the second submitted to the FCC since the Nashville TV station received authority last July to conduct experimental tests to determine the effectiveness of using vertical polarized co-channel signals to reach fringe TV areas. The first, on equipment developments, was submitted last October.

In its latest report, WSM Inc.'s President John H. DeWitt Jr. told of equipment refinements and the results of program tests on Jan. 1-4, 9-10. The booster station at Lawrenceburg was used to pick up WSM-TV's horizontally polarized Ch. 5 signals and retransmit them vertically polarized—still on the Ch. 5 wavelength.

Signals from the 10-watt directional transmitting dipole produced "highly acceptable" pictures on a random sampling of the 275 TV sets in the Lawrenceburg area, Mr. DeWitt reported. In many cases, he said, they were received by built-in or indoor "rabbit ear" antennas.

The system is operating satisfactorily, he reported, and is "remarkably stable."

Some of the difficulties encountered were reported by Mr. DeWitt. One was horizontal radiation from the transmitting antenna. Another was fading of the main signal from WSM-TV.

Need for further experimentation was expressed by Mr. DeWitt. This would seek, he said, (1) the elimination of horizontal radiation in the transmitter, (2) simplification of the receiving antenna, (3) more observations of picture quality, (4) techniques to overcome fading, (5) work on simple vertical receiving antennas, and (6) overcoming interference in areas where the direct signal and the booster signal are equal.

Mr. DeWitt estimated that the 20-element receiving array and the single dipole transmitting antenna—both of which are "backed" with a series of vertical wires for gain and directivity—would cost about $5,000 under commercial conditions. He declared that operating costs would be negligible.

One of the great advantages of the booster method of filling in fringe areas is saving in spectrum space, Mr. DeWitt emphasized. This is because the booster uses the same frequency that the main channel is on. A satellite operation involves an additional wavelength, he pointed out.

Another saving would be to viewers who would not have to spend excessive amounts for tall, highly sensitive receiving antennas. Of the 275 sets in Lawrenceburg, all have Yagis, Mr. DeWitt pointed out. Figuring $100 per installation, that would mean that $27,500 had been spent on antennas, he said. If all of Lawrenceburg's 1,750 families had to put such antennas up, it would total $175,000 in expense, he declared. In addition, community TV systems require an installation charge of about $100, and a monthly fee.

TRANSMITTING antenna in Lawrenceburg, Tenn., used by WSM-TV Nashville during experiments to fill in community with Ch. 5 telecasts from main transmitter some 70 miles away. Screen of vertical wire acts as directional booster for folded dipole radiator.

TWENTY-element broadside array, nicknamed the "Shinto Shrine," used by WSM-TV Nashville to receive its Ch. 5 signals in Lawrenceburg. Small box in lower center of array is amplifier.

Quaal Cites Farm Relations

NEED for more aggressiveness in public relations by farm organizations and by farmers themselves was cited last Monday by Ward L. Quaal, assistant general manager of the Crosley Broadcasting Corp., Cincinnati.

Addressing a session of the National Council of Farmer Cooperatives' annual convention at New Orleans' Hotel Roosevelt, Mr. Quaal proposed establishment of a well-financed public relations office in Chicago, or another central location, to serve all American agriculture groups.

He suggested that the office be financed by the nation's farm groups and operated by men trained in radio-TV, general public relations and promotion work. These men would, in turn, seek advice from agriculture experts, Mr. Quaal added.

WJNO Inc. Elects Officers

SYNDEY KING RUSSELL has been re-elected president of WJNO Inc., licensee of WJNO West Palm Beach, Fla., it was announced last week.

Other officers elected include H. V. McMillan, executive vice president; George H. Buck Sr., vice president; Ruth Shockley, secretary, and George H. Buck Jr., treasurer. Directors include Messrs. Russell, McMillan and Buck Sr.; Adrian C. Leiby of Bergenfield, N. J., and B. F. Paty Sr. of West Palm Beach.

KWKH Promotes Three

THREE staff changes at KWKH Shreveport, La., were announced last week by Henry B. Clay, general manager. William E. Antony, for more than 25 years KWKH chief engineer, has been appointed technical adviser to both KWKH and its sister station, KTHS Little Rock, Ark. O. S. Droke, with KWKH for the past 17 years, will succeed Mr. Anthony. Frank Page, formerly KWKH chief announcer, has been named KWKH assistant program director.

So Proudly We Hail . . .

ANNE HOLLAND of Baltimore

Wins Top Honors in Second Annual McCall's "Mike" Awards!

Anne Holland . . . one of the brightest in the galaxy of stars at WBAL . . . Director of Women's Activities for WBAL and WBAL-TV's Public Affairs and Information Department.

We are proud to announce that Anne Holland's work has received the recognition it deserves. . . . Mrs. Holland has won highest honors in McCall's Magazine's "Mike" Awards for American women rendering public service through radio and television.

So . . . proudly we hail our Anne Holland!

This is McCrary Auto Service, Inc.

This is what Mr. Carl McCrary says

"We have sponsored Fulton Lewis, Jr., since WPNF (Brevard, N. C.) *went on the air. The program has been satisfactory in every way. It has given us a lot of publicity, and we're happy to say that we are well satisfied. It is our intention to continue to sponsor Fulton Lewis, Jr., indefinitely."*

This is Fulton Lewis, Jr.

whose 5-times-a-week program is available to local advertisers at local time cost plus low pro-rated talent cost. Currently sponsored on 372 stations by more than 750 advertisers (among them 64 automotive firms), the program offers a tested means of reaching customers and prospects. For availabilities, check your Mutual outlet—or the Co-operative Program Department, **Mutual Broadcasting System,** 1440 Broadway, NYC 18 (or Tribune Tower, Chicago 11).

Houston City Council Votes Radio-TV Ban Lift—But

The running battle of broadcast media for equal access in news coverage took an unusual turn in the Texas City last week when councilmen voted "no" editing.

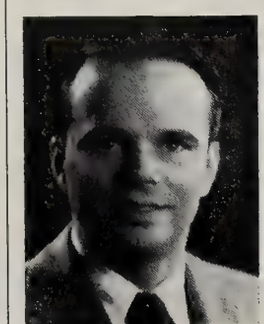
HOUSTON City Council ban on tape recording and telecasting was lifted last Wednesday by a vote of 6-3. However, councilman Joe Resweber stipulated that the entire council session must be broadcast or telecast, with no editing permitted.

Minimum time of council sessions has been one hour. The "no editing" provision makes the ban just as effective as before, Bill Crawford, news editor, KNUZ Houston, charged. It is difficult for successful commercial stations to clear an hour of time to broadcast unedited meetings which at times will have little or no news value, he emphasized.

Houston Mayor Roy Hofheinz commented that his station, KTHT, will broadcast entire sessions beginning Jan. 21. Editing rights afforded newspapers have the support of the Texas Assn. of Broadcasters and Sigma Delta Chi, national journalism fraternity.

WNBC-WNBT Changes Place Buck in New Post

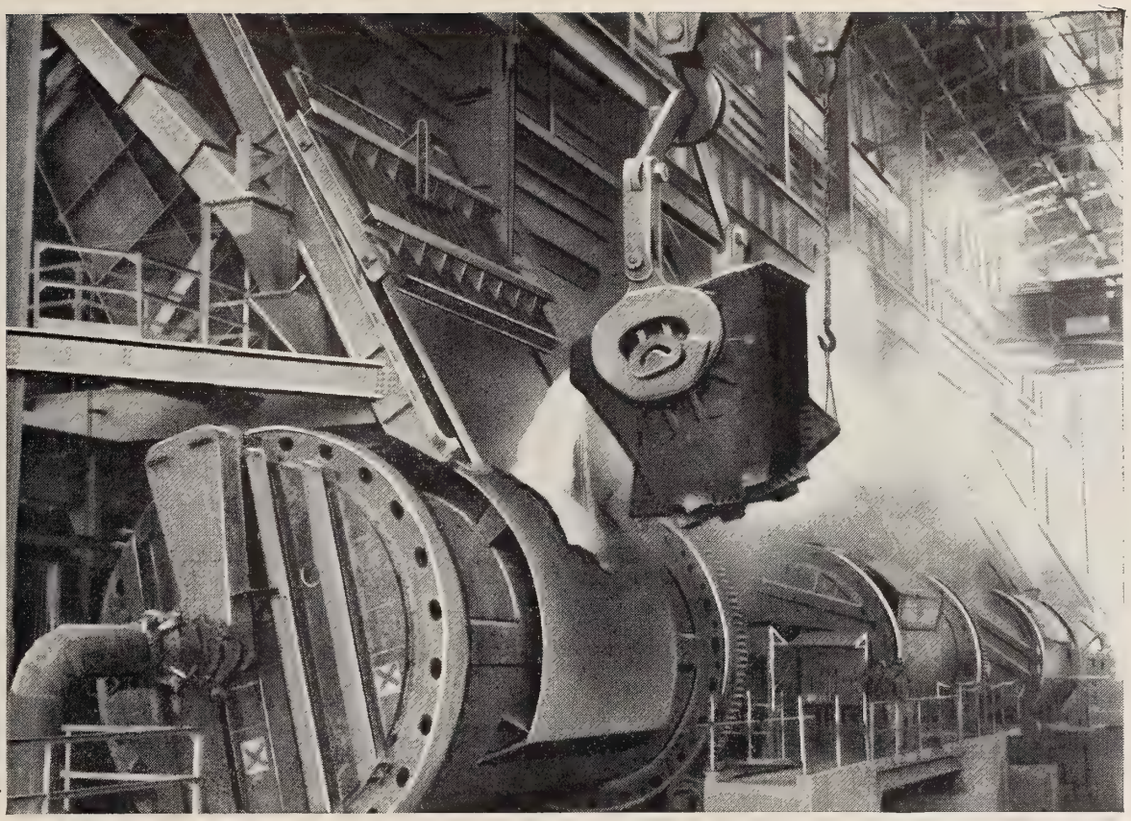
COMPLETION of readjustment and realignment of staff at NBC's WNBC-WNBT (TV) New York was announced last week by Ted Cott, NBC vice president and general manager of the stations.



Heading the changes was the appointment of Max W. Buck, formerly sales and advertising manager of King's Super Markets, as director of merchandising, advertising and sales promotion for WNBC-WNBT (TV). His first project, according to Mr. Cott, will be the retail drug promotion tie-in.

Under the reorganization, Jay Smolin will continue as advertising and promotion manager of the stations and Bill Rich as merchandising manager, both reporting to Mr. Buck.

In another change, Steve Krantz will supervise a newly-organized special features section consisting of associate producers Leon Tokatyan, Phyllis Adams and Barbara Walker. This group will handle public service programs, special projects and certain WNBT (TV) house packages. Mr. Krantz will report to Dick Pack, director of operations and programs.



KXOK Elects Roberts Pres.

ELZEY M. ROBERTS Jr., who has been serving as vice president of KXOK Inc., licensee of KXOK-AM-FM St. Louis, has been elected president of the corporation, it was announced last week. He succeeds Elzey Roberts, who becomes chairman of the board.

Mr. Roberts

The younger Mr. Roberts, 32, is a 1942 graduate of Princeton U. He is a member of the Institute of Radio Engineers, Sigma Xi, honorary scientific fraternity; Sigma Delta Chi, professional journalistic fraternity, the St. Louis Advertising Club and the Naval Reserve.

Molten "matte" from the reverberatory furnace being charged into a converter at Chile Exploration Company's new Chuquicamata Sulphide Plant. The "blister" product of the converter, about 99% copper, is being shipped to Anaconda's Raritan Copper Works at Perth Amboy, New Jersey, for electrolytic refining.

there's a new flow of copper in Chile!

On November 5, 1952, the first copper was poured from Chile Exploration Company's new Sulphide Plant at Chuquicamata, Chile. Thus was marked the beginning of a new cycle of development of the Chuquicamata Mine—the tapping of the huge reserves of copper sulphide ore.

Heretofore, Chile Exploration Company had mined and treated only the oxide type ores, producing in recent years about 360,000,000 pounds of copper annually. Now, with the new plant, the Company is beginning to mine and process the sulphide ore underlying the oxide ore zone. The Sulphide Plant, begun late in 1948 to handle the increasing amounts of sulphide ore encountered in the pit, is built on a scale in keeping with the magnitude of the ore body. From this multi-million dollar project will come a steadily increasing flow of copper until its output capacity, coupled with that of the existing oxide plant, *exceeds 500,000,000 pounds of copper a year.*

This expansion of Chilean copper production is only one part of Anaconda's company-wide expansion, improvement and modernization program. Other phases of this program are increased zinc production . . . an aluminum reduction plant . . . a new "open pit" copper mine at Yerington, Nevada... increasing copper production from Butte mines . . . modernization and expansion of fabricating plants. All serve the same purpose: more metals for the metal-hungry U. S. economy. 52328-A

TV as Radio Price Lever Hit by SCBA Members

Actions by certain advertisers seen as possible trade restraints.

COLLECTIVE action by certain advertisers "to use the advent of television as a means of beating down the price of radio advertising" may be in restraint of trade, South Carolina Broadcasters Assn. members suggested at their Jan. 9-10 weekend meeting, held at Charleston.

The state group adopted a resolution calling on networks "to recognize the true value of radio advertising and to sell it for what it is worth," suggesting networks have forced down radio rates by "compelling" affiliates to deliver station time at a low figure and thus threatening future financial stability of the industry.

Walter J. Brown, WORD Spartanburg, was elected SCBA president. Other officers elected were James F. Coggins, WKDK Newberry, vice president; T. Doug Youngblood, secretary-treasurer; H. Moody McElveen, WNOK Columbia, and John M. Rivers, WCSC Charleston, two-year directorships; Milton Scarborough, WLCM Lancaster, to Mr. Coggins' unexpired term; Joseph Martin, WDSC Dillon, one-year term.

Plans were made to change the name of the group to South Carolina Radio & Television Broadcasters Assn.

Deviation from published radio rate cards was condemned by the association. A study will be made of the state sales tax as it relates to purchase of TV and broadcast equipment. Delegates were guests at a cocktail party. Retiring President Rivers was host.

Convention speakers included Ernest B. Vaccaro, AP White House correspondent; Joe C. Good, National Cash Register Co.; William B. Ryan, BAB president; L. H. Christian, WRFC Athens, Ga.; Robert Burton, BMI vice president in charge of public relations; William T. Stubblefield, NARTB station relations director. Wallace Martin, WMSC Columbia, was program chairman and moderator of a panel discussion on rates. B. T. Whitmire, WFBC Greenville, was entertainment chairman.

WGAR Answers Attack on Radio-TV Crime Shows

WHEN the *Cleveland News* took up the familiar newspaper party-line campaign attacking radio and television programs involving crime plots, WGAR Cleveland came back promptly with an analysis of crime news appearing in the same edition of the newspaper.

Under the title, "Blood Bath for Kiddies," the *News* (affiliated with WHK Cleveland) submitted an analysis of radio-TV programs in which 17 violent deaths purportedly were recorded in a single evening.

Day Cites Stories

Charles Day, WGAR newscaster, cited these stories in the same issue of the newspaper:

Page 1—Drunk-driving story, not violent "but distasteful and often fatal."

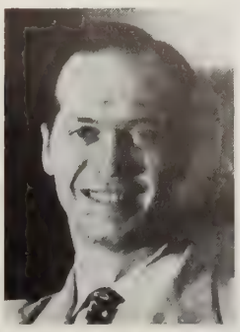
Page 3—2½ columns of gruesome details covering paternity trial. This recalled transcript of obscene divorce case newspaper had printed day after day while radio and TV avoided vulgar details. On same page of *News* was series of shocking statements by wife who had fatally stabbed husband.

Page 6—Details of death by dynamite.

Page 8—Woman slugged and robbed.

Page 16—Holdup story.

Mr. Day said the edition actually had a subnormal amount of crime news and WGAR had only one crime program that day. He pointed out that the criminal loses in the end in all radio-TV mysteries. He suggested people who live in big glass houses shouldn't hurl stones.



John F. Patt, WGAR president, said the *News* story "essentially distorts the situation." Use of composite figures covering seven stations multiplies the average mystery content by seven, he said, adding that the same distortion can be applied to other program types.

"There were about 150 individual programs in the Tuesday schedule logged by the *Cleveland News* writers," Mr. Patt said. "I suspect a summary of the same number of movies, news stories, books or stage plays would have discovered an equal proportion of murders or other crime mysteries. Fortunately, there are lots of program choices, both radio and television, at any given hour, for anyone who cares. . . ."

Ed McAuley, columnist writing in the Jan. 8 issue of the *News*, said newspapers "frankly appeal to one of the lowest expressions of human curiosity—the desire to know what goes on in other people's bedrooms," when ribald trials are underway. He called it "an unhappy combination of greed for bigger sales and rationalization regarding their duty to the public."

Clement Is Appointed To WROV-TV Post

JOHN CLEMENT, producer-director, WTAR-TV Norfolk, Va., has been appointed TV production director at WROV-TV Roanoke, Va., according to Frank Koehler, general manager, who also reported that studio facilities at WROV will be ready for production this month.

Mr. Clement

In his new assignment, which returns him to WROV where he was continuity director from 1949 to 1950, Mr. Clement will be responsible for all local programming.

A native of Radford, Va., Mr. Clement served two years in Air Force communications and has been an announcer and writer for a number of Virginia stations. He is a graduate of the National Academy of Broadcasting, Washington, D. C., and of New York U.'s Radio Workshop.

General Teleradio Sues KLAC-TV, UTP on Films

CHARGING a threatened breach of contract and asking declaratory relief, General Teleradio Inc., operators of Don Lee Broadcasting System and KHJ-TV Los Angeles, has filed a suit in Los Angeles Superior Court to prevent United Television Programs Inc. from leasing the Snader Telescriptions library to KLAC-TV, that city.

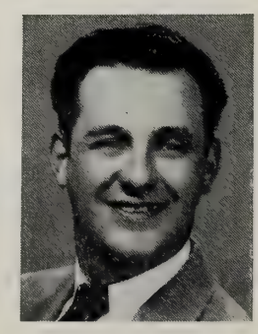
Named also as defendants are Ben Frye and Studios Films Inc., of which he is an executive; Dorothy Schiff Inc., licensee of KLAC-TV; Don Fedderson and Fred Henry, station general manager and program director, respectively; Gerald King and Wynn Nathan, UTP board chairman and western sales executive, respectively.

Wanted Injunction

General Teleradio had originally asked for an injunction to prevent release of musical films to KLAC-TV. But defendants involved agreed by stipulation last Wednesday not to release them pending the court hearing set for Jan. 28 before Judge Frank G. Swain.

Complaint charges that after the Snader musical films completed a one-year exclusive lease with KNBH (TV) Hollywood, on Jan. 14, 1952 and renewed for another year, they were also acquired last March by KHJ-TV under a "dual exclusivity" contract. When UTP acquired distribution rights late last year, KHJ-TV wanted to renew at a price of $24,000 for one year or $35,000 for two years, according to the suit. The complaint further contends the agreement was made and then UTP announced it wanted to extend the limited exclusivity to include KLAC-TV.

Six More NBC-TV Affiliates Bring Total to 71



NBC last week added six new television affiliates, bringing the total to 71, according to Harry Bannister, vice president in charge of station relations for NBC. The new affiliates are:

WALA-TV Mobile, Ch. 10, owned by the Pape Broadcasting Co. and scheduled to go on the air later this month; WFMJ-TV Youngstown, Ch. 73, owned by the Vindicator Printing Co., also this month; WWLP (TV) Springfield, Mass., Ch. 61, owned by Springfield Television Corp., to begin tomorrow.

WEEU-TV Reading, Ch. 33, owned by Reading Eagle Co., to begin about March 1; WJTV (TV) Jackson, Miss., Ch. 25, owned by Mississippi Publisher Corp. this month; KCBD-TV Lubbock, Ch. 11, owned by Bryant Radio & Television Inc., to begin about March 15.

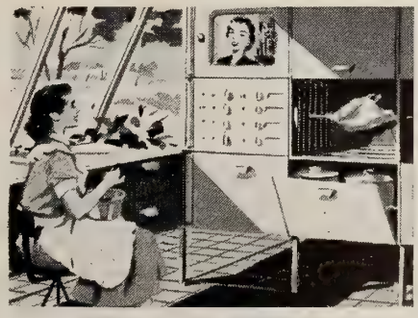
WPCT to Start Feb. 15

ISRAEL Putnam Broadcasting Co., licensee of WPCT Putnam, Conn., new 500 w daytimer on 1350 kc, last week announced the appointment of Daniel J. Hyland, co-owner, as manager of the station.

Mr. Hyland

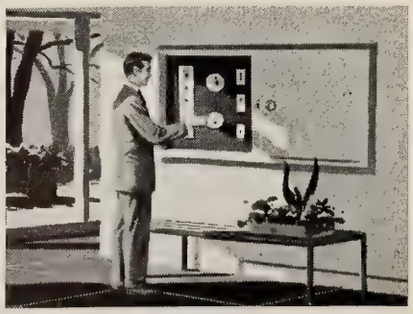
Mr. Hyland, a 15 year veteran in New England broadcasting, said that programming will get underway Feb. 15. Studios of the new station are nearing completion and equipment soon will be installed, he added.

WHERE WILL YOUR CHILDREN LIVE IN 1973?



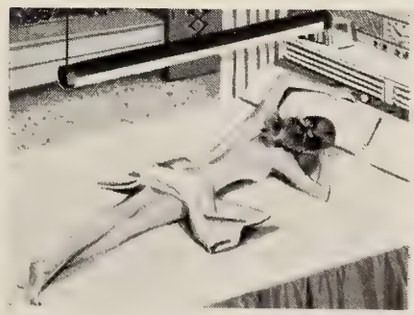
What kind of homes will your children have twenty years from now? The nation's electric light and power companies are thinking about them—*and getting ready for them.*

Part of the answer can be found in the new electric appliances still in the early stages of development.



There will be new ways of heating and cooling homes with the help of electricity. Glareless lighting will come on automatically. As darkness falls, ceiling panels will start to glow. There will be electric equipment to kill germs in the air and to filter out dust and pollen.

Most people will have electric kitchen equipment in units which can be arranged in different ways. They will be able to talk electronically to any room in their homes. They will have color television — several sets. They will need many times as much electricity as you use today.



To supply this extra electricity, the electric companies are making tremendous strides. They've doubled the post-war supply of electric power. By 1960, they'll triple it — with more to come. This is one more reason why there is no real need for new federal government electric projects.

COLOR TELEVISION. There will be almost as many sets in 1973 as there are radios today. That means most homes will have several television units—including one in the kitchen.

HOME CONTROL. Central electric "heart of the home" will control heating, cooling, lighting, communications — maybe even doors and windows.

LIGHT-CONDITIONING will include built-in sunlamps, special fixtures for producing striking lighting effects indoors and out, ceiling panels that glow.

THE HOMES OF TOMORROW, LIKE THE HOMES OF TODAY, WILL BE SERVED WELL BY AMERICA'S ELECTRIC LIGHT AND POWER COMPANIES*

"MEET CORLISS ARCHER"— ABC — Fridays — 9:30 P. M., Eastern Time.

*Names on request from this magazine

SALES and promotion managers of Westinghouse Radio Stations Inc. took part in two-day New York meeting last week. Group included (seated, l to r): Herb Masse, WBZ Boston; W. B. McGill, WRS advertising manager; John Stilli, WBZ. Standing, George Tons, KDKA Pittsburgh; Dave Lewis, KDKA; Eldon Campbell, WRS general sales manager; Jess Hadsell, WOWO Fort Wayne; Paul Woodland, KYW Philadelphia; Paul E. Mills, WOWO; Robert Teter, KYW; Tom Meehan, WBZ. Also taking part in the Westinghouse Stations sales discussions were officials of Free & Peters, station representatives.

Jonscher Heads Radio Sales In WMAL-AM-TV Shift

APPOINTMENT of Robert W. Jonscher, former WTOP Washington sales executive, as sales manager of WMAL that city was announced last week by Evening Star Broadcasting Co., WMAL-AM-TV licensee. Mr. Jonscher replaces Harvey L. Glascock, who has become TV sales manager.

In other shifts, George L. Griesbauer of the WMAL-AM-TV sales department, has been named to head the newly created WMAL-AM-TV sales service department, and Charles S. Tappy, formerly of the WTOP-TV sales department, has been appointed WMAL-AM-TV merchandising sales manager.

E. H. Meeks, former WTOP sales promotion director and prior to that assistant WLW Cincinnati promotion director, has been named new director of WMAL's combined promotion and publicity departments. He replaces John Ghilain and Van DeVries, both of whom recently resigned as WMAL promotion and publicity directors.

Second GE Uhf Shipment Sent to WEEK-TV Peoria

THE SECOND General Electric uhf transmitter was shipped last Tuesday to WEEK-TV Peoria, Ill. With a special GE antenna, to be shipped later this month, the 100 w output of the transmitter will be boosted to an ERP of 2 kw.

C. B. Akers, partner in WEEK-TV, reported that the station's transmitter building is ready for immediate installation of the transmitter. He said studio facilities already are being used on a closed circuit basis for training station personnel.

The station will be an NBC basic affiliate, but also will carry ABC and DuMont programs.

KUHT (TV)'s Target Date

NONCOMMERCIAL educational KUHT (TV) Houston, Tex., on vhf Ch. 8, will begin operating April 2, John Schwarzwalder, station manager, announced last week. He said broadcast hours will be 5 to 9 p.m., Monday through Friday. The station is to be operated jointly by the U. of Houston and Houston Independent Public Schools.

D. C. Train Wreck, Blast Brings Radio-TV to Scene

RADIO newsmen were on hand with all modes of paraphernalia—cameras, microphones, tape-recorders and other equipment—when a Pennsylvania train crashed a concourse at Washington, D. C.'s Union Station last Thursday morning injuring nearly 50 passengers.

To make activities more harried for the area's broadcasters, there were an explosion and a three-alarm fire.

At the train crash, WNBW (TV) (NBC) claimed a beat on live coverage. WTOP-AM-TV (CBS) came away with film clips and tape-recorded eye-witness accounts. WWDC-AM-FM (Mutual) said it speedily identified victims. WMAL-AM-TV (ABC) reported full coverage.

NBC live cameras, geared for Inauguration coverage, were on the scene at 10:20 a.m.—about 90 minutes after the accident—and piped in a direct visual account at 11:03 during its regular *Ask Washington* show with studio commentary by Frank Blair. Audio contact was established later, with Ray Scherer describing the scene. Camera pickup was directed by Ralph Burgin, WNBW program director. Engineering staff was supervised by Charles H. Colledge, John Rogers and Sherman Hildreth. Complete radio coverage to NBC was reported at 11 a.m. NBC-TV also filmed the fire-explosion at a tire-battery-radio store.

Two WTOP engineers—Bernard Swandic and Don Horner—tipped that station, having been on the Boston-to-Washington train. Bill Shadel aired news on his 9 a.m. CBS Radio *News of the World,* and Claude Mahoney taped interviews. Mr. Horner later appeared on local programs giving eye-witness accounts. WTOP-TV claims it was first with film coverage, using cutins on local and network programs.

WMAL radio claimed remotes by newsmen Harold Stepler and John Edwards and coverage of the wreck with tape descriptions. A special film interview program was telecast Thursday 8-8:30 p.m. by the ABC-TV outlet, which carried running accounts of the wreck and explosion with bulletins, pictures and films.

WWDC highlighted eye-witness accounts and newscasts stressing identification of victims, plus news spots on Transit Radio (WWDC-FM). Station sent two announcers to Union Station at 9:15 a.m., aired a telephone interview and tape-recorded accounts. Tapes were fed to the *Mutual Newsreel* at 7:45 p.m.

REPRESENTATIVES

Pearson TV Inc. Formed; Employes Buy 40% of Stock

FORMATION of John E. Pearson Television Inc., TV station representation firm, was announced last week by John E. Pearson, president of the new company as well as head of John E. Pearson Co., radio station representatives.

Employes of the new company have subscribed up to 40% of the stock issue, but no shares will be available to persons outside the firm. Mr. Pearson continues as sole owner of the radio representation organization.

Officers of Pearson Television include Mr. Pearson; Russel Walker Jr. and William Wilson of the New York office; Frank Reed of Chicago, and James Bowden of Minneapolis, all vice presidents, and Mrs. Agnes Ann Pearson, New York, secretary and treasurer.

Headquarters will be maintained at 250 Park Ave., New York, with branch offices at 333 N. Michigan Ave., Chicago; Northwestern Bank Bldg., Minneapolis; 1312½ Commerce St., Dallas; 2330 W. Third Ave., Los Angeles, and 57 Post St., San Francisco.

Mr. Pearson said the new company officially became active when WFPG-TV Atlantic City went on the air Dec. 20, 1952, and that the following outlets, currently under construction, also have signed Pearson Television to represent them: KCBD-TV Lubbock, Tex.; WHIZ-TV Zanesville, Ohio; WOSH-TV Oshkosh, Wis.; KGKL-TV San Angelo, Tex.; KFSA-TV Fort Smith, Ark., and WOUC-TV Chattanooga. Other TV stations to be represented by the new company will be announced shortly, Mr. Pearson said.

He noted that in each case to date, stations signing Pearson Television are under approximately the same ownership as radio stations represented by Pearson Co.

"We firmly believe that radio and television can be sold very successfully by the same representative in any market and that both media can live and prosper side by side," he said.

Kennedy Opens N.Y. Offices

KENNEDY Co., radio and television station representative at the Lincoln-Liberty Building, Philadelphia, last week announced the opening of New York offices at 342 Madison Ave. New offices will be managed by Foster G. Bowen.

Capper Joins Headley-Reed

GUY CAPPER, formerly of ABC's TV Spot Sales Dept., joins Headley-Reed TV, television station representation firm, as account executive effective today (Monday). Formerly with ABC owned stations and the ABC Pacific radio network, he has been engaged in radio and TV time sales for past 10 years.

Spot Radio Estimator

STATION Representatives Assn. last week distributed to advertisers and agencies the second edition of its Spot Radio Estimator for making rapid estimates of the cost of spot campaigns. Estimates, according to SRA, can be made for the cost of any time unit in any time segment for the most expensive station, average of network affiliates or average of non-network stations in any market.

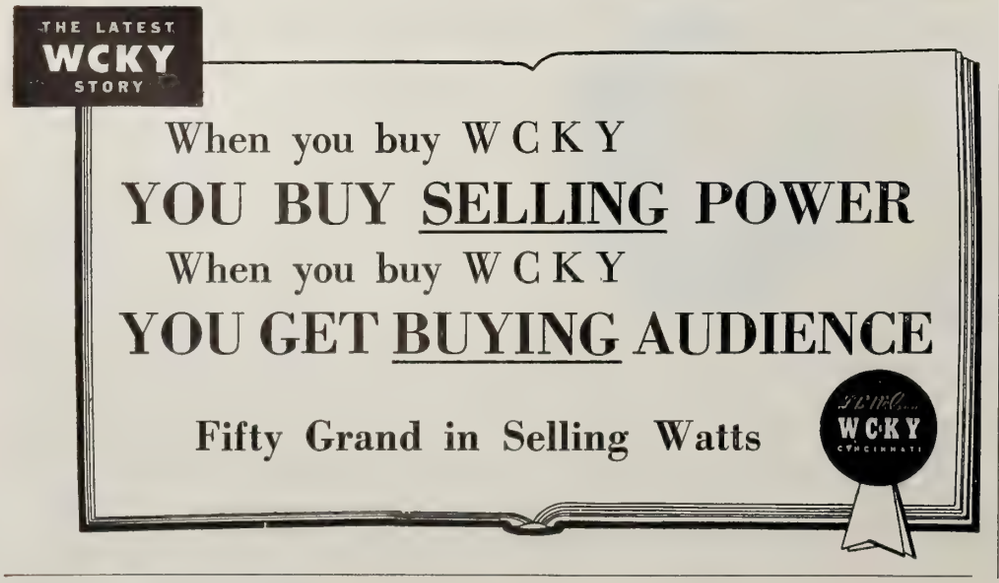
EXAMINING the new signal range calculator for television stations, being distributed by Headley-Reed Co. among agency timebuyers and research chiefs, is Tucker Scott (seated), chief timebuyer of BBDO, under the watchful eyes of (l to r) Jerry Zucker, of BBDO, and William Faber, Richard Hogue and Sterling Beeson of Headley-Reed.

TV's Signal Range Whipped By Headley-Reed Slide Rule

UNIQUE slide-rule for quick calculation of the signal range of a television station—any television station—was revealed last week by Headley-Reed Co., stations representatives, which is distributing it to timebuyers and agency research heads.



Headley-Reed officials said the slide-rule makes it possible to estimate the service area of any TV station within 30 seconds, as against, say 30 minutes or more by the mathematical methods which have been standard in the past.

They quoted agency authorities as saying the new device would save timebuyers thousands of hours' work in the course of a year. They said this slide-rule has been checked by television engineers and found to produce results consistent with FCC engineering standards within an error factor of not more than 10%—which, they said, researchers find satisfactory.

By adjusting the slide-rule to align the markings for channel, power and antenna height, it is possible with the signal range calculator to find quickly the approximate Grade "A", Grade "B", and "Principal City" coverage—within the meaning of FCC's standards—of any TV station, either uhf or vhf, Headley-Reed authorities asserted.

The calculator was devised and copyrighted by J. B. Epperson, an associate member of Federal Communications consulting engineers, and is being manufactured by Pioneer Electronic Supply Co. of Cleveland. It employs the physical mechanics of a slide-rule, with markings substituted in terms of channel number, antenna height, power, miles decibels, etc.

Spokesmen for Headley-Reed, which is distributing the device free to agency timebuyers and others to highlight its expansion in TV, said it already had been adopted for use by BBDO.

NBC to Wage Merchandising Drive for Kate Smith Show

In an aggressive move to show the impact of multi-sponsored TV programs, NBC has mapped plans for a campaign involving participation of food retailers in 60 cities.

A WEEK-LONG merchandising campaign will be conducted by NBC in connection with its *Kate Smith Hour* and in conjunction with cooperating food stores in 60 cities from Feb. 26 through March 5, Fred N. Dodge, merchandising director of NBC, announced last week.

Designed as a pilot effort in a forthcoming merchandising drive to demonstrate the impact of multi-sponsored television programs, the campaign will use a combination of point-of-sale material, on-the-air promotion, exploitation, newspaper and trade paper advertising, publicity and special programming both before and during the week.

Current food sponsors on the *Kate Smith Hour* (Monday-Friday, 4-5 p.m. EST) will be offered special services by all departments of the network during the campaign week, and the food chain stores and independents who sell sponsors' products in the 60 cities in which the program is heard will reciprocate by saluting Miss Smith, "the lady of song."

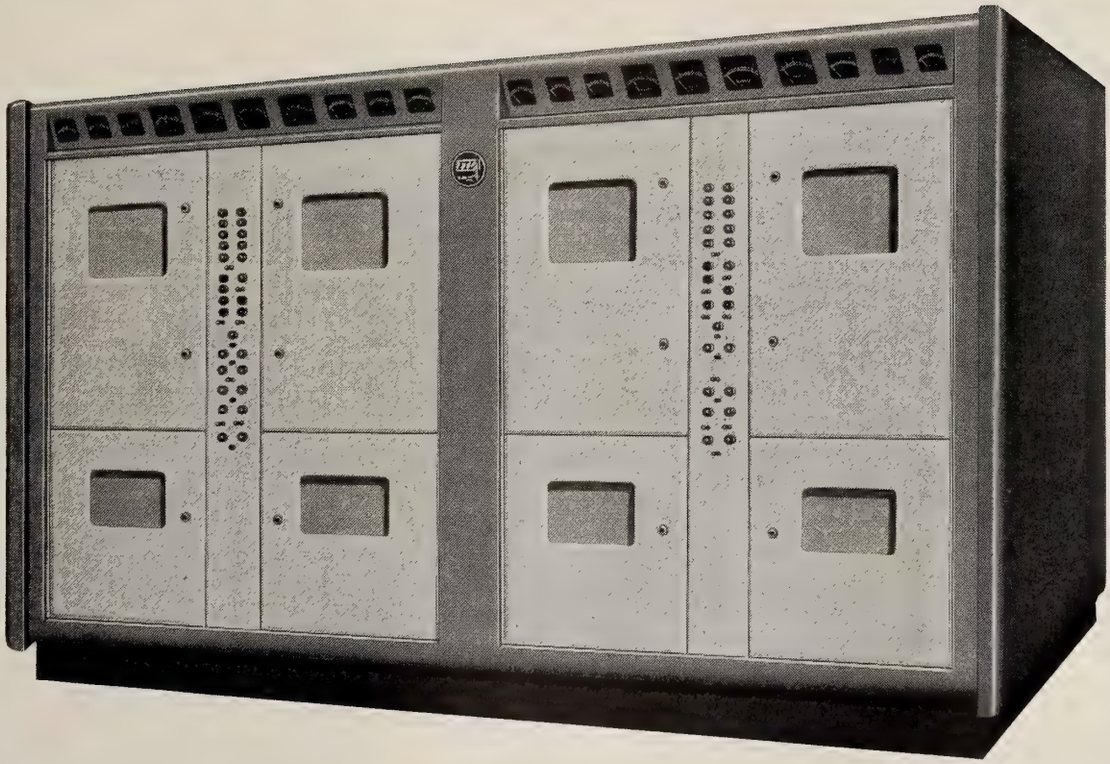
Clients participating in the drive were listed as Gerber's baby foods, Simoniz Co. (floor wax), Procter & Gamble (Oxydol, Dreft, Ivory Snow and Prell), Nestle Co. (Nescafe), Minute Maid Corp. (frozen orange juice), Doeskin Co. (tissues), and Block Drug Co. (Amm-i-dent toothpaste).

Eastern Baseball Network

REGIONAL network of some 15 eastern stations will carry 155 National League daytime games during the regular baseball season from April 13 through Sept. 26.

New York Giants home and away games, as well as those played by other National League teams, will be sponsored cooperatively on stations taking a feed from WMCA New York. All sales are being handled by AM Radio Sales Co., Chicago, which represents WMCA and WIND Chicago.

WHBF Replaces WQUA



SIGNING of WHBF Rock Island, Ill., to replace WQUA Moline as the CBS Radio affiliate in the Quad-City area, effective July 1, was announced last week by William A. Schudt Jr., the network's national director of station relations. WHBF is with ABC.

WMNC Affiliates With NBC

WMNC Morganton, N. C., became affiliated with NBC, effective Jan. 1, Harry Bannister, NBC vice president in charge of station relations, has announced. WMNC operates on 1490 kc and 250 w. It is owned by Nathan J. Cooper.

Federal

announces a completely new UHF transmitter...

Federal's FTL-20B transmitter is the latest in UHF equipment available today!

New in design — with trim, modern cabinet featuring simplified operating control and meter panels, new "look-thru" door construction and entirely redesigned internal arrangement. Swing-out sub assemblies provide utmost accessibility.

New in circuitry — with latest ceramic seal tetrodes for economical initial and operating costs. Rated power output — **1 Kw.**

This UHF unit comes complete with its own Master Control Console. Its self-contained two channel video and four channel audio switcher gives the added flexibility so necessary for modern TV station operation.

Call your nearest Graybar office for further information on this all new Federal Transmitter.

NBC Chicago Fuses AM and TV Staffs

NBC Chicago, in line with new network policy, reshuffled its radio and television staffs into a single operating unit last week.

Biggest change in the move is appointment of Jules Herbuveaux, formerly director of television operations, to assistant general manager of WMAQ and WNBQ (TV), reporting to Harry Kopf, vice president and stations manager.

Radio and television programming now comes under supervision of George Heinemann, former WNBQ program manager, whose new position is director of programs. Homer Heck, WMAQ program manager, has been named manager of consolidated radio and video production staffs. News, special events and public affairs, under the jurisdiction of Mr. Heinemann, are managed by William B. Ray.

John Whalley, former controller and now director of operations, will have reporting to him: Howard Luttgens, manager of technical operations; Leonard Anderson, manager of production and building services, and Thomas H. Compere, legal counsel.

John Wehrheim, formerly assistant controller, has been promoted to controller. Working with him will be Neil Murphy, chief accountant, and Glenn Uhles, office services supervisor. Messrs. Heinemann, Whalley and Wehrheim will report to Mr. Kopf.

John McPartlin continues as sales manager of WNBQ with Rudi Neubauer remaining as WMAQ sales manager. They will report to Mr. Kopf.

Snader Cedes TV Films For Cash Settlement

Arbitrator Rosenbaum has set new hearings for Friday to resolve finances in the Telescriptions dispute.

RIGHTS to some 750 Snader Telescriptions which have been the subject of lengthy litigation were relinquished last week by Louis D. Snader after arbitration and an undisclosed cash settlement.

Mr. Snader had sued Alexander Bisno and Samuel Markovitch, part owners with Mr. Snader in Snader Telescriptions Sales Inc., after the pair several months ago sold the Telescriptions for $600,000 to Ben Frye of Studio Films Inc., Cleveland [B•T, Dec. 15, 1952].

The arbitration, conducted by Samuel R. Rosenbaum, Philadelphia and New York attorney and former judge, gives Mr. Snader the right to produce and distribute new TV films as Snader Telescriptions Corp.

Mr. Snader originally had sued to prevent Messrs. Bisno and Markovitch from selling the Telescriptions and asked for dissolution of STS. His amended complaint by him charged the two with conspiracy and fraud and added as defendants United Television Programs, which now distributes the films for Studio Films; UTP President Gerald King, Mr. Frye and 103 limited partners; it also asked for declaratory relief and an accounting of funds.

The arbitration by Mr. Rosenbaum gives UTP the right to continue distributing the musical library under the Telescriptions name.

Mr. Rosenbaum also terminated all claims by Reuben R. Kaufman in STS, of which he formerly was president. Mr. Kaufman had filed a counter-suit naming as defendants Mr. Snader, Mr. Bisno, who is STS treasurer, Mr. Markovitch who is an STS director, STS, BSM Telescriptions, Snader Distributing Co., Mr. Frye, Studio Films, UTP, Bisno Telefilm Sales, Henry Bisno, Nathan Dicker and Sidney Dorfman.

One question is on division of net proceeds among two sets of several hundred investors who contributed $1 million to finance the deals and who, according to reports, have received only $200,000 in return.

Disposition of a group of Alexander Korda feature films and a *Dick Tracy* video film series, controlled by Snader Telescriptions Sales Inc., also will be resolved.

Mr. Kaufman had charged a conspiracy between Messrs. Alexander Bisno and Markovitch, claiming Mr. Bisno spent $750,000 without a full account, spent $25,000 of working capital without authorization, drew $6,500 of STS funds for himself and kept company money in his personal account. Mr. Kaufman, now president of Guild Films Inc., New York TV film distributors, charged STS received $2.1 million income up to May 1952 while spending $1.8 million, and demanded an accounting of the difference.

Crosley Buys Assets Of Johnston Film Company

PURCHASE of assets of Bert Johnston Productions Inc., TV industrial and commercial film firm, by Crosley Broadcasting Corp. was announced last Thursday by Robert E. Dunville, Crosley president. The purchase price was not disclosed. Crosley is buying physical assets of the firm on its liquidation and will operate it as a division of WLW Cincinnati promotions.

Mr. Dunville and G. Carlton Hill, executive vice president of the film company, closed the negotiations for the purchase, effective last Friday. The firm located in Deer Park, Ohio.

No change in personnel is contemplated, Mr. Dunville said.

Preliminary Injunction Granted in Film Damage Suit

PRELIMINARY injunction restraining Chesapeake Industries and Motion Pictures for Television Inc. from releasing a feature film, "Shed No Tears," to television pending trial of a $500,000 damage suit has been granted Frost Films and Equity Pictures in Los Angeles Superior Court [B•T, Nov. 24, 1952].

The restraining order, Jan. 9, also affects four Los Angeles TV stations: KNXT KNBH KTTV KLAC-TV.

Maintaining that it has not yet become a commercial practice to televise newly made theatrical motion pictures, the producers in their suit charge that video showing of the film will destroy future theatre release.

Besides the injunction as part of the $500,000 damage suit, the producers request the existing contract between themselves and Chesapeake be cancelled and the film be returned.

Also named as defendants are United Artists, Eagle Lion Classics, Eagle Lion Films, Pictorial Films and Pictures Unlimited.

Availabilities . . .

United Artists Television has announced 11 new sales of TV programs series distributed by the company. Heading the list is *Clete Roberts' World Report,* sold to **WGN-TV** Chicago, **WSBT (TV)** South Bend, **WEEK-TV** Peoria and **CBLT (TV)** Montreal.

* * *

Cate & McGlone, Hollywood, has completed 30 20-second TV film spot announcements for **United Air Lines,** Chicago. **N. W. Ayer & Son,** Hollywood, is the agency.

Production . . .

Louis D. Snader, Beverly Hills, has started production on the *Liberace Show* in cooperation with **KLAC-TV** Hollywood. Under a recently signed contract involving $1,521,000, 117 half-hour programs, starring the pianist, will be filmed during 1953 and distributed nationally by **Guild Films Inc. Duke Goldstone** is the director and **George Liberace** continues as musical director for his brother. **Robert M. Snader** is the associate producer.

In conjunction with **Wally Kline,** Louis Sna-

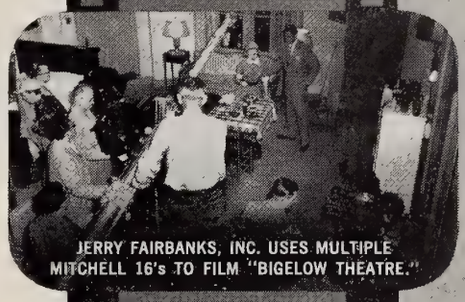
"TO MAKE CAMERAS WHICH WILL TAKE THE WORLD'S FINEST FILMS"

WORK on the first MITCHELL CAMERA was dedicated with these words over thirty years ago.

Today Mitchell 16mm and 35mm Cameras are used throughout the world in every field of motion picture photography.



In Television, Mitchell Cameras have pioneered new and superior techniques and standards. Mitchell, alone, brings you years-ahead professional motion picture equipment. Commercials, shorts, and features filmed with this camera are *sharper, clearer,* and *steadier* on home television screens because of the internationally famous smooth, positive operation and perfect control which the Mitchell Camera brings to each film.

The Mitchell 16mm Professional has the same proven Mitchell 35mm features which have made this camera the standard equipment of major studios in every part of the world.

Be sure of professional results—use the Mitchell Camera.

TOM KELLEY STUDIOS USES 35MM MITCHELL NC FOR DESCO-WARE COOKING UTENSILS' TV FILMS.

JERRY FAIRBANKS, INC. USES MULTIPLE MITCHELL 16's TO FILM "BIGELOW THEATRE."

ROCKET PICTURES, INC. USES MITCHELL FOR TV COMMERCIALS FOR JOHNSON'S WAX.

USAF's Asch Named V. P. In Van Praag Division

MARC S. ASCH, civilian chief of film production for the U. S. Dept. of the Air Force, has been appointed a vice president and producer in the industrial and TV films divisions of Van Praag Productions, New York, President William Van Praag announced last week.

Mr. Asch

Mr. Asch was one of the founders of the Bureau of Motion Pictures of the Office of War Information and subsequently was technical director and studio manager. During World War II, he was a major in the Army Signal Corps. From the service he joined United World Films, TV film producers and distributors, as associate producer.

AM, TV Shows Receive Christopher Medals

TWO radio programs and three special Christmas telecasts received quarterly Christopher Awards at a luncheon at New York's Waldorf-Astoria last Wednesday.

The broadcasts were selected as creative works that "reflect the power for good that can be exerted, with God's help . . . in the literary and entertainment fields." Each award recipient received a bronze medallion. Eight other awards were made.

In radio, awards were presented to John Driscoll, John Zoller and Warner Law for their part in presenting *Barbed Wire Christmas* on NBC Dec. 18.

An award went to Henry Denker, writer-producer-director of *The Greatest Story Ever Told,* based on the book and aired on ABC.

In television, awards went to Fred Waring's special Christmas presentation in song and dance of some of the many traditions which have stemmed from the birth of Christ. Bob Banner, director, and Hugh Brannum, writer, also received awards for this CBS Television presentation Dec. 14.

Cal Kuhl, producer, and Fielder Cook, producer, were honored for their *Lux Video Theatre* presentation Dec. 22 on CBS Television of "A Child Is Born," based on Stephen Vincent Benet's Christmas story.

Awards went also to CBS-TV's *Studio One* presentation of *The Nativity,* based on a cycle of medieval "mystery plays." Fletcher Markle, producer; Franklin Schaffer, director, and Andrew Allen, writer, were selected for the special Christopher medallions.

Rupert Lucas

RUPERT LUCAS, 58, sales manager for Barry & Enright, New York, television program producers, collapsed and died after a heart attack Tuesday night in the DuMont Television Network studios in New York.

Mr. Lucas served previously as a radio producer with Young & Rubicam and as sales executive with ABC.

Surviving are his wife, Mrs. Constance Lucas of Hartsdale, N. Y., and a daughter.

ATAS Awards Dinner

ANNUAL awards dinner of the Academy of Television Arts and Sciences will be held Feb. 5 at Los Angeles' Hotel Statler and will be televised locally on KLAC-TV, according to Charles Ruggles, membership chairman and president-elect, who said the event may be sponsored and telecast nationally. Membership is at a record high of 350, he said. Barbara Britton, star of CBS-TV's *Mr. & Mrs. North* film series, will act as "Miss Emmy" in presenting local and national ATAS "Emmy" awards.

Loew Leaves Telemeter

DAVID LOEW, former president of International Telemeter Corp., Los Angeles, has withdrawn from the firm and sold his approximately 20% stock interest to the pay-as-you-see subscription TV corporations. A new president is to be elected Feb. 13 by the board of directors.

Paul Raibourn, vice president of Paramount Pictures Corp., continues as board chairman of Telemeter with Carl E. Leserman, executive vice president. Paramount is a 50% owner of ITC.

RCA Thesaurus Adds

RCA Recorded Program Services has announced that RCA's Thesaurus has added *Music Hall Varieties,* half-hour show featuring Beatrice Kaye and Joe E. Howard, to its library program series. Company has sent brochures and promotion kits to subscribers.

INS-Telenews Sports Films

INS-Telenews has added a new Monday-Friday sports film service for TV stations. Using 3 to 3½ minutes of footage per day, the service will include two or more stories of top sports events.

AT signing of Pacific-Mercury TV, Los Angeles for *Boston Blackie,* half-hour Ziv TV series are (seated, l to r) Walt Kingsley, Ziv Television Programs Inc.; Joe Beneron, president, Pacific-Mercury TV Mfg. Corp.; Elliott Peikoff, vice president, Mercury Television & Radio Corp.; standing (l to r) are Don Staley of the Ziv firm; Edward L. Koblitz, president, The Edwards Agency, and Jim Brent, advertising manager, Pacific-Mercury TV.

COMPATIBLE COLOR SPECIFICATIONS APPROVED BY NTSC AT IRE MEET

With standards for compatible color approved in principle last week at the IRE meet, the National Television Systems Committee findings will be put to several months of thorough field-testings. Subsequent step would then be application to the FCC for such type commercial telecasting.

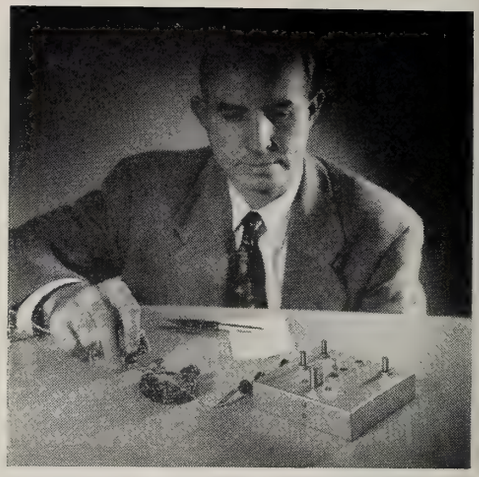
FULL set of signal specifications for a compatible system of color television was approved Thursday by the National Television Systems Committee, meeting in full session at Institute of Radio Engineers headquarters in New York [B•T, Jan. 12].

Approval of the specifications in principle marks a red letter day in the history of NTSC, all-industry group which for more than two years has been struggling with the problem of perfecting a system of colorcasting which would provide for the reception of colorcasts in black-and-white on the millions of monochrome TV receivers now in use as well as reception in full color by color receivers.

Before the group applies to the FCC for authority to telecast commercially under the NTSC standards, however, the specifications approved by the group last Thursday will be given exhaustive field tests, lasting perhaps three or four months. Dr. W. R. G. Baker, General Electric Co. vice president and chairman of NTSC, told BROADCASTING • TELECASTING Thursday that these field tests are designed "to adjudicate the specifications beyond the slightest question of a doubt."

Dr. W. R. G. Baker

Transmitters operated by DuMont, RCA, Philco and General Electric will definitely be employed for the tests, Dr. Baker said, with others perhaps participating as well. Knox McIlwain of Hazeltine Corp., chairman of NTSC Panel 16, will direct the testing program.



The editorial committee of NTSC Panel 12 was instructed to prepare the full set of approved signal specifications for color TV and to distribute them to the industry at the earliest possible moment. Donald Fink, Philco Corp., chairman of the editorial committee, said he would get his group together to prepare such an industry release within the week and would forward the material to the NTSC secretary for dissemination throughout the TV broadcasting and manufacturing industry. It was estimated that the task might be completed in two to three weeks.

Specifications approved by NTSC last week involve perhaps a 50% change from the tentative specifications issued by the group some months ago, Dr. Baker reported. Their present form he believes will stand up throughout the field testing period with only minor changes, he said, quickly adding that this is a personal, not an official viewpoint.

Dr. Goldmark Pointed Out

The presence of Dr. Peter C. Goldmark, CBS vice president in charge of engineering research and development, at the NTSC meeting was especially pointed out by several committee members. Dr. Goldmark conceived and directed the development of the non-compatible CBS system of color TV which won FCC approval for commercial operation in 1950. A court case attempting to block that decision was decided in CBS' favor the following year but at a government request to withhold production of color receivers for the present so as not to divert essential materials, CBS has not put its color sets on the markets. Dr. Goldmark was accompanied at the Thursday meeting by John W. Christensen, chief engineer of the CBS Laboratories Div.

Also present at the meeting were: Dr. Baker; A. W. G. Jensen, Bell Labs.; A. L. Beers, RCA Robert E. Shelby, NBC; Mr. McIlwain; B. F. Tyson, Sylvania; E. W. Engstrom, RCA; P. Neuwirth, Teleking; George H. Brown, RCA; W. W. MacDonald, Electronics; John V. L. Hogan, Hogan Labs; R. M. Bowie, Sylvania; Alfred N. Goldsmith; A. V. Loughren, Hazeltine; Dorman D. Israel, Emerson; Robert Dressler, Chromatic TV Labs.; D. E. Harnett, GE; D. B. Smith, Philco; Richard Hodgson, Chromatic; Lewis M. Clement, Avco (Crosley Div.); I. J. Kerr, GE; Mr. Fink, Philco; Kurt Schlesinger, Motorola; Dan E. Noble, Motorola; T. T. Goldsmith, DuMont; S. Taranter, Admiral; Clure Owne, ABC; R. B. McGregor, Arvin; D. E. Wyndman, Eastman-Kodak; John M. Barstow, Bell Labs.; Bernard F. Osbahr, Caldwell-Clements.

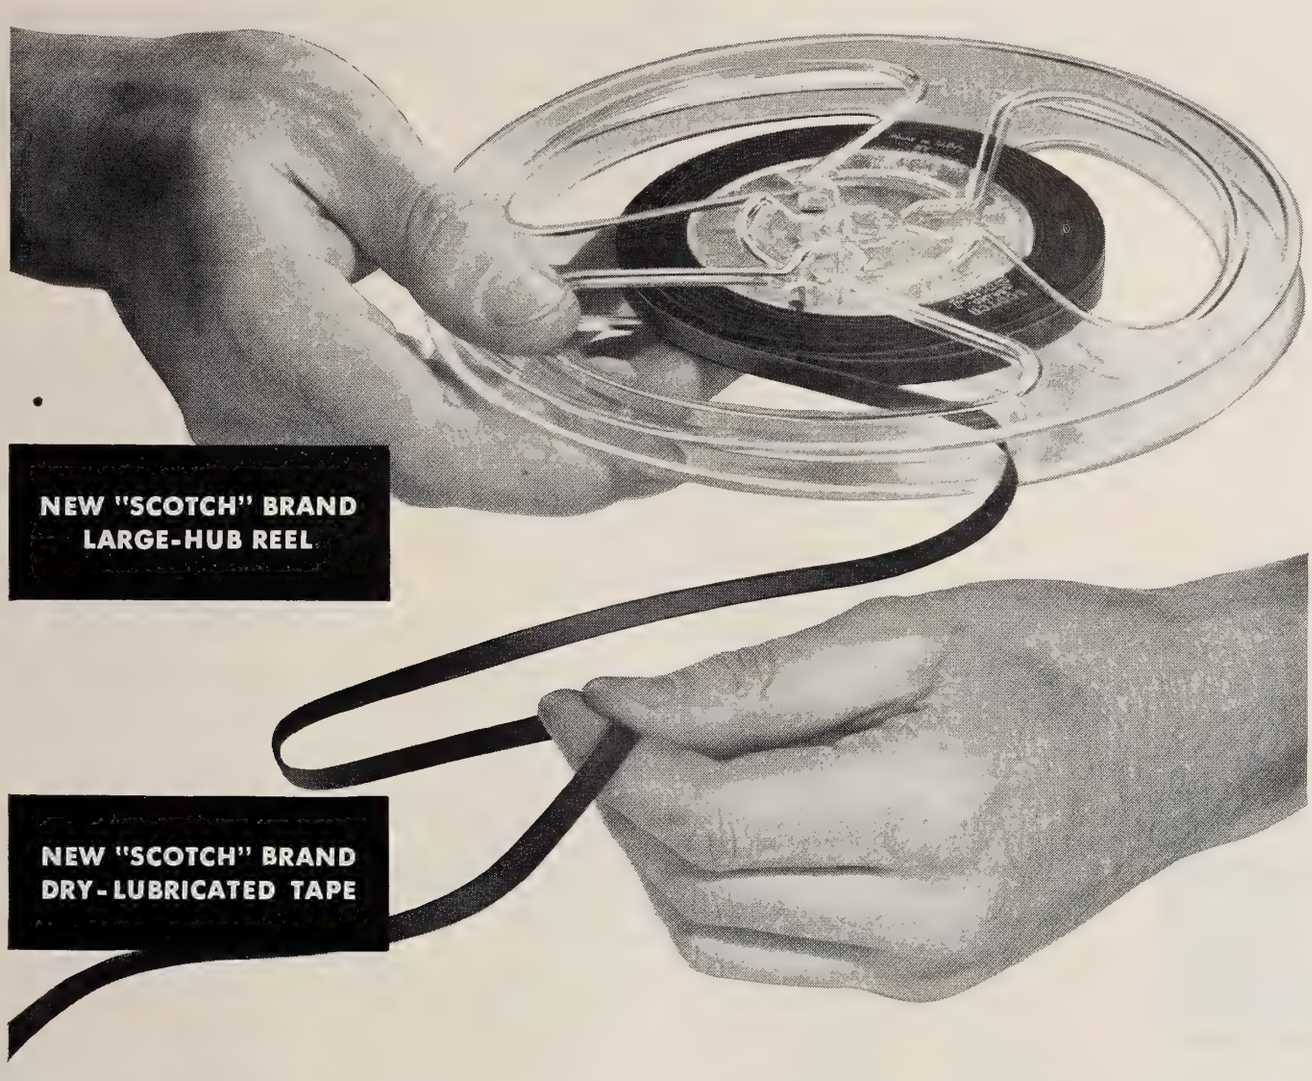
FIRST use of a transistor in vhf radio transmission has been claimed by RCA Victor, Camden, N. J. George M. Rose, who operates K2AH, amateur station, from his home in Mountain Lakes, N. J., and who is manager of RCA Tube Dept. development group, demonstrates tiny transistor transmitter. Device is built around a single RCA point-contact transistor now being developed experimentally in the department's laboratory. Mr. Rose was able to contact a "ham" station over 25 miles away.

7 New TV Outlets, 2 Others To Get Blaw-Knox Towers

ORDERS for towers for seven new television stations have been received by Blaw-Knox Co.'s Tower Dept., the firm announced last week.

Towers will be supplied to KBTV (TV) Denver; KRTV (TV) Little Rock; KFSA-TV Fort Smith, Ark.; WTVI (TV) Belleville, Ill.; WICC-TV Bridgeport, Conn., and WSLS-TV and WROV-TV, both Roanoke, Va.

Replacement towers for pre-freeze TV stations have been contracted by WHIO-TV Dayton, which will replace its 500-ft. tower with one 1,104 ft., and which will include an elevator to the top, and WMCT (TV) Memphis, which will substitute a 1,050-ft. tower for its present 750-ft. structure.



Philco's '52 Sales Up 18%

WILLIAM BALDERSTON, president, Philco Corp., reported last week that Philco sales in 1952 exceeded $360 million, an 18% increase over 1951.

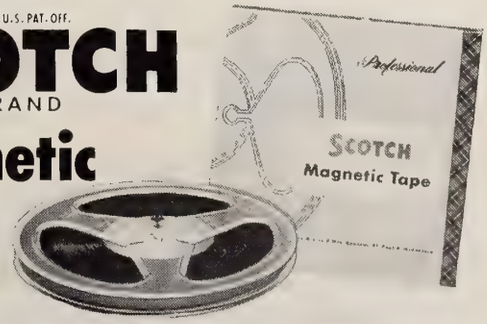
If general business continues at present levels, Philco has an opportunity to manufacture and sell more than one million TV receivers in 1953, Mr. Balderston predicted, in view of the planned opening of some 100 new video broadcasting stations.

GATES Radio Co. expects to occupy its new general transmitter assemblage plant, shown in artist's drawing above, sometime in April. Located on a seven-acre plot at Quincy, Ill., the new plant, the first of several sections planned, is 237 by 100 ft. and is on one floor with daylight construction. Gates will continue to operate its Plant No. 1 at Quincy and, accordingly, will plan to maintain company general offices there.

You need *both* to reduce timing errors!

You have an extra weapon against timing errors with the new "Scotch" Brand 7-inch Professional Reel. The specially-formulated tape available *only* on this new reel is treated with a revolutionary dry lubricant. It slides over heads without gumming or sticking, eliminates the flutter that contributes to timing errors. This also allows sustained tones to come through clearly, without annoying changes in pitch.

And the dry lubricant is unaffected by humid weather . . . does a top-notch job all year round, even in tropical climates!



The new larger hub on this improved reel does its part in combatting timing errors, but remember . . . for split-second accuracy and flawless reproduction every time, you need the *extra* advantage of "Scotch" Brand *Dry-Lubricated* Magnetic Tape!

See Your Distributor for a Supply of 7-inch Professional Reels and *Dry-Lubricated* Tape!

CHECK THESE FEATURES of the new "Scotch" Brand 7-inch Professional Reel

- **NEW LARGER HUB** measures 2¾ " compared to the 1¾ " of standard reels
- **SINGLE THREADING SLOT** minimizes distortion of lower tape layers
- **DRY-LUBRICATED TAPE** practically eliminates sticking, squealing, cupping
- **100% SPLICE-FREE.** All "Scotch" Brand Magnetic Tape (up to 2400 foot reels) is guaranteed to be free of splices

TV PROBLEMS TO TOP AIEE WINTER SESSION

Electrical engineers will converge on New York this week to hear technical papers on a number of timely subjects including transistors, color TV, uhf broadcasting, civil defense and 'Conelrad'.

TELEVISION problems will be dealt with in two Tuesday sessions of the Winter General Session of the American Institute of Electrical Engineers, being held this week, Monday through Friday, at the Hotel Statler, New York. TV pictures will be discussed during a Thursday afternoon session on high-vacuum tubes. Broadcast engineers may also be interested in a Thursday morning session on radio communications systems and in two Tuesday sessions on semi-conductors, chiefly transistors, included in the 86 technical sessions scheduled for the five-day meeting.

At a general session on Monday afternoon, AIEE President D. A. Quarles will present the Edison Medal to Dr. V. K. Zworykin, RCA scientist who invented the electronic tube which is the heart of present day TV. Dr. E. W. Engstrom, vice president in charge of research, RCA Labs., will discuss the career of the medalist and Prof. J. F. Calvert, chairman of the Edison Medal Committee, will describe the establishment of this award during the afternoon general session, whose principal address will be delivered by Dr. H. T. Heald, chancellor, N. Y. U.

Dr. Zworykin

Tuesday morning technical session on uhf TV will include the following speakers and papers: E. W. Allen Jr., FCC, "General Aspects of Uhf Broadcasting"; Dana Pratt, RCA Victor, "Uhf TV Transmitting Equipment"; F. E. Talmadge, RCA Victor, "New Devices for Broadbanding Uhf Transmitter"; D. W. Peterson and Jess Epstein, RCA Labs., "An Experimental Study of Wave Propagation at 850 mc"; J. W. Waring and W. P. Boothroyd, Philco Corp., "Selection and Amplification of Uhf TV Signals."

A session on color TV that afternoon will comprise: D. B. Smith, Philco Corp., "Present Status of NTSC Color"; Page Burr, Hazeltine Electronics Corp., "Transmitting Terminal Apparatus for NTSC Color TV"; Donald Fink, Philco Corp., "The Synchronization Problem in Color TV"; J. G. Reddeck, RCA Labs., and H. C. Gronberg, NBC, "Network Transmission of Color TV Signals." Also at that session, R. W. Ralston and D. B. Eickline of Illinois Bell Telephone Co. will discuss the national political conventions.

Radio Sessions

Agenda for the Thursday morning session on radio communications systems includes: C. A. Armstrong, AT&T, "Communications for Civil Defense"; R. J. Renton, FCC, "Conelrad"; J. R. Neubauer, RCA Victor, "The New Jersey Turnpike—A Unique High Communication System"; R. D. Campbell, AT&T, "Path Testing for Microwave Radio Routes."

High-vacuum tube session Thursday afternoon is scheduled to include: W. P. Bennett and H. F. Kazanowski, RCA, "1 kw Transmitting Tetrode for Uhf"; M. B. Shrader, RCA, "A New 10 kw Air-cooled Tetrode for Vhf TV Service"; John Hartman, DuMont Labs., "Cathode-ray Target Tube for Pulse Height Analysis"; W. A. Dickinson, Sylvania Electric Products, "Electromagnetic and Electrostatic Focus for Picture Tubes"; R. B. Ayer, RCA, "High-power Industrial Vacuum Tubes Having Thoriated-Tungtsen Filaments"; A. M. Bounds and P. N. Hambleton, Superior Tube Co., "The Nickel Base Indirectly Heated Oxide Cathode"; H. B. Law, RCA, "The RCA Three-gun Shadow Mask Color Kinescope."

Minnesota Mining to Build

MINNESOTA Mining & Mfg. Co., which is conducting extensive and secret research into magnetic tape recording of pictures for television, has purchased 125 acres near St. Paul for construction of a $3 million research laboratory. Construction of this first in a series of additions will begin this spring, and is expected to be completed by the fall of 1954.

It will house the central research department, where the "more fundamental and longer term" projects are carried out under the direction of Dr. Harry N. Stephens.

Minnesota Mining also maintains a research unit for each of its product divisions, and has realized $25 in sales for every $1 it has spent on research, according to William L. McKnight, board chairman.

NLRB Blocks Move to N. Y. In Hearing on TV Writers

RENEWED attempts by NBC, CBS, ABC, Authors League of America and Screen Writers Guild to move the NLRB hearings involving television writers from Los Angeles to New York for further testimony were denied by Trial Examiner Norman Greer at the conclusion Wednesday of the hearing of several weeks [B•T, Dec. 2, 1952].

He gave Television Writers of America, whose petition to be bargaining agent for Hollywood writers on network live and film TV shows caused the hearing; ALA, SWG and the networks until Feb. 4 to file briefs. Desilu Productione and McCadden Corp. whose cases were consolidated with the networks, also were given that deadline.

TWA Scope Questioned

ALA and SWG claim TWA is not representative of the craftsmen it seeks to represent [B•T, Dec. 15].

Frances Inglis, SWG executive secretary, during testimony Wednesday said 190 companies in the U. S. are producing pictures for TV showing. Of this number, 103 have headquarters in Hollywood, 68 in New York, 9 in Chicago and 10 elsewhere.

Nationally, they utilize the services of some 600 writers, she testified.

SAG Opens Chicago Office With Jones as Representative

SCREEN Actors Guild has opened an office in Chicago. John Dales Jr., SAG's national executive secretary, last week announced the new office was arranged with cooperation of the American Federation of Television and Radio Artists (AFTRA) local in Chicago.

Raymond A. Jones, executive secretary of the AFTRA branch, also will be SAG representative in the Windy City. The guild's staff will be housed at 102 E. Hubbard St., AFTRA's office.

Thomas J. Shea

FUNERAL services for Thomas J. Shea, 53, assistant president of International Alliance of Theatrical Stage Employes and Motion Picture Machine Operators of the U. S. and Canada, where held Friday in Middletown, Conn. Mr. Shea, a former president and vice president of the Connecticut State Federation of Labor, died Tuesday at the Will Rogers Memorial Hospital at Saranac Lake, N. Y., where he had been a patient for several months. He had been assistant president of IATSE since 1945.

Engineer Openings

OPENINGS for an engineer and technical secretary on the International Frequency Registration Board in Switzerland were reported last week by the State Dept.'s Telecommunications Policy Staff. Interested candidates should submit their qualifications and other data to the Telecommunications Policy Staff, Dept. of State, Washington 25, D. C. (attention: Mrs. Hazel Briggs), not later than March 30.

Fables of the leopard and the hippo—5

ON GOOD TIMING

THE HIPPO: "Alas, the victuals that pass me by. I always seem to miss the biggest share, at least."

THE LEOPARD: "Then study, sir, your timing in stalking *and* in snaring game."

THE MORAL: Wily television advertisers (like the Spotted Leopard) know, too, the importance of good timing. Of best-selling hours—and seasons—to pin down important sales.

So they choose *Spot* TV. Because they can buy just the hours that fit *local* viewing tastes best. In every time zone.

They can start fast. Or change pace easily during best selling seasons. In every market.

At low cost-per-sale.

Prove for yourself the importance of good timing . . . with Spot TV . . . on these thirteen select stations.

KPRC-TV

The controversy over film vs. live production is as old as commercial television and doubtlessly will still exist years from now. Much can be said for both techniques. Here's the first of a two-part series. Next week John L. Sinn, president of Ziv Television Programs Inc., will present the case for films on TV.

the case for LIVE television

By Martin Stone

ALL television programming, like "Omnia Gallia," is divided into three parts:

1. Film projection,
2. Studio origination, and
3. Use of the mobile unit.

The case for live television is not being stated in terms of a plea against the first method, film origination. Programming there must be, and a great deal of it perforce will be on film. The plea here is for more television, more faith in the medium. For to state the case for live television is to plead the cause of television itself. This new miracle of communication deserves no distinction if it does not preserve a quality that makes it different. Film in abundance on television is the equivalent of the home movie in continuous performance. Live television is magic of its own.

The television broadcaster who draws upon celluloid for his daily programming reduces his role to that of an exhibitor. His programming is at the mercy of others; his selection of fare is limited. Where the broadcaster tackles live television, however, he refuses to be bound by the product of distributors. He holds the threat of competitive production.

Live Is Troublesome

Live television—let's face it—is gruelling, wasteful, ulcerous. It demands production on an assembly line basis where the standards are not mechanical but creative. There are some who even demand that television be an art form. To fill the airwaves, though, with artistic performances—alive and skillful, day and night—is impossible even for the extravagance of a network. There is no reservoir of creative talent vast enough to accommodate the continuous spilling-over-the-dam of television programs. The prospects are even more frightening for the intrepid broadcaster who attempts to meet the challenges of live programming on a local basis with a limited budget and meager equipment.

Why, then, should the broadcaster attempt live television?

Some of the answers may here be suggested:

1. The community demands it. Certainly television has a public service to perform which no mere transmission of film can provide. Whether it be local meetings, parades or Boy Scout jamborees, the local broadcaster will have to establish his cameras for coverage of community events—on the scene—as a condition of his privilege of broadcasting.

2. No film, and no mechnical recording, can act as an equivalent for the immediacy of television coverage which comes from the use of the mobile unit in a special event. Whether it be boxing or baseball or wrestling or the Mummers' Parade, there is an excitement and color which comes from the transportation of the viewer to the scene that no other medium can duplicate. Television needs no intermediary, no commentator, no reporter. It is a fishbowl into which the world can peer, where real-life dramas and contests take place without benefit of script. The World Series game that hinges on the performance of the batter who has just stepped up to the plate, the roll call at the political convention that will determine the identity of the next President of the United States, the crime hearing at which an underworld king must choose at once between admission of guilt and contempt of Congress. Here is television at its best as it offers the exciting spectacle of news as news is made. Filmed television can offer no substitute for the quality of *NOW*.

3. No film, or tape, or any other reproduction, can capture the live—a better word is alive—quality of the personality in television. Whether it be Arthur Godfrey, Bishop Sheen or Adlai Stevenson, if a personality's purpose is to face a camera and by sheer talk establish a sense of communication with his audience at home, film remains a hurdle. "Talk" personalities on television make the bridge by sharing in common a simplicity: They do not pretend to be other people, or in a situation comedy, or in a "show." The fact that Mr. Godfrey is supported by a cast, or sets or costumes, doesn't spoil the

When Gabby Hayes (l) visited Howdy Doody and Bob Smith, it was a meeting of two of Author Stone's profitable television ventures. The Howdy Doody character has spawned a swarm of merchandising sidelines that have become a multi-million dollar business. It is among the oldest and most popular shows of its kind on the air.

fact that he never pretends to be putting on a "production." It's all dressing, revealed as a device to the viewer. Mr. Godfrey himself is most effective when he sits behind a desk and sells tea, man to man. Consider his loss of effectiveness when for a time he sold orange juice via kinescope. Mr. Godfrey, live, is talking to you—not to a cameraman who made a film, which was transmitted on television and which you happened to see.

Mr. Godfrey, Walter Winchell, John Cameron Swayze, share this characteristic in common: They are playing directly to the audience at home, in contrast with performers in a dramatic show who play to each other *for* an audience. Or, indeed, compare Sid Caesar or Milton Berle, or even Groucho Marx, who put on shows *for* an audience in a theatre. The personality in television derives his strength from a sense of intimacy enjoyed by his subject at home. Certainly Bishop Sheen is the kind of television personality that fairly crosses the camera into the living room. This is nigh impossible of achievement on film. It has nothing to do with the quality of celluloid. It has to do with being *alive.*

Mobility Is Key

4. The greatest potential for the expansion of the use of the television camera lies in a fuller employment of the mobile unit. I believe that this remains pioneer territory in television programming. The wide concentration on vaudeville, situation comedies and dramatic shows in expensive studio productions may make sense to the networks because of heavy investments in real estate and the luxury of the full time studio staffs, but the time is fast approaching when even the networks can afford only a few extravaganzas. The local broadcaster, without mammoth accommodations, expensive scenic designers and large construction shops, must from the start rely on the luxury of his imagination. He will, I feel, inevitably turn to his mobile cameras for realism on a low budget, which only natural settings and on-the-scene action can afford.

The greatest asset which television has to provide is truth. Compare radio, where one had to rely on reportorial technique; the announcer had to portray by appeal to the ear, and the listener had to supply his own imagination to add realism to the scene. Newspapers have a similar limitation, and perhaps the nearest approach to the realism of television is in the pictorial magazines like *Life.* Yet even here editorial restrictions and the limitations of space confine the story. Only television illuminates reality with a vivid impact that approximates actual witnessing.

The American public wants to know; television can be a mirror of America at work. The approach to television which is measured by truth demands the use of the uncompromising eye of the mobile camera.

The Kefauver hearings, for example, were a merciless revelation of truth. In another direction, President Truman's tour of the White House was a stimulating example of how all of us can be transported to an inner sanctum—a demonstration of television's reality. There is room for many more such explorations, so that those in the East can see the wonders beyond the Mississippi, and those in the West can visit New York's skyscrapers, subways and slums.

The mobile unit can do even more for the local community. It can show the processes of democracy at work . . . the courts, the marriage license bureau, the child welfare associations, the charity groups, the investigation bureaus, the city councils, what goes on in a city at night—in the night courts, in the fish markets, in the industries.

The Magic of TV

The magic of television lies mostly, I think, in being transported. It is the satisfaction received from sitting in one's living room with a sense of being present at Radio City, with a sense of performance by Arthur Godfrey for me—propped as I might be in an easy chair. There can be nothing but pleasure for the average man in witnessing the spectacle of (A) either Arthur Godfrey talking to *him,* indeed wooing him, or (B) witnessing *The Show of Shows* in his living room with as much enjoyment as the poor folks who had to go to the International Theatre and stand in line in a driving rain —if they were lucky enough to get tickets. No film accomplishes this purpose. A film may amuse and may entertain, but it does not give a sense of transportation. The only near-equivalent satisfaction to be derived from a television film comes from the fact that here is the equivalent—perhaps—of the local movie, without the inconvenience of going to a local theatre.

The case for live television is a plea for understanding of a new medium of *communication.* Film is a spectacle, and while a motion picture may be informative, even inspiring, it never acts as a vehicle of—repeat — communication. The efforts toward emphasizing live television must bear in mind this distinction, and seek to capitalize on its advantages.

(Don't miss "The Case for Films on TV" by John L. Sinn, president of Ziv Television Programs Inc., in next week's BROADCASTING • TELECASTING.)

ABOUT THE AUTHOR

Martin Stone is a lawyer turned executive and program producer. He is president of Kagran Corp., which, among other things, produces *Howdy Doody* and merchandises the freckled dummy. He is creator of *Author Meets the Critics* and the *Gabby Hayes Show.* Other programs he has produced include *Americana,* which Firestone sponsored on NBC-TV; *Gulf Road Show* for Gulf Oil on NBC-TV, and the *Jackie Robinson Show,* now on NBC radio.

No more lively show was ever aired than "Author" on the night Sen. Taft tangled with Tex McCrary.

Business is

hum-m-m-m-ing in Detroit

MARKET-wise, Detroit is the sweetest sales-territory in the U.S.A. That was true in '52 . . . *and it'll continue to be in '53.* The rhythmic music of machinery in action, of men at work, of cars and trucks and tanks rolling off production lines, of money changing hands, of clinking coins and ringing tills . . . all blend into a "hum sweet hum" of 4½ billion dollars retail business annually . . . in a market where hourly and weekly earnings of factory workers are at an all-time peak.

MEDIA-wise, you can make your sales hum in this market by spotting or programming your campaign on WWJ, Detroit's NBC affiliate. For 33 years, WWJ has been *first* in programming, in public services, and in getting results for its advertisers.

MONEY-wise, you can buy WWJ for 14.5% LESS than the average cost-per-thousand listeners for radio time in Detroit.

MERCHANDISING-wise, WWJ offers a follow-through service, from distributor to dealer levels, to help keep everyone humming about your advertising program on WWJ.

MAKE '53 a humdinger. Put more "*sell*" into your Detroit campaign by putting more of your ad money into WWJ.

THE PITCH ON

An ingenious partnership has built a $12 million business by adapting an old profession to modern media. The pitchman is off the streets and in the parlor.

OF ALL the toilers in the mercantile world, none has lived more precariously than the pitchman. His has been a nomadic and sometimes hounded trade, complicated not only by the usual vagaries of commerce but also by cruel changes in the weather and, in some communities, the oppressive diligence of the police.

For generations, the pitchman was obliged to endure another inconvenience. His sphere of influence extended only as far as he could project his voice, and even that range was limited, since there was always a chance that an intemperate shout would attract a hostile cop. It is a tribute to the resourcefulness of these vagrant merchants that so many survived such obstacles and accomplished their intricate purpose of bewitching passers-by into buying the potato peeler they had not until then realized they were dying for or the vitamin compound to cure debilities they had never suspected they had.

The limitations that have plagued the pitchman have now been relieved. Thanks to the miracles of radio and television, he not only has been taken off the streets but installed in the American home. He makes his pitch in comfort, undistracted by fears of sudden thunderstorms or roving flatfeet. Millions hear and watch him, and millions buy his wares. He has climbed from the society of carnival and boardwalk to the company of artists and millionaires. His astonishing transformation was arranged, not surprisingly, by two of his kind, perhaps the two most resourceful pitchmen who ever hawked a hair cream to a bald man.

Zooming Business

Aside from achieving the social elevation of their former colleagues and themselves, Charles D. Kasher and Leonard Rosen have made gratifying advances in their personal finances. A three-man partnership including them and Leonard's brother, Jack Rosen, set up shop in July, 1950. Their gross sales that year were $225,000. In 1951 sales were $4 million and in 1952, $12 million. It is the official estimate of the Messrs. Rosen and Kasher, who like to speak in round numbers, that gross sales will be $18 million this year.

Radio and television are responsible. In the last six months of 1950, Mr. Kasher and the Rosens spent $50,000 on radio-TV (mostly TV); in 1951, more than $1 million; in 1952, $4.5 million. The budget is expected to be about the same this year as it was last.

The enterprises which have amassed these records in so short a time are Charles Antell Inc., distributor of Charles Antell Formula No. 9, a hair cream and shampoo; National Healthaids of Baltimore Inc., distributor of NHA Vitamin Complex and Fastabs, a weight reducing pill; and Ronald Research Laboratories Co. Inc., which manufactures the products sold through the other two companies and conducts research into new products that the Messrs. Rosen and Kasher intend to unloose upon a market already reeling from the effects of those that have been introduced.

The origin of the half-hour pitch on radio and television, cornerstone of the Antell advertising technique, may be charged to a fateful meeting of Messrs. Kasher and Leonard Rosen in 1935 in Dayton, Ohio, where Mr. Kasher was temporarily established in a department store, pitching a lanolin hair shampoo called Albu-Lan. Mr. Rosen had stopped off en route to Cincinnati where he had an engagement for a similar enterprise with another hair product.

Old Pros

At that time both were experienced pitchmen. Mr. Kasher had entered the profession in 1930 at the age of 18 and Mr. Rosen the same year at the age of 15. A rapport was established, and the two went into partnership to demonstrate Albu-Lan at whatever store would provide refuge.

In 1938, they decided to diversify their sales by adding a vitamin-mineral product, Vigor-8, to their portable inventory. Vitamins were becoming popular at that time and Vigor-8 sold profitably, but despite his improving income Mr. Rosen decided to stay in one place for a while. He was 23 when he went back home to Baltimore to provide the mature and stabilizing influence in partnership with his younger brother, Jack, who by then was 20 years of age and chafing to establish his own business before he grew old. The Rosen brothers opened a house-to-house installment trade, traveling through Baltimore with possibly the most extensive and varied assortment of merchandise ever peddled door-to-door. The principal items in their line were home furnishings, jewelry and appliances.

Mr. Kasher, for the time being, continued as a transient vendor of Vigor-8.

Watching the Store

In 1941 the Rosen brothers took shelter. They opened a Baltimore store to sell the random merchandise they had previously sold door-to-door. By 1943 they had four such stores in the city, and Leonard was ready to branch out.

He and a friend became partners in Wood Products Inc., which manufactured furniture. Coincidentally Mr. Kasher quit the road and acquired an interest in Belforte Co., also a furniture manufacturer. The corporate history of these enterprises is somewhat vague, but in 1945 Belforte absorbed Wood Products, putting Messrs. Kasher and Rosen in partnership again. Not long afterward Mr. Kasher sold out, and two years later Mr. Rosen left Belforte to return to the stores with his brother.

In 1949 they consolidated their retailing into one store and began using radio advertising on WITH Baltimore. In February, 1950, they made their first excursion into television. One of the numerous products they were selling was an air conditioner. Financed by the Baltimore distributor of the unit, Leonard himself performed two demonstration programs on TV. Since neither radically upset the normal sales of air conditioners, he decided to obtain the skilled assistance of Mr. Kasher, celebrated in his circles as an adroit writer of pitch copy.

Mr. Kasher meanwhile had returned to active demonstration and was presiding over a lucrative pitch in Toronto, shoving a lanolin hair cream called Lee Harris. He was at first reluctant to leave a rewarding stand, but he yielded when Leonard explained the possibilities of going into the pitch business on television.

Once Mr. Kasher was in Baltimore, it was only a matter of weeks before a new vitamin compound of incalculable therapeutic effect had been discovered, perfected and bottled by him and his new partners. At the end of July 1950, Mr. Kasher himself went on WMAR-TV Baltimore in the first 30-minute pitch for NHA Complex, to be sold by mail.

Avalanche

Within an hour after Mr. Kasher had described the benefits of NHA Complex, 300 telephone orders for the wonder preparation had been received at WMAR-TV, enough to more than cover the $240 it cost to buy the time. It was plain to the Messrs. Kasher and Rosen that the pitchman's trade had become big business. They decided at once to expand. In less than a month after the introduction of NHA vitamins, the partnership performed a second chemical miracle of discovering, perfecting and packaging a new and revolutionary hair cream which they named Charles Antell, borrowing Mr. Kasher's first name and his mother's maiden name. The appendage, "Formula No. 9," was a stroke of merchandising inspiration, suggesting as it did the years of experience that had been attained in the making of the non-existent Formulas No. 1 through 8.

A half-hour TV commercial for Formula No. 9 was filmed with a professional actor, Richard Llewellyn, delivering the pitch. Mr. Llewellyn's fluency did not measure up to Mr. Kasher's, but he seemed more suited to television presentation of a hair treatment. Despite years of incessant massage

RADIO and TV

By Edwin H. James

while demonstrating unguents containing lanolin, the same magic ingredient of Formula No. 9, Mr. Kasher had developed a receding hair-line.

The Charles Antell promotion was even more successful than that for the vitamin compound. After the half-hour pitch was shown on WDTV (TV) Pittsburgh, 2,800 telephone orders were received in an hour.

It was fortunate that the Antell commercials were so effective, for the progress of NHA Complex was severely curtailed by a rude intrusion of the Federal Trade Commission which refused to believe that NHA Complex would prevent or cure arthritis, neuralgia, sciatica, lumbago, gout, bursitis, coronary thrombosis, rheumatism, high blood pressure, diabetes, bad bones, bad teeth, malfunctioning glands, infected tonsils, infected appendix, gallstones, eye trouble, goiter, overweight, underweight, constipation, indigestion, nervousness, lack of energy, lack of vitality, inability to sleep and grouchiness—as the exuberant commercials of Mr. Kasher seemed to promise.

Last November Federal Judge Calvin Chesnutt, of the U. S. District Court in Baltimore, issued a preliminary injunction restraining the Messrs. Kasher and Rosen from claiming that NHA Complex was an effective treatment for any such disorders. Judge Chesnutt noted the defendants' assertion that the commercials had not specifically made such claims, but he added:

"It is true that nowhere in the lectures do I find an express or direct statement that NHA Complex will prevent or cure these specifically mentioned human ailments, but . . . reference to them is subtly interwoven into the lecture in such a way that the overall impression can reasonably be stated to be that one hearing the lecture by radio or on television might well conclude that NHA Complex is a perfect treatment to avoid or cure such ailments."

The commercials that ran afoul of the FTC were in the long traditions of the pitchmen's spiel. An authoritative, seven-point description of the classic technique has been furnished in a short history of the Kasher-Rosens enterprises prepared under their direction by their publicity agent, Hal Salzman Inc., of New York:

1. Select a product that fits this sales technique.

2. Locate in heavy traffic areas.

3. Stop passing traffic with humorous, entertaining, informational, educational sales patter, into which is skillfully and unobtrusively (until the commercial comes) intertwined the compelling sales points of the product to be sold at the end of this talk.

4. Keep building a crowd around the counter, until the time arrives for the actual sales commercial.

5. Make the commercial sales pitch.

6. Close hard, fast, with compelling impact.

7. Make sales on the spot.

Point 3 is the critical part of the pitch. Around the New York offices of Television Advertising Assoc. Inc., an advertising agency which the Kasher-Rosen partnership owns and which prepares all commercials, this part of the pitch is candidly described as "the hook." It was in execution of "the hook" that Mr. Kasher's NHA Complex commercials referred to the numerous ills the flesh is heir to, without reference by name to NHA Complex. In the radio and television commercials now used for Charles Antell Formula No. 9, Point 3 is equally important. In the half-hour versions, Point 3 occupies at least two-thirds of the pitch, and Point 5—the naming of the product—is not reached until Point 4—a maximum audience build-up—has been fully exploited.

On radio and television the deliberate delay in reaching Point 5 serves a secondary purpose, in addition to collecting a crowd. It enables the Messrs. Kasher and Rosen to argue that the half-hour pitch is not in violation of commercial limitations in the radio and television codes, since the product name is not mentioned throughout the program.

Station Lineup

Undeniably, this argument has been persuasive to a great many radio and television stations. Antell and NHA Complex half-hour pitches have been broadcast by as many as 800 radio stations, and at one time Television Advertising Assoc. was able to place the half-hour films on 61 television stations.

"The hook" in the Antell commercials consists of a straight pitch on the evils of traditional hair care. The pitchman decries the tragic effects of submitting one's hair to the ministrations of barber shops and beauty parlors, where hair is mercilessly scorched, chilled and doused with useless goo. Twenty minutes of such graphic presentation are apt to impart the fear that the next visit to the barber means instant baldness.

Happily, however, the pitchman confides that there is an antidote to the medieval treatment the audience has been accustomed to accord its hair. The antidote is lanolin. As proof that lanolin is the only substance that hair can feed on, the pitchman points out that sheep are rich in natural lanolin and "Did you ever see a bald sheep?"

When the extraordinary healing powers of lanolin have been thoroughly described, the pitchman reaches Point 5, mention of Charles Antell Formula No. 9. From there on there can be no doubt who is sponsoring the performance.

Some 80 variations of these pitches, in both half-hour and 15-minute form, have been produced on record for radio and film for television. The variations are slight, since all the "programs," as the Messrs.

HOTTEST PITCH IN HISTORY

Though their techniques have earned for countless thousands of their colleagues no more than hand-to-mouth rewards, the Rosen brothers and Mr. Kasher are now big businessmen. Here, according to their own reports, are the records of their expenditures in radio and television advertising and their gross sales that resulted.

Period	Radio-TV Budget	Gross Sales
1950 (6 mos.)	$ 50,000	$ 225,000
1951	1,000,000-plus	4,000,000
1952	4,500,000	12,000,000
1953 (est.)	4,500,000	18,000,000

The prosperous partners inspect a sales report. L to r: Jack Rosen, Charles D. Kasher, Leonard Rosen.

Kasher and Rosen insist on calling these productions, follow the same outline.

The records and films are prepared by the creative department of Television Advertising Assoc. in New York. Time purchases are made from the TAA timebuying department in Baltimore, which is headquarters for the numerous Kasher-Rosen enterprises. Mr. Kasher, whom the other partners describe as a creative genius in the advertising world, spends most of his time in New York. He is president of Charles Antell Inc.

Leonard Rosen, chairman of the board of the Antell company, makes his headquarters in Baltimore and oversees timebuying. Jack Rosen, executive vice president, supervises manufacturing.

In addition to pioneering in the pitch technique on radio and television, the Kasher-Rosens partnership has intrepidly explored new methods of buying time. Probably no other advertiser of comparable size has ever picked up and dropped so much time so erratically.

Till Forbid

It is company policy of TAA to write time contracts on a "till forbid" basis. Most radio time has been bought with this escape hatch in the contract. Some TV stations have insisted on fixed periods.

With its commitments easily cancelled, TAA is perpetually engaged in, first, buying and, second, getting out of hundreds of agreements. Last November, Antell commercials were on 800 radio stations in 250 markets. Last week they were on 350 stations in 125 markets. Last October Antell half-hour films were on 61 TV stations. In November Antell picked up sponsorship of *Live Like a Millionaire* on an ABC-TV network of 34 stations and dropped all but two of the 61 on which it had the half-hour spot films. Last week it had replaced the spot films on some 35 stations.

Leonard Rosen recently explained company policy on timebuying. "The amount of time we buy depends on the pay-out in the market," he said. "Radio and television have to produce sales. We learned about that when we were doing mail order."

All Kasher-Rosen products were introduced by mail order. Antell is now sold entirely through retail outlets. The transition from mail order to national distribution may have established a merchandising record.

"Charles Antell pre-sold the United States on radio and television," Leonard Rosen recalled the other day. "We had requests from 500 druggists for retail distribution before we put it into the stores."

Sensing an opportunity, the Messrs. Kasher and Rosen mailed a brochure to 60,000 U.S. drug stores and chains with the catchy headline: "We've been stealing your customers. Now we're going to give them back."

In six and a half months Antell was nationally distributed. It is now sold, according to Mr. Rosen, in 75,000 retail outlets.

Of the other products, Fastabs, the weight-reducing pill, is now sold mostly retail, although about 10% of the Fastabs volume is still mail order. NHA Complex is not being sold heavily. As Leonard Rosen said the other day: "We're not promoting it right now."

Love That Soap

As would be expected of so energetic a partnership, a new product has just emerged from the miraculous laboratory that the Messrs. Rosen and Kasher possess. It is a soap which will bear the Charles Antell name.

The soap will be a pitchman's dream, for in addition to the usual cleansing agents, a single bar contains lanolin, chlorophyll and hexachlorophene, a germicide. It could be claimed that with so formidable a mixture of modern chemicals at hand the American public, in one operation, can wash itself, grow hair, be deodorized and rid itself of marauding bacteria.

The half-hour pitch may have to be lengthened to accommodate the description.

NEW PRODUCT

Not ones to be caught standing still, Mr. Kasher and the Rosen brothers are planning to enter the soap field with the product shown above. Charles Antell soap will contain enough ingredients to tax the adjectival resources of even the most accomplished pitchman.

A few years ago, when television was just beginning to grow, it was popularly believed that department stores would be basic TV customers. The forecasts proved false. Here an expert tells why TV and big stores have failed to come together and suggests how they could.

ways to expand tv use by department stores

By Samuel H. Cuff

BACK in the mid-40's, when television had arrived technically but was waiting for the end of the war to enter its destined role as star entertainer and instructor of the American home, a favorite sport of the industry's masterminds was predicting what would happen when that happy time arrived.

Prominent in all such predictions was one to the effect that department stores, as a class, would be a major if not the major group of advertisers on television. Stores would install their own TV studios, where fashion shows could be staged, household appliances demonstrated and other merchandise displayed, with coaxial connections to the local TV station, if, indeed, the store had not taken on that operation as well.

Radio had never been too successful in attracting department store advertising, this pre-TV logic ran, but with television the story would be quite different. Fashions have to be pictured—and TV could do that better than newspaper drawings. Appliances sell best through demonstrations—and TV could do them better and far less expensively than run of store salesmen. Why, the best demonstrator could make all the demonstrations, and to all the housewives, not just one at a time. Come TV and, newspapers, look out. Your best customers will desert you for this great new medium.

Vanishing Dream

It was a beautiful dream, but like most dreams it proved somewhat different in reality. The war ended; TV stations went up (but very few were owned by department stores); TV attracted advertisers aplenty, but department stores did not loom very large in the overall picture. They don't today.

What happened? Why didn't department stores embrace TV with the preconceived avidity? There are a lot of answers—about as many as there are stores in TV markets—but in general they can be summed up as (1) department stores' unfamiliarity with television, (2) TV stations' unfamiliarity with store advertising, and (3) a great lack of interest on both sides in the problems of the other. That summation is certainly oversimplified and probably overcynical, but it's essentially true, nonetheless.

Take the first point. A big city store contracted for time on a station to present a showing of its new fall fashions. The store's fashion expert demanded a runway and potted palms, waving away the protests of the station producer with a haughty "Young man, I've been staging fashion shows for 20 years." When she looked at the dress rehearsal on a 10-inch screen, she shrieked, "But where is the model?"

Another early fashion show featured a finale of fur coats, worn over the new gowns shown earlier in the telecast. TV lights in those days shed nearly as much heat as illumination and the inevitable happened. The models perspired; the gowns were ruined; the argument over who should pay for the damage raged for months. That store has not used TV since.

Now, point number two. Newspapers have local rates for retail advertisers, whose market is in most cases restricted and who therefore are charged less than the national advertisers of products available somewhere to all readers. TV stations in the great majority (about 85%) have only one rate, charging the department store for full station coverage, although this may include many outlying communities with department stores of their own.

It is worthy of mention that in Washington and San Antonio, two cities whose store trading areas correspond pretty well with the service area of the TV stations, department stores have been consistent TV users. And I might add that more than one store promotion manager in other cities has told me he would like to try out TV and would do so in a minute if he could get an appropriate retail rate.

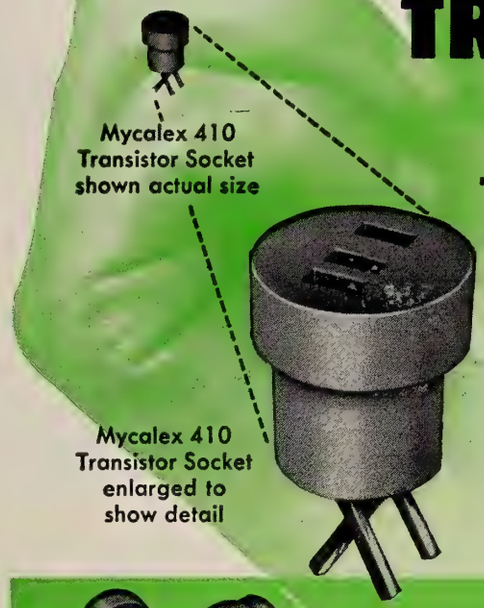
Some stores that tried TV advertising in the early days when rates were within their budgets attempted to meet the problem of rate increases by using what they call "resource" money—sums appropriated by the manufacturers of certain products sold by the store for local advertising of those products. The theory was that since these products were sold in other stores in the station's service area, the manufacturers would get enough sales overall to justify the added cost.

But the stations, or in most cases the package producers owning the programs, needed a minimum number of commercials to make the program pay out, so, when a manufacturer refused to allot any more money to the store for this kind of advertising, the program operator solicited another manufacturer of a similar product, often one who came in just to get his merchandise carried by the store. This was resented by the buyer of the store department stocking this type of ware, who felt the new product was being forced on him. So he made no effort to push it; sales were disappointing and this manufacturer, too, dropped out of the store's TV show. When this sort of thing had happened in a dozen departments, the store itself called an end to its TV venture.

Other stores have tried to use TV as they have used radio, with inexpensive daytime shows. But there is as yet no TV equivalent for the phonograph record which delivers, in the course of an hour, a million dollars' worth of talent at practically no cost. Low budget local talent daytime TV shows have in general found the competition for audience with the name talent daytime TV network programs too tough to make it worth while continuing.

So, for the moment, department stores are less than major TV clients and, if the present situation were to continue as is,

To Attract Department Store Advertising:



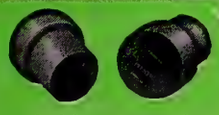
1. TV schedules must be flexible to allow for peaks and valleys in campaigns.
2. Telecasters must appreciate the stores' problems of selling some items one day, others another, never the same the year around.
3. TV must give the store (and its departmental buyers) better results at lower cost than rival media.
4. TV must establish local rates that do not charge for distant audiences outside the stores' trading areas.

Engineered today for your needs tomorrow!

MYCALEX®

PRECISION-MOLDED MYCALEX 410

TRANSISTOR SOCKETS

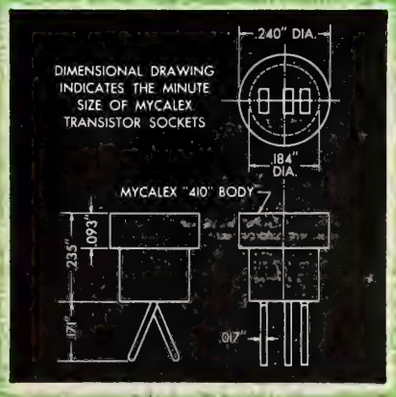


Mycalex 410 Transistor Socket shown actual size

Mycalex 410 Transistor Socket enlarged to show detail

—now in the pilot production stage
—engineered in advance of actual need

In keeping with the MYCALEX policy of progressive design in advance of needs, these Transistor Sockets were engineered months ago and are now in small scale pilot production. They'll be available in quantity in advance of actual needs.



Achievement in
PRECISION MOLDING!

The production of Mycalex Transistor Sockets is a real accomplishment of precision molding in miniature. The holes for the leads are the smallest ever molded. All tolerances are exceedingly close. Mycalex production engineers are proud of their achievement . . . particularly because low-cost, mass production techniques can be adhered to.

The body is precision-molded of MYCALEX 410, glass-bonded mica insulation for lasting dimensional stability, low dielectric loss, immunity to high temperature and humidity exposure combined with maximum mechanical strength. The loss factor is only 0.014 at 1 MC and dielectric strength is 400 volts/mil.

Contacts can be supplied in brass or beryllium copper. The sockets are readily solderable. The socket bodies will not warp or crack when subjected to high soldering temperature. They function in ambient temperatures up to 700° F.

Mycalex Low-loss Tube Sockets and Multiple Headers

A complete line of tube sockets including sub-miniature types is available in Mycalex 410 and Mycalex 410X glass-bonded mica insulation. Comparative in cost to ordinary phenolic sockets they are far superior in every respect. Dimensional accuracy is unexcelled. For complete information on standard and custom Tube Sockets or Multiple Headers, call, wire or write . . . there is no obligation, of course.

they would not be likely to become more interested in this new medium than they now are. They feel they don't really need TV, and the stations, with plenty of other business, are not worrying very much about getting stores into their studios.

But TV is not staying still. New stations, now the freeze has ended, are getting into operation at an ever accelerating pace. Many of these will be primarily local in character, dependent on local and syndicated programming and on local and spot business. To them the department stores will represent a source of business well worth cultivating.

To them I say:

Work with the stores, and do it their way, even though that might not coincide with the traditional pattern of across the board broadcasting. (Department stores never advertise horizontally—always in peaks.)

Try to understand their problem of selling a lot of one set of items of merchandise today, a lot of another set of items tomorrow and not the same items day in and day out the year 'round.

Appreciate that the advertising for each item is charged to a single department whose budget is geared to the cost of a fraction of a newspaper page. Try to give the buyer the kind of TV advertising that will create more sales at comparable advertising cost.

Above all, establish a local rate in keeping with the shopping area of your community's stores and don't charge them for remote audience they can't sell to, no matter how valuable these out-of-towners may be to your national and regional advertisers.

Do those things and you will find that department stores can form the solid basis of profitable local TV station operation.

ABOUT THE AUTHOR

From 1943 to 1947 Mr. Cuff was successively commercial manager and general manager of WABD (TV) New York and general manager of all DuMont stations. From March to December 1948, he organized and operated the RCA Victor and Allied Stores Television Caravan, which demonstrated TV in 22 cities then without TV stations. He has been radio and television consultant to Allied Stores since 1948. Mr. Cuff believes he was associated with the first regularly scheduled TV commercial show in the U. S., the *Travel Hour*, sponsored by American Express Co., for which he was manager of radio in 1935-42.

The "Calo Pet Exchange" finds homes for pets that might otherwise be destroyed. It's a commendably humane project, but Calo also knows that . . .

Dead dogs don't eat dog food

FOR 16 years on radio and more than four on TV, the Calo Dog Food Co. of San Francisco has been endearing itself to dog-lovers and presumably to dogs by sponsoring the *Calo Pet Exchange*, a program that finds homes for the floating canine population.

The rewards of this endeavor are more than spiritual. It would be an incorrigible ingrate indeed who, after acquiring a loving pet through the *Calo Pet Exchange*, installed it on a diet of a rival dog food. Calo sales records indicate that the proportion of ingrates in the broadcasting audiences of San Francisco and Los Angeles is reassuringly small. According to Charles R. Williams, vice president of the company, Calo outsells all other dog foods in San Francisco, and its sales have risen 55% in Los Angeles since the program was introduced there.

The *Pet Exchange* came into being after Frank Wright, then a newscaster on KWBR Oakland, Calif., slipped a filler item into a news show on a dull day in 1936. The filler said: "Wanted: A home for an abandoned puppy, breed undetermined. The people who owned this dog left town today. We don't want him killed."

The Gas Chamber

So many compassionate listeners volunteered to cheat the canine gas chamber that Mr. Wright decided to find a supply of homeless dogs equal to the demand. A visit to the San Francisco pound convinced him that an adequate throng of strays was awaiting execution, and in a trice the *Pet Exchange* was on the air, with Calo as a skeptical and short-term sponsor.

The show was immediately profitable —for the several unemployed telephone operators who were hurriedly drafted to handle calls, for the suddenly-discovered multitude of dogless dog-lovers who were provided with pets, for the dogs that were reprieved at the eleventh hour, for the sponsor who noted a flurry of demand for Calo dog food, and for Mr. Wright who began a new and more remunerative business career as a promotion and advertising man.

He now heads the Frank Wright National Corp., with offices in San Francisco and Los Angeles, and handles Calo advertising.

After a year, the *Calo Pet Exchange* moved from KWBR Oakland to KFRC San Francisco where it remained through December 1951. It then became a television feature on KGO-TV San Francisco. Meanwhile, it had been started in 1948 on KTTV (TV) Los Angeles. It now is also broadcast on KGMB Honolulu, and a somewhat similar show, *Animal Fair*, is on WBZ-TV Boston. All of these are sponsored by Calo.

ONE of the quarter-million pets for which Frank Wright has found new homes is shown here with Mr. Wright in a KGO-TV San Francisco telecast, waiting for a telephone call volunteering refuge.

Mr. Wright himself presides over the San Francisco and Los Angeles television productions, traveling by train between the engagements in a drawing room regularly reserved for him and a companion, which, not unexpectedly, is a dog—Calo Jr., a personable mongrel that also appears on the shows.

The programs open with an introduction: "And here is Frank Wright, the dog's best friend." Mr. Wright then pleads with listeners who may be bent on canicide not to destroy their pets but to give him a chance to dispose of them less drastically. Those who are swayed by his argument join the supply list which Mr. Wright's 10 assistants perpetually try to match with the list of demands.

Traffic Jam

Mr. Wright learned long ago not to disclose on the air where an available animal is actually located. On an early broadcast he spoke movingly about a stray German Shepherd pup in custody at San Francisco police station. Traffic patrols had to be called to clear the congestion from the precinct.

In the 16 years of the *Calo Pet Exchange*, Mr. Wright estimates that a quarter of a million displaced dogs and cats have been relocated in new homes. Occasionally, other species of pets have been satisfactorily exchanged, though some would have seemed to challenge even Mr. Wright's resourcefulness.

Once a man telephoned the program in obvious distress to report he owned two alligators that were breaking up his home. Although he was fond of them, his wife objected violently, on both ethical and sanitary grounds, to his keeping them in the bathtub. It was no trick at all for Mr. Wright to find a listener with a fenced pond and an affection for reptiles.

"camera work on the Waring Show is ... art photography"

JOHN CROSBY

and the cameras are GPL

Columnist John Crosby, discussing not electronics but end results on the screen, calls the Waring show on CBS Television "pure television." Such results come from three things: Waring imagination, CBS Television techniques, and GPL camera chains.

> *"The pictures move . . . are a combination of light and shadow, of form and substance that catch and hold the eye."*

A GPL extra in engineering accounts for much of this. Camera and operator may be moving on a boom in a 3-dimensional pattern. Yet the operator has only to concentrate on aim, while the director at the Camera Control Unit adjusts the iris for light and shadow.

> *"The cameras seem to roam at will on that show with a fluidity and grace almost never found in the movies."*

That fluidity is engineered into GPL cameras. Dual focus knobs, push-button lens change with automatic focus adjustment, precision pan and tilt motions—all these enable camera men and directors to capture the full scope of a show. Fantasy or stark realism, sports in sunlight or drama in stage shadows . . . GPL cameras put top quality pictures into the line.

Whatever your type of operation, whether you need one chain or six, investigate these cameras designed for *modern* television. Rugged but lightweight, they are easily interchangeable between studio and field. Circuit design guarantees consistent high quality.

Station owners like their economy; camera crews like their velvet smoothness and operating ease; maintenance men like their long service life.

NEW STATION OPERATORS:

Without obligation, GPL engineers will be glad to study your entire studio needs for cameras, projectors, film chains and video recorders.

When an advertiser buys into a "Feature Foods" show on any of these three radio stations, he gets a valuable merchandising plus. Cooperating stores push his products with special displays and promotion.

merchandising with meaning: the story of feature foods

By Jane Pinkerton

MERCHANDISING undoubtedly is radio's most bandied-about word in these days of TV popularity. Like the meaning of gimmick, a term the word seems to have superseded in the most-frequent-usage poll, the meaning of merchandising is a wispy and elusive thing known only to the individual currently saying it.

A Chicago man, however, seems to have added up all the possible meanings of merchandising, subtracted those inept and meaningless, and arrived at a total preceded by large dollar signs for advertisers and stations alike. He is Lyman Weld, president of Feature Radio Inc. and a veteran specialist in merchandising via an advertising agency.

Mr. Weld and the late Paul Faust, officers of Mitchell-Faust agency in Chicago from 1920 to 1950, developed, discarded and disinterred various food merchandising schemes over the years, finalizing their efforts in the success, *Feature Foods,* on WLS Chicago in 1934.

In 1950 when the agency was disbanded, the formulas developed on *Feature Foods* in almost two decades were trimmed to meet current competitive conditions and trends in food marketing, sale and consumption. They then were adapted to two additional markets, Philadelphia (KYW) and Des Moines (WHO), as a full-time service, Feature Radio Inc.

Results Guaranteed

Last year, Feature Radio Inc. and Mr. Weld again streamlined the sales and merchandising formats of the homemaker's feature in all three areas, coming up with a guaranteed-results plan for manufacturers of various consumer food and household products.

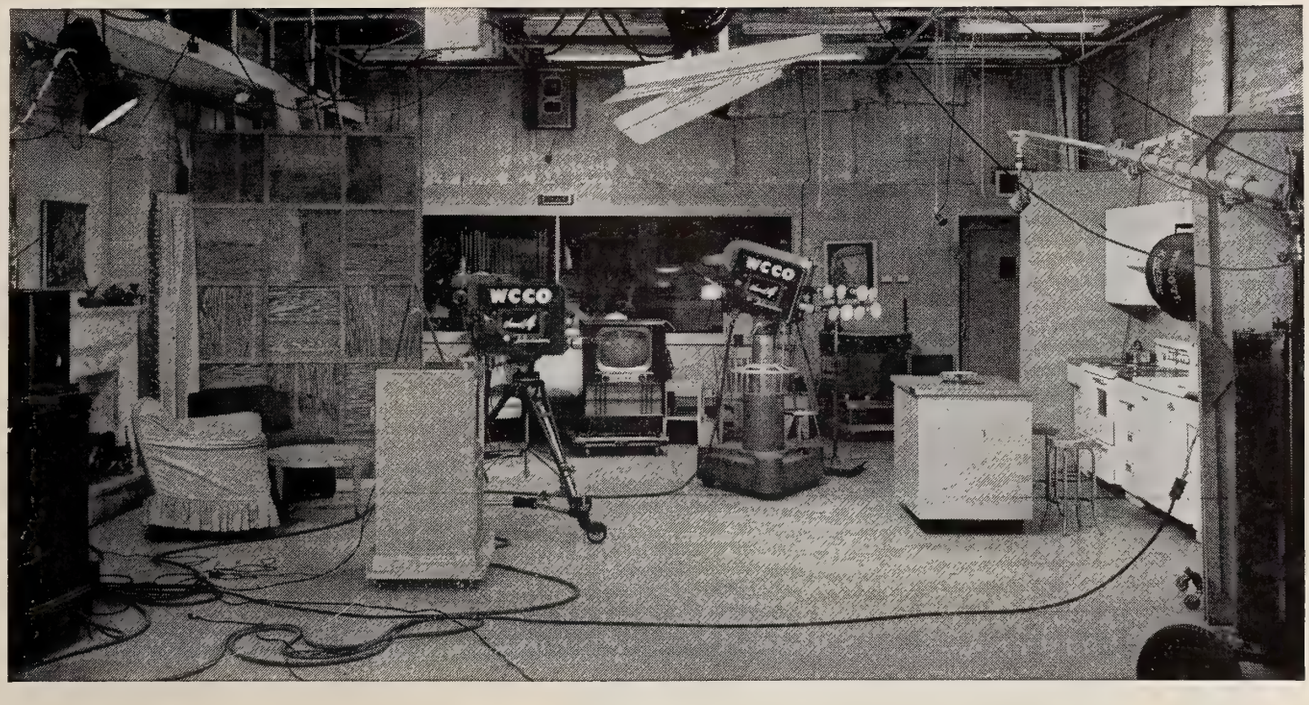
Clients participating in any of the Feature Radio homemaking shows on WLS, KYW or WHO now receive the following: Reports on personal merchandising calls made by Feature Radio employes in the largest and highest-volume independent stores in each area; personal checks in corporate chain stores with data on theirs and the competition's exposure and distribution; monthly personal demonstrations of the radio-advertised product at the point-of-sale (with sampling and couponing) and special displays of the product within the stores in the advertising-marketing area.

A canner of tuna fish, for example, who buys the minimum 13-week contract on WLS Chicago, in addition to the regular listening audience and station promotion, advertising and publicity, is guaranteed merchandising calls in 600 large (five or more employes) and medium (three to four full-time workers) grocery stores, along with personal visits to 60 VIS (very important stores) averaging $750,000 annual sales volume each and handling 5% of the total food store volume in metropolitan Chicago (50-mile radius).

The advertiser also is guaranteed a one-week display in each of these 60 grade-A stores during his 13 weeks of sponsorship; participation in 35 Bargain Bar store promotions; demonstration, sampling or couponing in 13 Bargain Bar promotions; monthly merchandising reports outlining distribution of his product, exposure, rate of sale and special comments by the Feature Radio representative; personal checks on 100 corporate chain stores showing distribution and exposure.

This same pattern is used in the Des Moines and Philadelphia areas, where "the biggest, best and largest-traffic stores" are surveyed. Average annual volume of each of the 64 top stores in Philadelphia is $650,000, and of the 54 stores in Iowa, $600,000. And these figures, Mr. Weld says, are conservative. In Iowa the stores are located in 12 counties and annually handle 24.2% of all food business in those counties.

The personal checks are conducted only in and with the cooperation of (on contract) the voluntary chains or cooperatives, nominally the independents, as contrasted with the corporate chains, such as Kroger



Feature Radio clients get special point-of-sale attention from consumers in Bargain Bar displays and demonstrations, set-up and manned by Feature Radio merchandisers. Clients can use couponing or sampling, and order any type of demonstration they prefer. This bar was maintained by WLS *Feature Foods'* show in the Chicago area at the heaviest-traffic independent stores.

WCCO-TV

has what it takes...

. . . studios—equipment—personnel—to do imaginative and *good* production

When you consider spot Television for the rich Minneapolis-St. Paul market you are unhampered by production limitations.

WCCO-TV has two fully equipped studios, exceptionally flexible mobile equipment, and the personnel to carry through your ideas. Twenty-eight people in production alone . . . men with as high as thirty years in television and show production...a selling-minded staff that works well with your client's Twin City district sales office!

Equipment, experienced personnel, and imaginative production...combine here to make spot television more effective and profitable!

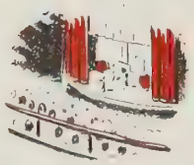
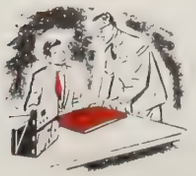
magnecord Voyager



for recording the world around



magnecord's new one-case portable professional tape recorder

Easiest to Handle— At last, a professional portable recorder and amplifier in a single case, light but rugged to take the most difficult remotes. The Voyager has been thoroughly field tested and it's been voted the best of travelers. Lighten *your* remote work, insure perfect recording — use the Voyager, newest member of the Magnecord family.

Professional Quality—Frequency response with tape is ± 2db from 50 to 15,000 cycles per sec. at 15 in. per sec. tape speed. The amplifier has bridging and low impedance mike inputs with 600 ohm output. Headphone monitor jack on front.

A Natural For Advertising Agencies— The Voyager is so flexible you can use it in a multitude of ways — air checks, development of spot announcements, program development, and with an amplifier and speaker, auditions, client presentations. Ultimate in quality.

The Famous Magnecorder— Standard of Broadcasters

For further information and demonstration, see your Classified Telephone Directory under "Recorders," or write

Magnecord, INC

Dept. B-1, 225 W. Ohio St., Chicago 10, Ill.

and A & P, according to Mr. Weld. The independents, to compete price-wise with the corporate chains, submit to a voluntary incorporation or cooperative arrangements. This group includes such chains as the Certified and IGA stores.

Five women merchandisers handle Feature Radio assignments in each of the three cities, visiting stores regularly to set up displays, securing prominent exposure positions for Feature Radio clients, checking on distribution by the competition, installing shelf-extenders and chatting with housewives over the Bargain Bar.

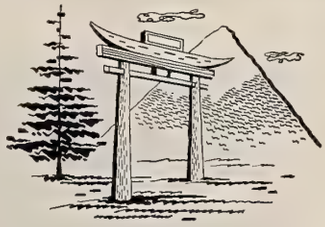
Under terms of the company's contract with each store, the store guarantees to stock any radio-advertised item for the 13-week minimum, an invaluable aid in gaining immediate and extensive distribution for a product introduced into a new territory.

The three-way operation involves the manufacturer, who creates a salable item; the radio show, which, through its well-established homemaking personality, talks to women at their own level of interest, and the in-store activity, which uses all point-of-sale devices to clinch the purchase.

Feature Radio, for example, has built shelf-extenders, which it uses one week out of every four in each store and lets the store use them the rest of the time. The plywood board, edged with chrome, extends the standard shelf so the product displayed is put into prominence as the shopper wanders along store aisles.

Tuna Jumping

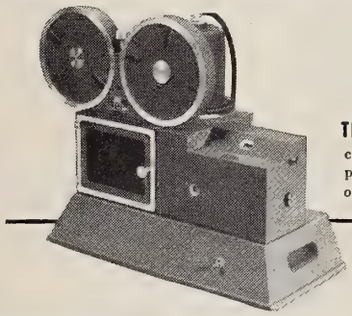
According to one food market, sales of tuna fish went up 378% in one week after use of a shelf-extender. Prior unit sales were 50, which rose to 239 with use of the device, a unit increase of 189.



"Island" displays, or floor stacks set apart from regular shelf and floor displays, make sales soar, too, and Feature Radio workers may use these at regular intervals in each store. These attention-getting devices are a must in store merchandising, Mr. Weld says, because most shoppers, it has been proved, buy on impulse when in the store, rather than from a pre-planned list of necessities—even in such a non-luxury line as food.

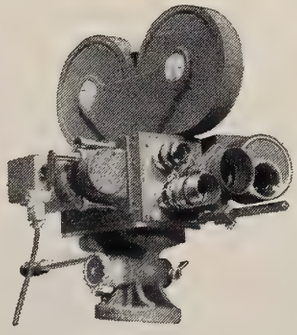
Women field workers for Feature Radio work closely with the radio personality in each of the three cities in which the merchandising program now is in effect, and with the grocers and consumers as well. Because of the necessity for "absolute, implicit accuracy" in reports, the workers are chosen carefully, instructed "never to guess," and to say they "don't know" when in doubt about a fact or figure. "If we ever caught any one of them fudging, they'd be out," said Mr. Weld, an empty threat thus far because no one has fudged.

Their field reports are the basis for overall reports to the client. One progress report, for example, showed a client that his item was in stock at 142 stores, temporarily out of stock at 2, with the field workers taking orders for merchandise in the two empty stores. For the same client, the report showed his exposure to be equal to competitors in 115 stores, better in 19 and worse in 4.

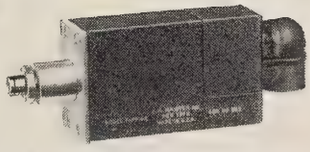


Shelf talkers were spotted in his behalf in 80 stores, his product was cleaned and

MAURER 16mm AT WORK FOR THE JAPANESE GOVERNMENT!



Ian Mutsu, president of the International Motion Picture Company, Tokyo, makes films for the Japanese Government . . . and for United Press-Movietone TV Newsreel. What camera? The Maurer "16," of course. "Thoroughly satisfied," says Mr. Mutsu . . . as all the world's top professionals say of the Maurer "16" . . . because it meets so many varied needs, gives top performance under all conditions of light, temperature and humidity.



THE 16MM. SOUND-ON-FILM RECORDING SYSTEM combines the highest fidelity in 16mm. recording practice with wide flexibility and extreme simplicity of operation.

THE MAURER 16MM., designed specifically for professional use, equipped with precision high-power focusing and view-finder. Standard equipment includes: 235° dissolving shutter, automatic fade control, view finder, sunshade and filter holder, one 400-foot gear-driven film magazine, a 60-cycle 115-volt synchronous motor, one 8-frame handcrank, power cable and a lightweight carrying case.

THE MODEL F PRIME RECORDING OPTICAL SYSTEM AND GALVANOMETER. A complete light modulating unit for recording sound photographically upon standard film, requires no special servicing or spare parts (other than recording lamp).

straightened in 92 stores and the exposure improved in 91. Distribution was reported in three super markets in that particular city, but two of the three had a temporarily-out-of-stock condition. Exposure, as contrasted with a competitive product, was checked there also. The reports always detail the names and addresses of stores visited on merchandising checks, for special displays and for Bargain Bar demonstrations.

Because of the intense competition in the food field, Feature Radio cannot release brand names and specific sales increases to point up its successful blending of merchandising and radio.

Distribution Gains

However, when a small New York seafood firm wanted to gain distribution in Philadelphia, where it had only 5%, it bought a small participating schedule there and now has between 35% and 40% distribution in the better stores, and is cracking the chain stores against established competition. And, despite the lack of freezer space to house its product, the firm reports trebled and quadrupled sales.

Several clients have been with Feature Radio on a firm 52-week yearly basis for as many as 10 years in Chicago, and for two years since the program's inception in the other two markets. Rap-in-Wax wax paper, which never has used any advertising but *Feature Foods* on WLS in Chicago, continues to be one of the best sellers in the market. Sales reports are especially gratifying because the paper for many years cost two cents more per roll than any sold by competitors, who used much heavier advertising campaigns. One mayonnaise maker said his sales rose 37% in a six month period.

In each of the three cities, a "believable" and understanding woman handles the radio show and integrates commercials according to her own style. In Chicago, the program is *Feature Foods* and the homemaker is Martha Crane, featured on the show 18 years.

At KYW in Philadelphia, the program is *Anne Lee's Notebook*. Miss Lee appears with Jack Pyle, disc m.c. She also was associated with the similar show at WLS for many years.

Stations Own Shows

In Des Moines at WHO, the daily *Iowa Feature Fare* is handled by Betty Brady, who originates the show with Duane Ellett, announcer, and Bill Austin, pianist, at the Hotel Savery. In all cases, the station owns the show and handles the sales, in cooperation with its representative, and Feature Radio supplies only the merchandising part of the package.

Mr. Weld, who continues to be delighted at the sales successes of his clients (an ice cream topping went up 700% in one week in Iowa), has instigated a similar package among druggists on KYW and WBZ Boston. Food and drug merchandising, once the "side show" during Mr. Weld's years in the agency business, now is the "main tent."

Advertisers who have crowded into the main tent with Feature Radio include Nabisco, Cocoa Wheats, Nestle's chocolate, Nutrena dog food, Ball jars, Fleischmann's yeast, Jello, Creamettes, Best Foods, Pillsbury Mills and Peter Pan peanut butter.

Services for these, and other clients have gone beyond "the call of duty." An example of this is outlined in a letter sent to Mary Amsberry, when she worked in the Omaha market at WOW, by H. K. Jansen, head of the household soap division of Armour & Co. there.

"We have checked your report that you were so willing to make up for us on the potential market of a giant-size package of detergent. We find that your accuracy is almost unbelievable, and it has been a great help to me in selling our own people on the idea of making a giant-size package of Armour Suds available in this market. . . . With your figures, we are definitely in the process now of making a giant-size package of Armour Suds. I know this information was not in line with what we asked you to do for us, and this makes it doubly appreciated."

R. J. Burmeister of the Good Luck margarine account group at BBDO, New York, wrote Mary Doyle, the merchandising coordinator at KYW Philadelphia: "There is no station doing a more outstanding merchandising job than KYW. Far too many stations fail to realize the effect that this type of response has upon the advertiser." He termed one of the monthly reports on the project "an excellent and very valuable study."

R. L. Harris, advertising manager of the American Chicle Co., Long Island City (Chiclets), commended Miss Doyle and KYW, saying, "We cannot recall a single similar instance when we have received such outstanding promotional support from a radio station carrying our advertising."

GETTING THE EDGE ON COMPETITORS

One merchandising device used by Feature Radio Inc. for its radio clients is the shelf-extender. In the illustration above, Presto cake flour, on the extended shelf, is more apt to attract the eyes of roving customers than rival flours displayed to the rear on regular shelves. Extender is used one week in four by the merchandising group, remaining three by the store for its own purposes. Sales after use of the extender rose in Des Moines 497% for a Pillsbury product, 450% for Hoffman Dressing (sauce) and 484% for Hunt's canned pears.

TELEQUIPMENT NEWS

Published by the General Electric Company, Electronics Park, Syracuse, N.Y.

THREE NEW, ADVANCED PIECES OF TV PROJECTION ROOM EQUIPMENT ANNOUNCED BY G-E ENGINEERS

Automatic Gain Control Amplifier, two new mirror change-over models, and versatile, improved slide-projector are now available to all television stations.

ENGINEERS at G.E.'s Electronics Park have announced the completion and the availability of three new, advanced pieces of television projection room equipment.

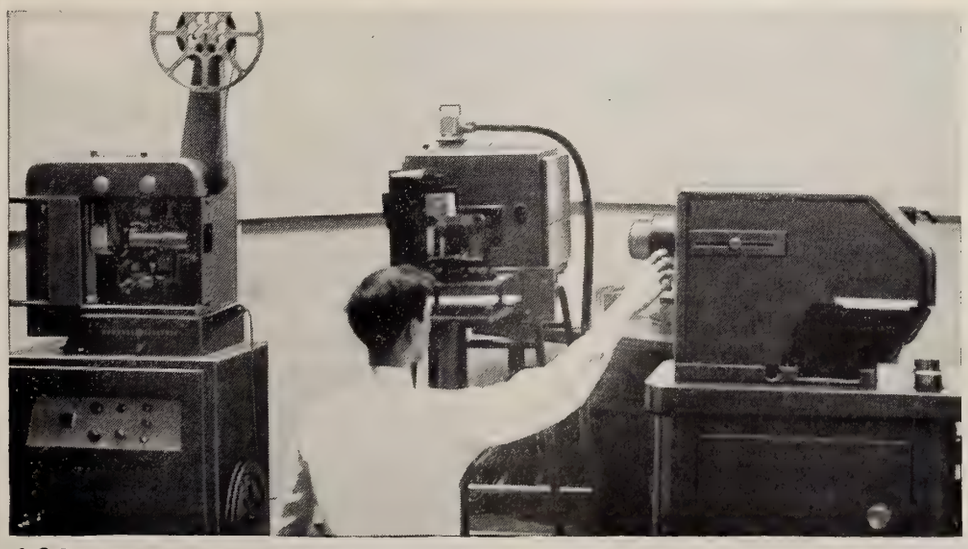
The first piece is an Automatic Gain Control Amplifier that will work with any station's film camera channel. The black and white stretchers in this Amplifier make it possible to get the most out of variations in film densities. And once the adjustments are set the Amplifier automatically maintains the level of adjustment.

This simplifies a station's operation and in many cases it will not be necessary to have an operator constantly at the film monitor. The Amplifier is rack mounted, and was developed by G-E engineers Max Diehl and Jack Petrik.

Mirror Change-overs

These two new designs are also adaptable to all TV film projection rooms. The simple V-type design has a provision for mounting a 2" x 2" projector that projects over the First-Surfaced mirrors into the film camera channel. This model costs $225 and allows three inputs to the channel.

The three mirror change-over design allows four inputs. Two are for film projectors. The others are for a 3" x 4" projector and a 2" x 2" projector. The features of this three mirror change-over include First-Surfaced (precision ground) mirrors, aluminum surfaced and vapor-hardened coated mirrors, and multiple adjustments in horizontal and vertical planes. The mirror change-over design costs $750 and has a leveling type platform on a heavy pedestal which can be bolted securely to the floor. It was developed cooperatively by G-E engineer Ed Lederer and Bausch & Lomb, Optical Co.



New TV Slide Projector

General Electric's new TV Slide Projector is a dual projector with a single optical system to eliminate keystoning. It has Variac and mechanical controls for fading and lapping from one picture to another. Opaques and transparencies can be used and the Projector has extra high light intensities.

The extreme versatility of this advanced Slide Projector is derived from the many pieces of accessories that go with it. They include a 2" x 2" slide projector, a single Selectro-Slide, a single slide carrier, a 4 slide rotary head, a roll-through script carriage and a time news tape carriage. Convenient storage space is also included.

Engineer Ed Lederer worked with Bausch & Lomb in the development of this piece of equipment, too. Contact G-E sales reps for detailed information on this projection room equipment.

General Electric says: "Before you buy any TV equipment—check a station using G-E units."

A G-E field engineer inspects the television industry's most advanced projection room equipment. An announcement has just been made by General Electric of the completion and availability of these three pieces of TV equipment.

Glenn E. Webster

Glenn E. Webster, G-E district sales manager for broadcast equipment, has his headquarters in the Merchandise Mart, Chicago. He handles G-E broadcast equipment sales in North Dakota, South Dakota, Minnesota, Iowa, Wisconsin, and parts of Illinois and Indiana.

GLENN E. WEBSTER

A veteran of 23 years in the electronics industry, Webster served 14 years with NBC as a studio and master control engineer. He served in various engineering and sales positions with other radio manufacturers, and for a time headed the Webster Engineering Company at Cedar Rapids, Iowa.

A native of Trescott, Kansas, Webster was graduated from Kansas State College in 1929 with an engineering degree.

Attention!

TV questions answered!

Television station owners, managers and engineers are invited by the General Electric Broadcast Equipment Section to submit questions on technical problems they have encountered in local TV station operations. The questions will be answered by highly skilled and experienced G-E engineers and sales representatives as a part of G-E's continuing field service.

Questions and answers which are felt to be of wide interest in the broadcasting field will be reprinted in the TELEQUIPMENT NEWS series during 1953. Send your questions to *Section 213-19-TN, General Electric Co., Electronics Park, Syracuse, N. Y.*

GENERAL ELECTRIC

bell system adds mobility to its tv facilities

WHEN President-elect Dwight D. Eisenhower is sworn in on the steps of the Capitol tomorrow (Tuesday), the Chesapeake & Potomac Telephone Co. will have two mobile microwave relay trucks in operation—to bounce TV signals from pick-up points to the telephone company's central office where they will be fed to the watching nation.

And as the inaugural parade wends its way up historic Pennsylvania Ave. the TV transmitters-on-wheels will be driven to new places along the line of march to serve as funnels for the lenses of TV cameras flashing the gala scene to the American people all over the country.

Mobile microwave pickup trucks are not entirely new for the Bell System's affiliated companies. But it has been only in the last year that TV service has become so important that relay stations on wheels have become a necessity. As of today, there are 11 such mobile units in the Bell System empire. More are on order and undoubtedly will go into operation during 1953.

Heretofore, the local telephone companies took care of TV stations' orders through existing local cable circuits. Where the pickup was from a site not connected, the telephone companies set up temporary receiving dishes and low-powered transmitters to feed the picture image to the nearest telephone facility.

'Bounce' the Signal

In many cases, local TV stations beamed the signal picked up by their cameras directly to the transmitter site. Where it was necessary to "bounce" the signal more than once, the stations came more and more to rely on AT&T companies.

Mobile trucks, built to specification, with tell-tale "dishes" atop their roofs, are ready to ride in many TV cities.

The two trucks in Washington are an example. One is a regular telephone truck modified by C&P engineers to function as a mobile TV relay station. It has been in operation for a year. The second, ordered from International Harvester Co., was modified by a body contractor to add a roof platform, relay racks and various interior fittings. It went into operation several months ago.

The first mobile unit has been used on several occasions. It was used at the National Airport to pick up the arrival of President-elect Eisenhower on his visit to the White House to confer with President Truman.

It also has been used to transmit football games from U. of Maryland and from the Marine Base in Quantico, Va.

SET UP for operation, a Chesapeake & Potomac Telephone Co. mobile microwave relay unit is ready to pick up TV picture signals and relay them to its central office for national distribution. Two of these units were readied for the inauguration ceremonies tomorrow.

* * *

New York Bell has three such trucks—the first being placed in service late in 1940—which have been used in various ways.

During an Ed Murrow *See It Now* show on CBS-TV, a mobile truck at Port Jefferson was used to pick up video signals from a submarine lying off Long Island. These were then relayed to the Empire State Bldg. in New York City.

In one instance, New York Bell sent a mobile unit up to New York Gov. Thomas Dewey's home in Pawling, N. Y. The signal was picked up and relayed to the AT&T Long Lines' Birch Hill relay station of the New York-Boston microwave system.

Pacific Telephone & Telegraph Co., which has three mobile units, bounced Bob Hope around quite a bit when the comedian put on a regular show from the flight deck of the U.S.S. Boxer as it was returning from Korean waters. Signals from the Boxer were aimed at Soledad Peak, San Diego, 10 miles away. There a mobile station relayed the images 35 miles to Re Mt., where another unit moved them along to Santiago Peak. At Santiago Peak, the mobile station pushed the video signals over the last 45-mile link to the Grand Ave. terminal of the telephone company in Los Angeles.

When an earthquake hit Bakersfield, Calif., last August, the Pacific company set up a mobile relay system originating on the roof of a department store in Bakersfield with a second atop Tehachapi Mt. and a third atop Oat Mt. From Oat Mt. the video signals were shot to the telephone company's Grand Ave. building in Los Angeles.

Five Link System

Earlier when a temblor levelled the little mountain town of Tehachapi, the Pacific company set up a five-link system operating from the railroad station in the still rocking area. Signals went from Tehachapi to Mt. Hall (near Mojave), to Mt. Liebra thence to Mt. Wilson and into Hollywood.

Illinois Bell, which has a single truck, found it indispensable when President Truman arrived at the Chicago airport during the Democratic convention this summer. He normally would have been televised on the air strip, with the signals going directly to the CAA Bldg., where an existing loop would have been utilized to feed the images to the central office. However, a new hanger had been constructed which cut off the line-of-sight from the air strip to the CAA Bldg. The mobile unit was rushed in to form a two-hop relay system to get the signals to the CAA Bldg.

Indiana Bell, with two mobile units, has found them a definite requirement for State Fair pickups, Indianapolis Speedway coverage, high school basketball tournaments and for other routine jobs.

THE MOBILE UNIT is the TV station and network's minute man on wheels. It is a field relay station in practice and in fact. Thanks to the technical ingenuity and perseverance of the Bell System, the telecaster has been able to overcome staggering problems of remote pickups. The unit's special usefulness comes into play at such outstanding national events as the inaugural. Tomorrow, as President-elect Eisenhower takes the oath of office, as the marchers and floats begin the swing down historic Pennsylvania Ave., the mobile truck will relay from scattered points the pictures which will appear as a continuous story for the nation's viewing millions.

Byer Brothers' Six Years With the Right Medium

Whether his store is large or small, the local retailer is finding through experience that radio's selling power outstrips the printed media's efforts.

BYER BROTHERS, Sandusky, Ohio opened their doors for business in the men's clothing field six years ago in March.

They started testing their success as a radio advertiser in December, 1947 when WLEC began operations. They have gradually reduced their newspaper advertising since then and now use a bare minimum of space in the local paper. Sixty-seven per cent of their advertising budget is spent on radio. The program is fifteen minutes of local news at 12:30 p.m. three times weekly. The same time and program has been maintained for five years.

In spite of being plagued by shortages following the war and lack of brand names for some length of time, Byer Brothers has been able to build their business to the point where they now sell brand name franchised lines such as, Fashion Park and Michael Stern suits, Manhattan shirts, etc., in addition to Alpagora topcoats, MacGregor shirts, Bates and Freeman shoes.

Yearly Sales Rise

They have shown a steady yearly increase in business even though they have competition from six other men's stores, a department store and chain stores, in a city of less than 30,000 population.

Perhaps their best promotion is a radio exclusive. A "baby tie" is presented to every proud father whenever his new born is reported on the local news program. This is a maroon tie saying "It's a Boy" or "It's a Girl". Byer Brothers purchases these ties in 24-dozen quantities.

David Byer and his brother, Marvin, operate the business with guidance from their father, Joseph Byer.

Byer Brothers give radio a large measure of credit for their success and acceptance in the community. They are unhappy about only one thing. At one time they dropped two days of their original news program and have been unable to get it back. The sponsor who picked it up will not part with it now.

Consistently Renewed

Incidentally, Byer Brothers is one of WLEC's original accounts of five years standing. An interesting sidelight is, that the station has batted one hundred per cent on renewals from their original clients, all of whom have signed their sixth continuous contract.

WLEC operates on 1450 kc with 25 w. It is licensed to the Lake Erie Broadcasting Company. Jay E. Wagner is president and general manager.

KONA (TV) Chinese Show

KONA (TV) Honolulu schedule Jan. 11 included the initial airing of *The Chinese Hour*. Station claims it is the first all-Chinese video show in Hawaii and believes it to be the first such anywhere. Directed and produced by Franklin C. Tong, the first show featured a Hawaiian Chinese newsreel, local Chinese Chamber of Commerce inaugural dinner and an INS world-wide newsreel narrated in Chinese by Mary Ching.

WOC-TV SELLS

State Furniture Co., Davenport and Muscatine, Iowa, has had a one-half hour program on WOC-TV each week since November, 1950. From the first program, television has paid-off for State. *It's still paying off* . . . for example, on their "live" amateur show, Nov. 14 and 21 of 1952, they advertised their line of sewing machines. During 17-day period, they sold 142 machines, average retail price, $60.00. TOTAL SALES, $8,520.00. (Other items were advertised on these same programs; they also did well.)

Schlegel Drug—a local chain serving the Quint-Cities—advertised three different toys on each of their one-minute announcements during early December. From one of these announcements (actually only one-third of an announcement), they sold 72 toy fire trucks at $3.39 each. $244.08 IN SALES ON THIS SINGLE ITEM. Yet they were unhappy. Reason? Simply because 72 were all of these fire trucks they had in stock. Could have sold two times 72 from that one announcement (pardon us, one-third announcement), they claim.

Yes, WOC-TV SELLS . . . get the facts from your nearest F & P office . . . or direct from us.

LEGISLATURE BROADCASTS

NEW program presenting a pro and con discussion of bills, hearings and laws which are pending has been conceived by Ken Miller, KVOO Tulsa news director, for broadcast every Friday evening. *Oklahoma Legislature* consists of live commentary and on-the-spot recordings of legislators at Oklahoma City, state capitol. Show attempts to inform listeners far enough in advance of what is pending, that they may voice opinions on the issues.

STATION-SPONSOR HARMONY

"WEIGHTS and Measurements" cards are being offered to viewers of *Margaret's Kitchen* on WNBW (TV) Washington by the Washington Gas Light Co., in that city. Firm sponsors several spots on the series. Station passes on this information as what it considers a good example of station - sponsor cooperation. WNBW is paying the printing bills for the cards while the gas company assumes the cost of mailing.

HAZEL BISHOP BROCHURE

SUCCESS in the use of two daytime NBC radio serials by Hazel Bishop Inc. is cited in a brochure distributed by the network. Aiming at a women's audience, Hazel Bishop, through the Raymond Spector Co., sponsored *Lorenzo Jones* three days a week plus *Inside News From Hollywood* five times a week. Last August, NBC reported, an offer of a 10-cent trial package of Hazel Bishop Complexion Glow brought in more than 100,000 dimes within the first four days the announcement was on the air.

OFFICIALS ANSWER QUESTIONS

PROGRAM series called *On the Spot* was launched by WROL Knoxville on Jan. 9 with Knoxville Mayor George Dempster as the program's first guest. Each week, a public official will be heard on the broadcast answering the questions which listeners will phone in during the broadcast.

APPEAL BRINGS RESULTS

SUCCESS story backing up claims of the power of radio is being told by WLIB New York. Windham Children's Service there had 40 Negro children who needed homes. Station agreed to help place the children. WLIB set up "Operation Foster Home" in its daily Negro block. Within three days, 209 valid requests were received for children.

FARM SHOW COVERAGE

TOP events of the annual Pennsylvania State Farm Show at Harrisburg, Jan. 12-16 were broadcast each day by KDKA Pittsburgh on the station's *Farm Hour* show. Homer Martz, station's agricultural director, handled the broadcasts. Broadcasts were taped at a special Westinghouse Radio Stations Inc. display booth on the main exhibition floor which was shared by KYW Philadelphia. Both stations are Westinghouse outlets.

NEW PROGRAM SCHEDULE

PUBLICATION of the "West's most complete program schedule" was announced last week by KSFO San Francisco. The six-page folded program, in addition to program listings, includes a coverage map of the KSFO signal radius, pictures of station personalities and rate information. Station's art department designed the lay-out. Copy on the cover stresses that on KSFO "evening listening is up while evening rates are down since the advent of television in the bay area."

TEXAS NETWORK SERIES

SERIES of five-minute news broadcasts five days per week over 16 stations of the Texas State Network has been started by Wally Blanton, Texas newscaster and announcer. Sponsor of the program, to be aired for 52 weeks, is Nob Hill Coffee.

NEWS BULLETIN PROMOTION

DAILY distribution of news bulletins to nine Washington hotels is being used by WMAL Washington to promote its radio and television newscasts and sports shows. Biggest news headlines of the day are printed on the bottom of table tents which are placed on luncheon tables in the hotel dining rooms. Top side of the tent promotes programs aired by Bryson Rash, Joe Campbell, Bill Malone and Jim Gibbons.

PLAYSKOOL TESTS TELEVISION

PLAYSKOOL Mfg. Co., N. Y., makers of Lincoln logs and toy blocks, will start a test campaign when it sponsors *Frontier Playhouse*, 10:30-11 a.m. Saturdays on WCAU-TV Philadelphia, effective Jan. 24. The show is em-

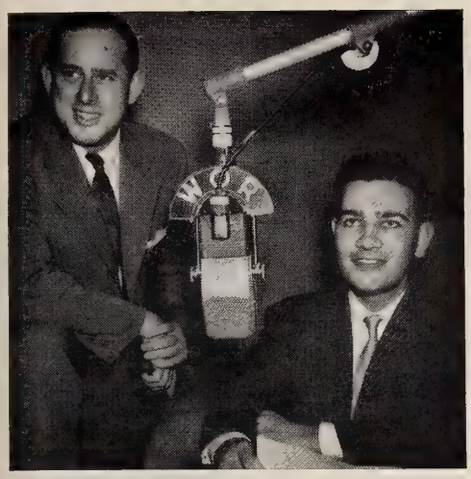
Luncheon talk
by GOVERNOR EARL WARREN
of California



The twenty-two subjects embrace all important aspects of television programming. The book is a practical symposium of TV data by men of wide experience and recognized pioneers in television.

In addition, a good portion of its more than 250 pages is devoted to condensed transcripts of the QUESTION and ANSWER sessions of the Clinics. These intense general discussions by the broadcasters attending the Clinics raised such TV topics as *how to make use of films . . . how to cut costs . . . how to build or remodel a plant . . . how to maintain public service . . . how to hold an audience . . . and how to direct the other TV operations.*

To make sure you receive your copy of "Twenty-Two Television Talks" immediately after publication, place your order now.

BMI

BROADCAST MUSIC INC.
580 FIFTH AVENUE • NEW YORK 36, N. Y.
NEW YORK • CHICAGO • HOLLYWOOD • TORONTO • MONTREAL

TESTIMONIALS aired by WOR New York in a joint sponsor-station promotion campaign feature one-minute announcements recorded by sponsors on the station which praise the outlet's sales effectiveness. Awaiting cue to read announcement are Leonard V. Colson (r), Mennen Co. advertising manager, and William Crawford, WOR radio sales manager.

ceed by "Patches" and features a series of Gene Autry films, billed as never before shown in that area. A log-building contest will be integrated, featuring youngsters between 6 and 10 in the studio constructing log cabins and forts. The station will assist in promotion by supplying limousines to transport children to and from the studio. Friend-Reiss-McGlone Adv. Agency, N. Y., expects the test to be successful enough to expand the programs into other cities.

SERVICEMEN INTERVIEWED

WWRL Woodside-New York is carrying two-minute transcribed interviews with local servicemen stationed overseas as part of a midday newscast. The series is produced by the Army Home Town News Center. Families of men interviewed on the program are notified of broadcast time in advance, and also are given free recorded copies.

PROGRESS REPORT

WEEKLY report on accomplishments of the Eisenhower Administration will be started by NBC radio on Jan. 26 under the name *Ike's Crusade Progress Report,* Mon., 10:35-11 p.m. EST. Show will feature commentators Morgan Beatty, Frank Bourgholtzer, Leif Eid, Earl Godwin, Richard Harkness, Ray Scherer and Esther Van Wagoner Tufty.

BINAURAL SYSTEM EXPANSION

WQXR-AM-FM New York, which uses binaural broadcasting regularly on its Sunday night *String Quartet* program, began transmitting recitals of the American Guild of Organists by the same system, on Jan. 10. The recitals will be broadcast each Saturday, 4:30-5 p.m. EST, from Temple Emanu-El in New York, WQXR said these broadcasts will be the first in the New York area using the binaural system from a point outside the studios.

CROSS PROMOTION

TED COTT, NBC vice president and general manager of WNBC-WNBT (TV) New York, and Ellis Meyers, vice president of *The Play-*

From where I sit
by Joe Marsh

"Biff" Falls for His Own Story

Biff Morgan's four-year-old daughter Rusty is something of a night owl. Stays awake way past her bedtime.

Every night Mrs. Morgan complained about how hard it was to get Rusty to sleep. Finally Biff decided to handle the situation. "Anyone can get a kid to sleep—takes a little patience! Here, hand me her storybook."

He grabs the book and goes into Rusty's room. About an hour later Rusty comes padding out in pajamas and hands her mother the book. "Read it quietly," she whispers, "so we don't wake Daddy."

From where I sit, I'll bet Biff won't be so quick to be a "child-care specialist" the next *time. If we could just resist being such "know it alls," our neighbors would be better off. Take those who would deny me a glass of beer with my supper—well, I might not care for the buttermilk* they *like. We all ought to realize that we all have different abilities and different preferences, too.*

Joe Marsh

bill, long-standing official program of the New York legitimate theatre, have signed a reciprocal promotion agreement in which each organization will promote the activities of the other. In a campaign "designed to stimulate interest in the two entertainment fields," WNBC-WNBT will carry a series of spot announcements featuring stars of current Broadway hit plays and revues. In return, *The Playbill* will run a full-page ad each week promoting programs heard and seen on NBC's key eastern outlets.

ROTARY TO SEE WTVJ (TV)

MIAMI Rotary Club has accepted an invitation extended by WTVJ (TV) Miami to hold its Jan. 22 meeting at the station. Meeting, station hopes, will acquaint club members with facilities at WTVJ. Station executives will be hosts at a luncheon and a tour of WTVJ will follow.

LOCAL HAWAIIAN NEWS

FIRST regularly-scheduled TV newsreel covering strictly local events in the Hawaiian Islands was launched Jan. 11 on KONA-TV Honolulu. Return of a number of Hawaii veterans to the Islands from Korea was one of a number of subjects covered on the first in a planned series of weekly quarter-hour telecasts.

PROGRAMS ON ISRAEL

FIRST of two programs on Israel, arranged by the Zionist Organization of America, was broadcast on WDRC Hartford on Jan. 11. Second show was aired on Jan. 18. Programs were entitled *A World to Build* and were placed on the station by the Hartford chapter of ZOA.

KFAB's 'Big Mike'

NEW trademark of KFAB Omaha, 50 kw CBS outlet, was introduced to the broadcasting industry last week. Harry Burke, general manager, said that the trade paper introductory campaign is being augmented by direct mail and other special promotions. Present plans also call for a special "Big Mike" radio program with accent on merchandising, Mr. Burke added.

MAIL RECORD CLAIMS

NEW TV show on WDTV (TV) Pittsburgh, starring Bill Cullen and titled *Professor Yes 'n' No* is headed for an all-time mail response record, station feels. Show was first televised Jan. 4 and during the week following 8,000 letters were sent in by viewers. Second show brought 5,000 letters. Sponsored by Crosley appliance dealers, the show has a viewers participation format. Because of the favorable public reaction, producer Alan Trench is lining up a number of stations for the weekly film program.

William L. Foss, Electronics Pioneer

FUNERAL services were held in Washington, D. C., Wednesday for William L. Foss, 60, pioneer electronics engineer, who died suddenly the previous Sunday after a heart attack. Many persons prominent in the electronics field paid tribute to his industry achievements.

MR. FOSS

Mr. Foss started his electronics career over three decades ago in Maine, his native state, after being graduated from American U., Washington, D. C., with an L. L. B. degree. From 1912 to 1917 he served as an electrician for Maine Central Railroad and General Electric Co. He served in World War I entering with the National Guard.

Post-war affiliations included Federal Telephone & Telegraph Co. and the Rines stations in New England. He was credited with construction of seven transmitters for the station group. In 1928 he set up a consulting practice in Washington, including broadcast, police and other systems.

During World War II Mr. Foss was consultant for the Signal Corps and Air Force, specializing in radar warning and defense techniques. After the war he set up an agency within the surplus property organization to dispose of electronics gear. After 1946 he operated as an electronics consultant.

Last summer he became a principal in the newly formed telecommunications firm, William J. Scripps Assoc.

Surviving are his wife, Lita S. Foss, and two children.

Mr. Foss was a member of Institute of Radio Engineers, Society of Motion Picture & Television Engineers, Assn. of Federal Communications Consulting Engineers, Engineers Club of Washington and Radio Pioneers.

Copyright Lectures

SECOND series of lectures by the Copyrights Institute has been announced. It will be held at the U. S. Court House, New York, each Monday evening, starting today and continuing through March 9, according to Theodore R. Kupferman of NBC's legal staff, chairman of the Copyright Committee of the Federal Bar Assn. of New York, New Jersey and Connecticut. Lectures have been scheduled on "Protective Societies for Authors and Creators" on Jan. 26 and on "Problems of Advertisers and Advertising Agencies," Feb. 2.

Kirby Consultant on Film

LIFE story of Glenn Miller, radio personality and orchestra leader killed in Europe in World War II, will be made into a movie by Universal-International Pictures Inc. Consultant for the film will be Col. E. M. Kirby, chief of the Radio-TV Branch of the Army Dept.'s Office of the Chief of Information. Col. Kirby was a friend of the late Mr. Miller.

Advertisers

Lawrence W. Bruff, advertising manager, Liggett & Myers Tobacco Co., elected to firm's board.

Ray Weber, administrative assistant to advertising manager, Swift & Co., Chicago, appointed manager of department.

Louis E. Wheeler, sales administrator, Joseph Schlitz Brewing Co., Milwaukee, to Blatz Brewing Co., same city, as assistant to president and chairman of plans board.

Neil H. McElroy, president, Procter & Gamble, Cincinnati, elected director of Chrysler Corp.

R. Bruce Wightman appointed general sales manager and **Alvin F. Griesedieck Jr.** named advertising manager, Falstaff Brewing Corp., St. Louis.

Darwin W. Heath, marketing research director, John Falkner Arndt & Co., Phila., to Morresville Mills there as advertising and sales promotion manager.

Frank W. Gray, L. A. sales and advertising consultant, to Mission Dry Corp., that city (Mission Orange and other bottled fruit beverages), as vice president in charge of sales promotion and advertising.

Agencies

Byron Bonnheim, account executive, Weiss & Geller, Chicago, elected vice president.

John Eby elected vice president in charge of public relations, Marshall Roberts Adv. Agency, Denver. Firm has moved to 909 17th St.

A. V. B. Geoghegan, vice president in charge of media relations of Young & Rubicam, N. Y., named co-chairman of plans board, replacing **C. L. Whittier** who has retired.

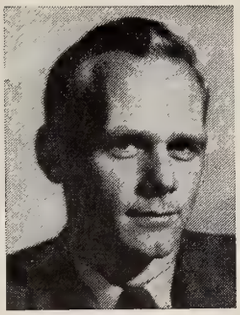
Mr. Geoghegan

Channing Barlow, vice president, Wilson, Haight & Welch, N. Y., to Marschalk & Pratt, N. Y., as account representative.

H. Ellis Saxton, owner of The Saxton Agency, Milwaukee, serving as head of publicity and advertising committee of bi-annual Boy Scout Circus planned for April at Milwaukee Arena.

Louis J. Carow Jr., account executive, Bozell & Jacobs, Chicago, elected a vice president.

Walter A. Tibballs Jr., BBDO, N. Y., transfers to agency's Hollywood office as supervisor of radio-TV production.



David Olen, account executive, Abbott Kimball Co., L. A., opens **David Olen Adv.,** 971 N. La Cienega Blvd., that city. Telephone is Bradshaw 2-7387.

Gault Davis, national food processing sales manager, International Minerals & Chemical Corp., Chicago, to Rhoades & Davis, S. F., as vice president in charge of client relations.

John Alden to Krupnick & Assoc. Inc., St. Louis, as account executive. Other additions to agency staff are: **Robert C. Bullen,** creative consultant; **Lee Cavanagh,** public relations director, and **Harry Lindemann,** art director, replacing **Robert L. Miller** who transfers to agency's account executive staff.

Robert M. Light, radio-TV director, Abbott Kimball Co., L. A., has resigned. Future plans will be announced.

Jack W. Smock, vice president, Foote, Cone & Belding Inc., L. A., to Young & Rubicam Inc., Hollywood, as vice president and manager of general advertising. He succeeds **E. E. Smith** who transfers to New York headquarters.

Mr. Smock

Floyd Flint, manager, J. Walter Thompson Co., Seattle, to The Burke Co., Seattle, effective Feb. 2. JWT office there will close Jan. 30.

Edward P. Holland to Lewis & Gilman Inc., Phila., as associate art director.

Howard C. Imhoff Jr. appointed art director, Doremus & Co., N. Y.

Arthur Meyerhoff & Co. has opened West Coast office at 328 S. Beverly Dr., Beverly Hills. **Jim Ward,** account executive, Leonard Shane Agency, L. A., and his assistant, **Lyle Westcott,** to Meyerhoff as West Coast manager and executive assistant, respectively. **Ken Robinson** to Beverly Hills office as account executive. Telephone is Crestview 5-3168.

J. Allan Hovey, Grey & Rogers, Phila., to Doremus-Eshleman Co., same city, as copy chief.

Dee Tozer, *Sunset* magazine, Menlo Park, Calif., to Guy-Lee Adv., Palo Alto, as production manager and account executive.

Ward Archer Adv., Memphis, Tenn., relocates at 1903 Sterick Bldg., same city.

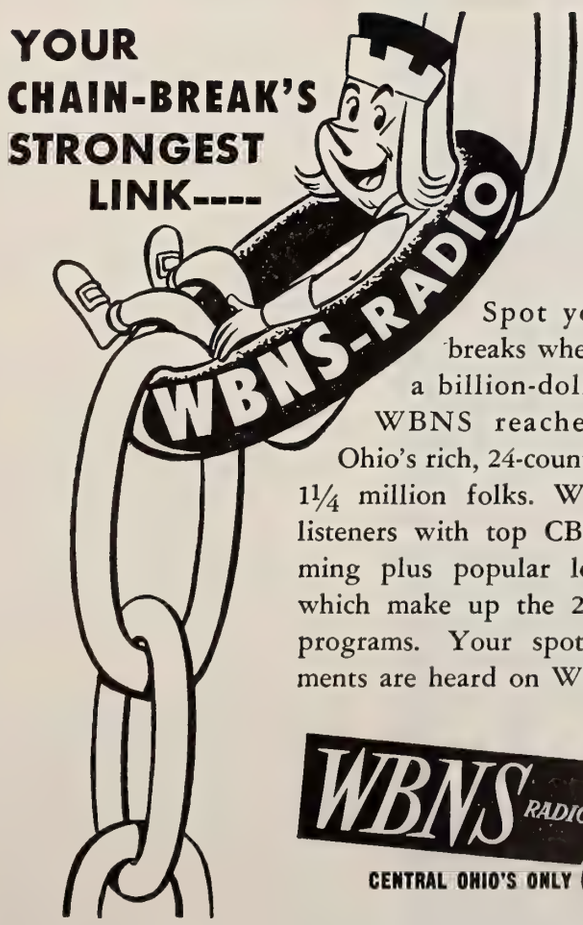
Irwin Co., Beverly Hills, opens L. A. office at 4068 Crenshaw Blvd. **Frank Warren,** account executive, will be in charge. Telephone is Axminister 7146.

Russ Young, timebuyer, Young & Rubicam, N. Y., father of boy, Jan. 2.

Stations

Joseph Goodfellow, eastern sales manager, NBC Spot Sales, N. Y., to WRC-AM-FM and WNBW (TV) Washington, as director of sales.

Ray F. McCarthy resigns from sales staff of KMOX St. Louis.



Craig Maudsley, formerly partner in Maudsley-Miller Adv. Agency, Hollywood, and **R. W. Clark,** manager of NBC-TV technical operations, that city, to KONA-TV Honolulu, as director of national sales and engineering, respectively.

Fred Maltz, salesman, KTFI Twin Falls, Ida., appointed regional sales manager, KLIX same city.

Lee Langer, Encore Restaurant, L. A., to sales staff, KTLA (TV) Hollywood.

Milton Chapman, assistant local sales manager, WABI Bangor, Me., promoted to local sales manager there. **Robert C. McCausland** to station as account executive.

Bernard Barth, assistant director of TV, WLWT

Carl Goerch, political commentator and analyst, WPTF Raleigh, elected Reader of House of Representatives in North Carolina General Assembly.

Alvin Lavanaway, graduate of Northwest Broadcasting School, Portland, Ore., to KWRO Coquille, Ore., as announcer-operator. Other graduates and stations where they now are located are: **Don Vickroy,** KOOS Coos Bay; **Fred Schamu,** KRUL Corvallis; **Harry Lanz,** KPFM Portland; **Robert Griffith,** KBLF Red Bluff, Calif.; **Bill Baldwin,** KWRO Coquille; **Steve Montgomery,** WALD Walterborough, S. C.; **William Miltenberger,** KOMW Omak, Wash.; **Roger Bennett,** KGEM Boise, Ida.; **Forest Lovett,** KNPT Newport, Ore.; **Allen Parkes,** KMCM McMinnville, Ore.; **Bill Hofmann,** KGON Oregon City.

Lillian Derbaum, copy chief at KTUC Tucson, named continuity director at WJHP Jacksonville, Fla.

Alpha Thwaits to WDRC-AM-FM Hartford, Conn., as assistant in bookkeeping department.

Ray Perkins, KFEL Denver, Col., appointed state chairman of radio and disc jockey div., March of Dimes drive.

Wyletta Mounts to KCOW Alliance, Neb., as woman broadcaster and traffic secretary.

Jack Bell to WICC-TV Bridgeport, Conn., on production staff.

Gene Law, production facilities department, KNBH (TV) Hollywood, promoted to floor manager.

Herman Hall, WCOG Greensboro, N. C., promoted to chief engineer there. **Nell Fulton King** returns to station to handle reception and continuity.

F. O. Carver, news director, WSJS Winston-Salem, N. C., elected president of city's Kiwanis Club.

Jim Bannon, Hollywood radio announcer, to KNX that city in same capacity. He succeeds **Clancy Cassell** who joins KCBS San Francisco.

Robert R. Roberts, KGW Portland, Ore., to announcing staff, WHBF Rock Island, Ill. **Joe Grear** appointed manager of film and props departments, WHBF-TV.

John Galbraith, Hollywood freelance radio announcer-newscaster-actor, to KNXT (TV) that city, as newscaster.

Bill Cardin promoted to director of news and special events, KOMA Oklahoma City, succeeding **Bob Eastman,** who enters private business. **Ken Lowe** added to station's news staff.

Wayne Harris, WCMT Roanoke Rapids, N. C., to WSRK Shelbyville, Ind., as production manager. **Blake Taber** appointed farm director at latter station. **Nicki Jordon,** KXLA Pasadena, Calif., to WSRK as women's director.

Jeanne Ruhling, musical director, WIND Chicago, to WMAL-AM-FM-TV Washington, D. C., as musical director.

Jim Poag, continuity department, WIS Columbia, S. C., appointed promotion and merchandising manager. **Mrs. John Battle,** WTMA Charleston, S. C., to WIS as assistant to **W. D. Workman Jr.,** news editor.

Gerald Mohr, Hollywood radio-TV actor, assigned role in Warner Bros. feature film, "The Eddie Cantor Story."

Yvonne Peattie, Hollywood radio actress, assigned role in 20th Century-Fox feature film, "Cabin B-13."

Johnny Carson, star of KNXT (TV) Hollywood *Carson's Cellar,* adds duties as m.c. on station's *Star Hostess Party.*

Virginia Eiler, Hollywood radio actress, assigned role in M-G-M feature film, "Latin Lovers."

Frank Grasso, 58, musical director, WFLA Tampa, Fla., died suddenly Jan. 11.

Nick Lawrence, 29, program director, WHPE-AM-FM High Point, N. C., died Jan. 8 after eight-month illness.

Jay Creedon, disc jockey, WICE Providence, R. I., was suffocated in fire at station, Jan. 3.

Bob Castellon, news editor, KSIG Crowley, La., father of boy, Jan. 7.

Bill Ellison, news director, WHBF Rock Island, Ill., father of boy, Stephen Robert, Dec. 30. **John Schermerhorn,** announcer there, and **Lou Ann Hamilton** were married Jan. 3. **Jackie**

BRONZE PLAQUE goes to Lee Ruwitch (r), vice president and general manager of WTVJ (TV) Miami, from C. W. Kistler, advisory board chairman of the South Florida Div., AAA, honoring the station's *You May Be Next*, auto driver education show, "for public service in traffic safety in 1952."

Tatman, WHBF-TV, and Ben Matthews were married Dec. 27.

Marion Pedlow, women's commentator, WPWA Chester, Pa., mother of girl.

Bob Lehman, director, KNXT (TV) Hollywood *Harry Owens Show,* father of boy, Christopher Alban, Jan. 5.

Pat Turner, WICC Bridgeport, Conn., traffic manager, and **Ernst Engelbrechts,** announcer, WCAW Charleston, W. Va., have announced their engagement.

Barbara Fyne, continuity department, WSJS Winston-Salem, N. C., and Lt. Tom Woods, U. S. Air Force, were married Jan. 2.

Norma Shealy, program librarian, WIS Columbia, S. C., and **Jack Brock,** salesman at WIST Charlotte, have announced their engagement.

Representatives

William G. Rambeau Co., N. Y., appointed national representative for WFAI Fayetteville, N. C.

Larry Coy, space salesman, *Look* magazine, Chicago, to Edward Petry & Co., that city, as TV salesman.

Networks

Robert H. White, New York sales staff of NBC, to network's Detroit office.

Otis Williams, Video Pictures Inc., N. Y., to WOR-TV New York's sales staff as account executive.

John J. Finley, sales staff, WBBM Chicago, to NBC same city, on radio spot sales staff.

Gene Dadan to advertising and sales promotion staff, ABC Chicago.

Sara Selby, actress on CBS Radio *Junior Miss,* assigned role in Warner Bros. feature film, "The System."

Marie Wilson, star of CBS-AM-TV *My Friend Irma,* named "the most glamorous career woman of the year," by Hollywood Business and Professional Women's Club.

Red Buttons, CBS-TV comedian, selected by Advertising Club of Baltimore as "outstanding television personality of 1952."

Nancy Craig, WJZ-TV New York commentator and personality, awarded scroll by **John Lester,** radio-TV columnist of the *Newark* (N. J.) *Star-Ledger* and the Newhouse Syndicate, acclaiming Miss Craig as "television's foremost good neighbor."

Robert Cummings, star of NBC-TV *My Hero* film series, chosen "King of the Winter Carnival" for St. Paul, Minn., festival, Jan. 30-Feb. 1.

Robert Montgomery, actor and producer, awarded 1952 gold medal of International Benjamin Franklin Society for "courageous American citizenship in fighting against communist infiltration of the motion picture and radio fields."

Don Coyle, manager of ABC New York research department, father of girl, Deborah, Jan. 9.

Freeman Gosden, who portrays Amos on CBS Radio *Amos 'n' Andy,* father of girl, Linda, Jan. 10.

Program Services

Bob Schultz, Frank Cooper Assoc., to Jay Garon-Brooke Assoc. Inc., N. Y., as partner on development of radio-TV packages.

C. P. MacGregor, head of C. P. MacGregor Co., L. A. (transcription and library service), re-elected to governing board of Merchants & Mfrs. Assn., that city.

Hallmark Productions Inc., headed by **Kroger Babb,** has moved headquarters from Wilmington, Ohio, to 9100 Sunset Blvd., Hollywood. Telephone is Crestview 1-6000.

Commodore Productions & Artists Inc., Hollywood, will move to 971 N. La Cienega Blvd., that city, in mid-February. Telephone is Hollywood 9-8229.

Robert M. Snader, vice president, Snader Telescriptions Corp., Beverly Hills, and **Barbara Klowdan,** story department, Revue Productions, Culver City, were married Dec. 28.

Equipment

Alter Scott elected vice president in charge of manufacturing for consumer products div., Motorola Inc., Chicago. **John Silver** promoted to vice president in charge of communications, electronics and operations.

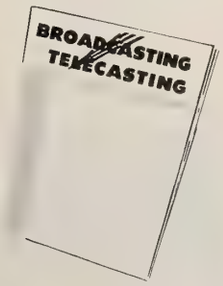
Blair Foulds elected vice president of General Precision Lab. Inc., Pleasantville, N. Y.

H. Leslie Hoffman, president, Hoffman Radio Corp., L. A., elected to board of directors, L. A. Chamber of Commerce. **Donn B. Tatum,** ABC Western Div. director of TV, continues on board for another year.

Leonard A. Rooney, government contracts administration, Raytheon Mfg. Co., Waltham, Mass., appointed manager of communication equipment sales for same company.

Robert L. Anderson named manager of new market and research department, Admiral Corp., Chicago. **Joseph R. Gransee** appointed assistant to advertising director at Admiral.

Floyd A. Hayhurst appointed staff assistant to **Edward C. Tudor,** president, I.D.E.A., Indianapolis.



Robert L. Shaw appointed district sales manager in Missouri, Kansas and Tennessee for radio-TV div., Sylvania Electric Products Inc.

Eugene C. White to tube dept., General Electric Co., Schenectady, N. Y., as industrial specialist to coordinate firm's policies for sales of industrial tubes to electronic equipment manufacturers.

Raymond V. Buivid named radio sales manager and **Thomas J. Nicholson** appointed parts sales

When Will TV Span Atlantic?—Not in '53, Says Guy

HOPES for live TV coverage in the U. S. of the coronation of Queen Elizabeth II of England were roused recently by James Fleming, news editor of the NBC-TV early morning news show *Today,* who predicted achievement of trans-Atlantic television as one of 10 big stories of 1953.

EUROPE

Those hopes were dashed, however, by Raymond Guy, NBC manager of radio and allocations engineering, who, in answer to a query from BROADCASTING • TELECASTING, indicated that NBC-TV's coverage of the Coronation will be by film.

Describing the various possible ways by which trans-Atlantic transmission of TV signals might be accomplished, Mr. Guy said that the most obvious method is shortwave broadcasting. But with so many multipath impulses, pictures at the receiving end would not be satisfactory. Relaying TV signals across the ocean is another possibility, Mr. Guy said, but "it is quite a large project" and he doubted that the many attendant problems could be solved in 1953.

Another method for getting signals from Europe to the U.S. and vice versa, which Mr. Guy said has received serious consideration, is the construction of a series of radio relay towers along the route followed by airplanes in their North Atlantic crossings, from Canada to Greenland to Iceland to the British Isles and so to the continent. While this is possible, Mr. Guy pointed out that it calls for construction and maintenance of relay towers across an uninhabited area where hurricanes rage almost constantly. In his expert opinion, this can be done but it is not a likely prospect for 1953.

The same holds true for transistors, which because of their tiny size might be utilized within a trans-oceanic cable to keep TV signals boosted and kept in synchronization from continent to continent. Here, too, is a distinctly possible solution to the trans-Atlantic TV problem, Mr. Guy believes, but one not apt to come to fruition until transistors have been perfected to a point beyond that anticipated in the year ahead.

CBS-TV's 'Studio One' Microwaved to Canada

First U. S. commercial program to be aired live in Canada is shown on CBLT (TV) and kinescoped for CBFT (TV).

FIRST American commercial TV network show to be aired live in Canada starts today (Monday) when Canadian Westinghouse brings in CBS-TV's *Studio One* by microwave relay from Buffalo to CBLT (TV) Toronto.

CANADA

Show will be recorded on kinescope at CBLT for presentation next Monday on CBFT (TV) Montreal. The fact that the show's producer is 31-year-old Fletcher Markle, who started with CJOR Vancouver and then moved to Canadian Broadcasting Corp., Toronto, played no small part in the final decision of CBC to accept the show. Mr. Markle has been with CBS since 1946.

No other U. S. network show, live or sustaining, has been lined up as yet for the CBC TV stations. But agreements are firm with all U. S. networks on the percentage of station time rates to be paid the originating network.

CBC is negotiating with a number of Canadian advertisers whose parent companies have TV network programs which could be relayed to Toronto, and then by film to Montreal until the microwave relay between Toronto and Montreal is ready this spring.

Meanwhile there has been no new Canadian advertiser taking time on CBLT or CBFT. Advertisers apparently are marking time to see what program changes CBC will make to bring a greater audience to the stations.

CBC in its TV programming has started to lighten its fare a bit, scheduling more popular type programs instead of cultural and educational formats which have predominated since CBC began telecasting last September.

Board Reserves Judgment On Canadian Indie Fees

CANADIAN independent broadcasters will not know for some time what fees they will have to pay this year to the Composers, Authors & Publishers Assn. of Canada (CAPAC). The Canadian Copyright Appeal Board Jan. 8 reserved judgment on the amount at Ottawa, pending settlement of a court case now awaiting a decision.

CANADA

Canadian stations, represented by Canadian Assn. of Broadcasters, asked for a reduction of the rates requested by CAPAC and a change in the basis of charging the rates, 1¾% of

station gross revenue.

BMI Canada Ltd. was awarded fees from independent stations based on the issued government receiving licenses, amounting to $46,278 in 1953 as compared to $44,248 in 1952.

Canadian Broadcasting Corp. has a set fee with BMI Canada Ltd., and did not oppose CAPAC rate request for 1¾% of its commercial revenue plus 1 cent per capita for Canada's population. CBC will also pay CAPAC a flat $5,000 for use of its music on the CAB International Service. The CBC fee to CAPAC is about $175,000.

CAB is now contesting a ruling that CAPAC fees should be a percentage of station gross revenue on basis this would give CAPAC access to station books.

CAB Montreal Meet Plans Okayed for March 9-12

PLANS for the annual meeting of the Canadian Assn. of Broadcasters at Montreal, March 9-12, were finalized at the agenda committee meeting at Montreal last Tuesday and Wednesday. They will be discussed at the CAB board of directors meeting this week at Ottawa.

CANADA

CAB board also will study, aside from other business, a proposed industry pension plan, a hold-up on acceptance of TV station applications by the Dept. of Transport, and brief to be presented Jan. 23 to the Canadian Broadcasting Corp.'s board of governors on proposed new AM broadcasting regulations.

This brief will be based on a belief that proposed controls and restrictions on publication by broadcast are parallel to attempts to control and restrict publication by printing in the 15th century.

'52 Canada BBM Report

COVERAGE data on 137 Canadian AM member stations are offered in the 250-page, 1952 Area Report released by the Bureau of Broadcast Measurement, Toronto. Tabular matter covers BBM stations heard in each county, census subdivision and measured city area, showing frequency of listening and total weekly BBM rating.

CANADA

Data sheets show how to use report's information, explains bilingual listening, gives BBM rules and regulations, lists all Canadian stations alphabetically by cities and by call letters and includes a map of Canada.

CAB Issues Data to Members

ECONOMIC trends and tax information will be given members of the Canadian Assn. of Broadcasters this year on an experimental basis. The economic trends analysis is to start Feb. 1 on a quarterly basis, and will be prepared by Frank Flaherty, business news writer of Ottawa. The tax analysis and accounting information service starts today (Monday) by CAB's auditors, Boyce, McCay, Duff & Co., Ottawa.

CANADA

EDUCATIONAL

CHICAGO TV STUDY RELEASED BY NAEB

Drama occupied fourth of air time, sports 18.39%, entertainment 20%, advertising 14.58%, informational 11.56% in this survey, the third in a series.

THE NATIONAL Assn. of Educational Broadcasters last Wednesday announced the results of a study of Chicago summer TV programming—the third in its series of city monitoring surveys designed to identify "trends in telecasting."

In book form and titled *Chicago Summer Television,* the study was compiled by three authors with the aid of the National Opinion Research Center in that city and was financed through a grant from the Ford Foundation's Fund for Adult Education.

NORC has made surveys supporting views of the National Collegiate Athletic Assn. on

WDAY

(FARGO, N. D.)

IS ONE OF THE NATION'S MOST POPULAR STATIONS!

Last year, WDAY was swamped with 145,659 letters and postcards from its listeners! This is the equivalent of a letter or card from over 70% of the 211,550 families who listen regularly to WDAY—an average of slightly over 399 letters per day, including Sundays and holidays!

NBC • 5000 WATTS • 970 KILOCYCLES

FREE & PETERS, INC., Exclusive National Representatives

controlled football TV, subscription video and other enterprises, while the Fund for Adult Education has appropriated sums of money in behalf of educational television.

George Probst, chairman of the Adult Education Committee of NAEB, for whom the survey was prepared, said it should prove a "veritable gold mine" for broadcasters and researchers. He said NAEB is making these studies because of its interest in serving the broadcast industry, FCC and the public at large. The book may be obtained at the U. of Illinois, Urbana, Ill., for $5.

The Chicago study was conducted from July 30-Aug. 5, 1951—nearly 18 months ago—and is similar to other surveys in the New York City and Los Angeles areas during 1951. It contains comparisons of the three markets. Principal author is Prof. Donald Horton, U. of Chicago's sociology department, with assistance from Hans O. Mauksch and Kurt Lang. Receivers were supplied for monitoring purposes by Zenith Radio & Television Corp. NORC supplied its facilities.

The Chicago survey covered the four TV stations—WNBQ (TV) WENR-TV WGN-TV and WBKB (TV). Highlights follow:

- **Drama occupied 26.18% or one-quarter of all broadcast time. Leading types of drama: Adventure and action, 6.09%; Western, 5.76%; crime and horror, 4.86%. Feature films (produced primarily for theatre exhibition) occupied 70.39% of all drama, TV stage productions, 22.53%.**
- **Sports occupied the second largest block of all broadcast time—18.39%.**
- **Entertainment accounted for a fifth of total time, with variety programs taking 7.89% of time in this category.**
- **Programs of an information character occupied 11.56% of total broadcast time and forum shows 3.35%.**
- **Commercials took 12.57% of all time and all advertising (shopping, promotion stunt programs) occupied 14.58%. Average length of commercials in programs was 73 seconds; in station breaks, 36 seconds. Average proportion of commercials was about 2:06 minutes to each 15 minutes of net program time.**

Comparing Chicago with New York and Los Angeles, the study reports: "The general picture is that of a relatively uniform program structure, which shows much less variation than one might expect from city to city or season to season."

WHBC Staff Assists Faculty

EIGHT members of WHBC Canton, Ohio's staff are assisting the faculty of the journalism department at Kent State U. in a radio news course being offered at the school during the current semester.

Al Frances, WHBC news director, will lecture on the organization of a news department. Gathering local news will be discussed by Edwin L. Kaufman, station newsman.

Other personnel in the project are John Baker Jr., assistant news director; Robert C. Fehlman, manager; W. H. Vodrey Jr. legal counsel; Carol Adams, women's director; Jim Muzzy, sports director, and Eugene Carr, director of radio for Brush-Moore Newspapers.

SE Institute Sets Opening

OPENING of the Southeastern Radio & Television Institute at Nashville, scheduled for March, will provide a new source of TV personnel trained in engineering and production, according to Bailey Manthey, president.

Mr. Manthey said beginning classes will be made up of engineers and radio production people sent to the school by southern TV applicants. Classes for inexperienced persons desiring to enter TV will begin at a later date.

NARTDA to Encourage Educational TV Development

Emerson's Ben Abrams sees radio-TV dealers as a 'rallying' force for spurring interest in educational stations and a heavy volume of set sales with opening of new TV markets.

MEMBERS of the National Appliance and Radio-Television Dealers Assn. will work at the local level to hypo interest in and development of educational television stations, following a blueprint which is now being completed by the group's board of directors.

This was reported at the association's annual convention, which took place in Chicago last week. The board, however, declined to reveal any of its plans at this time, although during the convention it took formal action to approve participation of its membership in the educational television program. Invitations are believed to be ready for mailing to a select list of members who would serve on the educational television committee, which is headed by Don Gabbert, a dealer in Minneapolis. Mr. Gabbert has been working on the project for some time, and reportedly has made several trips to Washington. D. C. during the past eight months to research the matter.

Advantages of the prosposed system of cooperation with local groups in development and construction of educational video outlets were outlined by Ben Abrams, president of Emerson Radio & Phonograph Co., who has

America's Broadcasters Bringing Inaugural Into The Classrooms

SCHOOLKIDS possibly numbering in the millions will get a chance to see—thanks to the enterprise of American broadcasters—the U.S. democracy's biggest spectacle of pageantry when the country's next President is inaugurated tomorrow.

Youngsters in many areas will witness the Eisenhower inaugural from their classrooms through co-operation by TV set dealers and manufacturers.

The 76 affiliates of CBS-TV are being furnished with a teacher's guide correlating the network's inauguration telecasts with actual classroom lessons in history, government and economics. The guide was prepared by the Citizens Education Project of Teachers College, Columbia U., under direction of Prof. William S. Vincent, in co-operation with CBS-TV, according to Sig Mickelson, CBS-TV director of news and public affairs.

In Chicago, more than 300,000 pupils of the city's school system will view ceremonies in auditoriums on sets supplied by 600 local dealers. The sets were installed at the suggestion of the National Television Review Board, local video critics and Admiral Corp.

WTVR (TV) Richmond, Va., in cooperation with the Parent-Teachers' Assn. and the Richmond Electrical Assn., has arranged to telecast the inauguration in every area school, according to Robert L. Montgomery of WTVR. Local television dealers will supply sets.

The entire school system of Lebanon, Pa., some 6,300 children, will watch tomorrow's spectacle, because of the efforts of William H. Worrilow, president of the Lebanon Steel Foundry, who offered to buy sets for all the schools in the city. RCA Victor dealers in Lebanon and Camden, N. J., are installing the sets and RCA Victor has loaned three large TV screens. The Lebanon project is being handled by A. A. Schechter Assoc. Mr. Schechter is a former executive of NBC and MBS.

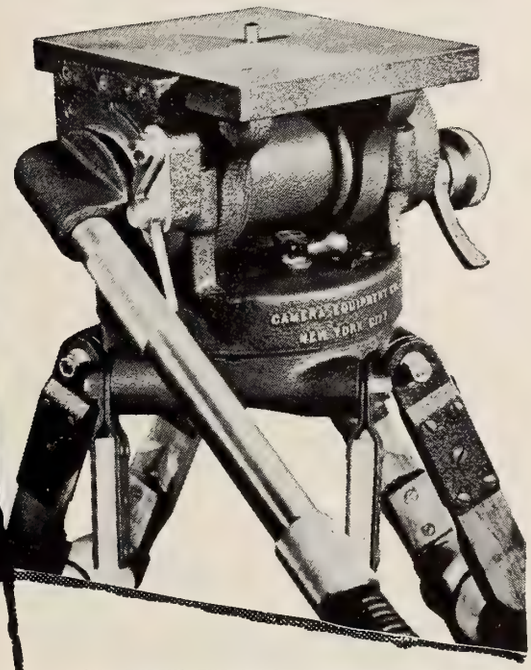
be interested personally in similar projects for some time.

Mr. Abrams, speaking at the closing session of the convention Tuesday afternoon, termed the allocation of 242 channels to educational TV "the most important" part of the FCC freeze-lift. With this kind of a station and programming, he said, television "will be put to the most constructive possible use for the first time, and it will effect the greatest public service ever seen in the U. S."

Seeing the need for a central body which could operate as a cohesive force in all activity in the educational television field, Mr. Abrams termed NARTDA an ideal group for this purpose because of its common interests and membership in cities where the channels have been assigned. The organization could serve as a "rallying point" for all persons and institutions interested in educational television, and "it could render a great public service as well as do a good public relations job for the association and its members."

The best device in the promotion of educational TV, he said, is "numerical strength," and he pointed out the widespread membership of NARTDA throughout the U. S. Member cooperation, with the proper guidance, could be very important in getting stations on the air.

Citing a need for "first things first," he said the first move is to get the stations on the air without delay so that channel assignments are not re-allocated to commercial enterprises. There are enough commercial allocations now, he said, discussing the 2,000 which will ultimately "blanket" the nation as sound broadcasting does now.



Must Be Non-Commercial

Educational TV, he said, must be non-commercial to survive. He said educational-only stations are needed because commercial stations do not and would not provide time for educational programming at peak periods when a maximum audience is reached, and would limit the amount of educational time which could be fitted into its commercial schedules. Nothing surpasses the importance or worthwhileness of educational TV," Mr. Abrams asserted.

Opening up of new television markets, as well as those with only educational stations, will bring about a heavy volume of set sales, he predicted. He estimated that seven one-half million sets will be manufactured and sold in 1953. Television is here to stay, and "is on the forward march." The industry "can't help but become one of the five largest industries in the U. S.," he claimed.

Another speaker on the TV panel, which was conducted by retiring president Mort Farr, was Joe Marty Jr., general manager of the electronics division for Admiral Corp. Mr. Marty discussed sales problems in marketing uhf receivers.

From Station Break to Feature . . . the NEW "BALANCED" *TV Tripod* is doing a whale of a job every day!

"BALANCED" TV TRIPOD mounted on 3-wheel portable collapsible dolly illustrated.

We THREW THE book away and engineered a brand new "BALANCED" Tripod for every photographic and video need. The result—a revelation in effortless operation, super-smooth tilt and 360° pan action.

PERFECT BALANCE prevents mishap if the lock lever is not applied. Quick release pan handle locks into desired position. Mechanism is enclosed, rustproof, needs no lubrication. Tension adjustment for Camera Man's preference. Built-in spirit level. Telescoping extension pan handle. We defy you to get anything but the smoothest, most efficient operation out of this tripod beauty.

WE CALIBRATE LENSES . . . Precision "T" STOP CALIBRATION of all type lenses, any focal length. Our method is approved by Motion Picture Industry and Standard Committee of SMPTE. Lenses coated for photography. Special TV coating.

Eleven Schools Back Move For Philadelphia Uhf Channel

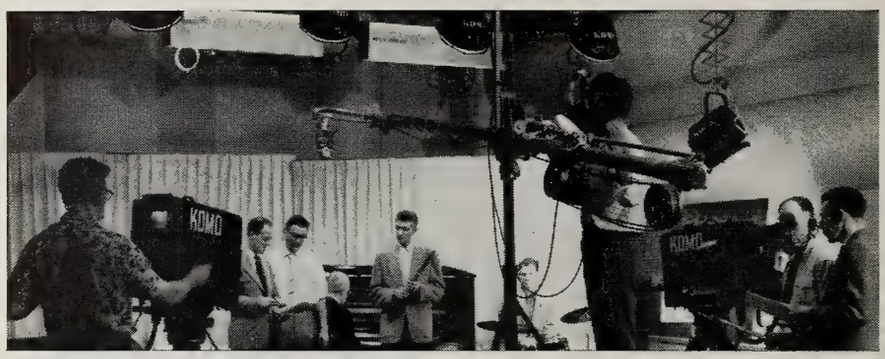
FIRST definite move was made by representatives of 11 large educational institutions in Philadelphia to establish a uhf, non-profit educational television station for the Philadelphia-Camden (N. J.) area.

The action was the signing of articles of incorporation and application for a charter in the name of the Delaware Valley Television Corp. Services would be available to every educational institution within a 50-mile radius of Philadelphia, public and private.

It would cost by careful estimate, $400,000 to build the station and $250,000 to $300,000 a year to operate it with a single eight-hour-a-day staff. Memorial Hall, in Fairmount Park, is favored as a studio center and already has been offered by the Park Commission.

WAAM (TV) Seminar Feb. 27

FIRST session of the WAAM (TV) Baltimore third annual Regional Television Seminar Feb. 27-28 will be devoted to "The Career Panel (What Can I Do in Television?)."



This session will feature short talks by Herbert B. Cahan, WAAM program manager; Sig Mickelson, director of news and public affairs, CBS-TV; Jack Harrington, president, Harrington, Righter & Parsons Inc.; Lester Lewis, president, Lester Lewis Assoc.; James O. Luce, chief radio-TV timebuyer, J. Walter Thompson Co.; Edward B. Roberts, script editor, *Armstrong Circle Theatre;* Kenneth Tredwell WBTV (TV) Charlotte, and Charles Underhill, ABC-TV.

'KO-ED'—U. of Wash. and KOMO in Co-op Training

DRY-RUN television experimentation in a weekly cooperative venture is giving practical experience to the technical and programming staffs of KOMO Seattle and at the same time is helping train radio-TV students at the U. of Washington.

With KOMO's $150,000 worth of TV studio equipment already installed but its application for Ch. 4 still pending before the FCC, the NBC radio affiliate has been producing and televising, via closed circuit, a program a week on Tuesday evenings. Selected students from the radio-TV department of the university, under the tutelage of Milo Ryan, associate professor in the School of Communications, develop the program ideas and put the shows on, handling all operations except the camera and audio work. KOMO's engineering staff, under Stanton D. Bennett, chief TV engineer, and the program and continuity departments under Fred Patterson, KOMO program manager, work with the students. George E. Dean, KOMO public service manager, is liaison man with the university.

KOMO's program of technical training started in February 1952, and now includes, in addition to the cooperative effort with the U. of W., a regular Monday afternoon workshop session.

AT workshop training session KOMO Program Director Frederick Patterson (left center) discusses script with Dick Osgood, U. of Washington student producer. KOMO personnel in foreground are Cameramen W. Bey and H. Armstrong; B. Pickering, boom man, and S. D. Bennett, chief TV engineer.

Wash. State Educators Urge Funds Be Passed for TV

LEGISLATIVE appropriation of $3½ to $4 million to implement a statewide educational television plan was recommended early this month at a meeting in Seattle of the Washington Citizens' Committee for Educational Television.

The meeting Jan. 9, which attracted some 200 broadcasters, telecasters, educators and civic leaders, recommended also that the state legislature pass enabling legislation to take advantage of the educational TV channels reserved by FCC, and that the governor or the legislature appoint an Educational Television Commission.

Robert Mullen, executive director of the National Citizens' Committee for Educational Television, and Harrison McClung, western division representative of the national group, were among the principal speakers at the Washington State meeting.

Mr. McClung, a retired vice president of J. Walter Thompson, told the afternoon meeting that commercial telecasters are not opposed to the idea of educational video.

The chairman of the Washington Citizens' Committee, Ed C. Whiting, gave credit to the commercial telecasters for their own educational efforts on TV, and noted the interest of Mrs. Scott Bullitt, president of King Broadcasting Company (KING-AM-FM-TV Seattle) in use of Ch. 9 for educational purposes.

The plan as approved by the meeting calls for stations, ultimately linked into an educational network, in the following cities:

Spokane, Pullman, Omak-Okanogan, Wenatchee, Ellensburg, Moses Lake, Yakima, Tri-Cities (Richland - Kennewick - Pasco), Walla Walla, Bellingham, Seattle, Tacoma, Olympia, Chehalis-Centralia, Aberdeen-Hoquiam, Kelso-Longview, and Vancouver.

NEW YORK BOARD OF REGENTS HEARS PRO AND CON ON STATE TV NETWORK

Eyes of broadcasters and educators have been on the biggest state of the Union, where a key drive by educational TV proponents to set up a 10 station network is in the critical stage. Second hearing on the proposal was held last week by the New York State Board of Regents.

ARGUMENTS for and against a non-commercial educational television network proposed by the New York State Board of Regents were presented at a two-day hearing in New York Wednesday and Thursday.

Viewpoints on the plan were placed before the Temporary State Commission on the Use of Television for Educational Purposes, headed by Douglas Moffat. The hearing was the second in a series of three meetings arranged by the commission. One was held in Buffalo on Jan. 7 [B•T, Dec. 12, 1952] and a final session is scheduled in Albany Wednesday.

The Regents' plan provides for the establishment of 10 educational stations throughout the state. Proponents of the program have estimated that it would cost $350,000 to build and about $250,000 a year to operate each station.

The commission, set up by Gov. Thomas E. Dewey, must make a report of its findings to the state legislature by Feb. 2. Under an FCC ruling, the state must forward definite plans by June 3 to be assured of 10 uhf channels reserved for the state.

Endorsing the Regents' plan at Monday's session were some 75 spokesmen for educational and civic organizations in the metropolitan New York area. They represented colleges and universities, elementary and high schools, museums, libraries, professional groups, labor unions and religious organizations, among others.

Their main contention was that educational television could make a contribution to the city, state and nation by raising the cultural level of the community. They argued that commercial television was not geared to fulfill these objectives, although certain speakers acknowledged that networks and stations had cooperated with their organizations in presenting programs of an educational nature.

The question of financing the project was put to several speakers by Henry V. Poor, counsel to the commission. Some replied that their organizations were prepared to help the program financially, while others said they could make no definite commitment. All spokesmen asserted they could pledge the cooperation of their members as talent on programs and in preparation of scripts. Several indicated they were prepared to furnish production of programs.

Schutzer Charge

One discordant note sounded at Wednesday's session was a charge by Arthur Schutzer, executive secretary of the American Labor Party in New York State, that Gov. Dewey and the state legislature have "no serious intention" of implementing the Regents' plan.

As basis for his accusation, Mr. Schutzer referred to Gov. Dewey's annual budget message two weeks ago, claiming that the state's chief executive made no direct or indirect mention of the proposed educational TV chain. He told the commission that he was making the charge to warn interested groups to guard against any attempts by Gov. Dewey and the legislature to hamstring the project.

One highlight of the session was a petition by scores of spokesmen for organizations on Long Island for a separate channel for their community. Under the Regents' proposed network, the station in New York would provide coverage for Long Island.

Long Island speakers stressed that their area had a population of more than one million, larger than any of the communities in which stations are planned with the exception of New York and Buffalo. They further argued that programming from New York necessarily would accent urban themes that would not fill the needs of suburban Long Island.

Some of the speakers endorsing the Regents' proposal included Dr. Buell Gallagher, president of the College of the City of New York; Dr. Henry T. Heald, chancellor of New York U.; Dr. Edwin S. Burdell, president of the Cooper Union Institute of Technology; Dr. Harold Taylor, president of Sarah Lawrence U.; Worthington Gregory, president of the Long Island Radio-TV Council; Rev. Daniel M. Potter, associate director of the Protestant Council of New York; Henry Lee Moon, public relations director of the National Assn. for the Advancement of Colored People, and Winthrop Rockefeller, chairman of a coordinating committee for civic organizations interested in educational television.

Critics of the plan voiced their opposition at

* S. M. "Survey of Buying" 1952

Thursday's session. Six spokesmen for taxpayers, business and women's groups, plus a housewife, urged the commission either to recommend the outright quashing of the plan or further exploration of the subject.

Advocating a further study of the topic was S. Arnold Witte, manager of the legislative services division of the Commerce and Industry Assn. of New York Inc., whose prepared statement was read by Mack A. Nomburg, association's public relations director. Mr. Witte asked the commission to hold its report in abeyance until it received complete information on the following points:

(1) The overall needs of the New York State School system and how a TV network fits in with a program of "first things first"; (2) the practicability of alternative methods of presenting telecasts and the comparable value and cost of alternative visual aids in education, and (3) the actual cost of establishing, operating and transmission of program of a state-owned-and-operated TV network.

Mr. Witte challenged the Regents' estimate of costs on both construction and operational figures. He declared that some experts in the field claim that construction costs may run as high as $10 million as against some $3,850,000 quoted by the Regents, and that operation figures may run from $4 million to $8 million.

Insisting that "first things must come first," Mr. Witte pointed out that schools in New York State are said to be "run down, inadequate and unsanitary." He called on the commission to investigate these reports and to recommend the improving of existing school facilities rather than use funds "on what appears to the laymen to be a possibly desirable but neverthless luxury item."

Ralph A. Brooks, executive secretary of the 5 Counties Taxpayers Defense Inc., and Lambert Fairchild, a trustee of the American Defense Society, voiced outright disapproval of the project. Mr. Brooks asserted that first consideration must be given to repair and modernization of New York City schools before the state contemplates "education for television." Mr. Fairchild branded the proposal as a manifestation of "the boondoggling, socialistic trend in government," adding:

"The Board of Regents and Mike Quill have one thing in common—complete disregard for the downtrodden taxpayer."

Objecting to the proposal, a mother and housewife, Mrs. Mildred Dey, of St. Albans, N. Y., declared that the envisioned plan would compel children to watch telecasts in school for several hours a day and would therefore "lead to eyestrain." She insisted that schools are designed to teach youngsters by means of qualified instructors and "not with a TV set."

Other speakers included Mr. Clifford A. Allanson, executive manager of the New York State Council of Retail Merchants Inc.; Mr. Isidor H. Goodman, West Side Taxpayers Assn. Inc., and Mrs. Irene W. Mills, New York State Federation of Women's Clubs.

Strikebound Schools End Baltimore AM-TV Classes

BALTIMORE's experiment in education by radio-television has ended and the city's public school system was back almost to normal last week.

Schedule of special classes, for which local radio and television stations offered their facilities, was terminated Jan. 9. Educators were unanimous in praising the cooperation by Baltimore broadcasters [B•T, Jan. 12].

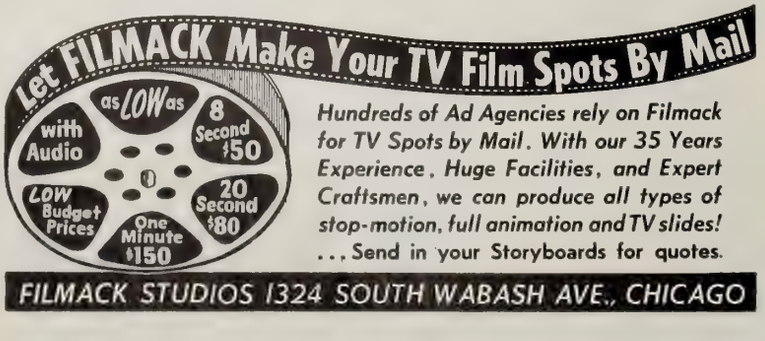
Virtually all the city's 175 schools reopened early last week as local civic authorities pressed for an early end to the strike of maintenance workers. The strike was called by International Teamsters Union (AFL) over a wage dispute and involved some 3,000 janitors, refuse collectors, engineers and firemen.

The plan for broadcasters' participation was drawn by WBAL-TV, which offered its facilities after the walkout New Year's Day. Nearly 40 hours of air time were set aside for allocation of subjects by the Baltimore Dept. of Education.

Educational TV Questioned By Hillman

TELEVISION as an educational medium has been overemphasized and should be approached with caution.

So stated Harry Hillman, member of the Los Angeles Board of Education, last week when he challenged the classroom value of educational television during discussion of a statewide study of educational TV channels by a committee set up by California's Gov. Earl Warren. Besides a time extension on the study, the school board requested local representation on the Governor's proposed Educational Television Commission.



Decrying what he referred to as a proposal by a national educational TV conference to place two 20-inch screen sets in every classroom, Mr. Hillman estimated that such an undertaking would cost Los Angeles more than $2 million.

Questions TV Need

"Nobody has shown me that you can't accomplish just as much with sound motion pictures in classrooms as you can with TV," he declared. "And nobody has told me who's going to pay for all this."

Mr. Hillman said he understood the plan is to present "canned programs" over the educational TV channels, and if that's the case, movies would do just as well, pointing out that "they are cheaper and we already have the projection equipment."

Dr. Hugh C. Willett, a board member and chairman of the National Collegiate Athletic Assn.'s television committee, explained that classroom use of television is a very small part of the program. "Our primary interest is the education of all citizens through TV," he said.

IN PUBLIC SERVICE

Missing Stockholder

UNABLE to track down one of some 6,000 missing stockholders of Commonwealth & Southern Corp., the Tracers Co. of America recently turned to WPIC Sharon, Pa., for help. Station's Larry Caldwell aired the news on his 8:05-9 a.m. *Milkman* program and within 20 minutes received phone calls on the whereabouts of Fred D. McFarland. He was located in a neighboring Ohio town. C & S has been liquidating its assets the past few years to conform with a court ruling. Mr. McFarland thus will receive his funds, thanks to WPIC.

* * *

School of Learning

FACILITIES of WKBZ-FM Muskegon, Mich., are being placed at the disposal of radio students of the city's Senior High School twice each week. With the station's technical staff standing by, the students take over WKBZ-FM Monday and Wednesday from 7 to 8 p.m. Through on-the-spot instruction they learn engineering, announcing, traffic, programming and writing.

* * *

Canned Sessions

FAILURE of Buddy Brown and his orchestra to appear for a local American Legion New Year's Eve dance found KLMR Lamar, Col., ready, willing and able to avert a minor catastrophe. Station supplied records and later piped dance music to the dance hall through a loudspeaker system. What might have become a complete fiasco thus was turned into a most successful dance party, according to Everett Shupe, KLMR manager.

* * *

'Shop Early'

MERCHANTS Div. of the local Chamber of Commerce paid tribute to WLEC Sandusky, Ohio, for its role in the recent "shop early" campaign. Station matched every spot announcement bought by the Chamber's retail division with a free plug and gave downtown merchants over 70 gratis spots each day when they remained open to 9 p.m. Announcers used station breaks to inform listeners of late shopping hours. Station also donated $549.45 in time for the local Christmas Seal drive.

* * *

Boy Gets His TV Set

COL. James T. Healey, president-general manager, WOKO Albany, N. Y., aired an appeal for an 11-year-old tuberculosis victim, after learning that what the boy wanted most for Christmas was a television set. Public response was "remarkable," said Col. Healey. In addition to the TV receiver, there are unused contributions which are to be set aside for other charitable projects.

* * *

KOIN Contributions

WHEN Bob Henderson, m. c. of *The KOIN KLOCK*, early morning show on KOIN Portland, Ore., appealed for contributions for the Salvation Army Christmas Fund, listeners responded with $2,270.57.

* * *

WPTZ (TV) 'Health' Awards

UPON its 250th telecast of *You and Your Health*, semi-weekly WPTZ (TV) Philadelphia series on public health, the station was awarded citations from Philadelphia County Medical Society, Philadelphia County Dental Society

WTMJ-TV Editorials

WTMJ-TV Milwaukee reports it has received complimentary letters from educators and citizens for its current quarter-hour, once a week filmed show illustrating editorials about Milwaukee which appear on the front page of the *Journal*.

The TV station and newspaper, both owned by the Journal Co., work together in planning various editorials about common problems of interest to local citizens. Covered by the joint newspaper editorial-TV show presentation are such topics as city cleanliness, parks, airport, library, civil defense, police and expressways. The *Journal* editorial appears on the same day the TV show is aired.

Several weeks before each show, the editorial writer figures out picture possibilities to accompany his editorial; then a commercial photographer with a movie-sound camera spends two days taking pictures, from which the most graphic are selected. The film is trimmed and a rough script written, then both are edited to their finished forms for presentation.

The show is presented at 6 p.m. on Tuesdays and currently is scheduled for 13 weeks. WTMJ-TV reports requests for filmed prints of the programs have come from schools in Milwaukee and suburbs and that PTA groups have realized the value of the subject matter and repeated showings to persons interested in improving the city.

and Philadelphia Department of Public Health, for "pioneering and developing health education" via TV.

WTIC Helps Spot Bandit Car

MINUTES after a robbery of the Berlin, Conn., branch of the New Britain National Bank, WTIC Hartford reports it aired the license number of the bandit's getaway car as described on the state police shortwave radio. A 12-year-old Berlin schoolboy and self-styled "Junior G-Man," who had noted the license number of an empty car on his way home from school, heard the WTIC bulletin and notified police, who recovered the abandoned getaway car, but failed to apprehend the bandit.

* * *

Delivers Freedomgrams

TO MAKE sure the voice of the industrial area in western Michigan will be represented on the Crusade for Freedom's Radio Free Europe and Asia, Muskegon County Crusade Chairman Marty Whelan, news eidtor of WKBZ Muskegon, enlisted 1,600 Boy Scouts to distribute 33,000 Freedomgrams, messages on behalf of RFE, to homes in that area.

* * *

Raises $4,000 for School

IMPACT of WJAR-TV Providence's *TV Sports Page* was demonstrated when the show's chief personality, sportscaster Warren Walden, used the program to promote within three days the raising of some $4,000 to complete expenses needed for West Warwick High School's local football team to participate in an annual football bowl game at Miami, Fla.

WHLI Public Service

RECORD 1,104 public service programs totaling 546 hours were broadcast during 1952 by WHLI Hempstead, L. I., according to George Ball, station public affairs director, who said the figure represents an increase of 23% over 1951. Also scheduled in 1952 were 10,101 public service spot announcements for national and local non-profit campaigns, he said.

* * *

Benefit Collects $101,411

BENEFIT show by *Wilkens Amateur Hour*, radio and television program on WDTV (TV) and KQV Pittsburgh, for the Children's Hospital Fund, not only received pledges of $66,671 in donations, but brought in a final total of $101,411—more than 150% of the pledged amount, the stations report. The regular Sunday show, normally one hour, was extended to an hour and a half for the benefit. Sponsor is Wilkens Jewelry Co.

* * *

WWRL Polio Drive

WWRL New York is conducting a saturation campaign on behalf of the March of Dimes this month, using spot announcements and case histories of polio victims, according to the station. Transcriptions are broadcast seven times daily and include foreign language announcements.

* * *

Nylons for TV Sets

MARGARET ARLEN, WCBS-TV New York personality, has begun an appeal on her five-day-a-week program for 1,710,000 discarded nylon stockings. Sale of that number of stockings, according to Miss Arlen, will bring in enough money to purchase 95 TV sets to be donated to the Greystone Park Mental Hospital, Morris County, N. J., for use by some 5,500 patients.

* * *

WIMS-AM-FM Radiothon

A 24-hour radiothon by WIMS-AM-FM Michigan City, Ind., to raise $10,000 for the La-Porte County Therapy Center for Retarded Children, resulted in receipts totaling nearly $13,000, William N. Udell, president-general manager, reported last week.

* * *

WDUN's March

WDUN Gainesville, Ga., fourth annual March of Dimes Marathon, which began early Jan. 3 and continued for 18 hours, raised $1,016.90 for Gainesville-Hall County Polio Campaign.

* * *

Power for Good

CKVL Verdun, Quebec, raised $600 for crippled children—without soliciting contributions or gifts from listeners. During Christmas week station aired a French-language program from the Victor Dore School and money started flowing in a few hours later. Announcer thanked listeners and an avalanche of donations was underway in the next few days.

What has TV Done to RADIO in Syracuse?

In spite of the fact that Syracuse is a two-TV-station city — even though 71% of the homes in the Syracuse area have TV sets—two separate surveys* show that radio is very much alive and kicking.

3.07 hours a day

is the average daily radio-listening time *in TV Homes* in Syracuse. These same homes watch TV an average of 4.52 hours a day. Non-TV homes listen to radio 4.4 hours a day. TV has *not* replaced radio in Syracuse—merely supplements it as a source of entertainment and information.

**Write, wire, phone or Ask Headley-Reed for your FREE Copy of the Surveys.*

A MEREDITH STATION

SIX employes, each with 20 or more years of service, are honored by WCCO Minneapolis at a special luncheon. L to r: Larry Fist, studio supervisor, 27 years; Irene Doherty, mail clerk, 25 years; Ivan Anderson, resident engineer-transmitter, 28 years; Larry Haeg, general manager, who presented $100 bonds to group; Russell Person, studio technician, 20 years; George Collier, technician - transmitter, 25 years; Fred Herman, technician, 24 years.

► START of its 26th year of remote broadcasting on WJAS Pittsburgh yesterday (Sunday) was observed by that city's First English Lutheran Church, with a talk by the Rev. Robert W. Stackel, present minister. Only two broadcasts have been missed due to weather and power failure.

* * *

► Sterling V. Couch, WDRC Hartford traffic manager, observed his 25th anniversary with the station Jan. 1. Mr. Couch was presented a gold watch at a party in his honor.

* * *

► GEORGE BARBER, manager of WCOG Greensboro, N. C., is observing his 22d anniversary in radio. He joined WDOD Chattanooga, Tenn., as an announcer-operator Jan. 19, 1931.

* * *

► ARTHUR GODFREY began his 20th year on CBS Radio last Thursday. He started with the network Jan. 15, 1934, on an early morning program with WJSV (now WTOP) CBS Radio's Washington outlet. Mr. Godfrey is heard 8½ hours a week on CBS Radio, in addition to frequent regular appearances on CBS-TV.

* * *

►RAY NORENE has been awarded a 20-year service pin at WBBM Chicago, where, as an engineer, he has traveled more than 300,000 miles in his work.

* * *

► WITHOUT warning, Nancy Osgood, WNBW (TV) Washington women's commentator, had her Jan. 2 program upset shortly after it opened as a score of NBC officials, broadcasters and friends interrupted proceedings to stage a 10th anniversary celebration in her honor. The event was a complete surprise. Impromptu interviews, songs and presentation of gifts provided unscheduled entertainment. In her 10 years Miss Osgood has interviewed over 2,000 guests on WRC Washington and WNBW (TV), NBC outlets.

► Frank Edwards, news commentator for the AFL, began his fourth year of broadcasts for the labor organization Jan. 5. Mr. Edwards is heard at 10 p.m. EST Monday through Friday on some 130 MBS stations.

* * *

►WWVA Wheeling, W. Va., claiming one of industry's oldest Saturday night hillbilly radio shows, *WWVA Jamboree*, on Jan. 3 marked 1,040th consecutive broadcast of the show, first aired Jan. 7, 1933.

* * *

► Philco Corp. received special scroll from NBC Dec. 29 commemorating the 200th telecast of *Television Playhouse* (NBC-TV, Sun., 9-10 p.m. EST). Presentation was made by John K. Herbert, NBC vice president in charge of radio and TV networks, to James H. Carmine, executive vice president of Philco. Company has sponsored the program since its inception Oct. 3, 1948.

* * *

► WSAZ Huntington, W. Va., client, Lawrence Drug Store of Huntington, on Jan. 1 began its 10th year of sponsoring the *World News*.

* * *

►James H. Riley, engineer, WLAW Boston, has celebrated his 15th year at the station.

Harkens Back 23 Years

FRANK SMITH, morning news editor, KRES St. Joseph, Mo., himself a polio victim in 1930, was principal speaker at a kick-off dinner of the 1953 March of Dimes in Buchanan County. Mr. Smith also is co-chairman, Radio Div., Buchanan County Polio Drive. In addition, Mr. Smith will address several groups in the area to promote the drive. He "plugs" the March of Dimes on his six newscasts daily.

Situations Wanted

Managerial

The $8400.00 question. That's what I'm earning right now. The hard way too. Presently general manager of an indie in one of the country's fifteen major markets. This station has been profitable since I put it on the air a year and a half ago. I don't have to be guaranteed the $8400.00 (yearly that is) but the potential must be there so that I can do that and better. Will also consider buying into a property. Write me now for a happier and more prosperous new year. Box 477S, BROADCASTING • TELECASTING.

(Continued on next page)

Situations Wanted (Cont'd)

Manager—with 20 years of constructive radio background. Not a has been, but a man who can get the job done, in sales, programming and administration. If you'll check my background today I'll be working for you tomorrow. Box 478S, BROADCASTING • TELECASTING.

Manager . . . program director . . . sports. Small station. Fifteen years success story sales, programming, announcing. Idea man. TV experience. Employer recommendation. Available February first. Box 519S, BROADCASTING • TELECASTING.

Traffic manager. AM-TV. Intelligent, calm, collected. Thoroughly experienced in local, national, regional sales and programming. Familiar three leading networks. Now employed. Box 528S, BROADCASTING • TELECASTING.

Efficient, stable, experienced manager available immediately. Have money to invest if required. Box 531S, BROADCASTING • TELECASTING.

Baseball play-by-play man looking for big metropolitan area. Can also deliver good sports and all-round announcing job. Box 548S, BROADCASTING • TELECASTING.

3 in 1. Station-program and commercial manager. Experience covers all phases of radio 250 to 5,000. Capable, progressive live wire with excellent radio background. Family man with fine personality and excellent references. An asset to your station and town. Box 558S, BROADCASTING • TELECASTING.

Mr. Station Owner!! Husband and wife management team will bring you high profits and community acceptance. Man has eleven years broadcast experience all phases including engineering. Wife has five years in sales, promotion, traffic, copywriting. Southerners. Box 559S, BROADCASTING • TELECASTING.

TV film manager. Thoroughly experienced in programming, procurement and operations. Now with top company. Box 574S, BROADCASTING • TELECASTING.

Program manager: Station experience from 250 to 50,000 watt as program manager, manager, announcer, continuity director. Network and agency experience over NBC and ABC—also television production and writing. Will furnish highest references from past and present affiliations. Presently program manager for leading station and regional network. Contact Robert D. Williams, 2128 Lakeshore Drive, Birmingham 9, Alabama.

TRANSMISSION LINE and FITTINGS

at a fraction of their cost

Because the FCC assigned us a UHF-TV frequency, we have a quantity of Communication Products Company's type 506 and 505, 50.5 ohm transmission line, originally installed for VHF which had to be replaced. It has never been in use and is in top condition, other than having weathered on the tower during the "freeze". Some of it is brand new, never out of the boxes. It's complete with "O" rings, bolts, connectors, etc. Clean as a whistle inside, carefully boxed for shipment and ready to go. We'll sell the lot at 50% of today's list price.

540 feet 3⅛" Type 101-506 (27-20 ft. lengths)
40 feet 1⅝" Type 114-505 (2-20 ft. lengths)
2-45° 3⅛" Type 73-506 Elbows
3-90° 3⅛" Type 72-506 Elbows
1-3⅛" to 1⅝" Type 85-506 Reducer Assembly
2-45° 1⅝" Type 42-505 Elbows

WPAG-FM Ann Arbor, Mich.—Washtenaw Bcstg. Co. Granted request to cancel license and delete FM station (BRH-113). Action Jan. 13.

Ownership Changes . . .

Actions by FCC

KJR Seattle, Wash.—Mount Rainier Radio & Television Bcstg. Corp. Granted voluntary acquisition of control of licensee corporation by **Theodore R. Gamble** through purchase of 6.525 shares of stock (43.5%) for $10 per share, or for total consideration of $65,250, as follows: From Ralph E. Stolkin, 3,262½ shares (21.75%), for $32,625; from Edward G. Burke Jr., 1,631½ shares (10.875%), for $16,312.50, and from Sherrill C. Corwin, 1,631½ shares (10.875%), for $16,312.50. Before transfer Mr. Gamble had 43.5% interest; after transfer he has 87% interest (holding total of 13,050 shares of stock). Other stockholders, whose interest is not changed, include C. Howard Lane, 10% interest (1,500 shares), and J. Archie Morton, 3% interest (450 shares). Filed Dec. 19, 1952; granted Jan. 13.

Hearing Cases . . .

Actions by FCC

Tampa Times Co. and **Orange Television Bcstg. Co., Tampa, Fla.**—By memorandum opinion and order, Commission denied joint petition requesting dismissal of amendment which had been filed last October by Tampa Television Co. to change site, increase antenna height and change estimated construction cost in its application for vhf Ch. 13 in Tampa, which is mutually exclusive with Tampa Times Co. and Orange Television Bcstg. Co. applications (Dockets 10330, 10253 and 10255). Commission found amendment of Tampa Television Co. was filed as matter of right prior to its designation for hearing. Denial Jan. 9.

Taylor Radio & Television Corp., Wichita, Kan.—By order, Commission denied petition to enlarge issues in proceeding involving Taylor, Radio Station KFH Co. and Wichita Television Corp., each seeking vhf Ch. 3 at Wichita. Taylor wanted to include "its officers, directors and stockholders" after the word "applicants" in issue "To determine the legal, technical, financial and other qualifications of the applicants to construct and operate the proposed station" (Dockets 10261; BPCT-698, 946 and 961). Denial Jan. 9.

Caddo Bcstg. Co., Anadarko, Okla.—By order, Commission granted request for postponement of oral argument in proceeding involving its application and that of Lawton-Fort Sill Bcstg. Co., Lawton, Okla., for new AM stations (Dockets 9755 and 9756; BP-7665 and 7737). Oral argument rescheduled for Feb. 24. Order Jan. 9.

Port Arthur College and **Smith Radio Co., Port Arthur, Tex.**—By order, Commission granted petition of Chief, FCC Bcst. Bureau, for enlargement of issues in proceeding on applications of Port Arthur College and Smith Radio for new vhf Ch. 4 TV stations so as to require determination as to whether tower proposed by the college will adversely affect KPAC (AM) Port Arthur (Dockets 10285, 10352; BPCT-839 and 1013). Order Jan. 9.

Hearing Calender . . .

1953 TELECASTING Yearbook

KGKO Dallas (Docket 8714, BP-6309; new AM, 1480 kc)—WFAA-570 Dallas and WBAP-570 Fort Worth petition to designate for hearing application of KGKO for license because of "severe and destructive interference they are suffering from equipment test operation" of KGKO. Supplement filed Jan. 13.

January 13

Westinghouse Radio Stations Inc. (KEX), Portland, Ore., et al (Docket 9136, BPCT-494; new TV, Ch. 8)—Motion by Westinghouse pursuant to rule 1.821 for order that 42 depositions planned by North Pacific TV Inc. shall not be taken or that they be taken after conclusion of hearing set Jan. 26.

KWEM West Memphis, Ark. (Docket 10227, BML-1503; move main studio to Memphis, Tenn.)—Further petition for reconsideration and grant without hearing of application which FCC on June 25, 1952, designated for hearing.

Ozarks Bcstg. Co. (KWTO), Springfield, Mo. (Docket 8380; increase power, 560 kc)—Motion by Beaumont Bcstg. Co. (KFDM Beaumont, Tex.) to dismiss Jan. 6 "Petition to Issue Amended Decision Consistent with the Court of Appeals Decision Beaumont Bcstg. Corp. v. FCC (No. 10888, June 26, 1952)" on grounds petition does not show grounds for relief.

James R. Fleming and Paul V. McNutt d/b as Anthony Wayne Bcstg., Fort Wayne, Ind. (BPCT-1400; new TV, Ch. 69)—Petition for prompt designation for hearing with competitive bid of Radio Fort Wayne (WANE) since delay is "entirely without fault of applicant" and since hearing already has been completed on Ch. 33 there.

Radio Wisconsin Inc. (WISC) and Badger Television Co. (WIBA), Madison, Wis. (BPCT-410, 1472; new TV, Ch. 3)—Motion by Radio Wisconsin to dismiss for lack of jurisdiction the petition of Dec. 29, 1952, by Badger requesting FCC to (1) dismiss application of Radio Wisconsin for Ch. 3 or (2) issue rule to Radio Wisconsin to show cause why it should not elect to dismiss its appeal in D. C. Court of Appeals or withdraw Ch. 3 bid.

Port Arthur College (KPAC) and Smith Radio Co., Port Arthur, Tex. (Dockets 10285, 10352; (BPCT-839), 1013; new TV, Ch. 4)—Petitions by Port Arthur College (1) to amend its application, (2) to oppose request of Smith Radio Co. for order to take depositions and (3) to reply to petition of Smith Radio Co. for review and reversal of hearing examiner order of Dec. 30, 1952, limiting depositions. FCC Broadcasting Bureau chief filed opposition to review request of Smith Radio and petitioned for continuance of hearing, set Jan. 25.

January 14

Mt. Mitchell Bcstrs., WMIT-FM Clingmans Peak, N. C.—Petition to amend Sec. 3.606 and add TV Ch. 18 at Burnsville, N. C., 10 mi. south.

Routine Roundup . . .

January 8 Decisions

BY COMMISSION EN BANC

Extension of Authority

January 8 Applications

ACCEPTED FOR FILING

Modification of CP

WLIT Linton, Ind., Henry C. Sanders and Norman Hall d/b as The Linton Bcstg. Co.—Mod. CP (BP-8304), which authorized new AM, for approval of ant., trans. and studio locations and change type trans. (BMP-6098).

Change Studio Location

WPTX Lexington Park, Md., Patuxent Radio Inc.—Mod. CP (BP-8200), as mod., which authorized new AM, to change studio location from 2.5 mi. SW of Patuxent Naval Air Test Center main gate on Maryland Hwy. #264, Lexington Park, to Dougherty Bldg., Great Mills Rd., Lexington Park, and change type trans. (BMP-6097).

Extension of Completion Date

KDEF Albuquerque, N. M., Frank Quinn—Mod. CP (BP-7759), as mod. which authorized new AM, for extension of completion date (BMP-6099).

Change Type Transmitter

WCHL Chapel Hill, N. C., Roland McClamroch Jr., Roy E. Fullen and L. T. Dark Jr. d/b as Village Bcstg. Co.—Mod. CP (BP-8052), which authorized new AM, to change type trans. (BMP-6096).

Renewal of License

Following stations request renewal of license: **KBOE Oskaloosa, Iowa,** Oskaloosa Bcstg. Co. (BR-2568); **KBOK Waterloo, Iowa,** Waterloo Bcstg. Co. (BR-1727).

Extension of Completion Date

WVAM-FM Altoona, Pa., The General Bcstg. Co.—Mod. CP (BPH-1743), which authorized new FM, for extension of completion date (BMPH-4805).

TENDERED FOR FILING

Increase Tower Height

WBAM Montgomery, Ala., Deep South Bcstg. Co.—Mod. CP to increase height of south tower of DA and make changes in ant. system.

January 9 Applications

ACCEPTED FOR FILING

Change Studio Location

KOTN Brinkley, Ark., Universal Bcstg. Corp.—CP to change studio and trans. location from 505½ Main St., Pine Bluff, Ark., to site to be determined, Brinkley, Ark. (BP-8705).

Extension of Completion Date

WCAM Camden, N. J., City of Camden—Mod. CP (BP-6854), as mod., which authorized change in trans. location, for extension of completion date (BMP-6100).

Change Studio Location

KFDA Amarillo, Tex., Amarillo Bcstg. Co.—Mod. license to change studio location from 109 E. 5th St., Amarillo, to on N. Ong St. at SE intersection of N. Ong and W. Cherry Ave., 2.8 mi. N of city limits of Amarillo (BML-1533).

License Renewals

Following stations request renewal of license: **KRED-FM Eureka, Calif.**—Redwood Bcstg. Co. (BRH-330); **KRFM-FM Fresno, Calif.**—California Inland Bcstg. Co. (BRH-622); **WDBO-FM Orlando, Fla.**—Orlando Bcstg. Co. (BRH-701); **KSEI-FM Pocatello, Ida.**—Radio Services Corp. (BRH-55); **WXHR (FM) Cambridge, Mass.**—Middlesex Bcstg. Corp. (BRH-600); **WHDL-FM Allegheny, N. Y.**—WHDL Inc. (BRH-343); **WGPA-FM Bethlehem, Pa.**—The Bethlehem Globe Pub. Co. (BRH-154); **WPAM-FM Pottsville, Pa.**—Miners Bcstg. Service Inc. (BRH-240); **WGH-FM Newport News, Va.**—Hampton Roads Bcstg. Corp. (BRH-163); **WFLN (FM) Philadelphia**—Lawrence M. C. Smith tr/as Franklin Bcstg. Co. (BRH-470); **WTMA-FM Charleston, S. C.**—Atlantic Coast Bcstg. Co. (BRH-161); **WMBA-FM Martinsville, Va.**—Martinsville Bcstg. Co. (BRH-517); **KYSM-FM Mankato, Minn.**—Southern Minn. Supply Co. (BRH-144); **KJAM Vernal, N. Y.**—James C. Wallentine tr/as The Uintah Bcstg. Co. (BR-1415).

Modification of CP

KGKO Dallas, Tex., Lakewood Bcstg. Co.—Mod. CP (BP-6309), as mod., which authorized new AM, to change type trans. and specify studio location (BMP-6101).

January 13 Applications

ACCEPTED FOR FILING

Renewal of License

Following stations request renewal of license: **KWPC Muscatine, Iowa,** Charles A. Henderson, George J. Volger, Thelma Marie Volger d/b as Muscatine Bcstg. Co. (BR-1415); **KLCB Libby, Mont.,** Lincoln County Bcstrs. (BR-2721); **KIYI Shelby, Mont.,** Tri-County Radio Corp. (BR-1770); **KUSD Vermillion, S. D.,** U. of S. Dakota

(BR-651); **WTOP-FM Washington**, WTOP Inc. (BRH-109).

TENDERED FOR FILING

Replace Expired CP

WBAR Bartow, Fla., William Avera Wayne—CP to replace expired CP (BP-8244) which authorized new AM to operate on 1460 kc, 1 kw-D.

January 13 Decisions

BY BROADCAST BUREAU

Change Studio Location

KFDA-TV Amarillo, Tex., Amarillo Bcstg. Co. Inc.—Granted mod. CP to change studio location from to be determined to designated address in Amarillo (BMPCT-953).

WPTX Lexington Park, Md., Patuxent Radio Inc.—Granted mod. CP to change studio location and change type trans. (BMP-6097).

Change Type Transmitter

KGKO Dallas, Tex., Lakewood Bcstg. Co. Inc.—Granted mod. CP to change type trans. and specify studio location; conditions (BMP-6101).

License Granted

WLAY Muscle Shoals, Ala., Muscle Shoals Bcstg. Corp.—Granted license covering change in trans. location (coordinates only), installation of new vertical ant. system, and redescription of trans. and studio location (BL-4853).

KPOA Honolulu, Hawaii, Island Bcstg. Co.—Granted license covering changes in ant. system (BL-4866).

Modification of CP

WRIS Roanoke, Va., Cy N. Bahakel—Granted mod. CP for approval of ant., trans. location, and change type trans.; condition (BMP-6075).

WCON Cornelia, Ga., Habersham Bcstg. Co.—Granted mod. CP for approval of ant., trans. and studio location (BMP-6076).

WBLE Batesville, Miss., Panola Bcstg. Co.—Granted mod. CP for approval of ant., trans. and studio location and change type trans. (BMP-6074).

Extension of Completion Date

WERH Hamilton, Ala., Marion County Bcstg. Co.—Granted mod. CP to change type trans. and extend completion date to 8-8-53; condition (BMP-6090).

WAUG-FM Augusta, Ga., Garden City Bcstg. Co.—Granted mod. CP for extension of completion date to 4-1-53 (BMPH-4804).

Request Granted

KHIT Lampasas, Tex.—Lampasas Bcstg. Corp.—Granted request for waiver of sec. 3.71 to operate from 6:30 a.m. to 7:15 p.m. daily for period of 30 days or until action has been taken on application for transfer of control.

Modification of CP

WKIK Leonardtown, Md., Southern Maryland Bcstrs. Inc.—Granted mod. CP to change type trans. and make changes in ant. system (BMP-6078).

Extension of Completion Date

WJEF-FM Grand Rapids, Mich., Fetzer Bcstg. Co.—Granted mod. CP for extension of completion date to 6-27-53 (BMPH-4803).

January 14 Applications

TV Blackmail

ONE OF the ugliest, most reprehensible blights to develop on the television allocations scene is that of the shake-down artist, who files a "strike" application for a facility to block the genuine applicant from getting an unopposed grant. Usually the application is filed a day or two prior to the expected action on the legitimate grant.

We have been informed of cases where there have been pay-offs to get the strike applicant off the back of the legitimate enterpriser. These pay-offs have been both in cash and in stock. That is black-mail, pure and simple.

The FCC is cognizant of these instances. But, informally, it contends that it is almost impossible to prove that an applicant is engaging in such tactics.

Somewhere along the line there must be the show-down. The FCC should have the courage to call a quick hearing, en banc, where it finds even a suspicion of a shake-down. The resultant publicity, in our judgment, should scare off these charlatans, and preserve for television broadcasters their good name.

We are disposed to suggest that thought be given to legislation which would require the posting of a substantial bond by TV aplicants, to prove their good faith. Unless something is done to thwart these offenders we can expect a brand of TV racketeering that will make a mockery of the administrative processes, and put the 5 percenters to shame.

Retail Tale Retold

IN THE past fortnight radio and television broadcasters have been given some very sound advice on how to expand and improve use of those media by department stores.

In last week's issue was a report by Department Stores Study on six months' use of radio by Pomeroy's department store in Pottsville, Pa. The conclusions reached by this report were that radio can move merchandise more effectively than newspapers, but radio has refused to adjust itself to the peculiarities of big store advertising.

In this issue an article by Samuel H. Cuff, radio-TV consultant to Allied Stores, makes about the same points regarding television.

Both the Department Stores Study and Mr. Cuff suggest that the broadcast media ought to make allowances in their techniques of time selling for the "lots of advertising today and little or none tomorrow" formula that department stores have applied to their newspaper buying for so many years.

It is further suggested that neither broadcasters nor telecasters as a group have made serious efforts to educate themselves to the practices of department store advertising. A deplorable lack of understanding exists.

It seems to us that radio's growing reliance on the local advertiser as a basic source of income would demand that broadcasters do all possible to explore ways of exploiting the rich area of department store advertising. Telecasters at the moment may not be under the same compulsion to develop local accounts, but they will be as soon as new stations begin to eat into national business that pre-freeze stations have enjoyed.

Only the most short-sighted businessman would continue indefinitely to delay exploration of possibly the most rewarding source of income that a television or radio station could develop.

"What's the AFTRA scale when I go commercial?"

Political Spoils at the FCC?

AFTER A 20-year patronage drought, it isn't difficult to understand the desire of the Republicans to shake loose as many jobs as possible in official Washington. But in their zeal to run the opposition out of office and reward the loyal party workers, there are signs that they intend to use a meat-ax rather than a scalpel.

The reports are somewhat disquieting, at this stage, as they pertain to the FCC. There is the expressed attitude, for example, that the new chairman should be an "outsider" who will have no compunctions about terminating the tenures of staff-level people, to make way for the GOP newcomers.

We certainly agree that there are a good many FCC job holders who could be cut loose without disturbing the efficiency of the FCC. Quite a few of these patronage-office holders were "blanketed in" early in the first Roosevelt Administration, and given civil service status which they did not earn by merit or via competitive examinations. They can just as readily be "blanketed out" by the new administration.

We do not contend that the FCC is a model of efficient independent agency operation. We have been among its foremost critics. But we disagree with the view expressed in some GOP quarters that it, as presently constitued, is the "worst" agency in Washington.

Communications is a highly complex field. It isn't essentially a political operation, although politics at times obviously have motivated certain of its actions. The rejoinder of the FCC last week to the letter from Attorney General McGranery on the ABC-United Paramount case, wherein Chairman Walker told off the Attorney General certainly didn't smack of politics. The case is pending before the FCC for decision and the record is closed, the FCC averred.

The FCC has on its staff many professional people who are in no wise identified with politics or with policy. Certainly they should not be uprooted. As a matter of fact, the Government would be hard put to find qualified replacements.

The Eisenhower Administration has the opportunity of changing the FCC's political complexion by making two new appointments to the Commission itself. There appear to be quite a few well-qualified Republican candidates for these posts. President Eisenhower can name a new chairman or designate one of the two new appointees to serve. We have favored the promotion of Vice Chairman Hyde to the Republican chairmanship.

We hope the new President will do with the FCC what he has done on the cabinet level. He has appointed the top-man for each department and pretty well left up to him the selection of his aides and his staff.

Darling, They're Playing Our Song

JOHN BECK had a problem of classic simplicity. He wanted to find out how to persuade grown men to imitate wild ducks.

John Beck sells athletic goods. WMT sells time. (Musical bridge here, "Mating Call of Athletic Goods Store for Eastern Iowa Radio Station.")

After locating a copywriter with mallard instincts, WMT went to work. The trick was turned with a recording of a duck call and some rather choice pintail prose. Beck's sold 288 duck calls, twice as many as they sold all last year, plus 288 decoys, plus 41 duck call records—all in four weeks, and before the season opened.

The entire project went off without a loose quack, except for one minor annoyance. We had neglected to say that our duck call was recorded, and, during the fourth week of the campaign, a rather nasty canvasback drake broke into Studio A demanding to meet "that girl with the lovely voice."

Moral: *WMT reaches all the ducks and most of the people in Eastern Iowa.*

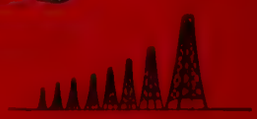
WHB NEIGHBORIN' TIME

Advertisers who sell to the masses have been quick to ride herd with this dinner winner—2½ hours of noon-time Saddle Soap Opera from "Triangle D Ranch," the Cow Country Club . . . with music by Don Sullivan and his Western Band, and the country philosophy of Deb Dyer. Bruce Grant is master of ceremonies, assisted by his side-kick, Pokey Red. Al, Bud and Pete enliven the proceedings with their musical novelties and wisecracks. Charles Gray gives the AP and local news report at noon. Broadcast from 11:30 a.m. to 2 p.m. daily, *WHB Neighborin' Time* carries participating spots ("live" or minute transcriptions) and sponsored quarter-hours. Ask for availabilities quickly to get your share of results when the chuck wagon comes 'round!

DO YOU READ IT?

WHB's pocket-size magazine, sent free to advertisers, agencies, advertising and sales executives and time buyers. Request a copy on your letterhead.



"BIG SEVEN" BASKETBALL ★ K. C. "BLUES" BASEBALL ★ "BIG SEVEN" FOOTBALL *and Other Sports*

WHB's ace play-by-play sportscaster, Larry Ray, is now in the winter season of forty-seven basketball games, broadcast direct from the campii at Kansas State College, the University of Missouri, the University of Kansas and other "Big Seven" schools. April 16 he begins the baseball season, with 154 games of the Kansas City "Blues" (New York Yankee's No. 1 farm team) at home and away, sponsored by Muehlebach Beer. Next fall, ten "Big Seven" conference football games. And in between, golf, tennis, fishing and all other sports — included nightly on his 6:15 *Sports Round-Up*, sponsored by the Union Pacific and Broadway Motors (Ford). A few availabilities are still open — so get off the bench now if you want to team up with Larry to sell your product to the WHB*ig* Market's biggest sports audience!

WHB NIGHT CLUB OF THE AIR

The new name for "The Roch Ulmer Show," 11 p.m. to 1 a.m. And a new format! — presenting the best in recorded popular music, old and new — with Roch Ulmer and his six terrific dialects adding sparkle and humor! Available for participating sponsorship and spots Saturdays and Sundays, guest M.C.'s, personalities in the dance band, entertainment and recording field — or prominent local citizens well-known as record collectors — bring their favorite "collector's item" records to the show and announce them.

CLUB 710—
With "Oil" Wells as Master of Ceremonies

His name is really *Earl* Wells—but a voice as smooth as oil, modulated to perfection—has earned him the nickname of "Oil." Monday through Friday, from 2 p.m. to 4:45 p.m., "Oil" presents the latest popular records —and the old standard tunes. Two solid hours and 45 minutes of wonderful listening, with short, cryptic introductions that make the program "mostly music." Each show features the "Top Twenty" tunes of the week, as reported by *Billboard*, *Variety*, *Cash Box*, a poll of local record shops, and the WHB Concensus. A wonderful time-segment for participating announcements — "live" or minutes, transcribed. On one afternoon a week representatives of the leading phonograph record companies bring "Oil" their newest records (never before heard on the air in Kansas City) — and present them personally for their "premiere" in the area.

WLS OPERATION GROCER best merchandising plan in its field

....INCREASED CREAMETTES SALES 10% in eleven weeks

.... So says C. F. Meyer, Chicago District Manager for the Creamette Company. This is quite an accomplishment, particularly in view of the fact that six years continuous participation on FEATURE FOODS... the business-building WLS program that influences the buying habits of millions of housewives... already had more people buying Creamettes, and more stores selling Creamettes, than any other packaged macaroni in the Chicago area.

Mr. Meyer's letter speaks for itself.
"I am happy to report that Creamettes and Creamette brand Ready Cut Spaghetti have enjoyed an increase of 10% in sales during our participation in an eleven week cycle of WLS's OPERATION GROCER in the Chicago market. This increase is in comparison with a like period last year. I should like to add that this merchandising plan is the best in its field here in Chicago. Thank you for your merchandising support and cooperation."

OPERATION GROCER embodies all the essentials for success... radio advertising, newspaper advertising, point of purchase displays and display material... complete in one result-getting package, at very nominal cost. Better see your John Blair man... or contact us... and get in on the hottest advertising-merchandising plan in the Chicago grocery field today.

Bigger and Better Programming At The Same Old Stand

WGAL-TV

Lancaster, Pa.

Recent examples of important program planning designed by WGAL-TV to meet the needs and interests of the communities it serves with television's highest standards of public service. Combined with top shows from four networks . . . NBC, CBS, ABC and DuMont . . . it means bigger and better programming for the people in WGAL-TV's rich Pennsylvania market area.

ABC, which for months has been mulling idea of single day and night radio rate, is due to take first step in that direction shortly, with adoption of single rate plan for all five of its owned radio stations: WJZ New York, WENR Chicago, KGO San Francisco, KECA Los Angeles and WXYZ Detroit.

★ ★ ★

STATUS QUO persisted at FCC last week as newly-inducted Eisenhower Administration failed to reach administrative level. But jockeying in support of favored candidates continues with no discernable change in line-up and with Vice Chairman Rosel H. Hyde strongly supported for chairmanship, while "draft Jones" movement, to bring in former Comr. Robert F. Jones for "house-cleaning job," still has steam.

★ ★ ★

DESCRIBED as "dark horse" for commissionership or even chairmanship of FCC if Hyde-Jones impasse is reached, is former Comr. Norman S. Case, ex-Governor of Rhode Island, who served from FCC's creation in 1934 until President Truman passed him by on reappointment on June 30, 1945. Now in private practice, Gov. Case believed to have New England support including Sherman Adams, top Ike assistant. Gov. Case believes that promotion of Mr. Hyde to chairmanship is logical and desirable, and acknowledges that he has been contacted, but is not an avowed candidate for FCC.

★ ★ ★

CHROMATIC color tube now in limited production, with customers chiefly manufacturing concerns whose orders are usually for two tubes, one to test for color reception, other to dissect to see what makes it tick. Informal reports from top level executives of Paramount Pictures subsidiary in charge of developing color tube invented by Dr. Ernest O. Lawrence of atom smashing fame indicate no plans for large scale production until mass production of color sets offers opportunity for volume sales.

★ ★ ★

FIRST TEST case in court of alleged economic injury suffered by an AM station from grant of TV outlet in same area planned by WGRD Grand Rapids, Mich., should FCC turn down its protest against grant of uhf Ch. 35 to Leonard Versluis for Muskegon (see story page 50). Plea for such relief now can be made under McFarland amendment to Communications Act. Case may be forerunner of others.

★ ★ ★

QUASHING of criminal anti-trust grand jury "authorization" against electronics industry by outgoing Attorney General James P. McGranery last Monday, expected to stimulate activity in color-TV (see story page 54, editorial page 98). While laboratory and experimental work had gone forward by leading companies, most of important entities were awaiting outcome of Grand Jury proceeding, since it basically involved patents.

★ ★ ★

IN WORKS is new subsidiary within CBS in which its ace commentator and CBS board member, Edward R. Murrow, will participate in stock ownership. Properties of subsidiary expected to include *See It Now* and other ventures in Murrow orbit, with likelihood that Fred Friendly, Mr. Murrow's co-worker, also will participate.

★ ★ ★

INDICATIONS that fire-brand Sen. Tobey, new chairman of Interstate & Foreign Commerce Committee, plans to go ahead with inquiry into ABC-United Paramount merger seen in request of his staff for additional information from FCC files. This ties in with introduction by Senator of bill (S 538) seeking amendment of Sec. 311 of Communications Act covering antitrust (story page 45).

★ ★ ★

DISCLOSURE by White House Press Secretary James C. Hagerty that President Eisenhower is contemplating monthly broadcast news conferences, underscores previous reports published here that there will be named to White House staff specialist in radio-TV production at operating level. Mr. Hagerty has several prospects under consideration for post, which presumably would have status of assistant secretaryship.

★ ★ ★

HAVING MADE no inroads with its campaign to foster "pay-as-you-go television" on ground that advertisers would never support non box-office medium, Zenith reportedly now is launching anti-commercial TV campaign. Film deprecating quality of TV commercials has been produced and was recently previewed by an NARTB committee. President Harold Fellows has implored Commander E. F. McDonald, Zenith president, to kill project or modify it.

★ ★ ★

WHILE FORMER President Truman has set up offices in Federal Reserve Bank Bldg. in Kansas City, it's expected that within short time he will establish offices also in New York. Family probably will divide time between two homes in view of radio-TV commitments (to NBC) of daughter Margaret. It's doubted whether former President will accept any radio-TV commentary proffers. Presumably he regards them as beneath dignity of office of former President.

★ ★ ★

IN COMPLIANCE with provisions of new McFarland law, FCC last week readied complete report on pending cases which have not been acted upon in last three months, six months and year. McFarland bill requires such periodic report. File, reportedly, is 1½ inches thick.

Radio-TV Get Equal Status With Press at White House

NEW White House policy disclosed Friday to group of radio-TV spokesmen provides that radio and television will be given full privileges when pooling of news facilities is required. James C. Hagerty, President Eisenhower's news secretary, indicated he will work through regular committee representing radio and TV networks at White House (see news conference story page 42).

Mr. Hagerty reviewed facilities for electronic pickups in White House and Executive Offices with five-man industry group, seeking ideas on ways to use radio and TV effectively. He said proposal for use of conference technique of some sort for Presidential broadcasts is still nebulous and "up in the air." Committee was told White House is acutely aware of importance of radio and TV as means of reaching public. Policy of cooperation with electronic media will prevail during Eisenhower regime, industry newsmen feel.

General Foods Sales

GENERAL FOODS Corp., New York, net sales for quarter ending Dec. 31 were $183,540,346, compared with $168,226,313 for same period in 1951. Net earnings were $4,829,618 as against $4,387,842 for same quarter in 1951.

GREATER TV DEPTH

GREATER scope and depth in TV programming is likely to be achieved as result of optical matting tests currently being conducted by CBS-TV technicians, network announced Friday. With device called "vistascope" in TV camera, CBS-TV said, it will be possible to show scenes outside of camera position by use of live actors in combination with miniature cutouts.

Rep. Javits Proposes Broadcast of Proceedings

RESOLUTION giving Speaker right to permit televising and broadcasting of proceedings in House of Representatives, and bill to provide radio-TV coverage of committee hearings to be introduced today (Monday) by Rep. Jacob K. Javits (R-N. Y.).

He said UN coverage, last week's inauguration and Presidential campaign show "need for modernizing our Congressional procedures to keep abreast of modern technology. The way to get the people interested in government is to let them see and hear it in action." He recalled that power of Speaker to ban radio-TV coverage was questioned last year when Speaker Sam Rayburn forbade cameras and microphones at hearings. Speaker Joseph W. Martin Jr. (R-Mass.) is in favor of more liberal policy.

12 TV GRANTS BRING TOTAL TO 317

DOZEN NEW TV stations were granted by FCC Friday to boost total of post-thaw authorizations to 209 and total U. S. stations to 317, including 11 for noncommercial, educational outlets. Friday's permits included first for Wyoming. Only New Hampshire, Alaska and Virgin Islands are without TV authorization.

Processing on city priority Group A line (cities without service) was extended to No. 181, Santa Fe, N. M., where vhf Ch. 2 went to Greer & Greer, while Group B line (cities with service) was extended to No. 186, Kansas City, Mo., where Empire Coil Co. received uhf Ch. 25. Ten Group A and 15 Group B mutually exclusive applications were passed over in expedited processing of uncontested bids. New grants included:

Madison, Wis. (City priority Group A-2, No. 30)—Bartell Television Corp. (WOKY Milwaukee principals), granted construction permit for uhf Ch. 33, effective radiated power of 16.5 kw visual and 9.3 kw aural, antenna height above average terrain 430 ft.

Wichita Falls, Tex. (Group A-2, No. 56)—Wichita Falls Television Inc. (KWFT), granted vhf Ch. 6, ERP 22.5 kw visual and 11.5 kw aural, antenna 490 ft. Estimated commencement date: Within 30 days. Network: CBS; representative, Blair-TV.

Greenville, S. C. (Group A-2, No. 68)—Greenville Television Co., granted uhf Ch. 23, ERP 22 kw visual and 11 kw aural, antenna 1,140 ft.

Jamestown, N. Y. (Group A-2, No. 97)—James Bcstg. Co. (WJTN), granted uhf Ch. 58, ERP 100 kw visual and 56 kw aural, antenna 720 ft. Subject to condition that construction not commence until application is filed to modify antenna of WJTN-FM and grant of same is issued.

Bellingham, Wash. (Group A-2, No. 138)—KVOS Inc. (KVOS), granted vhf Ch. 12, ERP 16 kw visual and 8 kw aural, antenna 550 ft.

Cheyenne, Wyo. (Group A-2, No. 151)—Frontier Bcstg. Co. (KFBC), granted vhf Ch. 5, ERP 5.2 kw visual and 2.65 kw aural, antenna 190 ft.

Sandusky, Ohio (Group A-2, No. 174)—Lake Erie Bcstg. Co. (WLEC), granted uhf Ch. 42, ERP 18 kw visual and 9.1 kw aural, antenna 270 ft. Estimated commencement date: Dec. 1.

Northampton, Mass. (Group A-2, No. 177)—Regional Television Corp., granted uhf Ch. 36, ERP 21.5 kw visual and 11.5 kw aural, antenna 950 ft.

Kingston, N. Y. (Group A-2, No. 178)—Kingston Bcstg. Corp. (WKNY), granted uhf Ch. 66, ERP 25 kw visual and 13.5 kw aural, antenna 250 ft.

St. Cloud, Minn. (Group A-2, No. 179)—Granite City Bcstg. Co. (WJON), granted vhf Ch. 7, ERP 23.5 kw visual and 12 kw aural, antenna 420 ft.

Santa Fe, N. M. (Group A-2, No. 181)—Greer & Greer, granted vhf Ch. 2, ERP 54 kw visual and 27 kw aural, antenna 420 ft. (Comr. Frieda B. Hennock not participating.)

Kansas City, Mo. (Group B-4, No. 186)—Empire Coil Co., granted uhf Ch. 25, ERP 93 kw visual and 51 kw aural, antenna 390 ft. Empire Coil on Friday dismissed its application for uhf Ch. 30 at St. Louis, leaving unopposed there KFUO's bid. Empire Coil is operator WXEL (TV) Cleveland and KPTV (TV) Portland, Ore., and permittee of KDEN (TV) Denver.

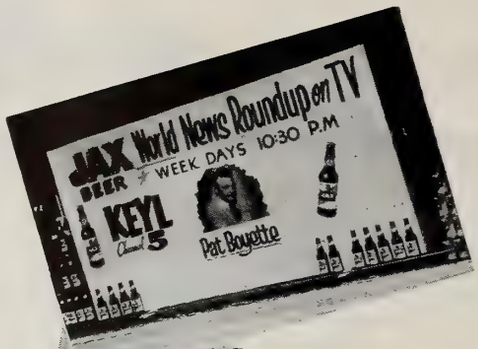
• BUSINESS BRIEFLY

MUSTEROLE ADDS ● Musterole, through Erwin, Wasey, New York, has added extra budget for eight-week campaign supplementing its present spot schedule, effective almost immediately in about 35 radio markets.

SANKA DRIVE ● General Foods, New York (Instant Sanka), planning radio spot announcement drive in 24 markets starting Feb. 9 for 52 weeks. Early morning announcements will be used. Young & Rubicam, New York, is agency.

QUIZ SHOW FOR THOR ● Thor Corp., Chicago, has bought quiz show which will take air this spring on ABC-TV. Move will be backed by intensive promotion and publicity, scheduled to break after clearance problem has been ironed out. Agency: Henri, Hurst & McDonald, Chicago.

DRY-STIK AGENCY ● Hudnut Sales Inc., N. Y., names Dancer-Fitzgerald-Sample, that city, to handle advertising for its new Dry-Stik cosmetic.



SCOTT SPONSORS ● Scott Paper Co., Chester, Pa., will sponsor *Ding Dong School*, Thurs., 10-10:15 a.m. on NBC-TV effective Feb. 5. Scott Co. also sponsors *Scott Music Hall* on alternate Wednesdays, 8:30-45 p.m. on NBC-TV and part of *Omnibus* on CBS-TV. Agency: J. Walter Thompson, N. Y.

SPOT CAMPAIGN ● Norwegian Canning Industries, New York (Norwegian sardines), through McCann-Erickson, New York, planning radio and television spot announcement campaign in six major markets. First six-week phase will start in February, followed by hiatus and then seven more weeks, probably in early summer.

MENNEN LOCALS ● Mennen Co., Newark, to sponsor three local television shows: Segment of *Broadway TV Theatre* (7:30-9 p.m., Mon.-Fri.) on WOR-TV New York, effective Feb. 2, newscasts on WCAU-TV Philadelphia, Wed., 11-11:10 p.m. starting Feb. 4, and on WTOP-TV Washington, Tues. and Thurs., 11-11:10 p.m., beginning Feb. 10. Agency: Kenyon & Eckhardt, N. Y.

MAY CAMPAIGN ● Junket Brand Foods, Little Falls, N. Y., through McCann-Erickson, N. Y., planning spot radio campaign to start early in May.

Color 5 to 10 Years Off, Says DuMont

COLOR TV is still five to ten years in future, Dr. Allen B. DuMont, president, DuMont Labs., declared Thursday at dinner given in his honor by radio-TV and appliance division for State of Israel Bonds at New York's Savoy-Plaza Hotel. Hailing progress already made, Dr. DuMont said color tubes are major problem, boosting cost of 17-inch colorset to $600-$700, against less than $200 for same size black-and-white TV receiver. Transistors offer great hope for future developments such as portable TV sets, Dr. DuMont predicted.

Houston Council May Abandon Restriction on Broadcasts

PREDICTION that Houston City Council will rescind restrictions on broadcast pick-ups of its sessions was heard frequently at weekend. Several stations have un-used tape versions of meeting held Jan. 21, with KPRC only outlet in Texas city to carry proceedings. Council's recent ruling permits taped broadcast if entire meeting is used.

KPRC carried 3½-hour session, 10:30 p.m.-2 a.m., bringing listener complaints about bickering and trivia. This led to belief council will lift ban entirely at Wednesday meeting. KTHT, Mayor Roy Hofheinz' station, understood to have taped meeting, along with KNUZ. Latter station will tape Wednesday's meeting in hope restriction will be dropped, according to Bill Crawford, news editor. Motion at last Wednesday's meeting to drop restrictions was lost by one vote, with two-thirds majority required to rescind. Mayor Hofheinz had originally predicted KTHT would be only station willing to carry full proceedings.

WMID Obtains Injunction

TEMPORARY injunction restraining U. S. Bureau of Internal Revenue from holding tax deficiency sale of property of WMID Atlantic City, N. J., granted Thursday by federal court in Camden, according to David H. Freedman, WMID general manager. Tax sale originally ordered for Jan. 8 because of controversy over sum of about $3,000, according to Mr. Freedman. He said parties are now within $500 of agreement and predicted settlement would be reached prior to Feb. 2, when injunction expires.

WABI-TV Gets STA

WABI-TV Bangor, Me., granted special temporary authorization for commercial operation by FCC Friday, to be effective yesterday (Sunday) (early story page 60). In other actions, FCC granted WCOV-TV Montgomery, Ala., change to 79 kw visual, 43 kw aural, antenna 440 ft., and changed status of KBMT (TV) Beaumont licensee from individual to corporation.

TV IMPACT

INAUGURATION DAY experiment undertaken by WKY-TV Oklahoma City, NBC affiliate, strongly supports impact of television upon nation's schools and school children. Station ran two 10-second spot announcements, asking school principals to report, by collect wire or phone call, number of students in their school watching Inaugural proceedings. Station Manager P. A. Sugg said WKY-TV received 137 phone calls and 43 telegrams soon after first announcement.

Baseball Radio-TV

TWO-YEAR pact for radio-TV rights to Washington Senators baseball games on WWDC and probably WTTG (TV) that city signed by National Brewing Co., Baltimore, Md. (National Premium, Bohemian beer). Firm will share radio sponsorship with Phillips Radio-TV appliance chain. Agencies are Kenyon & Eckhardt for National Brewing, Cohen Miller for Phillips.

Contract covers all radio-TV-billboard advertising in Griffith Stadium and provides for regional network comprising stations in Maryland, Virginia, Pennsylvania, Delaware and West Virginia.

Witting Statement

CHRIS J. WITTING, director and general manager of DuMont Television Network, issued following statement on Mr. Hagerty's report of plans to telecast Presidential news conferences (see story page 42):

"DuMont is gratified to see the Eisenhower administration recognize that television is an essential part of the country's journalistic structure with a real job to do at the White House. Our medium can not only report the facts behind national affairs rapidly, effectively and directly, but can give Americans generally a very real sense of participation in their government and a sympathetic understanding of the tremendous efforts that sincere men are making to handle these problems effectively. I am sure that the entire industry will unite wholeheartedly to see to it that the medium develops to the full this new potential of service to the American people."

ANOTHER SMYTHE STUDY

INCREASE in amount of crime drama and violence on television highlighted third in series of annual content analyses of New York television programs released Saturday for National Assn. of Educational Broadcasters by Dallas W. Smythe, director of studies. Study based on all programs broadcast by seven New York area TV stations week of Jan. 4-10, 1953. Detailed report also released by NAEB analyzes data in comparable weeks of 1952 and 1951.

PEOPLE

CHARLES L. HOTCHKISS, vice president of Dancer-Fitzgerald-Sample, N. Y., will move to agency's San Francisco office as executive vice president, effective Feb. 15. D-F-S office in San Francisco is known as Dancer - Fitzgerald - McDougall Inc. Mr. Hotchkiss will direct West Coast advertising for Falstaff Brewing Corp., St. Louis, heavy user of radio-TV time.

NED HULLINGER, manager of station relations for ABC's western division, Hollywood, since Dec. 1950, to transfer to network's station relations department in New York, effective Feb. 2. He has served consecutively as ABC publicity writer, assistant promotion manager, and publicity and audience promotion manager, all for western division.

CHARLES J. ALLEN joins Gardner Adv., St. Louis and New York, as vice president in charge of merchandising, after resigning from Kroger Co., Cincinnati, where he has been sales service manager. Mr. Allen, who joined Kroger in 1946, has been supervisor of radio-TV at Kroger.

FRANK P. BALDWIN, Charles Dallas Reach Co., N. Y. and Newark, to St. Georges & Keyes, N. Y., as member of copy staff.

KENNETH W. MILLER, with FCC engineering staff since 1940, has been named engineering assistant to Comr. Robert T. Bartley. Mr. Miller most recently has been Assistant U. S. Supervisor for Conelrad in Office of Chief Engineer.

Daylight Savings Bill

BILL (HR1722) introduced by Rep. Frazier Reams (Ind.-Ohio) to provide daylight saving time throughout nation referred to House Interstate & Foreign Commerce Committee. He said many people oppose daylight saving merely because of lack of uniformity.

TV Applications

EDUCATIONAL TV application filed for St. Louis by cooperative group which will finance part of station with $150,000 from Ford Foundation funds. Another $75,000 will be loaned by Arthur B. Baer of St. Louis department store. Money for operating station to come from public and parochial schools in area, with additional $150,000 for first year's expenses to be raised by public drive for funds. Educational bid one of four applications filed late last week:

Tarpon Springs, Fla. — WBOY Inc. (WBOY), uhf Ch. 32, ERP 257.1 kw visual, antenna height above average terrain 390 ft. Construction cost $212,150, annual operating cost $150,000, revenue $180,000. Applicant licensee of WBOY.

St. Louis, Mo.—St. Louis Educational Television Commission, vhf Ch. 9, ERP 53.6 kw visual, antenna 640 ft. Construction $303,950, operating $200,000, no revenue. Applicant composed of 13 trustees appointed by St. Louis mayor and St. Louis county supervisor from list of nominations submitted by public and parochial school supervisors in area. Chairman is Arthur H. Compton, chancellor of Washington U., St. Louis.

Las Vegas, Nev.—*Las Vegas Sun,* vhf. Ch. 8, ERP 2.7 kw visual, antenna 230 ft. Construction $69,800, operating $102,000, revenue $160,000. Owner of *Las Vegas Sun* is Herbert Greenspun.

Minot, N. D.—North Dakota Bcstg. Co. (KCJB) (resubmitted; earlier application dismissed at request of applicant), vhf Ch. 13, ERP 28.6 kw visual, antenna 420 ft. Construction $140,000, operating $96,000, revenue $120,000. Applicant is licensee of KCJB.

THE INAUGURATION

Networks: ABC-TV, CBS-TV, DuMont, NBC-TV.
Time: Jan. 20, 11:30 a.m. to about 5 p.m. in most cases; Inaugural Ball starting about 11 p.m.
Sponsors: Willys - Overland Motors on ABC-TV; Packard Motor Car Co. on CBS-TV; area participation on DuMont; General Motors on NBC-TV.
Agencies: Ewell Thurber Assoc., Maxon and Kudner, for the respective networks excluding DuMont.

AS HOME television entertainment, the Presidential inauguration is a great quadrennial show which defies all of the professional rules of production and yet, excusing perhaps a few hard-bitten political partisans, inherently attracts and holds immense audiences.

As demonstrated last Tuesday the inauguration does not have to be a slick production—though that would help immensely. The real appeal is in the high drama of the event itself and what it stands for in American life. As a week-in, week-out TV fare, the type of production surrounding President Eisenhower's inauguration could never hope to compete with, say, *I Love Lucy*.

To begin with, the lighting was terrible. A fog cast a haze over distance shots—which in Washington, on clear days, can be eminently attractive. Let it be said, however, that the haze was a handicap, not a bar, and that the cameramen used ingenuity along with their sundry new mobile gadgets to give viewers a combination of intimate glimpses of the principals and impressive shots of crowds and buildings, both during the ride of Mr. Truman and Mr. Eisenhower from White House to Capitol and during the mammoth parade back down Pennsylvania Ave. after the ceremony.

Unlike some of the lighter ceremonies surrounding the main event, the swearing-in rite was educational, dramatic television at its best,

THE OATH ON TV

Dignified emotion

imparting to the millions of viewers all the emotion, tenseness and dignity of the occasion. The TV audience saw Mr. Eisenhower taut, stirred, and finally relieved as he completed the oath and strode across the platform to give a quick kiss to Mrs. Eisenhower and then turn smiling to accept the congratulations of ex-President Truman and the other dignitaries. Shots of Mr. Truman during the new President's inaugural address were similarly impressive, showing a man obviously both tired and relieved.

It was in the pre-inauguration scenes at the Capitol, perhaps, that the telecast lagged most noticeably. Long lines of notables filed past the cameras, seemingly endlessly, and although it was an unavoidable situation and the cameramen broke it up with frequent outside shots, the duration of it had a wearying effect.

In this connection a quick pickup showing guards awaiting the arrival of Mr. Eisenhower prompted at least one viewer to observe, in contrast to the informality which marked most of the inauguration events, guards certainly will not be caught tying shoelaces and mopping heads when Queen Elizabeth II is crowned next June.

Coverage of the parade was excellent, thanks to good subject matter as well as good camera work. But it was long, and when the networks finally gave up at 5 p.m., the Eisenhowers were not the only tired ones among the parade watchers.

The program of the Inaugural Balls Tuesday night also showed a lack of organization and execution which would not be tolerated on a standard professional telecast. But TV did pick up at least one shot there that was superb—a shot from below showing the face of the new President listening with rapt concentration as Gladys Swarthout sang "Bless This House."

* * *

TALENT PATROL

The U. S. Army Talent Patrol, ABC-TV, Jan. 19.
Production: The U. S. First Army Band.
Technical Director: W. A. Lawrence.
Director: Eddie Nugent.
Continuity: Bill Larkin.
Master of Ceremonies: Steve Allen.
Talent: The Drifters (trio), Romeo Phillips (singer), Bob Elgus (magician), Billy Roberts (tap-dancer).

THE U. S. Army has invaded a segment of ABC-TV's Monday evening program schedule on behalf of recruiting with results likely to stir neither enlistments nor sustained viewer interest.

The new program, *U.S. Army Talent Patrol*, is designed to entice volunteers into the various technical services—electronics, communications, engineering—of the Army and Air Forces by presenting outstanding talent from service bases throughout the nation.

The series also is designed as a new showcase for the talents of Steve Allen, late of CBS-TV where he spelled Arthur Godfrey and other lesser lights of that network. He must have tired of sharing replacement honors with Robert Q. Lewis.

Mr. Allen doubtless has his admirers, including some viewers who may have been loitering around Army ordnance in quest of a suitable broadside to fire at the networks for deferring his reappearance on television. Man 'round our house, though, was otherwise occupied.

On the initial show, Mr. Allen presided—and that is a well-chosen word—over talent recruited from Camp Carson, Colorado Springs, Col. The entertainers—a hillbilly trio, singer, magician and singer—were neither bad by military standards nor particularly good by any of previous talent programs that have cropped up on television in recent years.

As an m. c. Mr. Allen seems ill at ease with service personnel, a situation not noticeably improved by his recourse to flat gags well seasoned with corn. His most noisome trait: applauding talent when he should be impartial.

There are two commercial cut-ins, the first showing two servicemen working over their equipment. The first GI exalts the technical training of the Army; the second asks: "Where else can you get a full week's vacation with pay?" The answer was not civilian life.

In opening the program, Mr. Allen notes that the "Army likes to encourage servicemen

to follow their chosen professions" once they get into service. (The Army never turns cooks into clerks, and reporters into mechanics—that sort of thing, you know.)

As noted before, the talent was not bad, and the tap dancer (Billy Roberts) richly deserved the top honor registered by a studio audience applause meter. Mr. Roberts came away with a special 48-hour pass, tickets to a Broadway play and luncheon at Sardi's, among other rewards.

Perhaps it is not that *U. S. Army Talent Patrol* is so bad as it is mediocre or innocuous —a show likely to drive many viewers AWOL in succeeding weeks—and not by the numbers either.

No, Junior, this Army-produced show won't necessarily improve under the new administration and Secretary of Army.

* * *

I LOVE LUCY

CBS-TV, Mon. 9-9:30 p.m. (Jan. 19).
Sponsor: Philip Morris & Co.
Agency: Biow Co., N. Y.
Packaged by Desilu Productions, Hollywood.
Producer: Jess Oppenheimer.
Director: Marc Daniels.
Writers: Jess Oppenheimer, Madelyn Pugh, Bob Carroll.
Cast: Lucille Ball, Desi Arnaz, Vivian Vance, William Frawley.

WITH complete benefit of clergy, including representatives of the Protestant, Catholic and Jewish faiths who approved his introduction into this leading TV series, Ricky Ricardo Jr. has arrived.

Similar blessed events have occurred among idols of the public without arousing half the interest that the approach and arrival of this one did. It is conclusive testimony to the popularity of Lucille Ball and Desi Arnaz or Lucy and Ricky Ricardo—the names and characters apparently are interchangeable—that 44 million people joined Mr. Arnaz-Ricardo in the fathers' waiting room.

I Love Lucy is now established as the standard marital farce on TV. Its ingredients are as old as story-telling, its situations as old as the theatre. Why *Lucy* should become a Monday evening must for a vast proportion of the television audience remains one of those elusive conundrums of show business.

True, the scripts of *I Love Lucy* have a high gloss that other programs of its kind have lacked, but writing alone cannot be the answer. The secret of *Lucy's* success is Lucy.

Miss Ball has probably the most plastic face of any pretty comedienne. What is more important, she knows how to keep it under absolute control. She may mug outrageously, but she is equally capable of subtle expression. It is Miss Ball who raises *Lucy* above the level of ordinary, slickly-written farce.

She is fortunate in having for a husband and co-star a perfect foil. Mr. Arnaz plays well opposite her. Alone, however, or with another female lead, he would be less effective.

If proof of this theory were needed, it came last Monday night when much of the show was performed without her. Until Lucy left for the hospital, the Jan. 19 production was up to the quality of any other in the series. It descended to routine levels, however, the moment she was out of sight.

Mr. Arnaz and his writers exerted every effort, perhaps too much effort, to keep the comedy going while he was waiting the delivery of his child, but at best *I Love Lucy* was mediocre in those sequences.

Presumably Miss Ball will reappear tonight. Mr. Arnaz and *I Love Lucy* need her.

our respects

to THEODORE F. KOOP

COMMERCIAL radio is in its 33d year, TV in its 12th, but for the first time in the history of the National Press Club these media are represented in the presidency. Holder of the unique honor is Theodore F. Koop, who directs CBS news and public affairs in Washington.

Mr. Koop ran unopposed for the office following vice presidential service. He will be formally inaugurated this Saturday.

Ted Koop—the "Theodore" is only a technicality around Washington—has a substantial quota of leadership material. He meets people easily and readily. He brightens conversation with a running fire of quips. He works hard and expects the same from his staff. Most of all he is cordial—unless you stomp on his toes, in which case retreat is the safest strategy.

Many stories are told in news circles about his resemblance to Sen. Robert A. Taft, and vice versa, including a remarkable hirsute similarity. The CBS newsman—still a bachelor, by the way—generally out-smiles his Senatorial twin, however, and his voice has no trace of the rasping resonance that marks the Taft broadcasts.

Theodore Frederick Koop was born at Monticello, Iowa, March 9, 1907 and spent his pre-college days in that quiet region. This region, incidentally, spawned two executives who rose to CBS vice presidencies—Earl H. Gammons, now CBS Washington vice president, and Harry C. Butcher, ex-CBS vice president, wartime aide to Gen. Eisenhower and now operating KIST Santa Barbara, Calif.

After Monticello High School sessions were over in the afternoon, young Koop used to pound out personal items for the hometown weekly, *Monticello Express.*

String correspondence for several Iowa dailies substantially bolstered the slender but welcome income from *Express* contributions. After graduation from high school he went to the U. of Iowa where he became editor of the *Daily Iowan.* He received his BA degree in 1929, accompanied by Phi Beta Kappa honors.

Ted Koop always wanted to be a newspaperman and his scholastic career only whetted this appetite. From the campus he went to the AP's Des Moines bureau. Two years later he was sent to New Haven by AP and after a year in that city he got his first big chance—assignment to AP's Washington bureau. Six months of reporting the exciting events of the Roosevelt Administration's early actions led to AP's New York bureau where he became a city editor.

Back in Washington again, he became one of three news editors in the AP bureau and wrote many major stories, including the third inauguration of President Roosevelt. During the 1940 campaign he directed AP coverage of Wendell Willkie's Presidential race.

In 1941 he left AP after a dozen years of service, joining the editorial staff of National Geographic Society. When the Pearl Harbor debacle brought this country into World War II, one of the first agencies created was the Office of Censorship, with Byron Price as director. Mr. Koop had worked under the censorship head at AP and was drafted as his special assistant.

Some of the censorship story has never been written, and never will be, for that matter. Nor will Mr. Koop's official operations be recorded for public consumption. Those who worked with him, however, recall he conducted many delicate liaison assignments involving other government agencies and foreign powers, including many top-secret episodes.

By March 1945 he was serving as Assistant Director of Censorship in charge of voluntary press censorship. Shortly after V-J day he was appointed Deputy Director to liquidate OC in the absence of Mr. Price, who was in Germany on a Presidential mission.

Book Recounts Experiences

The story of voluntary censorship and the successful cooperation of electronic and printed media proved that democracy could be efficient —more efficient than the crunching tyranny of dictator-imposed secrecy. The techniques used in this voluntary censorship are recorded for history in Mr. Koop's post-war book, *Weapon of Silence,* published by U. of Chicago Press.

Leaving Censorship in January 1946, he rejoined National Geographic as chief of its news bulletin service. The following year his alma mater, U. of Iowa, selected him as one of 99 alumni to receive a certificate of achievement at the university's centennial celebration.

In 1948 he entered radio via the CBS Washington bureau. As head of that unit he supervises a news and public affairs staff of nearly 20, besides directing preparations for all forums and Washington-originated speeches by the President and other government officials. He contributed the chapter on radio news in the National Press Club's book, *Dateline Washington.* He is a past president of the Washington professional chapter of Sigma Delta Chi, journalism fraternity in which he is a prominent figure. He serves on the board of Radio-Television News Directors Assn.

LIGHTNING STRUCK

SHREVEPORT

At 5:10 P.M. on December 3, 1952, a bolt of lightning struck the KTBS transmitter putting the station off the air. At 5:12 P.M. the KTBS telephone system was jammed with calls from listeners who were missing their favorite programs.

Results ... **over 2000 calls IN 7 HOURS!!**

In that period from 5:12 P.M. to midnight over 2,000 calls were completed (no one can determine how many didn't get through the jammed switchboard). Here is PROOF POSITIVE Shreveport's listening habits are tuned to 710 . . . KTBS.

BETTER PROOF than any survey that listeners WANT and listen to KTBS programs.

Restyling

EDITOR:
CONGRATULATIONS ON THE RESTYLED BROADCASTING • TELECASTING. FROM COVER TO COVER IT IS EASIER READING AND A REAL PUBLIC SERVICE TO THE INDUSTRY YOU ALWAYS HAVE SERVED SO WELL. I AM SURE YOUR READERS WILL BE QUICK TO APPLAUD THE NEW EDITORIAL FORMAT WHICH ELIMINATES THE JUMPING OR THE CONTINUATION OF ARTICLES TO THE REAR OF THE BOOK. TO YOUR ALWAYS IMPORTANT NEWS COLUMNS YOU HAVE BROUGHT NEW READABILITY. AS A LONG-TIME BROADCASTING • TELECASTING READER I WELCOME THESE CHANGES AND SALUTE YOU AND YOUR STAFF ON THESE LATEST EDITORIAL ACHIEVEMENTS.

ROBERT E. KINTNER
PRESIDENT
ABC
NEW YORK

* * *

EDITOR:
CONGRATULATIONS. IT'S A GREAT IMPROVEMENT. IF A NEW ADMINISTRATION CAN DO AS WELL THIS WEEK WITH ITS REVISED FORMAT WE WILL BE ALL SET. . . .

FRANK STANTON
PRESIDENT
CBS
NEW YORK

* * *

EDITOR:
CONGRATULATIONS ON NEW FORMAT. IT MAKES ALL YOUR MATERIAL MUCH EASIER TO FIND. THIS IMPROVEMENT IS ANOTHER INDICATION OF THE ALERTNESS THAT HAS ALWAYS CHARACTERIZED YOUR SERVICE TO THE TELEVISION AND RADIO INDUSTRIES.

CHRIS J. WITTING
DIRECTOR
DUMONT TELEVISION NETWORK
NEW YORK

* * *

EDITOR:
As a long-term reader of BROADCASTING • TELECASTING, I take real pleasure in the new package in which you now deliver your goods.

Personally, I find it more readable than ever —and, therefore, more useful.

William H. Fineshriber Jr.
Executive Vice President
MBS, New York

* * *

EDITOR:
My heartiest congratulations on the new format of BROADCASTING • TELECASTING.

The innovations are certain to lend even greater importance to the magazine's present eminence in its field. I particularly like your ideas of departmentalizing the news and of running each story to its conclusion without any carry-overs. The new feature section will fill the great need for stories of this type in all trade publications.

You and your entire staff deserve praise for accomplishing the change-over without breaking your weekly stride.

Frank White
President
NBC
New York

* * *

EDITOR:
I like the new dress on BROADCASTING • TELECASTING, and with apologies to the heading of our WITH ad on the cover, I predict they'll go for it "like babies go for rattles!"

There's just one hangover from the old days that I never did like—and that's the way you handle the captions under your photographs, in Futura Demi Bold, or maybe it's Tempo. I think it makes a very monotonous paragraph, and very hard on the eyes.

More power to you!

Joseph Katz
The Joseph Katz Co. Adv.
Baltimore

* * *

EDITOR:
The new and simplified format of BROADCASTING • TELECASTING magazine makes a great deal of sense to any busy executive. I particularly like the method of departmentalizing the material because this saves time and makes the reading matter so much easier to digest.

Everard Meade
Vice President in Charge of Radio and Television
Young & Rubicam
New York

* * *

EDITOR:
THE FIRST ISSUE UNDER YOUR NEW FORMAT REACHED ME HERE IN NEW YORK. IT'S MORE THAN EXCITING. IT'S THE LEADERSHIP ALL OF US IN THE BROADCASTING INDUSTRY HAVE COME TO EXPECT FROM YOU.

JERRY STOLZOFF
FOOTE, CONE & BELDING
CHICAGO

* * *

EDITOR:
You were looking like high button shoes. . . . With the new format you look like 1953. Congratulations.

Jim Luce
Timebuyer
J. Walter Thompson Co.
New York

* * *

EDITOR:
Congratulations on a superb job of restyling and an equally good job of explaining it!

Paul Miller
Executive Vice President
Gannett Newspapers
Rochester, N. Y.

* * *

EDITOR:
Congratulations on the rebirth of BROADCASTING • TELECASTING.

Your new make-up is clean and legible. It is a splendid setting for the enormous amount of news and the thoroughness of your news coverage.

T. F. Flanagan
Managing Director
Station Representatives Assn.
New York

* * *

EDITOR:
I know you and your colleagues are receiving many orchids these days for that fine streamlining job you've done on BROADCASTING • TELECASTING magazine.

In the spirit of your own classic punning, one might say that you have rung a decibel.

Harold E. Fellows
President
NARTB
Washington

EDITOR:
HAVE JUST READ JAN. 19 ISSUE FROM COVER TO COVER. THAT AMOUNT OF NEWS READING IS MADE PLEASANT BY YOUR FINE NEW FORMAT. CONGRATULATIONS.

KEN CARTER
GENERAL MANAGER
WAAM(TV) BALTIMORE

EDITOR:
CONGRATULATIONS ON YOUR NEW FORMAT. I LIKE IT VERY MUCH. PLEASE ACCEPT OUR VERY BEST WISHES FOR THE CONTINUED SUCCESS OF YOUR GREAT MAGAZINE.

CARL HAVERLIN
PRESIDENT
BROADCAST MUSIC INC.
NEW YORK

* * *

EDITOR:

As a charter-member-subscriber of BROADCASTING, now BROADCASTING • TELECASTING, I hasten to add my congratulations to you and your capable staff to what I know will be many missives of compliments on your new format.

It is well organized, very easy on the eyes and I like the idea of your editorials on the back page. . . .

G. W. (Johnny) Johnstone
Director, Radio and TV
Public Relations Div.
National Assn. of Manufacturers
New York

* * *

EDITOR:

Congratulations to you and your staff on the new BROADCASTING • TELECASTING. It sure is "better and easier to read." It is a very fine piece of work and a credit to the electronics art, profession and industry.

George W. Bailey
Executive Secretary
Institute of Radio Engineers
New York

* * *

EDITOR:

Enthusiastic compliments on the new format. Readable, logical, attractive, professional. You are more than the bible for an industry; a fascinating record of the progress of science and ingenuity in our enterprise system.

Tell your reporter who writes me up as arbitrator in the Snader Telescription dispute that I am not a "former judge." He has me confused with Sam Rosenman, a much more learned person.

Samuel R. Rosenbaum
Philadelphia

* * *

EDITOR:

Looks great! BROADCASTING • TELECASTING's restyled format certainly is very attractive.

My feeling is that it will stimulate a more thorough reading of the entire book. The elimination of jumps and carry-overs makes it easier to read complete stories.

The "new look" will make for a *longer look.*

William B. Ryan
President
BAB
New York

* * *

EDITOR:

The *new* BROADCASTING • TELECASTING is a great job. The improvement typographically puts the magazine in a class by itself; it's always been tops readerwise.

I particularly enjoyed Ed James' piece on the new type pitchmen.

Edward Cooper
Motion Picture Assn. of America Inc.
Washington

* * *

EDITOR:

Congratulations upon the new format of BROADCASTING • TELECASTING.

This improvement makes your magazine easier to read and gives us more valuable information than your previous efforts did.

Eugene S. Thomas
Vice President
George P. Hollingbery Co.
New York

* * *

EDITOR:

The new format is splendid. Magazine is well laid-out and quite readable. We are enthusiastic about it and believe the change is all to the good.

Clair R. McCollough
President
WGAL-AM-FM-TV
Lancaster, Pa.

* * *

EDITOR:

Congratulations to you and your staff on your new and restyled issue. I have just read the current issue and I agree 100% that it is easier to read and, as usual, chuck full of good news items, material and interesting features.

Again, our hats are off to you and your gang.

Frank M. Headley
President
H-R Representatives Inc.
New York

* * *

EDITOR:

BROADCASTING • TELECASTING apparently is not against change. The "new look" is attractive.

Rosel H. Hyde
Vice Chairman
FCC
Washington

* * *

EDITOR:
NEW FORMAT TERRIFIC. NOW I HAVE TO LEARN TO READ. REGARDS.

ALEX SHERWOOD
GENERAL MANAGER
WCSS AMSTERDAM, N. Y.

* * *

EDITOR:

No doubt time will heal this wound . . . *BUT* . . . how could you do this to us? Who was complaining? Now B•T looks like all the other publications. Just be your old sweet self.

Mel Kampe
Promotion Manager
WMAY Springfield, Ill.

* * *

[EDITOR'S NOTE: The volume of telegrams and letters complimenting B•T's new style has been so great that it is impossible to publish more than a few or to acknowledge any individually. B•T's well-wishers are assured that their messages have cheered and gratified the editors and staff.]

Billings and Cooings

EDITOR:

I just read the article on radio and television billings [B•T, Jan. 5] . . . You did a wonderful job in presenting the whole radio and television picture.

Bernard C. Duffy
President
BBDO
New York

* * *

EDITOR:

Just a note to tell you how excellently I think Florence Small handled the review of the broadcasting business and the listing of agencies in your recent issue.

PHILCO IS THE WORLD'S LEADING MANUFACTURER OF MICROWAVE EQUIPMENT

Philco leads the world in mass production of quality microwave equipment to meet modern industry's demands for relay systems of the highest reliability and performance.

Philco microwave components meet most JAN (Joint Army-Navy) specifications without any changes in circuitry, thereby permitting other users of microwave communications equipment to have the built-in reliability required by the Armed Forces. That is why commercial users of Philco microwave equipment include such famous names as American Telephone & Telegraph Co., Santa Fe Railway System, Bonneville Power Administration, Platte Pipeline Company and many others.

Where quality and reliability are important, look to Philco . . . world's leading manufacturer of microwave equipment!

TUCKER SCOTT

on all accounts

THE CHIEF purchasing agency of radio and television time, BROADCASTING • TELECASTING discovered in its recent check [B•T, Jan. 5], is BBDO, and the chief time purchaser for BBDO is young (32), brilliant Tucker Scott, a southern gentleman who has thrived in his northern exposure.

The first man at the foremost agency to be assigned exclusively to the buying of television time, Mr. Scott, in 1949—his first year at the agency—was purchasing time for 57 accounts, and with a distinction that earned him in one year the position of co-ordinator of radio-TV media. Several months ago he was raised to the post of chief timebuyer, supervising purchases for the largest list of accounts in the country.

Born in Eastville, Va., March 20, 1920, Mr. Scott was educated at Randolph-Macon in his home state, where he received in 1941 his B.S. in physics and chemistry.

"But frankly," he confides, "even then I found this chemistry business a lot less interesting than the chemistry of business."

His first job after leaving school was with Westinghouse in Philadelphia, from which he resigned to enlist in the Navy in 1942. The Navy sent him back to school—Harvard—to study communications. Subsequently he served as communications officer in 26 islands in the Pacific. He was discharged honorably from the Navy in 1946 with the rank of lieutenant senior grade.

He came to New York after the war and joined the media-research department as a timebuyer of Compton Adv. From there, after three years, he made his big move to BBDO.

Among the 87 radio and TV accounts he oversees there currently are: American Safety Razor, DeSoto, duPont, Electrolux, Ethyl Corp., Hamilton Watch, General Electric and Lever Brothers (Breeze and Swan).

The Scotts—she is the former Melissa Mason of Methuen, Mass.—have been married since Nov. 6, 1943. They have three children: Tucker Jr., 8; Sandra, 5, and Martha, 1½. The family is currently renting a house in Norwalk, Conn., while their new home in Darien is being built.

His three-ply duties—all of which he takes seriously—as father, husband and businessman—leave Mr. Scott less time than he would like to indulge in his hobbies, which include deep-sea fishing, hunting, swimming, golf and landscaping. He expects, with the completion of his new house, to get in a goodly share of the latter.

'52 RADIO TIME SALES REACH $464 MILLION

Annual B•T estimates show that radio's net revenue from time sales was bigger in 1952 than ever before, $7,896,000 bigger than 1951. Local sales were up 7.1%; spot sales were up 4.1%; network was down 13.1%. Station population, however, is still growing faster than total revenue, an almost unavoidable situation prompted by the mass of FCC postwar authorizations.

U. S. RADIO stations and networks sold $464,439,000 worth of time in 1952, an increase of $7,896,000 over the volume of 1951.

These were net time sales, after all frequency and promotional discounts and after deduction of commissions to agencies, national sales representatives and others.

Following the pattern that has obtained since 1948, growing revenue from spot and local advertising more than overcame the decrease in revenue from national network business.

Spot time sales in 1952 were $124,414,000, a 4.1% increase over 1951. Local soared to $229,847,000, a 7.1% jump over 1951. Regional network business was also brisk—$11,107,000 in 1952, a 30.9% increase over 1951. Only network volume was down—$99,071,000, a 13.1% decrease from 1951 level.

It was the first time that network time sales had fallen below the $100 million mark since 1943.

[Total time sales for U. S. television stations and networks were $288,826,000 in 1952. In television, network business continued to outstrip spot and local. By categories, TV net time sales were $135,614,000 for network, $82,711,000 for spot and $70,501,000 for local. A complete report on TV time sales will appear in the TELECASTING YEARBOOK, published at the end of February.]

Spot, Local Rise; Network Declines

The 1952 estimates of radio business volume will appear in the 1953 BROADCASTING YEARBOOK, which is scheduled to go in the mails Jan. 28. The estimates are based on a formula that has been used successfully for 15 years.

The 1952 radio figures show how great a change has taken place in the comparative volume of business coming from national network, spot and local sources in the past decade.

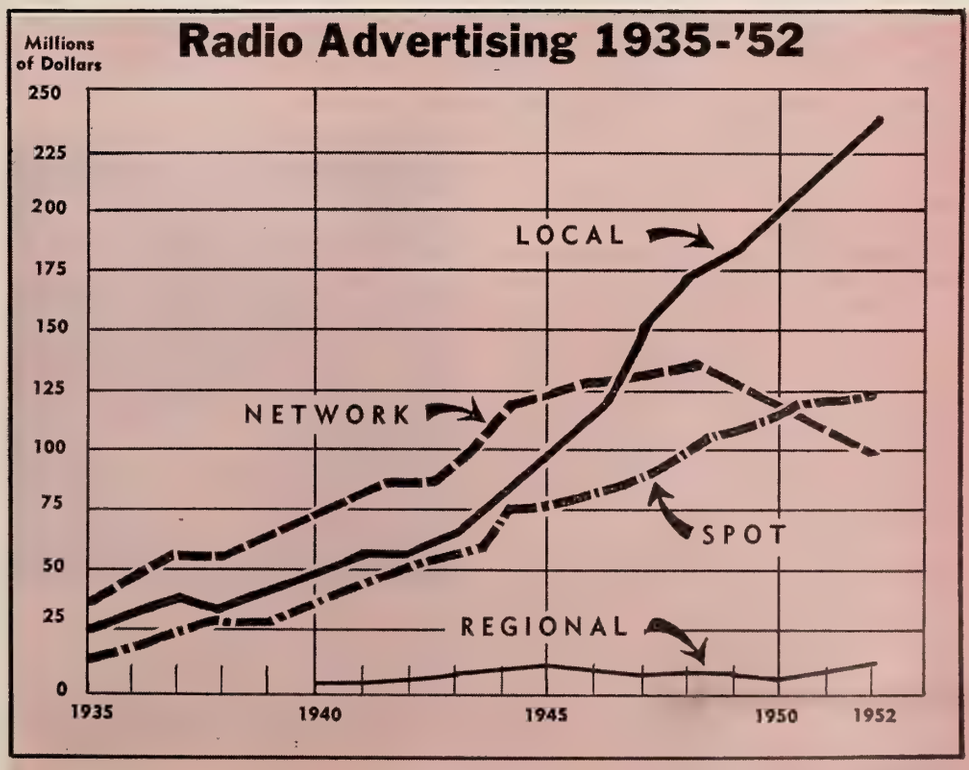
* * *

RADIO NET TIME SALES 1951-1952

Class	1951 (000)	% Total	1952 (Est.) (000)	% Total
Natl. Network	$113,984	24.9	$ 99,071	21.3
Regional & Misc. Network	8,481	1.8	11,107	2.4
Natl. & Regional Non-Network	119,559	26.3	124,414	26.7
Local	214,519	47.0	229,847	49.6
TOTAL	$456,543	100.0	$464,439	100.0

Percentage in 1943

In 1943, when network volume was at about the same level as 1952 ($99,389,177), it accounted for 43.6% of total time sales. Last year only 21.3% of total volume came from networks. Spot business in 1943 ($59,352,170) was 26% of total sales. In 1952 spot provided 26.7% of all business. Local advertising in 1943 ($64,104,309) was 28.1% of total time sales. Last year almost half of all time sales were made to local advertisers.



Regional network advertising, always in much smaller volume than other categories, did not fluctuate significantly in the past decade until 1952, when the $11,107,000 volume of regional business was far bigger than that for any year before. Included in this category is revenue from special networks arranged for such events as sports broadcasts, as well as monies that were realized from permanent regional organizations.

Fast Postwar Increase

Time sales since World War II have increased more than $130 million in annual volume, from $334 million in 1946 to $464 million in 1952. But the size of the radio broadcasting industry has expanded even more rapidly, it should be noted.

In the same period the number of AM stations in operation has more than doubled, from 1,062 on the air at the end of 1946 to 2,391 at the end of 1952. With the station population rising faster than the total business volume, the postwar years have seen a decline in "average" per-station revenue.

At the end of 1946, with 1,062 AM stations operating, and with total time sales of $334 million, the "average" station sales were $314,575. (This, of course, ignores the fact that both national and regional networks take sizable

chunks of the total volume of time sales too. These computations are used only to indicate how, though the pot has grown, the crowd dipping into it has grown too, with individual portions getting smaller.)

The next year, 1947, total volume was $374 million, but at the end of that year 1,522 stations were on the air—meaning the "average" volume per station had decreased to $245,786.

In 1948, total volume was up to $416.7 million, but by the end of that year, 1,865 stations were in operation, and the "average" was cut to $223,442.

In 1949, total volume rose to $425 million, but at year's end there were 2,048 stations, bringing the "average" down to $207,693.

The curve continued to fall in 1950 when total volume was $453.5 million and 2,199 stations were on the air, for an "average" of $206,-714.

In 1951 the "average" fell below $200,000; it was $195,857 for the 2,331 stations in a year that produced $456.5 million total times sales.

Last year, the "average" was $194,244, with 2,391 stations cutting up the $464 million total.

Summed up, since World War II, total radio time receipts have increased by about 39%, but the number of stations has risen some 125%. The "average" time sales per station has decreased by almost 38%.

FM revenues are not treated independently in these estimates since the total FM volume of time sales is not large enough to be accurately estimated by the sample method.

Gross time billings (value of time sold, figured at the one-time rate with no deductions) as estimated by the BROADCASTING Yearbook were $702,448,970 in 1952, compared with $685,968 in 1951.

Of the total gross billings, $158,746,670 was for network time, $16,528,300 for regional and miscellaneous network, $185,139,800 for spot and $342,034,200 for local.

Food Company Lead

The biggest spenders on radio networks in 1952 were companies dealing in food and food products, traditionally the type of business that leads all others in buying network time. This class of advertiser made up more than a fifth of all radio network gross billings. Its $42,485,936 gross billings were 22.9% of the total.

The other four groups in the top five categories of network buyers were toiletries with $25,787,368, or 14.3% of the total: drugs and remedies, with $22,131,627, or 13%; soaps, cleaners & polishes, $17,948,730, or 11.5%, and smoking materials, $20,610,365, or 10.1%.

All these were in the top five network buyers in 1951, except that in that year smoking materials led soaps.

The 19th YEARBOOK to be issued by Broadcasting Publications Inc., the 1953 volume, will include all the sections that have made the YEARBOOK a basic reference work in radio and will contain added new features.

Many of the directories have been expanded. These include complete information on advertising agencies dealing in radio, advertisers who buy radio time, radio representatives, transcription and programming firms, network executives and personnel, as well as all other services relating to broadcasting.

The station directory, which includes every AM and FM station on the air, has been enlarged to include additional personnel listings.

The TELECASTING YEARBOOK, counterpart of the BROADCASTING YEARBOOK, is being published again this year and will go into the mails in February. The success of the first TELECASTING YEARBOOK in 1952 has established it as the source work of the television field.

MIDGET SPOTS RATES ASKED FOR RINSO IN NEW APPROACH

Television uses the 10-second spot at station breaks. Also, radio in some Latin American countries utilizes the terse, flash commercial. Now in a Rinso spot radio drive Hewitt, Ogilvy, Benson & Mather is asking stations for rates for such a segment, so small it is not currently carried on radio cards.

THE issue of radio rate bargaining arose again in a new and oblique form last week. It came in the form of renewed efforts of an advertising agency to prepare for its client a spot schedule at special rates using four to eight-second announcements—a time-unit unlisted on station rate cards, which heretofore have catalogued nothing less than 20-second segments.

The agency is Hewitt, Ogilvy, Benson & Mather, New York, and the product at issue is Lever Brothers' Rinso. Actually the contemplated campaign is an elaboration, on a national scale, of a previous schedule the agency set last July in New York State only for Good Luck Margarine, another Lever item.

At that time the agency used 31 stations for an eight-day period in the Empire State at what was reported to be a "considerable discount" for the four and eight-second announcements. Some professed to see an element of mitigation in the fact that the discounts were given during a traditionally slow season.

Currently, for Rinso, the agency has sent out letters across the country asking for rates and availabilities on the four and eight-second spots.

If the stations agree to the special terms, and if the advertiser concurs in the arrangements, the agency plans to launch its campaign on Feb. 2 in more than 100 markets on a 52-week basis.

The schedule would call for a five-week initial campaign followed by a short hiatus. This would be succeeded the rest of the year by a continuous saturation of four and eight-second spots. At least 100 spots would be used each week in each market.

In a sense the unprecedented sale of midget segments of time in radio would be following the pattern set by television stations, whereby call-letter identification is followed by a ten-second spot.

Lever's Rinso, which had been serviced by Ruthrauff & Ryan, New York, for a number of years, recently went to Hewitt, Ogilvy, Benson & Mather on the basis, it was said in some quarters, of the successful job the agency did on the client's margarine account. This marks the first Rinso activity under the new agency banner.

WILLIAM MENNEN Jr. (l), vice president of Mennen Co., goes on the air in one of a series of "good neighbor" broadcasts launched over WMTR Morristown, N. J., before Mennen Co. moves to its new home in that area. Leonard V. Colson (r) is firm advertising manager.

Philip Morris Sets Spots For King-Size on AM & TV

PHILIP MORRIS & Co., New York, last week reported it is launching national distribution of a new king-size Philip Morris cigarette, with advertising to include a radio and TV spot campaign, after public announcement of the new product on PM's *I Love Lucy* show on CBS-TV tonight (Monday).

This, it was said, marks the first time a cigarette company has been able to achieve national distribution in volume on a new product at one stroke.

The announcement on the *Lucy* show, plus the *My Little Margie* show on NBC-TV, will be followed by a supplementary television and radio spot announcement in markets where the network shows do not give adequate coverage. Biow Co., New York, will handle advertising of both the regular and king-size Philip Morris.

Alfred E. Lyon, board chairman of Philip Morris, said "several million dollars" would be spent in advertising.

Radio—TV Billings Topped by D-F-S in 1952

DANCER-Fitzgerald-Sample, New York, announced last week its gross radio and television time billings for 1952 totaled $25,917,011 (for time only) as compared to $21,334,172 in 1951.

The announcements also stated that according to figures that leading networks have furnished the agency, the combined radio-television time billings of other agencies ranked as follows:

Young & Rubicam	$17,204,389
Benton & Bowles	17,073,135
BBDO	16,542,112
William Esty & Co.	16,262,673
J. Walter Thompson Co.	12,636,196
Leo Burnett Co.	9,722,691
Biow Co.	9,508,410
Foote, Cone & Belding	8,645,611
Compton Adv.	7,262,490
Cunningham & Walsh	6,940,156
Geoffrey Wade Adv.	6,729,178
Needham, Louis & Brorby	5,938,072
Kudner Agency	5,815,439
Lennen & Newell	5,757,837

[These estimates are for time alone, Estimates of top agency time and talent billings were made by BROADCASTING • TELECASTING Jan. 5.]

TV Appeal Behind New Diamond Match Co. Package

NEW Diamond Match Co. packaging design is calculated to appear to video viewers by showing "family resemblance" among company's products and by variations in color.

EFFECTIVENESS on television is a primary factor considered in the Diamond Match Co.'s new packaging design for its line of houseware products, according to James D. Evans, company advertising manager.

The new packaging design, which is expected to be nationally distributed at the family level by Feb. 15, provides a Diamond "family resemblance" for its paper and woodware household products. The traditional Diamond red, white and blue colors require no changes for effective video appearance, Mr. Evans said.

The newly designed packages already have appeared in commercials on Pacific Coast video stations and the color variations are appealing both to women and to men, Mr. Evans said. The new designs were made to appeal to men also after a survey showing 68% of husbands shop for household items at least once a week.

Lettering on the packages has been increased in size to permit easy reading of the product name on store shelves, and a lighter red is used on larger packages such as napkins and towels most likely to be purchased by women, while darker, more vivid red is used on smaller packages of such items as matches and products men are more likely to buy.

Thus, according to Diamond, the packages are designed to appeal to impulse buying of Diamond products in self-service stores. Surveys have shown 38% of supermarket and 27% of drugstore purchases are unplanned, Mr. Evans said. The prominence of the Diamond brand name and the familiar diamond design is calculated to catch the eye of those familiar with Diamond products, he said.

Bank Ad Budgets Are Up, ABA Reveals in Survey

ADVERTISING expenditures by banks will reach a record high during 1953, according to results of an annual survey of commercial bank advertising plans conducted by the advertising department of the American Bankers Assn., New York.

Survey forecast that banks will spend an estimated $61 million on advertising their services during 1953. This represents a $13 million increase over advertising expenditures last year. Survey also revealed that radio-TV are among the media which banks will use in their advertising during the year.

Slesar, Hirx New Orr VPs

HENRY SLESAR, copy chief, and Lou Hirx, production head, were appointed vice presidents of Robert W. Orr & Assoc. last week.

Ethel Norman, with the agency since 1949, has been named assistant account executive.

Kremer, Harvey Setting Up West Coast Agency Service

A NEW type of "special service" firm to aid advertising agencies is being established by Ray H. Kremer, director of radio and television for Lambert & Feasley, New York, and William W. Harvey of Los Angeles.

It will be known as the Kremer & Harvey-West Coast Adv. Agency Service, on the West Coast.

In a sense the new company will be following the precedent established by Wyatt & Scheubel, New York, television and radio representatives of agencies located outside New York. The firm, Kremer & Harvey, however, will represent agencies and their clients who lack branch offices in the film capital on the West Coast. The headquarters will have complete office facilities at the disposal of such agencies at 2404 W. Seventh St., Los Angeles.

Mr. Kremer, who has been radio and television director for Lambert & Feasley for the past seven years and is a veteran of 22 years in the industry, will resign his agency post effective Feb. 15.

W&G's PSYCHOLOGY IN SELLING

Weiss & Geller, Chicago advertising agency, is using psychological studies to determine how effective certain types of programming are when related to the sponsor's message.

BECAUSE the successful advertising man is usually an excellent practical psychologist, Weiss & Geller Agency, Chicago, has adopted a policy of having its executive personnel work closely with leaders in the social science fields.

These areas, embracing psychiatry, psychoanalysis, psychology, sociology and anthropology, enable a deeper study of consumer motivations. Researchers thereby can more readily tailor advertising and copy themes to the real reasons for which consumers buy products, it is claimed.

"Applying the Third Dimension to Television," or the application of these motivation studies to advertising was outlined by Edward H. Weiss, president of the agency, to members of the Chicago Television Council at luncheon Wednesday in the Sheraton Hotel.

Mr. Weiss, concentrating on the fact that "crime doesn't pay—for some sponsors," spoke of the recent hubbub created in Chicago and Cleveland with exposure of the amount of crime and violence being telecast daily.

Mystery Case Analyzed

"Alarmed" at the results reported in Chicago by *The Daily News*, Mr. Weiss elaborated on his agency's findings that a mystery show was not successful programming for a client, Wine Corp. of America (Mogen David wine).

Psychological studies showed his agency personnel, he said, that a person's receptivity and reaction to a message is at a minimum when panic prevails, and many mystery shows induce a state of mild panic or hysteria. The same type of analysis was made for the commercials, which were revamped to fit in with the nostalgic, childhood - at - home feeling which analysts said wine brought to mind among most persons.

A new format, a quiz show, coupled with the home-sweet-home theme in the commercials, has resulted in an ever-widening sales curve for Mogen David, Mr. Weiss said.

Although he noted that some mystery shows attain high ratings, audience acceptance and sales, Mr. Weiss quoted findings of the Schwerin Research Corp., New York, which reported that mystery shows are more likely to sell equipment, such as cars and TV sets, than are products taken internally or orally.

For a Toni campaign, the agency determined that "what a woman really wants is approval of other women. She wants attractive hair to please herself and to make herself feel more feminine."

For Holeproof hosiery, and its Luxite lingerie line, W & G based an entire campaign upon a woman looking at herself in a mirror with the headline, "See Yourself in Luxite," because "one of woman's basic unconscious motives is self-adoration . . . Narcissism to social scientists."

JOHNSON, NAMM TO SPEAK IN D. C.

National and local experts will analyze the 1953 business outlook for the Nation's Capital. Sponsored by the Washington Board of Trade, sessions will be held tomorrow.

ARNO H. JOHNSON, vice president and director of research for J. Walter Thompson Co., and Benjamin H. Namm, board chairman, National Retail Dry Goods Assn., are on the agenda of the "Business Outlook Conference" this week in Washington, D. C.

Metropolitan Washington business activity and its prospects for 1953 will be the keynote for sessions held by the Washington Board of Trade tomorrow (Tuesday) at the Shoreham Hotel, according to Harry L. Merrick, vice president of Kal, Ehrlich & Merrick Adv., the event's publicity chairman.

Schedule includes the following speakers:

Morning session: Mr. Johnson will speak on "What's Ahead in '53" and Mr. Namm will discuss "The Retail Outlook in '53." Messrs. Johnson and Namm will participate in a panel discussion which also will include Hulbert T. Bisselle Jr., executive vice president, Riggs National Bank, Washington; Frank E. Weakly, president, Washington Properties Inc.; George Burrus, president, Peoples Drug Stores Inc., Washington, and Philip M. Talbot, senior vice president, Woodward & Lothrop Inc., Washington.

Luncheon session: Arch N. Booth, executive vice president, Chamber of Commerce of the United States, "Business and the New Administration."

Afternoon session: Dr. Homer Hoyt, president, Homer Hoyt & Assoc., "The Business Future in the Washington Metropolitan Area." Mr. Hoyt will speak on a panel including Frank J. Luchs, executive vice president, Shannon & Luchs; John A. Reilly, president, Second National Bank, Washington; J. M. Meehan, chief of the Office of Business Economics, U. S. Dept. of Commerce; Louis Justement, architect, and John A. Remon, member, National Capital Planning Commission.

William A. Zeckendorf, president, Webb & Knapp Inc., will speak on "Lifting Your Sights."

Brown From CBS to Forjoe

JAMES F. BROWN has resigned CBS Chicago to join Forjoe & Co., radio and television station representative firm, on Feb. 2 as vice president and general manager of the Midwest Division. He succeeds William Wyatt, who resigned to join the George W. Clark station representative firm as vice president in charge of the Eastern Division, headquartering in New York [B•T, Jan. 12].

Robert J. Davis Sr. Dies

FUNERAL services were held Friday at Glendale, Calif., for Robert J. Davis Sr., 53, owner of Davis & Co., Los Angeles advertising agency, who died Jan. 18 after a heart attack. A son, Robert J. Davis Jr., is radio-TV director of Davis & Co.

ANNUAL "Colonel of the Year" award by Free & Peters Inc., radio-TV station representative, went to Hal Hoag (2d from l), western manager of firm headquartering in Hollywood. Mr. Hoag, with Free & Peters for 15 years, also was named vice president. L to r: Bill Bryan, F & P Detroit manager, named "colonel" in 1950; Mr. Hoag, '52 winner; Lloyd Griffin, H. Preston Peters and Russel Woodward, F & P directors; Jones Scovern, eastern sales manager for radio, who received honor in 1949. Firm makes award each year in recognition of unusual growth and contribution by F & P executives to its business success.

NEW BUSINESS

Spot

Manischewitz Wine Co., N. Y., returns to radio with spot announcement campaign effective today (Monday) after short hiatus. Agency: Donahue & Coe, N. Y.

Swift & Co., Chicago (Jewel shortening), renews Ernest Tubbs program, Mon., Wed., Fri. quarter-hour, in 35 southern markets from Feb. 2 through May 1. Agency: J. Walter Thompson Co., Chicago.

Girard's Inc., San Rafael, Calif. (salad dressing), started *It's Glenn Again* on KECA-TV Los Angeles and KGO-TV San Francisco, Sun., 9:15-9:30 p.m. PST, for 13 weeks from Jan. 18. Agency: Guild, Bascom & Bonfigli, S. F.

Kiplinger News Letter, Washington, D. C., planning radio spot campaign to begin almost immediately. Agency: Albert Frank-Guenther Law, N. Y.

Dale Dance Schools, N. Y., has started 1953 radio campaign with contracts on following stations: WMCA and WINS New York; KJBS San Francisco and WIND Chicago. Other cities are expected to be added. Agency: William Warren, Jackson & Delaney, N. Y.

I. J. Grass Noodle Co., Chicago (Mrs. Grass' soup mixes), placing spot campaign on WTAM Cleveland, WLWT (TV) Cincinnati, WLWD (Dayton), WLWC (TV) Columbus, WBKB (TV) and WNBQ (TV) both Chicago, WTMJ-TV and WFOX both Milwaukee. Agency: Phil Gordon Agency, Chicago.

General Shale Products Corp., Johnson City, Tenn. (building materials), starts transcribed *Marvin Miller, Story Teller,* five times weekly five minute program, on WWNC Asheville, N. C.; WPUV Pulaski, Va.; WHIS Bluefield, W. Va.; WJHL Johnson City, and WKPT Kingsport, Tenn., for 52 weeks from today (Monday). Firm pre-tested series on WDEF Chattanooga and WNOX Knoxville. Agency: Lavidge & Davis, Knoxville.

Brown & Williamson, Louisville (Raleigh cigarettes), is adding 10 TV markets to its film spot schedule. Three announcements will be used weekly in each area indefinitely. Agency: Russel M. Seeds Co., Chicago.

Paper-Mate Co., L. A., is spending reported $78,000 for radio and TV spots in Chicago area during 45-day intensive advertising campaign for ball point pen. Of this, estimated $50,000 is for TV. Agency: Erwin, Wasey & Co., L. A.

Network

International Shoe Co., St. Louis, renews 10-10:15 a.m. portion of *Howdy Doody* Sat. on NBC radio for 52 weeks from March 21. Agency: Henri, Hurst & McDonald, Chicago.

Armour & Co., Chicago, has ordered another 60 AM stations for *Dial Dave Garroway* on NBC network of 100 stations 1:30-1:45 p.m. CT from March 2. Agency: Foote, Cone & Belding, Chicago.

General Mills, Minneapolis, has signed for sponsorship of Friday portion of *Ding Dong School,* on NBC-TV from Chicago Mon. through Fri., 9-9:30 a.m. CT. Product to be advertised is Kix. Agency: Tatham-Laird, Chicago.

Skinner Mfg. Co., Omaha (Skinner's Raisin Bran), sponsoring *No School Today* over ABC radio, Sat., 9:30-10 a.m. EST for 13 weeks, effective Feb. 28. Agency: Bozell & Jacobs, Omaha.

Agency Appointments

Procter & Gamble Co., Cincinnati, names Benton & Bowles, N. Y., for Pert, new home permanent, effective Feb. 1.

Dejur Amsco (photographic equipment and cameras), names Friend, Reiss, McGlone, N. Y.

M. A. Bruder & Sons, Phila. (paints and building materials), appoints Abner J. Gelula & Assoc., Phila. Radio-TV will be used.

Colorglo Products Inc., L. A. (auto polish), appoints Philip J. Meany Co., that city.

Workshop Assoc. Div., Gabriel Co., Norwood, Mass., appoints Larcom Randall Adv., Boston, Mass.

Utility Appliance Corp., L. A. (Gaffers, Sattler and Occidental gas ranges, Utility heaters and coolers), appoints Calkins & Holden, Carlock, McClinton & Smith Inc., L. A. Radio-TV is being used.

Bol Mfg. Co., Chicago, appoints Schwimmer & Scott, same city, for six flavors of Hopalong Cassidy Aid. Account executive is **Edward H. Guy.** Media will be selected by mid-February.

Photo Invernizzi - Italian Film Export

The Italian Influence

Glamorous Silvana Mangano, Italian motion picture star, is one reason why Italy is a leading film-producing nation.

In films, as in the world of fashions, food and furniture -- in American industry and arts generally -- Italian creativeness continues to play a more and more important role in satisfying our demands for better living. The Italian Influence on American home decoration and cuisine is assuming dominant proportions, and in fashions, Italy ranks second only to France and is rapidly closing the gap.

To you the advertiser, all this has a special meaning. More than two million Americans of Italian origin live in and around New York. To them, WOV, is the link between the old world and the new.

It is upon this tremendous group that the Italian Influence makes its first and most penetrating impact in stimulating the desire for better living. There is money here, too -- in abundance, for all the good things of life, American or Italian.

Your approach to advertising in the New York market needs careful appraisal in the light of the intimate association between WOV and the largest Italian-speaking community in the world -- in the light of the Italian Influence on the buying habits of this area.

MULTI-SET HOMES AND AUTO RADIOS SURVEYED BY NIELSEN

This Nielsen survey was completed last June. To assure a comprehensive study, interviews in a sample of 100,000 homes in all 3,072 U. S. counties were conducted.

FORTY-FOUR per cent of all U. S. radio homes have two or more radio receivers and more than 22 million families own one or more car radios.

These figures were reported last week by A. C. Nielsen Co., Chicago market research firm, which released a nation-wide measurement survey of multiple-set ownership after six months of compilation. Personal interviews in a sample of 100,000 homes in all 3,072 U. S. counties provided the basis for the study.

At the time field work was completed June 1 of last year there were 70,175,670 radio sets and 17,706,930 television receivers operating nationally, with a combined radio-TV total of 87,882,600. This is in addition to car radios.

Radio homes total 43,949,460, of which 44% have two or more sets. In analysis of multiple-ownership, the measurement shows 56% of all U. S. radio homes have one receiver only, 32% have two sets and 12% have three or more receivers.

Although Nielsen is not ready to release the total number of car radio sets in operation, the survey shows a total of 33,581,970 families own cars. Of this number, 67% or 22,630,820 families have one or more car radios.

In an effort to determine the actual number of radio and television sets in operation, rather than merely the number in circulation, the Nielsen field workers excluded in the home-radio count all automobile sets, portables not used in the home, FM-only models, sets which were out of order and not slated for immediate repair and sets installed in businesses and public places.

All Home Sets

The count included all radio sets in the home, all in barns, garages, workshops and other outbuildings, combination AM-FM, AM-TV and AM-phonographs, portables used in the home and receivers used by servants, guests and roomers.

"Every set counted is actually delivering an audience, giving us a record, not of receivers in existence but of AM and TV receivers in actual use," Mr. Nielsen, president of the company, commented.

Figures were culled from Nielsen Coverage Service data. In correlating figures, Nielsen researchers found that families with three or more radio sets are more likely to have TV than are families with only one radio. The study showed also that similar relationships were applicable to large families and to those in the upper economic brackets.

Based on May 1952 estimates, the Nielsen Co. analyzed distribution of radio homes and found 45% of all radio homes are comprised of families with three to four persons—31%, families of one and two, and 24%, five or more.

Families with 3-4 persons accounted for 43% of the one-set home; 1-2, 35%, and five or more, 22%. Three- and four-member families represented 48% of the two-set homes; 1 and 2 persons, 27%, and 5 or more, 25%. Fifty per cent of the three-set homes were in families of 3 and 4 persons, 30% in 5 or more and 20% in 1 and 2.

Thirty-nine per cent of all radio homes have TV sets and 61% radio only. Sixty-four per cent of one-set radio homes have radio only; 36%, TV. Among two-set radio homes, 58% have radio only; 42%, TV. In the three-set radio home, 50% have radio only; 50%, TV.

Fifty-seven per cent of the three-set homes are maintained by persons in the upper economic level, 30% by middle economic groups and 13% by lower. Forty-seven per cent of the two-set radio homes are upper, 34% middle and 19% lower. In the one-set radio homes, 34% are upper, 33% middle and 33% lower. In the all radio homes, 41% are upper, 33% middle and 26% lower.

DRAMA PREFERRED, SAYS THE PULSE

IN ISSUING its report on top 25 network television programs for July-December 1952 period last week, The Pulse commented that dramas continue to place more programs among the leaders, but comedy-situation formats are proving increasingly popular. Top 25 network TV programs are listed as follows:

TOP TWENTY-FIVE NETWORK TV PROGRAMS
(from Multi-Market Tele Pulse, July-December, 1952)

	July-Dec. 1952	Jan.-June 1952
I Love Lucy (CBS)	46.6	39.5
Texaco Star Theatre (NBC)	41.2	36.6
Godfrey's Talent Scouts (CBS)	36.0	39.1
Comedy Hour (NBC)	35.0	27.4
Your Show of Shows (NBC)	34.8	35.7
Dragnet (NBC)	34.0	+
Godfrey and His Friends (CBS)	33.1	33.8
You Bet Your Life (NBC)	30.8	32.9
Fireside Theatre (NBC)	30.5	31.6
Red Skelton (NBC)	27.7	36.3
Television Playhouse (NBC)	27.5	30.0
Boxing (Wednesday) (CBS)	27.4	26.3
Life With Luigi (CBS)	27.3	*
Mama (CBS)	27.1	29.5
My Friend Irma (CBS)	27.1	24.6
What's My Line (CBS)	26.9	25.6
Robert Montgomery (NBC)	25.6	25.9
Our Miss Brooks (CBS)	25.4	*
Man Against Crime (CBS)	25.1	24.1

NBC, CBS Share Honors In Trendex TV Ratings

NBC-TV and CBS-TV each placed five programs among the top 10 Trendex Ratings for evening sponsored shows the week of Jan. 2-8. They are as follows:

1. I Love Lucy (CBS)	66.7
2. Talent Scouts (CBS)	53.1
3. Dragnet (NBC)	48.6
4. Godfrey and His Friends (CBS)	45.7
5. Star Theatre (Berle) (NBC)	41.3
6. Red Buttons (CBS)	38.5
7. Comedy Hour (Hope) (NBC)	38.0
8. You Bet Your Life (NBC)	36.3
9. T-Men in Action (NBC)	35.3
10. Suspense (CBS)	33.4

TV NEWSREEL

DISCUSSING Ipana toothpaste sponsorship of *The Jackie Gleason Show* (CBS-TV, Sat., 8-9 p.m. EST), are (l to r): E. Lloyd Bernegger, Bristol-Myers Co. v. p. in chg. of sales; R. B. Brown, pres. of B-M products div.; Mr. Gleason.

MUSICAL messages for clients was probably the topic of conversation when these three gentlemen got together. (L to r) are Rudolph Bruce, adv. mgr. of New England Coke Co. and president of the Radio Executives Club of New England; Jack Wilcher, jingles writer, and Paul Provandie, Hoag & Provandie, Boston.

EXCLUSIVE TV rights to all Boston Celtics basketball games were negotiated for WNAC-TV that city by Linus Travers (r), exec. vice pres. of Yankee Network. Signing is Walter Brown (c), president of the Boston Garden, while Celtics coach Red Auerbach looks on.

COCA-COLA Bottling Co. of Honolulu Ltd. arranges 52-week contract with KGMB-TV Honolulu for *Kit Carson Show*. L to r are Paul Beam, of Beam & Milici Adv.; J. Q. Adams, bottling company vice pres.-gen. mgr.; J. Howard Worrall, pres., Hawaiian Broadcasting System, and Wayne Kearl, broadcasting company gen. sales mgr.

When the dogwood blooms in Atlanta
WSB-TV will be operating with 100,000 watts
Approval for the increase has been granted, and operational facilities now being installed will be ready by early spring.
The value to advertisers in this *doubled* WSB-TV power best can be answered by a technical man. Ask any qualified television engineer about this formula — 100,000 of radiated power on channel 2 from a tower 1,062 feet high.
Get more for your money— *much more.* Get on WSB-TV.

FCC STATISTICS: REVENUE PER RECEIVER

FCC has an eye for figures, too. Hy Goldin at the Commission came up with a median revenue per television receiver, and information of interest to the telecaster—whether "average," or otherwise.

DOES YOUR TV station gross about $6.28 per receiver?

If so, you are "average" and party to a vital FCC statistic—one of many on revenues-per-receiver for various markets disclosed last week—which TV applicants may find useful in determining estimated incomes for their prospective stations.

The figure of $6.28 is the median revenue-per-set for all 107 stations operating the full year during 1951. For 1950 the median revenue-per-set per-station (106 outlets reporting) was $5.90.

If you were the only station in your market in 1951, your revenue per-receiver probably was around $9.82, while in 1950 it probably was about $10.13. But in 1951, one-station markets had an average of 96,000 sets-per-market while there was an average of only 40,000 sets for such markets the previous year.

The median revenue-per-set, per-station, for 1951 in a two-station market was $7. For 1950 in a two-station market it was the same. For three-station markets, the median in 1951 was $4.38, 1950 $5.25; four-station markets—1951 $3, 1950 $3.60; seven-station markets—1951 $1.75, 1950 $1.60. Tables I and II).

Of particular interest to FCC observers in the study is the similarity of median revenues-per-set for any given market (one-station, two-station etc.) regardless of the changes in the total number of receivers in that type market from one year to the next. Also, it is noted, revenue per-set per-station decreases as more stations are added to a market.

The figures are part of several tables concerning revenue-per-set which were compiled by Hy Goldin, FCC's assistant chief accountant in charge of economics and statistics.

Mr. Goldin presented the data last Monday at the Tampa-St. Petersburg comparative hearing for three applicants seeking vhf Ch. 8. The proceeding, involving the competitive bids of WTSP, WFLA and Tampa Bay Area Telecasting Corp., was completed last week before Hearing Examiner Basil P. Cooper.

Mr. Goldin prepared the data at the request

of the attorneys for the three applicants following conflicts which arose over estimates of revenues for the market. It is taken from the actual reports on revenue made by the 107 operating stations on FCC Form 324. NBC estimates of receiving sets in use per market are employed and population figures are those of the 1950 census.

Whereas Tables I and II concern median revenues-per-set per-station for all stations operating in 1950 and 1951, Tables III and IV concern such revenue only for about two dozen stations in one- and two-station metropolitan areas with populations of 250,000 to 500,000. Median revenue per-set in the one-station market is $11 for 1951 and $10 for 1950. Revenue per set to each station in the two-station market is $7 for 1951, $5.50 for 1950.

Median revenue per-set for each of the two dozen outlets is $9.17 for 1951 and $9 for 1950.

Table V, representing data for 15 stations in 14 selected markets, shows a percentage distribution of revenue sources—network, national spot and local—in addition to revenue per-set.

Table V covers 13 one-station markets and one two-station market. Although most of the 14 cities included range in size from about 250,000 to 500,000, the market area for each of the cities comprises an average 600,000 persons, based upon J. Walter Thompson Co. market area data.

Table VI shows average revenue per station for 1951, classified by number of sets in the market, for one-station and two-station markets in areas of 250,000 to 500,000 population.

TABLE I—ALL MARKETS

1951 Revenue Per Set Per Station, Classified by Number of Stations in Market

Revenue Per Set Per Station (Dollars & Cents)	Number of Stations in Markets 1	2	3	4	7	Total
Under $1.00					4	4
1.00-2.00					4	4
2.00-4.00		2	10	6	6	24

Median Revenue Per Set Per Station	$11.00	$7.00	$9.17

THOMPSON CO. TV SET COUNT BRINGS PROTESTS FROM VIDEO BROADCASTERS

Agency's report on sets-in-use in 162 major markets arouses complaints by TV broadcasters and station representatives on grounds J. Walter Thompson Co. underestimated coverage of many stations in top markets by restricting estimates to areas defined as "metropolitan."

J. WALTER THOMPSON Co. uncorked a market-by-market estimate of television sets-in-use last week which touched off a series of resounding cries from television broadcasters and station representatives.

The crux of the complaints was that, in confining estimates in top markets to the areas defined as "metropolian," the agency had seriously underestimated true coverage of many stations, whose range does not terminate at political or geographical lines.

The survey offers this "Summary of Number of Television Receivers Estimated To Be in Households and Public Places in the U. S., Jan. 1, 1953":

	Estimated No. TV Receivers	Per Cent of U.S. Total
First 162 U. S. Markets, Made up of 280 Counties	17,414,037	82.924
Markets Beyond First 162, each Having 500 or More TV Receivers (698 Counties)	3,180,766	15.146
Markets Wherein There Are Less Than 500 Receivers Each (1,794 Counties)	405,197	1.930
Markets Having No TV Receivers (301 Counties)		
Total U. S. (3,073 Counties)	21,000,000	100.0%

The report finds it "significant to note that those of the 162 markets wherein there are television transmitters account for 47% of the nation's households and 73.6% of the television receivers in use. The entire 162 top U. S. markets account for 58.8% of the U. S. households and 82.9% of the 21 million receivers in homes and public places, according to these estimates."

Of the 76 markets having TV stations as of Jan. 1, it is noted, all but three are among the 162 top U. S. markets. These 162 markets are as defined in "Population and Its Distribution," compiled by J. Walter Thompson Co.

The set estimates of the Thompson company were prepared, the report explains, "to facilitate the answering of important questions asked by advertisers, agency personnel, and sales and research executives relative to the potential penetration of television advertising into specific markets."

The material, it is noted, "provides data that makes it possible to determine answers to such common questions as the following:

"How effectively can specific markets be reached by television?

"In which markets are other media required to achieve satisfactory coverage?

"Is the sales and merchandising follow-through that stems from television advertising being directed to the markets where it will do the most good?"

The report continues:

". . . Since most television stations have an effective coverage radius of 50 miles or greater from the transmitter the television advertiser is able to reach far beyond the transmitting markets. Thus it occurs that such markets as Hartford and Bridgeport, Conn.; Trenton, N. J.; Allentown, Bethlehem and Easton, Pa., show a high ratio of television households despite the absence of transmitters in any of those cities."

The study estimates that all TV sets in use in the U. S. were manufactured since the war, except for a few thousand demonstrated and sold at the World's Fair in 1939, and that 80% of all of today's receivers were built in or after 1950. In all, it is estimated, 23,016,645 sets have been built, with 21 million of these having been sold domestically. Since set life is estimated at about eight years, "obsolescence has not yet become an important factor," the report concludes.

Nor does the study find multiple ownership of sets an "important" factor; not more than 1% of the TV homes had more than one set.

The report also notes that as yet there is no information "on the speed with which receivers can be mass-converted in new uhf markets where vhf reception has been an established thing," and no indication "as to what percentage of owners will desire such a conversion."

The Thompson agency's set estimates, the report explains, are based on data "derived from a variety of competent sources many of which are confidential." But their accuracy "has been authenticated by field investigation in selected markets and the figures reported are believed to have an accuracy of plus or minus 5%," the report maintains.

TABLE IV

1950 Revenue Per Set Per Station for Stations Located in Metropolitan Areas with Population of 250,000-500,000

Revenue Per Set Per Station (Dollars & Cents)	Number of Stations in Market 1	2	Total
$2.00-4.00	1	1	2
4.00-6.00	1	4	5
6.00-8.00	1	1	2
8.00-10.00	5	1	6
10.00-12.00	3		3
12.00-14.00	1	1	2
14.00-16.00	3		3
16.00-18.00			
18.00-20.00	1		1
Total Number of Stations	16	8	24
Median Revenue per set Per Station	$10.00	$5.50	$9.00

TABLE V—14 SELECTED MARKETS

Revenue Per Set Per Station and Percentage Distribution of Time Sales, 1951

Station	Revenue Per Set Per Station	Percent Distribution of Total Time Sales: Network[1] %	Gross Nat'l. Spot[2] %	Local %
1	$17.80	34.4	37.8	27.8
2	15.80	22.9	35.9	41.2
3	15.58	30.8	41.0	28.2
4	15.34	54.9	40.6	4.5
5	13.39	26.1	30.4	43.5
6	11.41	25.3	52.4	22.3
7	9.76	20.5	36.6	42.9
8	9.38	21.8	51.0	27.2
9	8.60	54.0	32.1	13.9
10	8.44	33.3	43.2	23.5
11	8.10	54.0	18.6	27.4
12	7.59	38.2	42.3	19.5
13	6.83	35.5	64.5	
14	6.25	20.6		79.4
15	5.12	49.4	30.3	20.3

Median revenue per station per set $9.38.

[1] Net revenue.

[2] Gross revenue before deductions for commissions to advertising agencies, national representatives, etc.

Justice Dept. Complaint Amended in 16 mm Suit

Ordered to clarify "ambiguities" in the government's anti-trust suit against motion picture makers and distributors to force release of 16 mm film to television, Justice Dept. attorneys change complaint's phraseology, leaving the next move to the defendants.

THE U. S. Dept. of Justice, clarifying specific charges, amended its anti-trust suit Monday against motion picture studios and distributing companies to force release of 16 mm feature films to television and other outlets. The defendants were given 30 days from last Tuesday to file answers.

Clarification of two phrases in the complaint was ordered by Federal Judge William Byrne in Los Angeles, Dec. 29 [B•T, Jan. 5], on petition of the film companies for a more definite bill of particulars and their request that "ambiguities" be dropped. The government's Assistant Attorney General James McGrath at that time was given 30 days to amend the complaint.

Asks Clarification

Judge Byrne ordered clarification of the phrase "among other things," in the government's charge that "during the period of the time covered by this complaint, and for the purpose of effectuating the aforesaid combination and conspiracy, the defendants did, among other things, enter into written and oral agreements containing restrictions hereinafter set forth, limiting the purpose for, location at, time when and conditions under which 16 mm films may be exhibited." In the amended complaint, the phrase, "among other things," was dropped.

He further ordered the government's attorneys to clarify the phrase, "limiting conditions," in the charge that "the aforesaid restrictions on 16 mm feature film exhibitions consists of the following: Limiting the conditions on which licenses for exhibition of 16 mm feature films may be granted to churches, schools, clubs, hotels and drive-in theatres."

In the case of theatres, the government's complaint declared companies conspired to limit admission price, advertising, category of persons to be admitted and hours of showing.

Named as defendants are Columbia Pictures Corp. and subsidiary, Screen Gems Inc.; Universal Pictures Corp. and subsidiary, United World Films Inc.; Warner Bros. Pictures Inc.; Warner Bros. Pictures Distributing Corp.; RKO Radio Pictures Inc.; 20th Century-Fox Film Corp.; Republic Pictures Corp.; Republic Productions Inc.; Films Inc., and Pictorial Films Inc. Although not made a defendant in the suit, Theatre Owners of America is named as a co-conspirator.

Film Nuggets

NBC and the Allen B. DuMont Labs. received awards for effective sales presentations from the National Visual Presentation Assn. at a luncheon meeting of the Sales Executive Club of New York last Tuesday.

NBC was awarded first prize in the slide-films-with-sound category for its "Summer Radio — 1952" presentation. This sound-slide film described the summer market picture and the dimensions of the summer NBC radio audience.

DuMont Labs. received honorable mention in the motion picture class for its "Selling the Sizzle" industrial film. It was designed to acquaint DuMont receiver retailers with techniques of effective selling as espoused by Elmer Wheeler.

Sales

New clients for **INS-Telenews'** daily TV service are KOPO-TV Tucson; WKBN-TV Youngstown, and WHUM-TV Reading, according to Robert H. Reid, manager of INS' Television dept. He said that KOLN-TV Lincoln, Neb., already a client for the daily services, has added the weekly news review and *This Week in Sports*.

* * *

WPIX (TV) New York has signed with **Atlantic Television Corp.**, New York, for 41 feature films for first TV showings in the area. The package includes "The Bachelor's Daughters," "The Great John L.," "The Devil and Daniel Webster," "Dr. Christian" series and "Guest in the House."

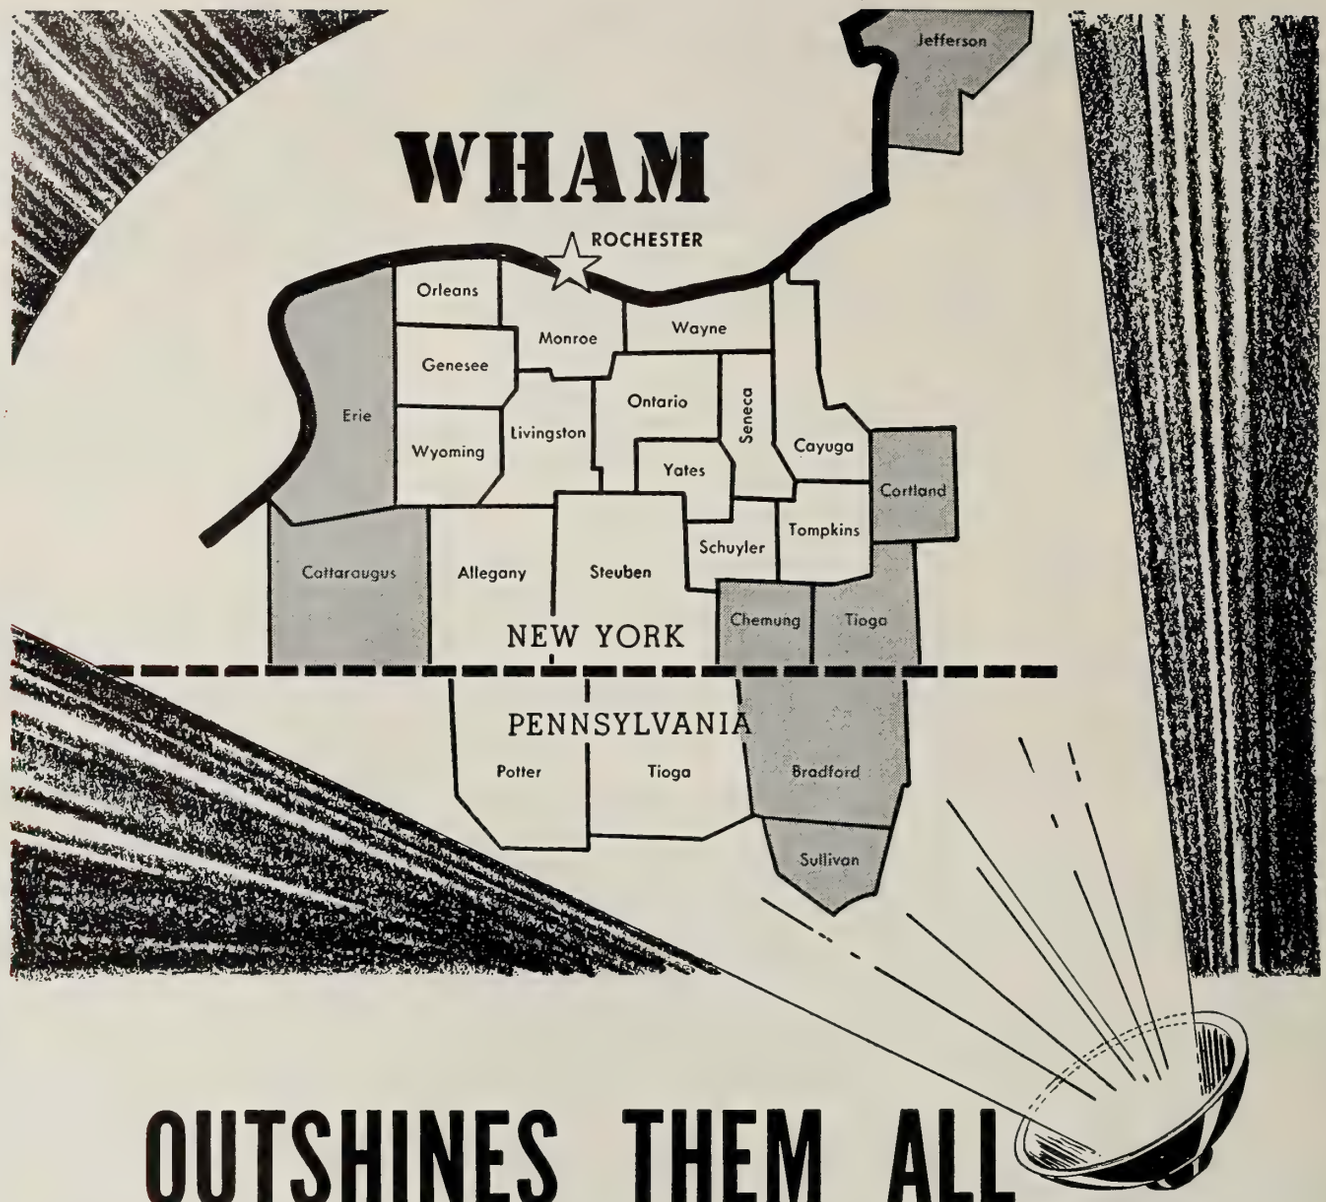
* * *

Bell Brand Foods Ltd., Los Angeles, **Van Camp Sea Food Co.,** Terminal Island, Calif., and **Olympia Brewing Co.,** Olympia, Wash., are each buying a weekly half-hour film program over **KTTV (TV)** Los Angeles. Bell Foods (potato chips, peanut butter), begins *Ramar of the Jungle* tomorrow (Tuesday) for 52 weeks; program is filmed by **Arrow Productions Inc.,** Hollywood, and agency is **McCann-Erickson,** Los Angeles. Van Camp Seafood (Chicken of the Sea tuna) on Jan. 21 stars *Hopalong Cassidy* for 39 weeks, sponsored on an alternate weekly basis; agency is **Brisacher, Wheeler & Staff Inc.,** San Francisco. Olympia Brewing will start **Ziv TV Programs'** *Favorite Story* Jan. 21 for 52 weeks; agency is **Botsford, Constantine & Gardner,** Seattle.

* * *

Pacific Coast Borax Co., New York, will start the weekly half-hour *Death Valley Days* on WHUM-TV Reading, Pa., about Feb. 5. The agency is **McCann-Erickson Inc.,** New York.

* * *



Kellogg Co., Battle Creek, starts weekly half-hour *Superman* on KECA-TV Los Angeles, Feb. 9 for 52 weeks. Series is filmed by **Superman Inc.,** Culver City. Agency is **Leo Burnett Co.,** Chicago.

* * *

The Princeton Film Center Inc. is producing a series of TV commercials for **Hoffenreffer Brewing Co.** of Boston via **H. B. Humphrey, Alley & Richards.** The producer also has completed a series of commercials for **The Stanley Works,** starring **Norman Brokenshire,** to be integrated with the Film Center's five minute television program, *Norman Brokenshire, the Handyman,* for which Stanley has bought time starting Jan. 28 on WSYR-TV Syracuse, WNBF-TV Binghamton and WHAM-TV Rochester. **Horton-Noyes,** Providence, is agency.

Availabilities

Goodwin-International, Johannesburg, South Africa, announces that pilots for its films are in New York and will be available in February. The films include *Boy & Simba,* quarter-hour series dealing with the adventures of a white boy and his pet lion in the wilds of Africa, and *African Visit,* quarter-hour series dealing with

OUTSHINES THEM ALL

99.8% Domination of 16-County Area
MORE Listeners ALL the Time★

For over 25 years, time buyers have found that whatever their sales goal in Western New York, WHAM consistently outshines the competition. And for good reason! WHAM dominates 16 Western New York-Northern Pennsylvania Counties. The latest area PULSE proves again that WHAM alone with 99.8% listener preference can do your selling job to more people than any of the 24 radio stations in the area.

Call the HOLLINGBERY Representative for Complete Details

★PULSE (Oct.-Nov. '52) interviewed 6200 homes in WHAM-land. Out of 552 measured quarter-hour broadcast periods, WHAM was FIRST in 551. Truly overwhelming coverage and listener preference!

GEORGE P. HOLLINGBERY COMPANY, *National Representative*

pigmy elephant hunts, bushmen rituals, snake tortures and other events peculiar to Africa.

* * *

Telenews Productions Inc., N. Y., will hold premiere showing of its new 15-minute film series, *For Women Only,* in New York next Thursday. It is described as the "first TV film counterpart of the popular women's magazines."

Distribution

Distribution of *Movie Quick Quiz,* syndicated video package of **Walter Schwimmer Productions,** Chicago, reverted to that company last week at the conclusion of a sales agreement with United Television Programs, same city.

George Guyan, sales director for Walter Schwimmer Productions, will direct all national sales of the show. The 15-minute, five-week quiz show was sold recently to seven more stations.

Production

Paul F. Heard Inc., Hollywood, in association with **Louis Forbes,** will produce a half-hour series of 26 TV films, *Front-Row, U.S.A.,* illustrating the manner in which freedom, courage and initiative are expressed in the American way of life.

* * *

Volcano Productions, Hollywood, headed by **Bob Angus** and **Bill Lewis,** who produce ABC-TV *Adventures of Ozzie and Harriet,* has signed western short story writer **Luke Short** to write a TV film series, *Ricochet.* The pilot film, scheduled to roll in mid-February, will be shot in 35mm color.

* * *

RKO Radio Pictures Corp. is completing six black-and-white TV trailers, 15 to 50 seconds in length, to be used to promote its technicolor documentary film release, "The Sea Around Us."

Random Shots

Screen Gems Inc., New York, TV film producer and distributor, has announced a search for story properties and program presentations adaptable to filming for television.

Film People

Harry K. McWilliams, exploitation manager for Columbia Pictures for the past eight years, has been named director of advertising and public relations for **Screen Gems Inc.,** New York, it was announced Wednesday by **Ralph Cohn,** vice president and general manager.

* * *

Phil Williams, assistant to the director of television for 20th Century Fox, has announced that he has resigned to accept a position with **Ziv Television Productions Inc.** Mr. Williams will assume his post with Ziv as an account executive in Texas on Feb. 16.

* * *

Seymour G. Klaff, attorney for State of Illinois Commerce Commission, has joined **Guild Films Inc.,** New York, as executive vice president and board member and will have charge of firm's fiscal departmental operations.

* * *

Jim Lister has been promoted to production coordinator of *Tales of Tomorrow* by **George F. Foley Inc.,** New York package producer.

* * *

Capt. Carl Zimmerman has dropped narration chores on the Army's TV series, *The Big Picture,* to devote full time to supervising production of the program.

* * *

Dr. Paul I. Ilton, archaeologist, historian and writer, has been appointed director of research to work on *Spotlight, USA* for **Ted Baldwin Inc.,** New York.

INAUGURAL IN A GOLDFISH BOWL: RADIO-TV BLANKET CEREMONIES

History-making event was a new milestone for television, while for network radio, it was an old story well done. Millions of citizens watched their 34th President take his vows to perform the duties of the office. Still many other millions heard the political pageant described on the air.

EYES and ears of America were trained on General "Ike" last Tuesday as the Eisenhower Administration assumed office.

The complete ceremonies were intimately carried by at least 118 television stations in 74 cities, with an estimated 75 million viewers having access to the most comprehensive coverage in video's comparative short history.

Radio and television duly reported these milestones with unprecedented coverage, from the solemnity of the oath-taking ceremonies at the U. S. Capitol through the parade pageantry to the climatic Inaugural Ball. For the latter event, the networks pooled their TV facilities.

Radio and TV were there, with myriad equipment and gadgets—from 11 a.m. to 12:50 a.m. Wednesday as radio-TV networks marshaled all their resources for unprecedented coverage that reached millions of viewers and listeners in homes, automobiles, schools and a variety of public places—coast-to-coast.

Each network could boast "firsts" in one respect or another. NBC-TV picked up the President-elect and Harry Truman on the White House lawn at 11:28 a.m. CBS-TV came away with exclusive interviews with the military Chiefs of Staff and comprehensive coverage. ABC's WMAL-TV Washington laid claim as the only TV station to televise the entire parade. DuMont TV Network's WTTG (TV) wrapped up highlights in an hour-long film for late viewers.

NBC-TV inaugural coverage was masterminded from control rooms in the Wardman Park Hotel, headquarters of the network's WRC WNBW (TV) Washington, D. C. outlets. Master control board shows monitored pickups from several vantage points where NBC maintained positions for its 15 cameras. William R. McAndrew, NBC-TV special events chief, directed coverage of Capitol ceremonies and parade festivities.

NBC

William R. McAndrew, NBC-TV special events chief, directed the network's television coverage, headquartering in the Wardman Park Hotel. Five TV cameras and seven commentators covered the White House meeting Tuesday morning. NBC's Cadillac "traveling eye" then went into action on the trip to the Capitol and 250 staff members got into high gear, including 22 commentators.

Fifteen NBC cameras picked up the parade with cameras at the Capitol, the FTC Bldg., the Treasury Bldg. and at the White House reviewing stand on the edge of Lafayette Park. Charles C. Barry, vice president in charge of programming, and Davidson Taylor, director of public affairs, supervised overall inaugural coverage.

Morgan Beatty and Clifton Utley coordinated actual monitor pickups at the Wardman Park Hotel from 10 remote points. NBC's Vicicon hand camera provided intimate glimpses of the parade crowd as the "traveling eye" stopped for interviews. Merrill Mueller gave commentary and Dave Garroway interviewed spectators. Ben Grauer spearheaded Inaugural Ball activity. NBC newsman Ray Scherer and cameraman Bill Birch meanwhile followed Mr. Truman to Missouri.

General Motors sponsored all NBC radio-TV coverage save the oath-taking ceremonies from 11:45 a.m. to 12:45 p.m.

Joseph Meyers directed NBC radio coverage, from 11:30 a.m. to 3 p.m., which included the oath-taking and parade. Arthur Barriault supervised reports from the Capitol and Gene Juster coordinated broadcasts at the Wardman Park.

CBS

CBS Radio took the air at 11:30 a.m. with Bob Trout at the Capitol and Charles Collingwood traveling in a Packard in the procession to the Hill. Network carried a special program at 4 p.m. on President Eisenhower's office-taking. CBS Radio employed 100 staff members handling myriad assignments. Operation was supervised by Wells Church, director of news and public affairs, from a central master control booth under the Capitol steps.

CBS-TV employed a staff of 150 newsmen, production and technical personnel and utilized 15 cameras. The network's custom-built unit, housed in a Packard convertible, rode alongside the Presidential car on the parade route.

Edward R. Murrow interviewed Gens. Hoyt Vandenberg, Omar Bradley, Lawton Collins and others. Walter Cronkite served as anchor man for the network, aided by CBS-TV corps of newsmen.

Overall coverage was supervised by Sig Mickelson, CBS-TV director of news and public affairs. Paul Levitan was in charge of arrangements for all broadcasts and Don Hewitt directed inaugural coverage. Inaugural cover-

WHITE HOUSE reviewing stand on the edge of Lafayette Park was a beehive of activity once the Presidential party settled in its special box to review the parade. The man to the left of the NBC cameraman above is actor Edward Arnold of ABC radio's *Mr. President* fame. Mr. Arnold handled commentary for part of DuMont TV Network coverage of the Washington ceremonies.

age of both radio-TV was sponsored by the Packard Motor Car Co.

DuMONT

DuMont TV Network sponsorship was on an area basis. The National Bank of Washington paid the tab on WTTG (TV) Capitol pickups, and Beacon Wax on WABD (TV) New York, with some 24 stations taking part. The American Oil Co. bought an hour of filmed highlights with actor Edward Arnold doing commentary and received credits before and after the Inaugural Ball. James Caddigan supervised DuMont's Inaugural coverage.

DuMont located cameras at the Capitol and Treasury Bldg., as well as the White House. It picked up oath-taking ceremonies at 11:30 with other networks and wound up parade coverage at 5:30 p.m. DuMont concentrated on pickups from a limited number of vantage points in the hope of preventing repetition of picture and comment.

ABC

ABC radio presented a total of five and one-quarter hours of inauguration coverage and ABC-TV six and one-half hours. Willys-Overland sponsored on both radio and TV from 11:30-4:30 p.m. EST (except the swearing-in ceremonies) and ABC-TV's coverage of the Inaugural Ball from 11 p.m. to 12:30 a.m. EST.

The combined radio-TV team of ABC reporters included Walter Winchell, John Daly, Elmer Davis, Erwin Canham, Martin Agronsky, Paul Harvey, Quincy Howe, Bryson Rash, Leo Cherne, and many others. Mr. Rash handled Capitol activities on simulcast, and later the Inaugural Ball.

Supervising the overall operations was Thomas Velotta, ABC vice president in charge of news and special events, who was assisted by Don Coe and John Madigan, directors of radio news and TV news, respectively.

ABC utilized mobile jeep units and a miniature "peek-a-view" camera to supplement 16 TV cameras and more than 35 radio and video microphones in strategic locations. More than 150 editorial and technical workers helped cover the proceedings, ABC reported.

From 9:30-10:30 p.m. EST, ABC-TV presented a recapitulation of the day's events on the "Inaugural Highlights" program and ABC radio provided a similar presentation from 8-9 p.m. EST.

One sidelight to ABC's coverage was the story of an ABC-TV engineer in the Willys-Overland jeep, who saw nothing of the parade, even though he was in it. For hours, his attention was riveted on keeping his microwave transmission unit focused on the Capitol dome, the receiving point. And reporter Leo Cherne told of a little girl who asked him during an interview if her doll was "on television."

WMAL-TV, ABC Washington outlet, covered the parade right through to 7 p.m.—beyond the 5:30 p.m. time ABC cut off network coverage. The station asked viewers if they wished to see the parade to the finish—their affirmative response clogged WMAL-TV switchboards—so it continued coverage under emergency lighting set up by District of Columbia police.

MBS

MBS had its battery of newsmen on hand. A Mutual jeep-type car trailed immediately behind the first wave of official cars in the parade, with Everett Holles and other newsmen describing events. Fulton Lewis Jr., Fred Fiske, Hazel Markel and others numbering about 75 had various assignments. Wildroot Co., Buffalo, sponsored part of Mutual's coverage, and other segments were carried as co-op features.

CBS Manual

There was high praise from school systems throughout the country for the CBS-TV teachers' guide prepared for use in conjunction with the telecast of the Presidential Inauguration.

The manual, produced at CBS-TV's request by a staff of experts at the Citizenship Education Project of Teachers College, Columbia U., was designed to guide teachers in classroom discussions of the Inauguration. CBS-TV said it had distributed some 175,000 copies of the guide throughout the country through its 76 affiliates and noted that millions of pupils in thousands of schools viewed the events on TV.

Inaugural Short Shots

Lineup of VIPs on the Inaugural stand at the Capitol during the oath-taking ceremonies was flanked by CBS Radio's Bob Trout on one end and ABC-radio-TV's Bryson Rash. Mr. Trout was so close to Margaret Truman he might have interviewed her—but, of course, he didn't.

* * *

The radio-TV-newsreel boys were located atop a wooden structure about 25 yards from the Inaugural stand, separated by the Marine Corps band and the press section. They had to draw up their equipment through a trap door in the loft and otherwise had their troubles.

* * *

WTTG (TV) Washington reported that, during the solemn ceremonies, a woman called the station and wanted its cameraman to tell one man to remove his hat while the new President was talking.

* * *

NBC brought its old parabolic microphones (of 1928 vintage) out of the museum works to catch crowd noises, marching and musical sounds. "It's just a sign of the times," said one NBC radioman. "Television gets a brand-new Cadillac and we get a 1928 microphone."

* * *

NBC also came up with a camera installed on a hydraulically-operated lift which serves, in other seasons, as an apple-picker in Oregon. It's called an "Industrial Monkey"—and that's no apple-sauce, either. It's owned by the Mobilift Corp.

* * *

Don Hewitt, CBS-TV news and special events director, was really on the ball with a selection of colorful pickups at the network's monitoring board. He managed to catch cowboy Monty Montana lassoing Ike at the White House stand.

* * *

Bill Neel, WMAL-TV Washington news editor, carved a niche for himself when he took over commentary duties on the parade which the station telecast to the end. Complimentary calls poured in praising his short but informative work. Mr. Neel had an advantage: He had put out a guidebook of Inaugural descriptive material for ABC earlier this month—though he never appeared before a microphone previously.

* * *

Inaugural Ball coverage apparently left something to be desired, if only because of the melange of shots spotting nobody in particular. But one pickup stood out: A dramatic closeup shot of General Ike, taken below the railing of his box, looking on as Gladys Swarthout sang, "Bless This House." A blurred, nostalgic expression, then a faint smile that needed no commentary.

* * *

Television coverage of the inauguration went international, too, with the Voice of America supplying kinescopes for telecasting in Holland and Japan.

CBS-TV supplied 1½ hours of "hot kinescopes" of its inauguration coverage, which the Voice TV branch sped, via KLM Royal Dutch Airlines, to the Netherlands in time for telecasting there on Wednesday, day after the inauguration.

The Voice unit also dispatched CBS-TV kinescopes to Japan, where they are slated for use when the Broadcasting Corp. of Toyko commences operations Feb. 1.

Independent Retail Grocers in Baltimore say:

WFBR's

the station for us!

Every year since 1936, the powerful Independent Retail Grocers Association of Baltimore has turned to Baltimore's promotion-minded, know-how station, WFBR, to make sure their Annual Food Show, held at the Fifth Regiment Armory in Baltimore, goes over with a bang.

Every year WFBR has thrown the full weight of its promotion, programming, merchandising and production departments behind this great food event.

The result? Every year, bigger crowds, more exhibitors, better displays—and firmer loyalties, friendship and cooperation between the 2765 members of the Independent Retail Grocers Association and WFBR.

To the left, you'll read what Joseph Manning, executive secretary of the Association thinks of us. Elsewhere, a list of food and allied accounts we've carried this year.

One last word: it's more true today than ever, for real showmanship, solid merchandising and active, day-in, day-out promotion, you need

"WFBR's know-how and showmanship have been invaluable to our Association for over 16 years by their cooperation in our Annual Food Show —just as independent grocer cooperation has helped make WFBR dominant in grocery and allied products merchandising."

(Signed)

Joseph P. Manning

ABC BASIC NETWORK • 5000 WATTS IN BALTIMORE, MD.
REPRESENTED NATIONALLY BY JOHN BLAIR & COMPANY

PRESIDENT TO BE IN CLOSE TOUCH WITH PEOPLE VIA RADIO AND TV

Intensified use of electronic media is planned, including development of a new form of conference technique so that the nation may know what is going on at the White House. Discussions are starting on methods to be used, and network presidents are quick to offer their cooperation.

RADIO and television are getting significant recognition as news media from the new Administration.

Enjoying the widest circulation, fastest contact and most intensive appeal of all media, broadcast facilities will be used frequently by President Eisenhower as a means of keeping the public informed about what is going on in Washington and in the world.

The President and his advisors are searching for a formula they hope will be an improvement on the fireside chats first developed by the late President Roosevelt and also used by ex-President Truman.

Out of a series of discussions may come a new form of conference in which question-answer or forum technique is used, though perhaps not the rapid-fire and unrehearsed type of White House news conference of the last 20 years.

James C. Hagerty, the President's news secretary, said the White House is studying various ways of utilizing TV and radio, including participation of high government officials when specialized subjects are discussed.

First discussion with radio-TV representatives was held at the White House Friday noon. It dealt with operational problems of broadcast coverage. Invited to take part were these news representatives of five networks: Julian Goodman, NBC; Bryson Rash, ABC; Ted Koop, CBS; Hollis Seavey, MBS, and Roger Coelos, DuMont.

Question of Quoting

Radio-TV pickups of Presidential news conferences would raise one difficult problem—quoting of the President's replies to questions. Under the Roosevelt-Truman rules, reporters could not quote the President's words without specific permission. This rule was based on fear that a mis-used word or mispronounced syllable, or hasty retort, might lead to disastrous consequences.

From the network-station viewpoint, any broadcast of a Presidential discussion would provide top programming for the public. Use of prime evening hours would be considered, whereas under recent custom White House news conferences have been held Thursdays at 10:30 a.m. and 4 p.m., on alternate weeks.

In discussing the TV news conference idea, Mr. Hagerty scotched oft-heard rumors that the President might abandon conferences or resort to use of advance written questions.

The TV idea is still just tentative, Mr. Hagerty continued, with no details worked out. He added that the President would like to develop a plan by which he could talk to the people.

President Eisenhower agrees with ex-President Truman that news conferences provide a means of getting the President's ideas to newsmen and then to the people. At his final news conference Jan. 15 Mr. Truman had said he often learned a lot from the questions that reporters asked.

In the search for improved news coverage facilities, Mr. Hagerty said, the idea of calling in high government officials involved in important announcements was receiving consideration. He flatly denied the President had resisted the idea of holding news conferences.

When ex-President Hoover was in the White House (1929-33) he required that written questions be submitted in advance. Only a small percentage were answered at news conferences. When Franklin D. Roosevelt assumed office in 1933 he threw open his conferences to oral questioning. The interchanges became lively, and usually were newsworthy as government policies went through a transition period. Came World War II, and the conferences became even more productive of stories. FDR developed the "fireside chat" technique of reaching the people during prime broadcast time.

Embryo State

The official transcript of Mr. Hagerty's comments at his first news conference Wednesday morning indicates the embryo state of the idea. Excerpts follow:

Mr. Hagerty—We are in a day of a new media—television. I would like to work out with television representatives and with you gentlemen a system whereby the President could give talks to the people of the country—possibly press conferences to the country—on television. What we are at present thinking of is something like that, about once a month, although we do not want to be tied down to one a month.

Q—Will that be a normal press conference simply televised?

Hagerty—I don't know. I am just merely giving you our thinking. It may be—it may not be a press conference. It may be an informal talk by the President to the people of the nation. It may be an announcement by the President to the people via the medium of radio and television.

Q—Wouldn't it be the idea to have questions asked?

Hagerty—It would entirely depend on the format of that one particular telecast or broadcast. I just don't know and I wish you wouldn't try to tie me down on details because I am not prepared to say yet what format—as soon as we can work it out—it will be worked out very carefully with radio and television and reporters. Then we will come to some understanding.

Frank Stanton, CBS president, endorsed the idea of broadcast news conferences in a statement issued Wednesday. He said:

As I understand the announcement by James C. Hagerty, the idea of holding monthly broadcast press conferences is still tentative. What pleases me most about it—as it must please the listening and viewing public, as well as members of the broadcasting industry—is the recognition it gives to the news service which radio and television have provided to the American people.

While any final judgment is premature at this point, the proposal is a logical development of news coverage, and I look forward to the announcement of the way in which the mechanics will be worked out. Such news coverage should go far toward sustaining the high level of political interest and participation on the part of the American people which radio and television helped to create during the past Presidential campaign.

We will cooperate with other members of the industry in being of whatever assistance we can in working out with Mr. Hagerty the arrangements for holding these broadcast news conferences.

Robert E. Kintner, president of ABC, issued the following statement:

The ABC is greatly interested in working closely with Mr. Hagerty to further plans looking toward the televising and broadcasting of President Eisenhower's news conferences We look upon this as a further step in keeping the country fully informed and will cooperate to draw up arrangements with all parties involved.

Frank White, NBC president, asserted:

The NBC is greatly interested in plans announced today by James C. Hagerty, White House press secretary, to consider the possibility of televising and broadcasting special monthly news conferences with President Eisenhower.

NBC will welcome the opportunity of having its representatives meet with those of President Eisenhower and the industry to work out practical arrangements for carrying forward the plan under consideration. Our position has always been that radio and television, with their capacity for reaching the public directly and immediately, should have equal opportunity with all other media in access to the news as it is happening. We hope the procedure which has been suggested will prove to be a constructive step in that direction.

Thomas F. O'Neil, Mutual president and board chairman, said:

President Eisenhower's contemplated plan to broadcast news conferences from the White House is heartily endorsed by the Mutual network. A major part of our public service program is an up-to-the-minute coverage of the news; thus we look upon the proposal to admit broadcasters to the White House news conference as another great stride forward in radio's continuing campaign to keep Americans the best informed people in the world.

We will lend every possible assistance in working out the arrangements.

Utah Delegation Tapes

WEEKLY meetings in Washington, D. C., of the entire Congressional delegation from Utah—claimed the first such sessions in the state's history—will be taped in a half-hour program to be released over the eight Utah stations of the Intermountain Network.

The delegates—all Republicans—are Sens. Wallace Bennett and Arthur Watkins and Reps. William Dawson and Douglas Stringfellow. The stations: KALL Salt Lake City, KOVO Provo, KLO Ogden, KOAL Price, KVNU Logan, KSVC Richfield, KJAM Vernal and KSUB Cedar City. The Wednesday breakfast meetings in the Senate dining room will be released on the stations at 9:30 p.m. Sundays.

Hardy Gets UNESCO Post

RALPH W. HARDY, NARTB government relations director, is one of five newly-appointed members of the U. S. National Commission for UNESCO, the State Dept. has announced.

Reappointed to second terms were eight others. All will serve as official representatives of non-government organizations. The commission selects the organization which, in turn, nominates its representative. Justin Miller, NARTB board chairman and general counsel, previously represented NARTB until his term expired.

What big ears you have, Iowa

GUS BRUNKAN is an equipment dealer in Dyersville, Iowa, 48 miles by kilocycle from WMT. He sells farm equipment on trade. He had five used International corn pickers in stock and didn't know how lucky he was.

WMT's annual mechanical corn picking contest was held on schedule. Ten thousand people turned out for the event, listened to the governor speak, drank 700 gallons of coffee, watched 17 pickers in action, saw the winner crowned with the state championship, a WMT trophy and a check for $100.

The event was reported on WMT's morning farm broadcast. All the news that was fitten included this fact: The winner used a Model 24 International corn picker.

Brunkan sold all five of his.

MORAL: *Even WMT news broadcasts sell Eastern Iowans.*

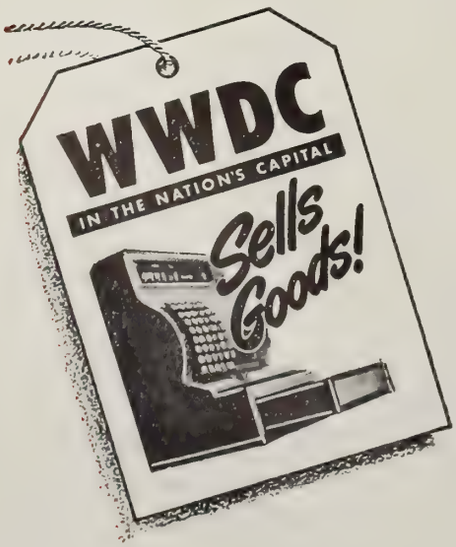
PEOPLES DRUG STORES SALES FORGE AHEAD



When we tell you that WWDC makes businesses grow, we're not just talking platitudes. We give you facts and figures—names and addresses—to prove what we say.

Take Peoples Drug Stores, for example. They started on WWDC in October, 1950. The sales of this great retail organization have gone steadily up ever since. In October, 1951, sales were up $115,169 over October, 1950. And October, 1952, showed a gain of $332,806 over October, 1951. Bill Murdock, head of the William D. Murdock Advertising Agency, says: "Our WWDC newscasts have definitely helped Peoples Drug Stores sales in the Washington area."

WWDC can help *your* sales in the Washington area too. Let your John Blair man give you the whole story.

CLAYTON R. SANDERS, Advertising Manager of Peoples Drug Stores, says: "We've used WWDC consistently for more than two years. We've gotten very good results."

In Washington, D. C. – it's

WWDC

REPRESENTED NATIONALLY BY JOHN BLAIR & CO.

ABC-UPT MERGER STRATEGEM AS TOBEY INTRODUCES BILL

The active Senator from New Hampshire has introduced a bill to amend the Communications Act that obviously is aimed at the ABC-UPT marriage. For insurance, the Senate committee wants broad powers to investigate all phases of communications. It looks like Sen. Tobey wishes an inquiry of the whole matter.

FCC IS SET this week to consider its final decision on the merger of ABC and United Paramount Theatres, with one eye cocked toward Capitol Hill and the other toward Comr. Frieda B. Hennock, who has served notice that she intends to "dissent."

Sen. Charles W. Tobey (R-N. H.), who contends the wedding never should be consummated [B•T, Jan. 19], asserted his Congressional powers last week by instigating:

(1) A bill (S 538) to amend the antitrust section (311) of the Communications Act, and,

(2) A resolution (S Res 41) designed to give the Senate Interstate & Foreign Commerce Committee, of which Sen. Tobey is chairman, broad powers and $125,000 to investigate all types of communications, civil aeronautics, surface transport and maritime matters generally.

The first measure has potent possibilities, including the chance to hold hearings that could be maneuvered into a sweeping investigation of the FCC with ABC-UPT merger overtures.

The second is a pro forma resolution under which the Senate committee could investigate just about everything in the communications and transport fields. The Senate group had this authorization in the last Congress.

While the Senator is dividing attention between FCC affairs and railroad wrecks, another controversy centering around FCC's upcoming ABC-UPT decision is still alive. This is the exchange between the Commission and former Attorney General James McGranery.

There is no indication, however, that the FCC intends to veer from its position that the case is closed and will be decided on the record, as required by law, without regard to legislative overtures. And there's nothing now apparent to change the view that the FCC majority will favor the merger, following closely the thinking of Hearing Examiner Leo Resnick.

New Attorney General

A new Attorney General, Herbert Brownell Jr., has taken office. At this stage there is no indication of the impact the change in administrations and Attorneys General may have upon Mr. McGranery's argument with FCC Chairman Paul A. Walker. Chairman Walker has displayed eloquent indifference to the Dept. of Justice proposal that the upcoming ABC-UPT merger decision be delayed while the department scans the situation.

In any event, Sen. Tobey appeared to have made a flying start toward execution of his threat to subject the whole merger to committee scrutiny. It's his opinion, according to his public observations, that the merger might "vitiate" the antitrust laws and maybe the FCC really hasn't any legal authority to approve the transaction.

The Tobey bill is general and legalistic in its terminology, but these characteristics were believed to open the door for a committee inquiry since the measure naturally was referred to the chairman's own committee.

An opening group of "whereases" points to the public's right to enjoy the fullest variety of entertainment. Agreements to apply monopolistic restraints would deprive the public of such full enjoyment, it is explained, with the additional observation that "some persons" have been found conspiring to restrict entertainment.

SEN. CHARLES W. TOBEY
Possible Probe in Mind

The bill proposes that the following language be added to the antitrust section (311) of the Communications Act:

The Commission is directed to refuse a station license or the permit hereinafter requested for the construction of a station to any person engaged in the business of producing, distrubting or exhibiting entertainment for the public other than as a broadcast station license (or to any person directly or indirectly controlled by such person) if such person shall have been found to be in violation of any of the anti-trust laws of the United States in any suit or action, civil or criminal, brought by or on behalf of the United States or any agency thereof where such violation involves monopolizing or attempting to monopolize the production, distribution or exhibition of any form of entertainment or unlawful agreements restricting free and open competition in the production, distribution or exhibition of any form of entertainment.

Provided, however, that the Commission may by special order grant such license or permit to such person if it shall affirmatively appear to the Commission after notice and hearing

(a) That such person has not engaged in any such violation within five years prior to the application for such license, and

(b) That there is no probability that the unlawful practices which were the subject of such suit or action can or will be practiced in connection with radio communications by such person as a licensee or permittee, and

(c) That such person does not possess the power to substantially retrict the availability of such entertainment for broadcast.

The resolution giving broad investigative powers to the Senate committee would set up a fund of $125,000 subject to the will of the chairman. It is a type of authority frequently granted committees to carry on their normal functions. All main means of communication are covered—television, radio, telegraph and telephone. The resolution was referred to the Committee on Rules & Administration.

McGranery Denies Politics In Government's 'Star' Suit

FORMER Attorney General James P. McGranery has denied any "political implications" in the government's anti-trust action against the Kansas City Star Co. (WDAF-AM-TV).

Mr. McGranery was questioned on the Justice Dept.'s civil suit when he appeared Jan. 18 on NBC-TV's *Meet the Press*.

Mr. McGranery said he originally authorized the grand jury investigation without any prompting from former President Truman, who was charged in some quarters with inspiring the government's action. Mr. McGranery said the inquiry stemmed from complaints from local advertisers who protested the combination unit advertising rate.

Monopoly Charge

The Star Co. was charged with "monopolizing the dissemination of news and advertising" in Kansas City. Simultaneous with the grand jury indictment, the Justice Dept. filed a civil suit seeking revocation of the licenses of WDAF-AM-TV, owned by the publishing firm [B•T, Jan. 19, 12].

Mr. McGranery assured reporters there was nothing political in the action and added that The Star Co. had been cooperative in working with investigators to compile data on advertising contracts and other agreements.

FTC Files New Complaint Against Liggett & Myers

SECOND complaint has been issued by the Federal Trade Commission against Liggett & Myers Tobacco Co., New York, challenging certain advertising claims made for its Chesterfield cigarettes.

FTC filed its first complaint in U. S. District Court last October, seeking to enjoin the ad claims that Chesterfields produce no irritating effects on nose, throat and accessory organs. The complaint was dismissed by Judge Irving R. Kaufman and FTC took its appeal to the Circuit Court of Appeals, where it now pends.

The commission has maintained throughout this case that tobacco is a drug as defined in the Federal Trade Commission Act and that it is so recognized in certain medical publications.

Challenges Claims

FTC has challenged L&M claims that Chesterfields are "always milder," "better tasting," "cooler smoking" and give "no unpleasant after-taste." The claims, FTC said, are false, misleading and deceptive. Hearing was set for New York March 24 before hearing examiner William L. Pack.

FTC has instituted proceedings and issued similar orders against American Tobacco Co. (Lucky Strike), R. J. Reynolds Tobacco Co. (Camel), P. J. Lorillard Co. (Old Gold) and Philip Morris & Co. Ltd. (Philip Morris cigarettes).

The Liggett & Myers claims have been made in radio, television and other forms of advertising.

Donaldson to Senate Group

RAY S. DONALDSON, counsel to RTMA and candidate for FCC commissionership, was appointed staff director of the Senate Banking and Currency Committee, it was announced last week. He will take up his new duties next month.

"The railroads are a great machine which combines a vast variety of apparatus, devices and processes to turn manpower and fuel into ton-miles of freight service and passenger-miles of travel." Some of the ways in which new developments are combined with tested fundamentals on the 225,000-mile "proving ground" of American railroads, and some of the advances in actual results, are outlined in this article by one who is in a position to see the whole picture.

THE ADVANCING RAILS

By WILLIAM T. FARICY

President, Association of American Railroads

Nineteen twenty-one is a benchmark year in American transportation. It was the first full year after Congress and the country turned from the government operation of railroads of the World War I period and returned the railroads to private management. It marked the beginning of tremendous and dramatic changes in transportation, not the least of which have come about in railroading itself.

Back in 1921 government expenditures on building inland waterways were just in their beginning. Since then, the government has spent on such projects three times as much as had been spent in all the preceding century, with resulting changes in the transportation picture.

Back in 1921 the pneumatic truck tire was just coming into use and the business of intercity commercial transportation by motor vehicle was in its infancy. Since then, the total number of motor vehicles has been multiplied five times and the proportion of trucks to total motor vehicles has gone up half again as much as it was then. The resulting changes in the pattern of transportation are visible on every street and highway.

Back in 1921 commercial flying of air mail had just been inaugurated and general commercial transportation by air was still to be born. In the years since then, planes have multiplied in number and grown in size, cities have built more and larger airports to accommodate more and larger planes, the Federal Government has assisted in airport building and has provided and operates special airways with navigation and control features. A new industry of commercial air transportation has been created.

Transportation of crude petroleum by pipeline was well established before 1921 but since then the network of lines has been greatly extended and whole new networks of lines have come into being to carry refined petroleum products and natural gas in vast volume and over long distances.

The Growth of the Service

Beneath the earth, then, as well as on the earth, on the water and in the air, the past thirty years have seen changes in transportation plant and methods so profound and so dramatic that in the minds of many they have overshadowed the parallel advances made in the older method of transport by rail. To some, they may have seemed to forecast even the ultimate eclipse of the rails.

But with all the changes, the railroads have not only stayed in business but have gone ahead to render more service and better service to agriculture, to industry and to the defense of the nation. In 1921 the railroads performed freight service equivalent to moving 2,900 tons of freight one mile for every man, woman and child in the United States. By the peak prewar year of 1929, that amount of railroad service had grown to 3,700 ton-miles per capita. But in 1951, the railroads moved 4,200 ton-miles per capita and, during the peak years of the second World War, they had been called upon to move more than 5,500 ton-miles per year for each one of us in the country.

The people of this country continue to need railroads, and to need them more and more—especially in time of war, rearmament and national emergency. Then what have the railroads done to keep abreast of these needs?

The measure of what railroads have done is not to be found in any mere

catalogue of new devices adopted and new methods put into effect. I could list here more new and important advances in plant and methods than space permits or a reader's patience would tolerate. But the railroad is not a mere aggregation of devices and apparatus. The railroad, rightly viewed, is a machine, and the railroads as a whole are a great machine, which combines a vast variety of apparatus, devices and processes to turn manpower and fuel into ton-miles of freight service and passenger-miles of travel. The real measure of the advance of the railroads is to be found, therefore, in the way in which new developments and tested fundamentals are combined to produce transportation service with maximum economy and minimum expenditure of manpower, fuel and materials.

So, as a measure of the real advance of the railroads in the past three decades, let's take a look at how these elements were combined and used in 1921 and, thirty years later, in 1951.

Holding Down the Cost

The working time of employees for which railroads paid $1.00 in 1921 cost them $2.81 in 1951. For fuel, materials and supplies which cost $1.00 in 1921, the railroads paid in 1951 an average of $2.20. Taxes which took 5 cents out of each dollar of revenue in 1921, took 11½ cents in 1951. Wages, fuel, supplies and taxes make up at least 90 per cent of the cost of operating railroads, and every one of these items has more than doubled since 1921. Yet the ton-miles of freight service for which shippers paid in 1921 an average of $1.00 cost them in 1951 only $1.05, while the passenger-miles for which you paid $1.00 in 1921 actually cost you only 81 cents in 1951.

Of course it would not have been possible to move 1951 traffic with the railroad plant of 1921, but if it could have been done, the cost to the railroads of doing the work with that plant, but with wages, prices and taxes at present levels, would have been nearly three times what it cost to do the job with the improved plant of today. Necessarily, under such conditions freight rates and passenger fares would have had to be very much higher than they are now.

Efficiency: 1951 or 1921

The story back of this tremendous advance in efficiency and economy is one of research and invention, of investment in improved plant and equipment, of application of the new and better methods of operation which improved plant and equipment made possible.

Note that I do not say enlarged plant for in miles of track and in number of locomotives and cars the plant of 1921 was larger than that of the present day. But in capacity and efficiency the 1951 railroad is so greatly different from that of thirty years ago as to warrant the statement that we have railroads which in essentials are new.

Let us turn our thoughts back to the railroads of 1921 for a moment. There were 2,600,000 freight cars on the rails in that year. The output of freight service was 310 billion ton-miles. Of course 1921 was a year of business recession but even at the peak of the boom of the 1920's, when the railroad plant was working at capacity, a similar number of freight cars turned out only 450 billion ton-miles. Last year, with half a million fewer cars than were in use in the 1920's, the railroads produced 647 billion ton-miles of transportation—getting 80 per cent more service out of the average freight car than in the prewar peak of 1929.

Back in 1921 the railroads had 65,000 locomotives, of which all but 364 were steam power. The diesel locomotive was yet to be thought of. Since 1921 we first saw the development of the modern high-horsepower, high-speed, high-efficiency steam locomotive and then the introduction and rapid adoption of the diesel electric locomotive. So rapid has been this adoption that today 65 per cent of all freight service, more than 70 per cent of all passenger service and more than 75 per cent of all yard service is rendered by diesel electric locomotives. And 97 per cent of the diesel electric locomotives which are performing this service have been bought since 1940. More than 82 per cent have been bought since the end of World War II, and more than 38 per cent just in the two years, 1950 and 1951.

Right now we are seeing the beginnings of what may be a still further development in the use of turbine locomotives of at least three different types —steam turbines, oil-burning gas turbines and coal-burning gas turbines. In no field of transportation is there greater or more rapid change than in the motive power of American railroads.

And who can say that we may not have atomic powered locomotives some day? They are not yet in sight, but for four years now the Association of American Railroads has had a competent mechanical engineer duly accredited to the Atomic Energy Commission. One of his assignments is to observe, insofar as security regulations permit observation, the workings of the Commission staff to the end that whenever atomic power becomes practically usable for locomotion, the railroads will be ready to apply it.

As was said before, there were no diesel electric locomotives on American railroads in 1921. Neither were there any air-conditioned passenger cars, nor streamlined trains. Today virtually every passenger car in regular through service is air-conditioned and streamlined trains have become so prevalent that on main lines of principal passenger-carrying railroads they are now the rule rather than the exception.

(Continued on page 48)

Electronic Railroading

In 1921 there were only the rudimentary beginnings of automatic train control, and the marvel of centralized traffic control was still in the future. Now, on hundreds of stretches of railroads, switches are thrown and signals are set over districts of as much as 200 or 300 miles by one man seated before an illuminated map on which moving trains automatically show their position. In 1921 there were no coded track circuits which now transmit information in such detail and completeness that it might be said the signals do everything but talk. And even talking has been added in the postwar years as the equipment has become available, through the use of communication between moving trains and fixed stations, now widely adopted on at least fifty railroads.

In 1921 there were no push-button yards where electronics and compressed air, cooperating with gravity, enable one hump switch engine and a few men to do the work which in flat switching yards would have required the services of a fleet of engines and a much greater number of men.

The recorded and measured advance in actual results made possible by these and hundreds of other changes on the railroads will stand comparison with those of any segment of American industry. They are not the record of an industry which is static or asleep—or even the record of an industry which has just been awakened. They are the product of unremitting research, invention, ingenuity and investment. They are the achievement of an industry alert to present opportunities and alive to future possibilities.

The Basic Principles

Fundamental features of this railroad industry were arrived at long ago. There is the track, a surface unique upon the face of the earth which makes it possible for units of locomotive power to pull whole trains of cars. There is the principle of the train made up of separately and individually loaded cars combined into a mass unit for movement. There is the principle of standardization and interchangeability which permits the cars of any railroad to be operated in the trains and on the tracks of any other—and by so doing makes possible the truly continental character of American commerce.

These fundamentals which have shaped the growth and development of rails remain unchanged. Vast changes have occurred in the manner in which these fundamentals are applied to the job of transportation. One reason why they have so largely escaped general notice is that changes in railroading are necessarily in the line of evolutionary development rather than revolutionary departure.

Take, for example, the steel rail which is at the very foundation of our commerce. To the naked eye the only change observable in the past thirty years has been an increase of about 20 per cent in average weight. But this increase in weight is the smallest part of the change. As a result of protracted research carried on jointly by the railroads and the steel companies, the advances of metallurgy, manufacture and design have been such that rail laid today is only one-fourth as much subject to breakage as the rail of thirty years ago and will give 50 per cent more service life. The number of rail joints has been reduced since 1921 by lengthening the rail from 33 to 39 feet, a length which is soon to be doubled when the rolling of 78 foot rail begins. In many instances, rails are welded together end to end in long stretches of continuous or jointless rail.

What is true of rail is true in greater or less degree of every other element in the structure of the tracks. The average life of crossties has been more than doubled, for example, and the search for improved protection against decay and mechanical wear continues with some thirty different kinds of ties and methods of treatment being subjected to service tests.

The Biggest Proving Ground

One of the curious misconceptions about railroads is the belief that the industry has no proving ground to try out new ways of doing things. The railroads have the biggest proving ground in the world, and the only one big enough for their purposes, in their 225,000 miles of line. Sections of this trackage do not have to be set aside as "railroad proving grounds" because any and all of it is available to try out under test conditions new ways of construction, new types of equipment, new methods of operation, or any new idea or combination of ideas which offers enough promise in the laboratory to warrant testing in service.

At any given time many miles of railroad are so used under test conditions as carefully controlled as if the track were permanently set aside and devoted exclusively to these purposes. These tests may be short stretches of some particular track material or method of construction. Or they may be stretches of a hundred miles of line on which the performance of new types of freight car trucks, to take only one example, is tried out under operating conditions in test trains containing instrument cars which are really rolling laboratories.

Perhaps as good an example as any of how these things are tried out on the railroads is the story of the development in recent years of better freight car air brakes. The first testing was done with sets of air brakes of new types arranged on test racks in the laboratory at Purdue University to simulate the workings on a train of 100 cars. The type of brake which performed best on the test rack was installed in a special train in which the number of cars had been increased to 150. This train, which contained a number of instrument cars to record

performance, was operated on mountain railroads in Oregon and California. After this test, the brakes were returned to the laboratory to work out defects which had developed in the field. Then they were re-installed in a 150 car train and once more subjected to road tests, this time in Pennsylvania, before the new air brake was declared ready for general use. The cost to the railroads and the air brake companies for the entire test was in the neighborhood of ten million dollars—and now the whole process is being repeated in laboratory and train tests of still another brake—this latest one designed to handle trains more smoothly by varying the braking pressure according to the loaded or light weight of the cars.

This combination of laboratory research and field testing on the proving ground of our railroad tracks is essential in the further advancement of the industry. Much, though not all, of the laboratory work is done in the Central Research Laboratory of the Association of American Railroads located on the campus of the Illinois Institute of Technology in Chicago. No sooner was this large laboratory opened in 1950 than the rapidly growing research program of the Association of American Railroads began to outgrow it, and today we are going ahead with an additional building for enlarged mechanical research. A major project in this field, being pursued not only at the AAR laboratory but also by the Armour Research Institute of Chicago and the Franklin Institute of Philadelphia, looks toward improvement in the design, metallurgy, lubrication and performance of axle bearings of freight cars in our constant war on that enemy of railroad performance, the hot box.

Important as are axle bearings, they are, however, but one detail of freight cars—and freight cars are but one part of the whole great machine of the railroads. To measure the advancement of the enterprise as a whole, it is necessary to look at operations as a whole. There is no one measurement which reflects the results of all the changes and advances but the one which comes nearest to doing so is the hourly transportation output of the average freight train—a figure which reflects not only train loads but train speeds. So great has been the increase in both these factors that the average freight train of 1951 turned out almost three times as many ton-miles of transportation service per hour as the average train of 1921; almost twice as much as the train of 1931; and nearly 50 per cent more than the train of 1941.

The Needs of Tomorrow

Who, thirty years ago, could have foreseen the advances which have been made in railroading? And who today can say what the advance will be in the decades ahead?

Certain it is that never has there been greater zeal and activity in pushing out the frontiers of knowledge than there is today. And certain it is that much of the new knowledge to be gained can be, and will be, applied to railroads and railroading. Certain it is that the gains to be achieved will benefit not merely railroads but all of us in an America whose production, whose very life, depends on steel rails.

Just as the transportation needs of 1951 could not have been met by the railroad plant of 1921, so the needs of 1981, or for that matter the needs of 1961, cannot be met to the full with the plant, equipment and methods of 1951. To meet ever-growing needs with ever-better service, rendered at decreasing costs, there must be unremitting research and invention. But the most devoted and ingenious research is not enough by itself, unless somewhere there is someone willing to invest the money it takes to put the results of research to work. And that willingness to invest—so essential to the life of any business in a free-enterprise economy—depends upon earnings, or the prospect of earnings.

Railroad earnings have not been sufficient in these postwar years to warrant investment on the scale which is required. And yet during those same years the railroads have invested an average of more than a billion dollars a year in better tracks and terminals, better shops and signals, better cars and engines, better everything.

This tremendous program of improvement has been, on the part of the railroads, an act of faith—faith that the public and the government will come to recognize the railroads for the highly competitive industry they are rather than the monopoly they are supposed once to have been; faith that railroad management will be granted greater latitude to adjust rates, fares and services to changing and flexible conditions; faith that railroads will be recognized and treated as a business, created by private investment, subject to the same economic necessities as any other business, and entitled to the same chance to operate on a business basis, without the added pressures of unnecessarily rigid restrictions or of government-aided competition.

We have it on Scriptural authority that faith will move mountains—but I suppose this to mean that the actual moving job has to be done with the tools which someone has the faith to provide. The people who have invested in railroads have provided for America a great machine for moving mountains of goods and products—a machine which in World War II moved more than 90 per cent of all war freight, and which today, and on any other average day, moved more than ten ton-miles for every man, woman and child in the United States. On faith, a tremendous job has been done, striking advances have been made. And if that faith shall prove to have been justified, jobs bigger than we have yet seen will be done, and advances even more striking will be made as America moves forward to her great destiny.

PENTAGON, Washington, D. C., was the scene of ceremonies honoring the principals responsible for success of the joint NBC-U. S. Navy TV series *Victory at Sea*. Outgoing Navy Secretary Dan A. Kimball (l) capped presentation of Distinguished Public Service Award with firm handclasps. L to r: Secretary Kimball; Richard Rodgers, who composed special narrative symphonic music; Robert W. Sarnoff, vice president in charge of NBC-TV's film division, and Henry Salomon, originator, producer and co-author of public service series. Service award is highest civilian honor accorded by Navy [B•T, Jan. 19].

THEATRE TV INQUIRY RESUMES TODAY

Several months and possibly a year of two-days-per-week sessions will be needed to settle basic policy questions.

FCC'S EXTENSIVE inquiry into proposals for allocation of frequencies and promulgation of rules for a nationwide theatre television service will resume at 10 a.m. today (Monday) before the Commission *en banc* in the auditorium of the U. S. Dept. of Commerce.

Numerous basic policy questions are involved in the movie industry's bid for groups of 30 mc channels on an exclusive basis in the spectrum above 5,000 mc [B•T, Jan. 19]. A preliminary hearing was held last fall at which engineering and accounting testimony was received [B•T, Oct. 27, 1952].

According to FCC, the Commission will sit only Monday and Tuesday of each week for the theatre TV proceeding in order to allow time for consideration of other broadcast and non-broadcast matters. Since the theatre TV proponents alone have some 26 days of direct testimony estimated, observers see the hearing continuing for several months, perhaps even as long as a year, according to one prediction.

Western Union Telegraph Co. has petitioned the Commission to issue an order providing for an investigation pursuant to Sec. 201(a) of the Communications Act to determine "whether it is necessary or desirable in the public interest that physical connections and through routes between common carriers, and charges applicable thereto, and divisions of such charges, be established in the event the Commission should determine that the theatre television transmission services involved in this proceeding should be established on a common carrier basis."

Last week, the Motion Picture Assn. of America and National Exhibitors Theatre Television Committee filed a petition in support of the Western Union request.

Last Thursday, FCC issued the following procedure for the taking of further evidence:

I. Direct testimony on engineering and accounting matters. Such testimony will be received from witnesses for the following parties in the order indicated:

A. National Exhibitors Theatre Television Committee and Motion Picture Association of America Inc.
B. American Telephone and Telegraph Co.
C. Radio Corp. of America.
D. Western Union Telegraph Co.
E. American Petroleum Institute (A. Earl Cullum Jr. only at this time and cross-examination of this witness will be heard following his direct testimony).

II. Cross-examination of witnesses who have presented evidence on engineering and accounting matters. Counsel for each party will be required to indicate upon conclusion of all direct testimony on engineering and accounting matters, which witnesses they wish to have recalled for cross-examination.

III. Rebuttal testimony on engineering and accounting matters. (Parties who desire to present rebuttal witnesses should notify Commission counsel promptly, giving the names of the witnesses.)

IV. Testimony on issues other than accounting and engineering. Cross-examination of each witness will immediately follow that witness' direct testimony. Such testimony will be taken in the following order:

A. National Exhibitors Theatre Television Committee and Motion Picture Association of America Inc.
B. Theatre Network Television Inc.
C. Theatre Television Authority.
D. Western Union Telegraph Co.
E. American Telephone & Telegraph Co.
F. Independent Telephone Assn.
G. American Petroleum Institute.
H. Aeronautical Radio Inc.
I. American Trucking Assn.
J. American Civil Liberties Union.

Other parties to this proceeding not listed above have indicated in their summaries of testimony filed with the Commission January 12, 1953, that they will limit their participation to cross-examination and such rebuttal testimony as may be necessary.

The Commission expects each party to cooperate in expediting the conclusion of the hearings by making their presentations as brief as possible and, wherever possible, by reducing direct testimony, in whole or in part, to writing and offering it for the record in that form in lieu of oral presentation.

Notice is hereby given that sessions of this hearing will be held on Mondays and Tuesdays only of each week.

Mead Resigns as FTC Head

JAMES M. MEAD last Wednesday resigned as chairman of the Federal Trade Commission, a post he held since May 24, 1950. He is expected to continue, however, as a member of the FTC until Sept. 25, 1955.

WGRD Protests FCC's Ch. 35 Grant to Versluis

PROTEST against grant of uhf Ch. 35 in Muskegon, Mich., to Versluis Radio & Television Co. for a new TV station was filed with the FCC last week by WGRD Grand Rapids, Mich., claiming that unfair competition will result from the grant.

This is believed to be the first such protest since the Communications Act was amended by the McFarland Act.

Versluis Radio & Television Co. is headed by Leonard A. Versluis, president and 100% owner of the company. Mr. Versluis also operates WLAV-AM-FM Grand Rapids.

WGRD claims that Mr. Versluis will operate the new TV station as a Grand Rapids outlet rather than as a Muskegon station. If this happens, WGRD claims, Mr. Versluis can offer a combination rate for the AM, FM and TV stations. Because WGRD can base its rates only on its AM operation, it claims it would be placed in an unfair competitive position.

Before Mr. Versluis had received his grant for the new TV station, WGRD filed a petition with the FCC requesting that the application be set for hearing. However, on the same day the Commission granted Mr. Versluis' application, Dec. 23, 1952, it also dismissed WGRD's petition on the grounds the Grand Rapids station was not a party in interest [B•T, Dec. 29, Sept. 22, 1952].

In its protest of the grant, WGRD recites substantially the same claims it had made in its earlier petition.

WGRD also alleges that Mr. Versluis, who was formerly permittee of WLAV-TV Grand Rapids (now WOOD-TV), "trafficked" in the permit because he sold the station within 20 months after it began operation and made a "profit" of $1 million in the sale.

Mr. Versluis was granted a construction permit for WLAV-TV July 29, 1948, the petition stated, and interim operation began Aug. 15, 1949. On June 27, 1951, an application was filed for a license to cover the CP, while on June 26, 1951, the contract for sale of WLAV-TV was signed with WOOD.

WGRD also charges that there were discrepancies between the financial statements filed by Mr. Versluis in the bid for assignment of permit and the request for license for WLAV-TV.

WGRD is an applicant for uhf Ch. 23 in Grand Rapids, but the application is mutually exclusive with another filed by W. S. Butterfield Theatres Inc.

Antitrust Suit Against NFL Opens Today in Philadelphia

ANTITRUST action against the National Football League will open today (Monday) in the U. S. District Court for the Eastern District of Pennsylvania at Philadelphia, with the Dept. of Justice claiming the league's restriction of football broadcasts and telecasts constitutes restraint of trade.

Judge Allen K. Grim will preside at the juryless trial, expected to last at least two weeks. Judge Grim last year dismissed a league request to drop the civil suit [B•T, Jan. 14, 1952].

The pro football case is regarded by attorneys in and out of government as a test case. While the Justice Dept. has been closely observing the National Collegiate Athletic Assn. restriction of football telecasts to a one-network-one-game-a-week schedule, it has indicated unofficially no action will be taken against colleges until the pro case is decided.

To sell frozen foods to inland Californians
(AND WESTERN NEVADANS)

Be on the Beeline

Frozen foods or hot tamales, the way to sell in *inland* California is . . . on the BEELINE! It's the five-station radio combination that gives you

THE MOST LISTENERS More than any competitive combination of local stations . . . more than the 2 leading San Francisco stations and the 3 leading Los Angeles stations *combined.*
(BMB State Area Report)

LOWEST COST PER THOUSAND More audience plus favorable Beeline combination rates naturally means lowest cost per thousand listeners. (BMB and Standard Rate & Data)

McCLATCHY BROADCASTING COMPANY

SACRAMENTO, CALIFORNIA Paul H. Raymer, National Representative

COMMENT STIRRED ON TV AUXILIARIES

The Commission's proposal to narrow the band width of auxiliary TV channels stirred more individual ideas by organizations than either approval or disapproval. Each group spelled out its stand.

COMMENTS filed with FCC last Monday with respect to the Commission's proposed amendments to rules governing television auxiliary stations were more in the form of counter-proposals than either approval or disapproval of the proposed changes.

NARTB, NBC, American Telephone & Telegraph Co. and Raytheon Mfg. Co. filed comments. Only AT&T appeared to have made very extensive tests employing the standards proposed in the amendment of Part 4 of the Commission's Rules.

Three groups of channels are now available for TV auxiliary broadcasting, under present FCC rules: 1990 to 2100 mc, 6875 to 7125 mc and 12,700 to 13,200 mc.

Among other changes proposed in the Commission's amendment was one that would increase the number of channels available to telecasters for auxiliary services in the 7000 megacycle band through a reduction in channel width from 25 to 19 mc.

Under this plan, the 6875-7125 mc band would be divided into ten 19 mc channels for television broadcasters and three 20 mc channels for communications common carriers. Telecasters would be allocated 6875 to 7065 mc for their 19 mc channels.

NBC's Brief

NBC pointed out that at the present time only the 7000 mc band is suitable for television auxiliary services because the equipment available in the 2000 mc band is not readily portable.

With regard to the changes proposed in the 7000 mc band, NBC said there were three problems. The first is the inadequacy of the number of channels available to television broadcasters. As an example, NBC pointed out the situation in the New York area where there is a shortage of spectrum space in the 7000 mc band for the auxiliary services.

The second problem is that of adjacent channel interference, which NBC noted was recognized in the Commission's notice of proposed rule making. But the network said the seriousness of this interference cannot be evaluated for equipment now in use.

The third problem relates to a comparative performance (distance range or signal noise level) of equipment which may be developed for 19 mc channeling with that now found in the 25 mc equipment. NBC said, "It seems inevitable that the reduction in band width will degrade performance somewhat."

It is NBC's position that the limitation on the number of channels available on the one hand, and on the other hand the inadequacy of present equipment to operate on adjacent channels with reduced channel width, raises very serious problems in the large market areas.

NBC said that the ability to continue many of the important public service types of programs will be impaired by the immediate adoption of the Commission's proposal.

The best present solution to the problems raised in the Commission proposal, according to NBC, is to make more spectrum space available in the 7000 mc band for TV auxiliary broadcast stations.

Although the Commission's proposal to narrow the band width may be found to be feasible, NBC said, the proposal should not be adopted until equipment has been developed and adequate field tests have been made to assure its feasibility.

NARTB agreed with the NBC suggestions in its comments on the contemplated changes in the 7000 mc band, and said that what the FCC should do is assign additional microwave frequencies through the apportionment of the 7065 to 7125 mc portion of the band to television broadcasters. With those frequencies now available only to common carrier use made available to television broadcasters, there would be a total of ten 25 mc channels for TV pickup and STL work.

In its comments, NARTB also requested that the status quo be maintained with respect to the 2000 mc band, and that there be a further amendment tacked on the FCC proposal which would include a plan to permit the use of a coding device for auxiliary's identification.

In its tests using the standards proposed by the Commission, AT&T found that in the case of transmission paths diverging at an angle of 34 degrees or more, it appears that no serious interference problems will be experienced with 19 mc separation between channels in the 7000 mc band. AT&T reported that its tests also indicated that it is possible, under controlled conditions, to operate two parallel circuits 19 mc apart for short periods of time without serious interference.

However, AT&T said, successful operation on parallel paths appears to be contingent upon the use of cross-polarization, precise frequency control to prevent the frequency separation from becoming less than 19 mc, and special line-up procedures and monitoring. The latter two conditions impose serious practical operating problems, AT&T claimed.

The 7000 mc equipment is designed for portable use and neither the transmitter nor the measuring equipment can be expected to maintain the necessary high degree of precision under practical working conditions. Also, AT&T said, it is impossible to make frequency adjustments during the transmission without interfering with the picture signal. In addition, the danger of the receiver locking to the adjacent channel during a fade or momentary power failure will be increased with the reduced separation.

Operating Difficulties

The firm recommended that in view of the operating difficulties encountered, the Commission maintain the present 25 mc channel widths.

The tests AT&T made were carried out Jan. 6, 7 and 12, and were between the Empire State Bldg. and AT&T's building at 176th St. in New York, a little more than 7 miles apart.

Raytheon, too, said the proposal to reduce the channel width in the 7000 mc band was not appropriate at this time. But Raytheon seemed to question the need for additional channels more than the difficulties which might be involved should the channel width be reduced.

FCC Annual Report

COPIES of FCC's annual report for fiscal 1952, issued a fortnight ago [B•T, Jan. 19], were put on public sale last Monday by Superintendent of Documents, Government Printing Office, Washington 25, D. C. Price is 40 cents. FCC itself does not distribute copies.

COMPTON FAVORS IIA RESHUFFLING

Relayed in the Acheson IIA report, Dr. Wilson Compton urges bolstering of overseas staffs and reshaping of radio activities. These views fall on attentive ears as Congress considers integration of the foreign information programs.

REORGANIZATION of the International Information Administration with greater emphasis on overseas radio activity "should be diligently pressed," according to Dr. Wilson Compton, IIA administrator.

His views were given to former Secretary of State Dean Acheson and were included in Mr. Acheson's semiannual report on IIA.

The report was released as the administration changed hands.

Dr. Compton referred to strengthening of overseas staffs and reshaping of radio and other media field activities. He said the IIA program is gaining in the fight against "Communist propaganda," and said agreements are in the making for integration of IIA's foreign information activities with Mutual Security Agency and Technical Cooperation Administration.

Congress Interest Up

The report was released as Congress became increasingly interested in coordinating U. S. foreign information programs, perhaps under a single agency with or without psychological warfare functions. The Eisenhower Administration plans to strengthen both these aspects, with realignment of agency structure [B•T, Jan. 19].

A Senate Foreign Relations information subcommittee has been studying overseas information activities, including Voice of America. In executive session last Wednesday, the subcommittee, headed by Sen. William Fulbright (D-Ark.), agreed to hold hearings, probably in February. A resolution will be submitted in the Senate to extend the study and deadline for its report beyond Jan. 31. Staff members are preparing an interim report on Voice operations based on field trips last December.

Meanwhile, similar machinery was set in motion in the House. Rep. Edith Nourse Rogers (R-Mass.) introduced a proposal (H Res 95) to create a select committee to study the problem. It would seek to "determine means by which the national interest may be best served in time of peace by the conduct of international information services and in time of war by a civilian psychological warfare agency." Resolution was referred to the House Rules Committee.

FTC Case Set Aside

FEDERAL Trade Commission case pursued since May 1943 against Carter Products Inc., directing that the word "liver" be removed from the name "Carter's Little Liver Pills" and that many advertising claims be discontinued, was set aside last week by the Ninth Federal Circuit Court. Carter products uses spot radio extensively.

First

First— In the Fabulous Texas Great Plains Market

First— KDUB-TV Lubbock, the first TV station on the Texas Great South Plains. The first new Texas station since the freeze lifted.

First— Retail sales for Lubbock are substantially higher than the average for Texas, and are among the highest of any city in the Southwest*. As a matter of fact, KDUB-TV brings TV to a vast untapped $389,756,000** West Texas market, and 317,700 potential customers**. To be specific, it's the 3rd market in the nation, measured in terms of personal and family buying power.

First— TV set sales are breaking records in this tremendous, aggressive market. An estimated 15,200 families are now reached, with many added daily.

Reach a fabulous NEW market with KDUB-TV, Lubbock. The acceptance and impact of TV in the Texas South Plains area is terrific and gains momentum daily. Buy TV in a growing market — Buy KDUB-TV.

Govt. Electronics Suit Fades as Threat to Firms

CLOUD of criminal implications which has hung over electronics manufacturers the past 12 months in the wake of a grand jury inquiry into possible anti-trust violations faded over the horizon last week.

Attorney General James P. McGranery announced last Monday that he had revoked the grand jury authorization looking toward possible criminal prosecution.

At the same time, he held out the possibility of civil litigation and court injunctions and stressed that the investigation would continue. On the basis of data gathered by the grand jury, he absolved electronics manufacturers of "the use of force, strong-arm tactics or activities of a similar punitive nature."

While Mr. McGranery pointed out that criminal action was still possible "if warranted," authorities were inclined to dismiss such an eventuality and felt the Justice Dept.'s action represented a "face-saving" move on the eve of Mr. McGranery's departure from office.

Manufacturers were reluctant to comment on the development at this time, though the informal consensus of some high-placed authorities was that it would remove another obstacle in the path of color television progress and permit them to proceed on defense orders unshackled by government restraints.

Color TV Implicated

It will be recalled that some of the data requested for grand jury presentation last May touched on the color television issue, with implications that some manufacturers had banded together in concerted action against FCC-proposed TV standards for the production of color-casting equipment.

Mr. McGranery made no reference, direct or indirect, to color television in his announcement. He traced the investigation to January 1952 when the grand jury was authorized to explore for possible violations of the anti-trust laws. He noted the grand jury process was needed to ascertain the facts.

Virtually all of the major electronics firms—and Radio-Television Mfrs. Assn.—were included in the "industry-wide" probe, with RCA asked to furnish voluminous data on patent practices.

RCA later lost out on its motion to modify patent provisions of the subpoena which it claimed should have been dismissed as inoperative under certain consent decrees set forth over 20 years ago. RCA challenged the subpoena as "so broad, sweeping, vague and indefinite that compliance would be unreasonable and oppressive" [B•T, Oct. 27, Sept. 8, 1952].

Referring to the investigation, Mr. McGranery said the Justice Dept. study of the material "suggests that removal of whatever restraints may exist in the industry should more properly be the subject of civil litigation (misdemeanors) than of criminal prosecution."

The investigation originally was launched in the Justice Dept. under the stewardship of then Atty. Gen. J. Howard McGrath. The subpoenas called on manufacturers of AM, FM and TV transmitting and receiving equipment—and military products—to furnish data encompassing charges that FM was stifled in its growth; patent litigations, sales and production figures; royalties; exchange of technical material; expenditures for research and development in radio, television and related electronics fields; restrictions on types or quantities of AM-FM-TV receivers, and stockholders reports [B•T, March 3, 1952].

House Group Unset

HOUSE Interstate & Foreign Commerce Committee, named last week, has not been organized nor has any schedule been decided on meetings with officials of the regulatory agencies over which the House committee has jurisdiction.

Question of whether the Committee will authorize continuance of its investigation programs may also be decided when it organizes—hoped for this week.

Personnel of the House commerce group follows:

REPUBLICANS—Charles A. Wolverton (chairman), N. J.; Carl Hinshaw, Calif.; Joseph P. O'Hara, Minn.; Robert Hale, Me.; James I. Dolliver, Iowa; John B. Bennett, Mich.; Richard W. Hoffman, Ill.; John V. Beamer, Ind.; William L. Springer, Ill.; Alvin R. Bush, Pa.; Paul F. Schenck, Ohio; Joseph L. Carrigg, Pa.; Herbert B. Warburton, Del.; Steven B. Derounian, N. Y.; Thomas M. Pelly, Wash.; J. Arthur Younger, Calif.; John W. Heselton, Mass.

DEMOCRATS — Robert Crosser, Ohio; J. Percy Priest, Tenn.; Oren Harris, Ark.; Dwight L. Rogers, Fla.; Arthur G. Klein, N. Y.; Thomas B. Stanley, Va.; William T. Granahan, Pa.; F. Ertel Carlyle, N. C.; John Bell Williams, Miss.; Peter F. Mack Jr., Ill.; Homer Thornberry, Tex.; Louis B. Heller, N. Y.; Kenneth A. Roberts, Ala.; Morgan M. Moulder, Mo.

McCarthy Data Sought In Madison Complaint

FCC CHAIRMAN Paul A. Walker last week wrote Sen. Joseph McCarthy (R-Wis.), suggesting that the Senator immediately submit any information he may have respecting the qualifications of Badger Television Inc., vhf Ch. 3 applicant at Madison, Wis.

Senator McCarthy a fortnight ago protested the Badger application, stating he wished to bring evidence to FCC showing "it would be against the public interest" to have either William T. Evjue, editor of the *Capital Times* and president of the applicant, or Cedric Parker, city editor of the *Times,* "exercising any control over a television station" [B•T, Jan. 19].

Badger Television is a combination of two TV applicants—WIBA and Television of Wisconsin Inc. [B•T, Dec. 22, 1952]. WIBA is owned by the same interests which publish the *Wisconsin State Journal* and the *Capital Times.* Both papers have opposed Sen. McCarthy. Badger Television's application is mutually exclusive with the Ch. 3 bid of WISC Madison and comparative hearing will be required.

Walker Answers ACLU

RESERVATION of noncommercial, educational television channels will not automatically expire on June 2 but will continue an "indefinite" period, FCC Chairman Paul A. Walker stated last week in a letter to Patrick Murphy Malin, executive director of the American Civil Liberties Union, New York.

Chairman Walker pointed out that after June 2 the Commission will consider petitions to amend the TV allocations table, respecting both commercial and noncommercial channels, but that each such petition would be considered on its individual merits. This even means educators could petition to change the status of a commercial channel to a reserved noncommercial facility, he stated.

Mr. Malin wrote Chairman Walker in early December to express ACLU's support for the reservation of channels and to inquire as to the status of reservations after June 2, expiration of the Sixth Report's one-year rule precluding the filing of petitions to make changes in the allocation table.

RTMA Expands Information

INFORMATION department of Radio-Television Mfrs. Assn. headquarters in Washington, D. C., has been expanded, according to James D. Secrest, executive vice president.

Peter H. Cousins, information director, has been named special assistant to Mr. Secrest and staff assistant to Technical Products Division. Tyler Nourse has been promoted from assistant information director to editorial director in charge of publications. Herbert Francis Hodge Jr. joins the staff today (Monday) as editorial assistant to Mr. Nourse. The changes followed resignation of Ralph M. Haarlander as assistant to the Technical Products Division.

Message Stress Urged

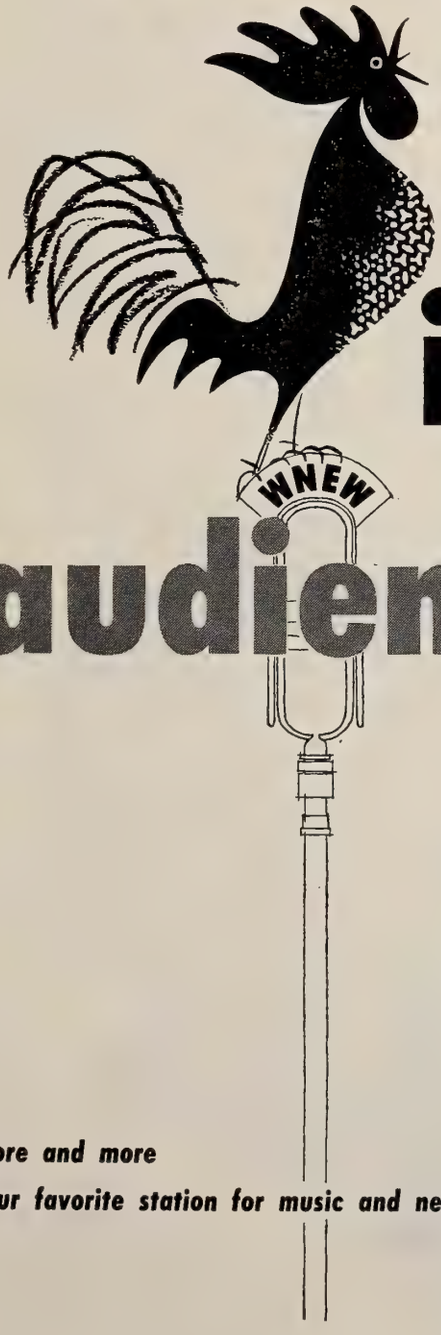
DEPLORING over-emphasis in radio commercials on "sound effects, songs and spirited voices," John F. Hardesty, director of local promotion for BAB, told the Advertising Club of Hartford last Thursday that local advertisers would "discover the true sales impact" of radio if they stressed the basic sales message.

He said progress has been made in integrating attention-getting sound effects and special radio slogans into commercials but added that "this has been done, in many instances, at the expense of the most important element—the advertiser's sales message."

RTMA Names Instructor

INDUSTRY training course in TV set servicing will be directed in New York by Paul B. Zbar, member of Institute of Radio Engineers and long active in TV training schools, according to Radio-Television Mfrs. Assn. The course, first of its kind under RTMA sponsorship, is designed to upgrade present TV servicemen and increase their technical efficiency. A syllabus of the course, to be developed at the privately endowed New York Trade School, will be prepared for use by vocational training schools throughout the country. RTMA members are underwriting the special course.

APRA Honors WHAS-AM-TV



WHAS-AM-TV Louisville will receive a certificate of outstanding achievement in public relations at the American Public Relations Assn. eighth annual convention. APRA members from 43 states and territories are expected to attend the March 2-3 convention in Washington, D. C.

Airlines Advised

IMPORTANCE of radio advertising to airlines is pointed up in a 15-page presentation, "CAVU (ceiling and visibility unlimited) for Airlines With Radio," being distributed by BAB to its members. The booklet gives eight reasons for airlines to use radio and points out that "virtually everyone is an airline travel prospect—and radio is the only medium that reaches everyone."

CAPITOL PROPOSES MONTHLY FEE FOR SAMPLE RECORD SERVICE

A $10 charge is proposed for stations though free performances of records are credited with building the phonograph business to its present lofty peak. WJPS Evansville gets a form letter and tells the record company exactly what it thinks about the idea.

MAKERS of phonograph records, receiving countless millions of dollars worth of free radio promotion, may want to charge broadcasters for the chance to give them all this publicity.

Signs were apparent last week that record companies want to set up their own version of ASCAP, perhaps in an effort to heap still another burdensome impost on broadcasters. Latest to revive the idea is Capitol Records Inc., whose national promotion manager, Gene Becker, is contacting stations via a form letter.

Writing Jan. 14 to the record librarian of WJPS Evansville, Ind., Mr. Becker proposed a plan to charge $10 a month for its popular and western releases.

In reply he received a scorching letter from Robert J. McIntosh, WJPS general manager.

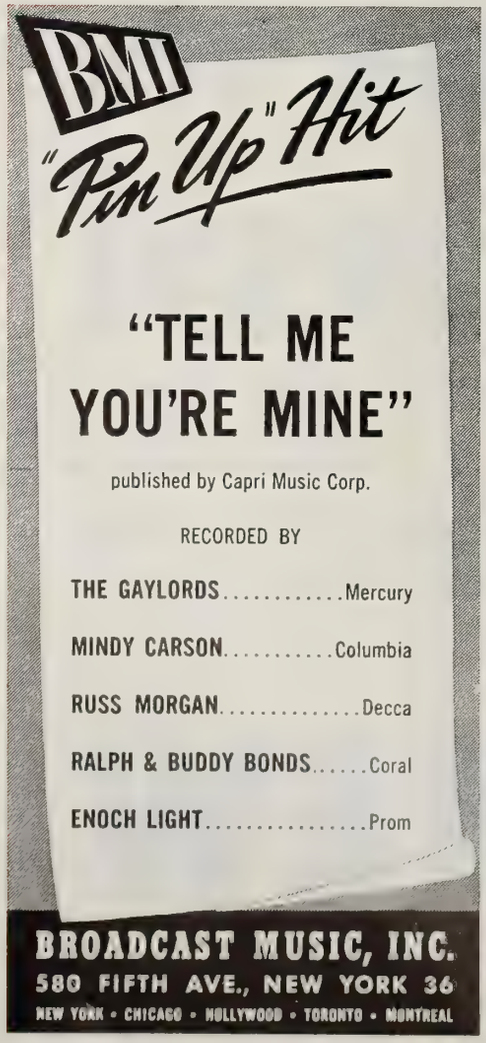
"When I read your letter I about blew my top," Mr. McIntosh replied in a letter dated Jan. 19. He continued:

Very frankly, Mr. Becker, radio should be charging Capitol Records for exploiting their stars. This move is a good way for Capitol Records to be thrown off the air completely.

If the other record companies follow your pattern I can see a real showdown where all of the record companies will have to buy radio time if they want their records played on the air. WJPS has no intention of paying Capitol Records one cent and you can take us off your mailing list immediately if you so desire.

Several other station managers contacted by BROADCASTING • TELECASTING said they had been approached in the past with the fee idea but had rejected it. The records didn't stop, they added significantly.

It is common practice for record companies to shower their new offerings on broadcasters, particularly in the popular-folk lines. Usually the pressings are of special quality. At many stations each disc jockey will receive records, many of them owning their own libraries.



Sensational expansion of the phonograph record industry from the low point of the 30s is generally credited in a substantial degree to broadcast performance.

Semi-Flex Pressings

Capitol Records in its current proposal would furnish semi-flex pressings each week, prior to national release date where possible. For this service it would make "a nominal charge of $10 per month" for popular and western releases, $5 for western alone or $8 for popular alone.

"We are fully aware of the great exploitation value we receive from radio programming of our records and albums," Mr. Becker wrote. "Therefore, we have established what we sincerely believe is an equitable figure for the service—when you consider that the regular price of the records you will receive in a month is far in excess of the monthly amount we will charge. Naturally, the records furnished will be your property."

Concluding, he said, "Many thanks for your interest in Capitol Records. We sincerely hope you will be able to take advantage of one of the above services, and you may rest assured that we will give you the best possible service. Whatever course you decide to follow, we want you to know that we do appreciate your past and present cooperation."

Gerbel Returns to KJR After Gubernatorial Race

ARTHUR GERBEL Jr. has returned as assistant general manager of KJR Seattle after serving successfully as state campaign manager for the re-election of Washington's Gov. Arthur B. Langlie.

Mr. Gerbel

Mr. Gerbel, who is completing 17 years at KJR, is secretary-treasurer of the Seattle Rotary Club, a member of the U. of Washington Alumni Assn.'s board of trustees, Catholic Children's Services board of directors and the local Washington Athletic Club's board of governors.

LOOKING over late details of new WTTG (TV) Washington show, *Wolff at the Door*, sponsored by Mid-Atlantic Appliances and Admiral Corp., are seated (l to r), Walter Compton, WTTG general manager, and Irving Grossberg, Mid-Atlantic vice president-treasurer; standing, I. V. Dalo, Mid-Atlantic general sales manager; Leo Lisee, Admiral regional sales manager, and Bob Wolff, star of the half-hour, five-a-week, women's show.

KGA Spokane Sold For Reported $500,000

SALE of KGA Spokane, Wash., 50 kw ABC affiliate on 1510 kc, to the Bankers Life & Casualty Co., Chicago, was completed Tuesday by Gonzaga U. of Spokane, licensee. The transfer, involving an estimated $500,000, is subject to FCC approval.

The Rev. Francis J. Corkery, S.J., president of Gonzaga, and John D. MacArthur, president of the insurance company, completed negotiations in Chicago last week through Blackburn-Hamilton, radio and television station broker.

KGA is the first broadcast property to be acquired by Bankers Life & Casualty Co., which has several insurance properties in Washington. The agreement includes the station, structure and land.

The Spokane station was founded in 1926 and in 1932 was acquired by NBC, which bought KJR Seattle, KYA San Francisco and KEX Portland after the Northwest Broadcasting System, headed by Adolph Linden, had collapsed. The stations were purchased from banks holding Northwest securities. From 1933 to 1939 KGA was leased by NBC to Louis Wasmer, who bought the station for about $25,000 in November 1939.

Ten years later, Mr. Wasmer, who owned KGA as an individual, sold the station to Gonzaga U. for about $425,000, plus accounts receivable, which brought the overall consideration to about $550,000. That sale also was handled by Blackburn-Hamilton.

Although federal tax laws exempt incomes of religious and educational groups, Washington state has changed its statutes to revise the exemption status of such groups with respect to their commercial properties.

WGFG Changes to WKMI

UPON change of call letters of WGFG Kalamazoo, Mich., to WKMI (K for Kalamazoo, MI for Michigan) on Jan. 1, the station helped bring about public acceptance of the new call letters by a series of promotions.

Advance station breaks told of the change and a newspaper ad pictured a baby in diapers with the headline, "It's time for a change (of call letters)." Disc jockeys promoted the change in various ways and a New Year's Day half-hour show featuring all the station staff celebrated the new call letters.

Gray Beaten

BARRY GRAY, radio and television commentator and disc jockey, was beaten by three men on Jan. 16 as he was leaving his automobile to go to a DuMont Television Network studio in New York. This was the second such attack on Mr. Gray in the past four months [B•T, Sept. 8, 1952].

Mr. Gray received medical attention in the studio and appeared briefly on his 11-11:15 p.m. EST television show. He missed his Saturday and Sunday radio shows on WMCA New York but resumed work on his radio and TV programs last Monday.

At the time he was beaten on Sept. 4, Mr. Gray attributed the attack to persons opposed to his reports on the resurgence of "Neo-Nazi" movements in the Yorkville section of New York. He offered no specific reason for the latest incident.

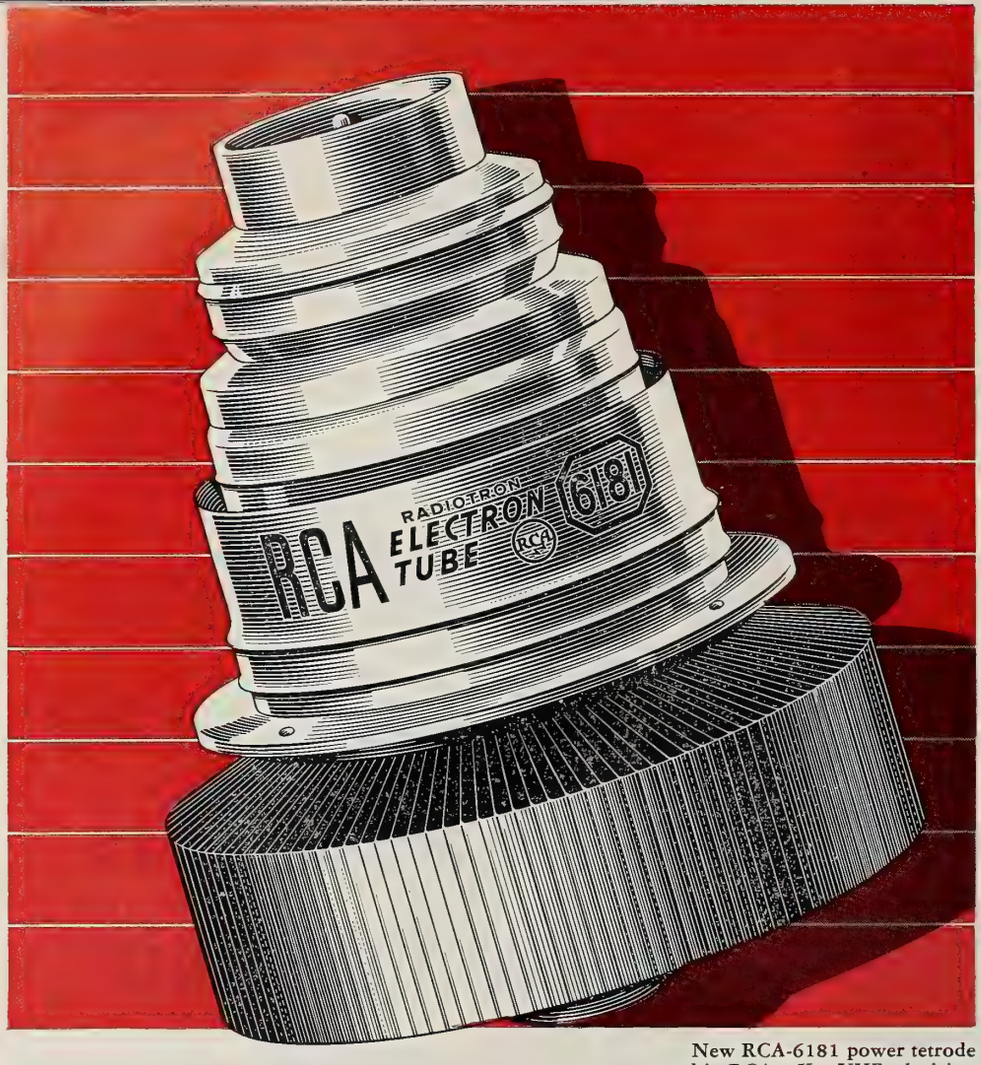
'Customer Contact' Plans Evolve at WMAL-AM-TV

WMAL-AM-TV Washington, D. C., has evolved merchandising agreements with Peoples Drug Stores and the Food Town grocery chain giving drug and food advertisers who buy station time prominent in-store product displays.

The arrangement ("Customer Contact") provides that an advertiser buy spot announcements or programs on either WMAL or WMAL-TV for one week. In return, Peoples and/or Food Town will feature the product in window or in-store displays, the choice resting with the client. Agreement goes into effect Feb. 1

Wilkins Coffee will be featured the first week in the 75 Peoples drug stores throughout the Washington area. Peoples is a substantial radio user, with a heavy newscast schedule. Food Town does over $20 million business annually.

Similar plans have been tried in New York City, Detroit, Cincinnati and other cities. But WMAL claims it is the only regular merchandising tie-in of a grocery chain in D. C.



Kenneth H. Berkeley, vice president and general manager of WMAL-AM-TV (the *Washington Evening Star* stations), was present at negotiations involving Clayton R. Sanders, advertising director for Peoples, and Alan R. Klompus, advertising manager for Food Town.

Patt Sees Prosperous '53, Cites WJR Sales Increase

RENEWED appreciation by advertisers of radio's flexibility and universality was given last week by John F. Patt, president of WJR Detroit and WGAR Cleveland, in predicting another prosperous year for radio in 1953.

Opening the annual WJR staff conference in Detroit last Monday, Mr. Patt pointed to an increase of $90,479 in WJR local and national sales for 1952 over those of 1951, saying the increase was significant because WJR rejected "more than $250,000" in business that did not meet the station's standards.

Worth Kramer, WJR vice president and general manager, revealed total sales of $3,383,292 for the station in 1952, praising Elmer Wayne, WJR sales manager, for his part in the accomplishment. Also credited were Gordon Gray, vice president in charge of WJR's New York office, and Henry I. Christal Co., national representatives, and Radio Time Sales Ltd., Canadian representatives, both appointed last year.

New RCA-6181 power tetrode used in RCA 1-Kw UHF television transmitter type TTU-1B.

New UHF Stations

with the RCA-6181

UHF TELEVISION is now a reality! And the RCA-6181 power tetrode is playing a vital role in new station operations.

Many features have been incorporated in this new tube which provide important operating advantages. The use of forced-air cooling permits substantial operating economies: ceramic bushings are used between terminals to reduce power loss. The coaxial-electrode structure of the 6181 is designed especially for use with high-power circuits of the coaxial-cylinder cavity type; its indirectly heated, low-temperature, coated cathode assures long serviceability.

Specify RCA when you need tubes for replacement.

ELECTRON TUBES HARRISON, N. J.

KOPO-TV Schedules Feb. 1 Target for Interim Airing

KOPO-TV Tucson President Harold C. Tovrea last week reported the station expects to go on the air as the first video outlet in that city Feb. 1, with an effective radiated power of 33 kw for about a year's interim operation on vhf Ch. 13.

The Tucson TV outlet aired test patterns Jan. 13 after receiving its DuMont TV transmitter Jan. 2. The KOPO-TV interim antenna was hoisted atop the present radio tower Dec. 12, 1952. Construction began on KOPO-TV studios Dec. 5, 1952, after FCC granted the station's construction permit Nov. 17 and its interim operation permit Dec. 3.

KOPO-TV is licensed to Old Pueblo Broadcasting Co., 48%-owned by Gene Autry, radio and screen cowboy singing star. The station expects to go to full 316 kw effective radiated power upon completion of its 500-ft. antenna tower in about a year.

Programming Time

Programming time tentatively is set for 4 to 11 p.m. daily and will consist of CBS-TV and DuMont films and local live shows until such time as Tucson is connected to national networks by coaxial cable.

Assisting KOPO-TV in getting on the air is Walter J. Stiles, television consultant. Also assisting engineers is Robert Myers, West Coast Allen B. DuMont Labs. representative. General manager of KOPO-TV is E. S. Mittendorf.

KOPO-TV Tucson President Harold C. Tovrea (l) and TV consultant Walter J. Stiles turn switch to air test patterns by the station, which is scheduled to go on the air Feb. 1.

Pay-As-You-See TV Criticized by Slavick

WARNING against pay-as-you-see TV has been sounded by H. W. Slavick, general manager of WMC WMCF (FM) WMCT (TV) Memphis, who was in Washington, D. C., a fortnight ago with NARTB's committee studying subscription television.

Mr. Slavick said "it will be disastrous for the public" if pay-as-you-see representatives succeed in convincing the FCC that their system should be approved. These supporters, Mr. Slavick said, "have propagandized to the effect that the television industry as it now is can't foot the bill, which is absurd. The scheme they propose would . . . cost the public about $7 billion a year."

He asserted that the idea is contrary to the concept that channels are a natural resource belonging to the people and are to be used in the best interests of the public.

WCBS-TV Billings Increase

SIGNING by CBS-owned WCBS-TV New York of more than $630,000 in new and renewed business during the first two weeks of January was announced Thursday by George Dunham, general sales manager. He said this represented a 63% increase over the $388,000 booked during a similar period last year.

KNXT (TV) Sales Record

NEW weekly sales record has been established for KNXT (TV) Hollywood with $370,000 in new and renewed business for the week of Jan. 15, Edmund C. Bunker, sales manager of station and CTPN, reported last week. Spot announcements and participations accounted for $30,000 of the total sales, including two saturation campaigns.

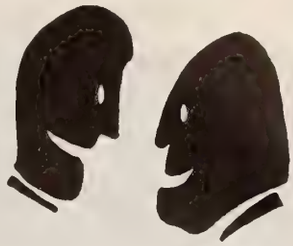
WGN-TV to Air Cubs, Sox

EXCLUSIVE rights to the daytime home games of Chicago's two major league baseball clubs, the White Sox (American) and the Cubs (National) have been acquired by WGN-TV, the *Chicago Tribune* station. The entire telecast schedule will be co-sponsored by the Theo. Hamm Brewing Co., St. Paul, and Liggett & Myers Tobacco Co., New York, for Chesterfield, through their respective agencies, Campbell-Mithun, Minneapolis, and Cunningham & Walsh, New York.

The schedule includes 77 home games by the Cubs and 54 by the White Sox, as well as the three-day city series April 10-12. The initial league game, between the Cubs and Cincinnati, is April 14, while the White Sox season opens April 16 with St. Louis.

Negotiators included James T. Gallagher, business manager for the Cubs; Frank Lane, general manager of the White Sox, and William A. McGuineas, commercial manager, WGN Inc.

KBA Meeting Set June 11-12



KENTUCKY Broadcasters Assn. executive committee, in a session Jan. 16, set KBA's spring meeting for June 11-12 at Louisville's Seelbach Hotel.

Meeting with the executive committee were Joe Eaton, WKLO Louisville, president; Mike Layman, WSFC Somerset, first vice president; Sam Livingston, WKYB Paducah, second vice president, and directors Gilmore Nunn, WLAP Lexington, and J. W. Betts, WFTM Maysville. Messrs. Nunn and Livingston will make up the spring program.

KSWO-TV Commencement

KSWO-TV Lawton, Okla., will begin operation about March 1, spokesmen for the station predicted last week. Present plans call for telecasting with lower power and antenna height than that specified in the CP pending completion of a $350,000 TV center four miles east of the Lawton city limits. The station, to operate on vhf Ch. 7, is owned by the Oklahoma Quality Broadcasting Co.

"just good business to put *your* Advertising on WVAM"

"It reaches *more* people in central Pennsylvania with *more* power (1000 watts, day and night) with *more* of radio's best shows—CBS.

"That's why *more* local and national sponsors are putting their sales messages on WVAM."

Burbach Honored by Associates with Portrait

UNVEILING of portrait honoring George M. Burbach (c), general manager of KSD-AM-TV St. Louis, is Joseph Pulitzer (r), editor and publisher of the *Post-Dispatch*. Joseph Pulitzer Jr. (l), newspaper's associate editor, commissioned the portrait.

GEORGE M. BURBACH, general manager of KSD-AM-TV St. Louis, was the subject of an oil portrait unveiled at a reception Jan. 15 when the broadcaster was honored by his associates in the radio, television and newspaper field for his part in developing St. Louis broadcasting and telecasting.

Hosts at the ceremony were Joseph Pulitizer, editor and publisher of the *Post-Dispatch,* owned by the Pulitzer Publishing Co., KSD-AM-TV licensee, and his son, Joseph Pulitzer Jr., associate editor of the newspaper.

Painted by William F. Draper, a New York artist, the portrait shows Mr. Burbach seated, holding a newspaper, and in the background a television tower, both symbolic of Mr. Burbach's more than a half-century as a newspaperman and his role in radio and television.

About 50 guests at the honoring ceremony heard the elder Mr. Pulitzer praise Mr. Burbach before dropping the veil from the portrait:

"One of the things I think about when I talk of George M. Burbach is that he stands for clean advertising and careful censorship. I think that this establishes an extraordinary record on the part of Mr. Burbach, who has contributed enormously to the security and permanance of this institution.

"By his vision, persistence and courage, he has made these two stations what they are. It is my earnest hope that this portrait will hang in the halls of KSD and KSD-TV for many years."

Mr. Burbach, in return, credited his staff, the publisher and the younger Mr. Pulitzer for the newspaper's achievements in radio and television.

As head of KSD-TV, Mr. Burbach put the station on the air Feb. 8, 1947, as the first post-war equipped TV station in the U. S., which caused a coaxial cable to be extended to St. Louis in 1948.

Mr. Burbach has been in broadcasting since KSD went on the air in 1922.

KXLY-TV Equipment Tests

FIRST equipment tests for KXLY-TV Spokane were run Jan. 16 from the station's transmitter located atop Mt. Spokane. Norman Hawkins, manager, said the first test was considered successful and that commercial operation will begin Feb. 1 on vhf Ch. 4.

Salinas Target

TARGET date of June 1 has been set by the Salinas-Monterey Television Co., new uhf Ch. 28 grantee at Salinas, Calif. [B•T, Jan. 19], according to S. E. Cisler Jr., co-owner. Call of KICU (TV) has been requested. Network affiliation and representation are not set.

WABI-TV Test Pattern Gets Underway

TEST pattern of WABI-TV Bangor, Me., was to have been yesterday (Sunday), according to Murray Carpenter, general manager. Program operation is to begin next Saturday.

WABI-TV has completed affiliation agreements with CBS-TV and DuMont, and representation will be handled by George P. Hollingbery in the national sales field. Kettell-Carter Inc. will be the New England representative for the station.

Mr. Carpenter described weather conditions which impeded construction but declared that almost all of the technical equipment has arrived. "I have about $75,000 worth of miscellaneous electronic equipment scattered all over my house," he said.

Mr. Carpenter praised the "extremely fine cooperation from RCA and . . . the conscientious organizational work done by Walter Dickson, our chief engineer."

Lee Gorman, WABI-TV sales manager, is now in New York, Mr. Carpenter said, and James C. Fletcher Jr. has been retained to do special sales work in New York.

WABI-TV will operate on vhf Ch. 5. It is Maine's first television outlet.

Georgia Broadcasters Buy WMOG for About $100,000

WMOG Brunswick, Ga., has been sold for about $100,000 to a group of Columbus, Ga., and Opelika, Ala., broadcasters. The sale is subject to usual FCC approval.

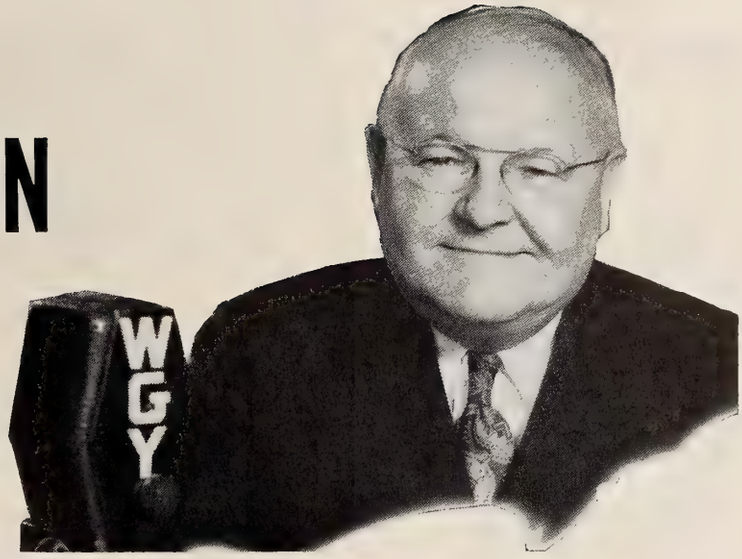
Buyers, incorporated under the name of Radio Brunswick Inc., include President Allen M. Woodall, president of WDAK Columbus and operator of WBML Macon and WRDW Augusta; Vice Presidents Yetta G. Samford, C. S. Shealy and Frederick G. Storey Jr.; Secretary Miles Ferguson and Treasurer John Cooper.

Messrs. Samford, Shealy and Ferguson own WJHO Opelika. Mr. Ferguson also is station manager of WDAK, and Mr. Cooper is general manager of WJHO.

Mr. Storey is treasurer of WMOG, director and 20% owner of WHAN Charleston, S. C., and vice president and 16½% owner of WLAG La Grange, Ga. He is the son of the late Frederick G. Storey, editor of *The Columbus Ledger.*

WMOG was established in 1940 and is an MBS affiliate. It operates on 1490 kc with 250 w fulltime.

KFYO Boosts to 5 kw



KFYO Lubbock, Tex., schedule called for an increase in power last Monday from 250 w day and night to 5 kw day and 1 kw night and a frequency change from 1340 to 790 kc.

Mr. Thompson

The station's new $100,000 transmitting plant took almost eight years of planning and construction, according to General Manager Gordon Thompson. He said the power increase will boost KFYO's broadcast coverage area to 200 miles by day and by an "appreciable" area when broadcasting at night.

The FIRST CITIZEN of the 17th STATE*

Charles John Stevenson is *first* on the air in WGY-Land. He greets his listeners between 6:00 a.m. and 6:45 a.m. every morning but Sunday.

And he's *first* in sales, too! The president of the Company which was one of his past sponsors wrote and said, "I regard you as the best salesman in the world. Please send me a picture of yourself so I can hang it in my office."

This is only one of the 30,000 pieces of mail "The Chanticleer" received last year. His jovial personality, his cheerful chuckle, and the music he provides between his conversation and his jokes have given him a tremendous following among the rural folk in Eastern Upstate New York and Western New England.

As an individual Charles John really gets around! He's publisher of the oldest weekly newspaper in the United States (Washington County Post); he appears at plenty of fairs every summer; and every year he fills about 100 speaking engagements—everything from high school commencements to bankers' conventions.

When he celebrated a recent program anniversary on the air, over a hundred people were in the studio at 5:45 a.m. Some of them had left their homes at 3:30 a.m. to drive the hundred miles to Schenectady.

CHARLES JOHN AND BLACKSTONE THE MAGICIAN A recorded interview with Blackstone was the feature of a recent Chanticleer Program.

PUT THIS FIRST CITIZEN'S PERSONALITY AND ENTHUSIASM BEHIND YOUR CLIENT'S PRODUCT AND IT WILL SOON BE FIRST IN SALES!

GARLAND BACKED BY ABA FOR FCC

Arizona Broadcasters endorse KOOL Phoenix general manager for one of the upcoming FCC vacancies and re-elect KOY Phoenix General Manager Albert Johnson as president.

CHARLES H. GARLAND, general manager of KOOL Phoenix, was endorsed for one of the upcoming FCC vacancies by his fellow members of the Arizona Broadcasters Assn. at their annual meeting in Phoenix Jan. 15.

The resolution giving Mr. Garland Arizona broadcasters' backing for the FCC post, for which his name has been mentioned, came at the meeting held in the Arizona Club, at which Albert Johnson, general manager of KOY Phoenix, was re-elected ABA president.

The broadcasters also elected Carleton W. Morris, owner of KSUN Bisbee and KAWT Douglas, as vice president, and re-elected Frank Redfield, president-general manager of KIFN Phoenix, as secretary-treasurer.

ABA's new board of directors includes Harold Ritter, president-general manager of KYCA Prescott; Tom Wallace, president of KTKT Tucson; Julian Kaufman of KPHO-TV, and Bill Lindsey, general manager of KYMA Yuma.

The Arizona broadcasters also passed a resolution protesting the action of Mesa High School recently in prohibiting broadcasting of school ball games from its stadium and gymnasium, declaring censorship in a tax-supported institution as dangerous and stating the games' box offices have not been hurt by broadcasting.

At a dinner, Ralph W. Hardy, NARTB director of government relations, urged broadcasters to take a new look at the industry.

People today place a higher value on freedom of the press and broadcasting than ever before, Mr. Hardy said. He said the industry cannot afford to turn a deaf ear to the wants and opinions of the people, because there is no better bulwark than the American people to stave off government interference.

ENDORSED for FCC commissionership vacancy by Arizona Broadcasters' Assn. at meeting in Phoenix was Charles H. Garland (c), KOOL Phoenix general manager, shown with Albert Johnson (r), KOY Phoenix general manager, ABA president, and Carleton W. Morris, owner of KSUN Bisbee and KAWT Douglas, ABA vice president.

C. Arthur Johnson Dies; Was KWTO Executive

C. ARTHUR JOHNSON, 59, vice president and treasurer of KWTO Springfield, Mo., died Jan. 14 in a Kansas City hospital after suffering a stroke three weeks earlier on Dec. 23, 1952. Funeral services were held at Springfield, with burial at St. Joseph.

Mr. Johnson

Mr. Johnson, who also was manager of the Pioneer Outdoor Advertising Co., Springfield, first became associated with a radio station at St. Joseph and later as part owner moved the station—KGBX—to Springfield. He also became associated with KWTO when it was formed in 1933, and remained with KWTO when it was separated from KGBX in 1943 by an FCC order. Survivors are his wife, his father and two sisters.

'Chain Lightning' Extended

EXTENSION of WNBC-WNBT (TV) New York's concept of "Chain Lightning" merchandising to include the 5,000-member drug stores of the New York State Pharmaceutical Assn. was announced last Tuesday by Ted Cott, NBC vice president and general manager of the stations.

WNBC-WNBT (TV), according to Mr. Cott, will launch a promotional campaign advancing the theme that the member drug stores are "an important factor in community life." Highlight of the promotional effort will be a weekly half-hour radio program, *Favorite Story*, which will be sponsored by the association in behalf of its member stores. In addition, spots on both radio and TV will be used.

The association will promote products via in-store promotion and window, point-of-sale and counter displays.

WNBC-WNBT utilizes the "Chain Lightning" operation with more than 1,500 supermarkets and "Quality Store Group," comprising more than 2,000 independent grocery stores.

KONA (TV) Rate Card

KONA (TV) Honolulu's new rate card No. 1, announced last week as effective retroactively to Dec. 16, 1952, shows a Class A one-time rate of $150 per hour and grading down to a one-time Class A time signal rate of $12. Open Class B one-hour rate is $112.50 and Class B time signals $8 each. Other rates are shown for 30, 20, 15, 10, 5 and 1 minutes and 20 and 10 seconds.

WCBS Sales Activity

INCREASE in sales activity at WCBS New York during the latter part of December and early January presages a sharp upswing in local radio sales during 1953, according to William F. Miller, general sales manager of CBS' New York outlet.

Among contracts reported by Mr. Miller are Esso's renewal of the *Jack Sterling Show* for 52 weeks through Marschalk & Pratt, and sponsorship of spot announcements by the Nestle Co., American Maize Products Co., the Continental Baking Co., American Home Foods Inc., Pilgrim Laundry Inc., General Baking Co., General Electric Co., and the Barbasol Co.

TRAVERS, BOGGS FOR FINESHRIBER?

Search has unofficially begun at MBS for an aide for Thomas F. O'Neil, president and board chairman, when William H. Fineshriber Jr. is expected to transfer to NBC next month.

THOMAS F. O'NEIL, president and board chairman of MBS, was reported unofficially last week to be seeking a key aide to assist him in operating the network after Vice President William H. Fineshriber Jr.'s imminent departure [CLOSED CIRCUIT, Jan. 19].

Mr. Fineshriber

Norman Boggs, vice president in charge of sales for the Don Lee Network, and Linus Travers, executive vice president in charge of sales for the Yankee Network, were among those mentioned in speculation about a possible successor to Mr. Fineshriber, who, although still on the job at Mutual, is slated to become vice president and general manager of the radio and television networks of NBC next month.

Whether the ultimate choice in the wake of Mr. Fineshriber's departure would get the title of executive vice president, or only some of the duties and some other title, apparently had not been firmly settled last week. Mr. O'Neil has taken an active role in the guidance of network affairs since his election first as board chairman and subsequently also as president last year, and it was considered probable that this activity on his part would increase rather than diminish. The executive vice presidency was created when Mr. O'Neil became president.

Both Mr. Boggs and Mr. Travers are veteran broadcasters, and both of their respective present organizations—Don Lee and Yankee—are part of the General Tire & Rubber Co.'s radio-TV properties, as is Mutual also.

There has been no official announcement either of Mr. Fineshriber's resignation from Mutual or his new post at NBC. His move, it was understood, awaits formal action of the NBC board of directors at the regular board meeting Feb. 6. As vice president and general manager of the networks he will report to John K. Herbert, vice president in charge of the networks.

ABC-TV RELEASES '52 BILLING

General Mills heads advertisers on ABC-TV for 1952, spending $2,090,483; Dancer-Fitzgerald-Sample was top agency purchaser, with expenditures of $3,295,001. Both the advertiser and the agency also were heaviest radio spenders on the network during the year.

GENERAL MILLS was the biggest advertiser on ABC television during 1952, spending a total of $2,090,483 on the network, according to figures released by ABC.

Heaviest agency spender on ABC-TV was Dancer-Fitzgerald-Sample Inc., with $3,295,001 for 1952. Both General Mills and D-F-S were ABC radio's biggest radio spenders, too [B•T, Jan. 12].

ABC-TV's 1952 gross of $17,697,140 was down $600,000 from the $18,297,589 gross in 1951 [B•T, Jan. 12]. Figures for ABC-TV in 1952 follow:

Skelton Back to Live TV

RED SKELTON, dissatisfied with film results and in agreement with his sponsor, Procter & Gamble Co., will abandon filming of his weekly NBC-TV show when he returns to the series in a few weeks after recuperation from an operation. He originally insisted it be done on film, but now will do the show live, it was said.

Douglas Coulter of NBC-TV Dies After Heart Attack

DOUGLAS COULTER, 52, an executive producer for NBC-TV and widely known radio pioneer, died after a heart attack Wednesday at his home in Scarsdale, N. Y.

Mr. Coulter was credited with creating many of radio's first commercial programs and with setting many advertising standards during the medium's growing period. While vice president in charge of radio for N. W. Ayer & Son during the late 1920s and early 1930s he produced many of the first major network radio programs.

Joining NBC-TV in May 1950 as a producer, Mr. Coulter was appointed an executive producer in October 1952. Prior to joining NBC, he was vice president of the radio department of Foote, Cone & Belding from July 1946 to March 1949. He served previously as vice president in charge of programs for CBS from April 1936 to April 1946 and with the radio department of N. W. Ayer from the mid-20s until he resigned in 1936 as vice president.

Survivors are his wife, the former Nancy French of Washington, D. C.; a son, Douglas Jr., a student at Johns Hopkins U., and three sisters.

Radio-TV News Dinner

PLANS were underway last week for the ninth annual Radio Correspondents Assn. dinner, to be held at the Statler Hotel, in Washington, D. C., Feb. 7. Martin Agronsky, ABC commentator, will be installed as new president of the Congressional Radio-TV Galleries, succeeding Hollis Seavey of MBS [AT DEADLINE, Jan. 12].

General committee for dinner is made up of John Edwards, ABC; Mr. Seavey, and Bill Henry. Mr. Agronsky is heading a special committee to recruit entertainment for the dinner. Other groups will be chairmanned by Howard Kany of AP, Richard Harkness of NBC and Mr. Seavey. ABC is handling talent arrangements this year, with entertainment to be selected from the entire radio-TV industry.

Short Presidential Campaigns Urged by CBS' Paley

THE PRESIDENTIAL campaign ought to be shortened by upping the date of the national conventions from July to Sept. 1, according to William S. Paley, CBS chairman of the board.

His view was given before the Poor Richard Club in Philadelphia Jan. 17.

Mr. Paley was presented the club's Gold Achievement Medal for his "contribution to the strength of the nation through his service to government."

Television and other media make the upping of dates possible and desirable, Mr. Paley said, because they enable the candidate to quickly project his personality while bringing his platform before the people more forcibly than ever before.

This is where television can make "one of the central and major contributions . . . to our political life," Mr. Paley said.

Lewine to ABC-TV Post

ROBERT F. LEWINE, radio-TV department director of Hirshon-Garfield, New York, has been appointed eastern program director of ABC's television department, effective Feb. 1, Charles M. Underhill, national director of the TV department, announced Thursday. Mr. Lewine has headed the Hirshon-Garfield radio-TV unit for the past three years. He formerly was with Rockhill Productions, whose TV and film department he organized in 1949.

DuMont Adds Four

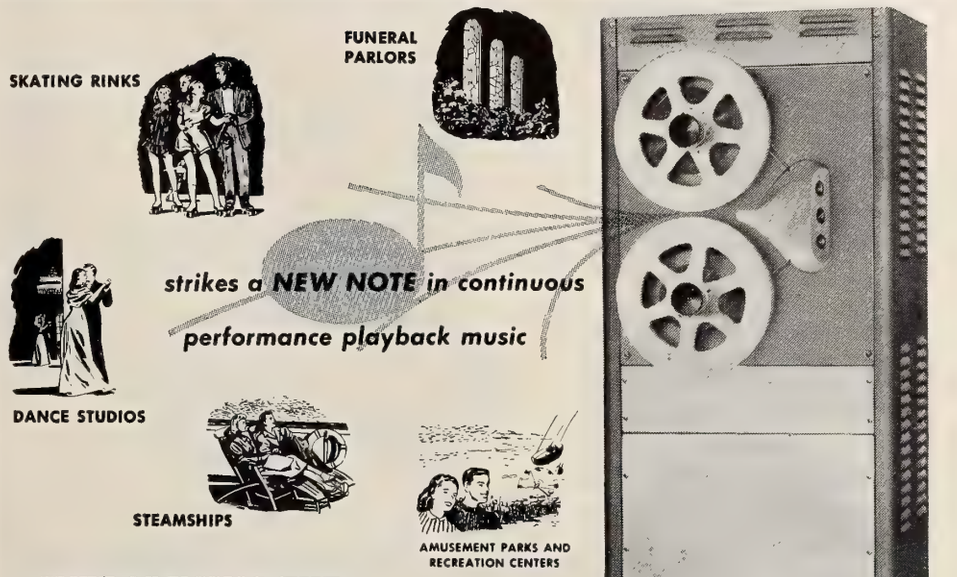
ADDITION of four affiliates to DuMont Television Network, bringing total to 28, has been announced by Elmore B. Lyford, DuMont's director of station relations. New affiliates are: WEEK-TV Peoria, Ch. 3, owned by West Central Broadcast Co.; WLVA-TV Lynchburg-Roanoke, Ch. 13, Lynchburg Broadcasting Co.; WLBC-TV Muncie, Ind., Ch. 49, Tri-City Radio Corp., and KXLY-TV Spokane, Ch. 4, Pacific Northwest Broadcasters.

Nila Mack Dies in N. Y.

NILA MACK, producer of CBS Radio's Saturday morning children's program, *Let's Pretend* for the past 23 years, was found dead Tuesday, apparently after a heart attack, in her New York apartment. Miss Mack joined CBS Radio in 1930 after a career in vaudeville and on the legitimate stage. Funeral services were held Thursday at the Frank E. Campbell Funeral Church in New York.

WDEF Joins NBC April 7

WDEF Chattanooga will join NBC as a radio affiliate on April 7, Harry Bannister, NBC vice president in charge of station relations, announced Thursday. Current NBC outlet in Chattanooga is WAPO. WDEF operates on 1370 kc with 5 kw daytime and 1 kw nighttime. Carter Parham is president and Ken Fleniken is general manager. The station currently is an ABC affiliate and a spokesman for that network said that as yet no replacement has been signed.



NBC Affiliations in '52

DURING 1952, NBC added 14 stations to its radio network, now totaling 205, and 11 new TV stations, bringing the TV total to 75, plus agreements with nine TV stations expected to begin operations early this year, NBC has reported. Going beyond the continental borders, NBC-TV also made affiliation agreements with CMQ-TV Havana, XEW-TV Mexico City, and Toronto and Montreal stations of CBC.

ABC Radio SAC Members

ELECTIONS of members of ABC radio's Stations Advisory Committee in Districts 2, 4, 6 and 8 have been announced by the network.

Chosen for two-year terms, effective Jan. 1, were: District 2, J. P. Williams, WING Dayton, re-elected, with Gene Trace, WBBW Youngstown, alternate; District 4, T. B. Lanford, KRMD Shreveport, re-elected, with Henry Johnston, WSGN Birmingham, alternate; District 6, Frank C. Carman, KUTA Salt Lake City, re-elected, with Al Caldwell, KOAT Albuquerque, alternate; District 8, A. D. Willard Jr., WGAC Augusta, Ga., with Owen Uridge, WQAM Miami, Fla., alternate.

INTRODUCING THE

AMPEX 450

- *Up to eight hours of uninterrupted performance—day after day, year after year*
- *Requires no attention during operation*
- *Lowest cost per hour*

Model 450 rack-mounted. Also available in portable or console mount.

The new AMPEX 450 gives you hours of high-quality background music delivered at *lowest cost per hour* of any musical reproduction system. With the AMPEX there are no interruptions, no records to change and no attendants since it *needs no attention* during operation. It plays at the touch of a button and keeps on playing for as long as eight hours without repetition. Because tape doesn't lose quality with repeated playings, music is always scratch-free and pleasant, with less background noise and distortion.

The Model 450 is engineered to rigid AMPEX standards and is capable of delivering thousands of hours of service with no breakdowns and minimum maintenance.

FEATURES

- 50 to 7500-cycle frequency response at 3¾ inch tape speed
- Standard NARTB reels up to 14 inches
- Pushbutton controls
- Automatic reverse control available as an accessory permits full eight hour program without interruption.

IF YOU PLAN FOR TOMORROW, BUY AN AMPEX TODAY

NTSC COLOR TV DETAILS PROVIDED AT AIEE MEETING

NTSC advances in developing standards for color television have riveted attention anew in the industry on the question of color as against monochrome. AIEE delegates heard the details last week.

FIELD TESTING of the specifications for compatible color TV approved in theory by the National Television System Committee [B•T, Jan. 19], will be followed by the drafting of final specifications to be submitted to FCC.

This will complete the NTSC's task of the past two years and more, D. B. Smith, Philco Corp. vice president, said last Tuesday in a report to the American Institute of Electrical Engineers.

Mr. Smith was the first of four speakers to discuss the NTSC color TV system. A session on that subject was one of more than 80 technical sessions at AIEE's midwinter meeting, held Monday through Friday at New York's Hotel Statler where more than 4,000 electrical engineers were registered.

NTSC, an all-industry group formed under RTMA auspices, succeeded the original NTSC which in 1939 and 1940 determined standards for black-and-white TV. National acceptance of monochrome TV by the American public is ample testimony to the adequacy of those NTSC standards, Mr. Smith noted.

After the "parlor games" in Washington which terminated in the fall of 1950 with the Commission approving a field sequential, noncompatible system of color TV, the current NTSC was formed and an ad hoc committee reviewed work in colorcasting to that time.

The committee recommended in the spring of 1951 that a new system of instantaneous color broadcasting be developed in place of CBS's field sequential system or RCA's advocated line sequential system.

Color Added

NTSC's color system starts with black-and-white television with color added by a subcarrier wave, he said. Comparing the process to color photography, Mr. Smith said when pictures are colorcast with the NTSC system, the owner of a black-and-white TV receiver gets a better monochrome picture, too. A direct color tube is required, but its development is up to the individual manufacturing companies.

Early last year, tentative specifications were drafted for a fully compatible color system, which, by allowing present receivers to receive the colorcasts with as good or better monochrome quality as they now get, would provide an incentive for TV broadcasters to get into color and so make this new kind of TV possible, Mr. Smith said. These tentative specifications were field-tested and on Jan. 15, a new set of tentative specifications were approved by NTSC for further field testing.

Color TV must transmit both "luminance" —the brightness characteristic of the picture— and "chrominance"—the color characteristics of hue and saturation, Page Burr, Hazeltine Electronics Corp., explained. Since present-day monochrome telecasts provide the receivers with information approximating the luminance of the scene, NTSC's major problem has been "to devise a method for incorporating chrominance data into the monochrome service without degrading the performance of existing black-and-white receivers," he said.

Because the energy of monochrome telecasting is not constantly distributed across the full band width but is bunched around harmonics of the line repetition rate of the scanning process, it has been found possible to utilize the gaps for insertion of a suppressed subcarrier to transmit the chrominance information without seriously degrading the picture, Mr. Burr said. The sub-carrier frequency, in the neighborhood of 3.89 mc, was selected so both the sub-carrier and its harmonics fall in the gaps of the luminance signal spectrum, he pointed out.

Synchronization Types

Discussing the synchronization problem, Donald G. Fink, Philco Corp., pointed out that there are four types of synchronization needed: Synchronization of picture and sound, of field scanning (vertical sync), of line scanning (horizontal sync) and of primary colors (color sync). The first three types, he noted, are the same in color as in black-and-white telecasting.

For each type there must be freqency synchronization, with the repetitive scanning process the same at the receiver as at the transmitter, he said, and also phase synchronization, to "reproduce pictures and sound in the appropriate temporal and spacial relationships."

Mr. Fink expressed phase synchronization requirements in terms of the maximum tolerable amount of time between two-frequency-synchronized processes, emphasizing that "the significant figure is not the time difference in microseconds [millionths of a second], but rather the corresponding phase angle in electrical degrees."

Picture-sound synchronization is easy, Mr. Fink observed, with one-tenth of a second permissable, or 180 electrical degrees. The vertical synchronization tolerance is 10,000 times smaller, 10 microseconds or 0.22 electrical degrees. Horizontal synchronization perform-

EDISON Medal is presented to Dr. V. K. Zworykin (l), vice president and technical consultant, RCA Labs. Div., by Donald A. Quarles, president of Sandia Corp. Presentation was made at the opening session of the winter meeting of the American Institute of Electrical Engineers in New York, Jan. 19.

ance achievable in ordinary black-and-white sets is 0.06 microsecond, roughly one 17-millionth of a second. Electrically, the permissable phase error here is 0.34 degrees.

For color synchronization by the field-sequential method, utilizing six-segmented revolving discs at transmitter and receiver, the permissable phase error is 230 microseconds (or 12 electrical degrees), "substantially less strict" than is required for vertical and horizontal synchronization, Mr. Fink noted. He said, however, that the electro-mechanical synchronizing device to meet these requirements accounts for a substantial part of the cost of a field-sequential color set.

In a compatible color system, Mr. Fink explained, the frequency-synchronization requirements are far more strict than for monochrome transmission, but the phase-synchronization requirements of the luminance signal are the same as for monochrome. The subcarrier for color must be modulated two ways, he said, in phase to represent the hue and in amplitude to represent the saturation of the colors transmitted. The subcarrier has maximum amplitude for intense colors, smaller amplitudes for pastel shades and zero amplitudes for white, gray and black (zero-saturation colors), he reported.

Sets Error Limit

Tests having indicated that a phase error of 10 electrical degrees is tolerable, particularly when the observer does not know the correct hue of the object televised, NTSC has set five degrees as its limit, to be on the safe side, Mr. Fink said. This means a permissable timing error of 0.004 microsecond, seven times smaller than the permissable timing error in horizontal synchronization and about 22 times smaller than the one 11-millionth of a second which worried the FCC in 1949. Fortunately, he stated, practical color TV sets can maintain this timing accuracy, even against noise effects.

Mystery of how this timing accuracy can be achieved, he said, is dispelled when the phase error is expressed in electrical degrees.

Mr. Fink declared that "the most difficult synchronization problem of color television is not color phase. It is ordinary horizontal and vertical sync." He pointed out that the 0.22

Too Much Color

PROBLEMS of color TV cropped up anew last week as W. L. Dunn, vice president of Raytheon Television & Radio Corp., Chicago, said "the less said about color TV by responsible people in the industry, the better it is for the public." Any statement, he added, is likely to confuse the public. Raytheon, however, will be ready for color when it comes, "but we don't look for it very soon."

Mr. Dunn, addressing distributors, said color will continue to be delayed for several reasons: (1) It will be "some time" before the industry can get costs down to a level comparable with black-and-white prices, (2) FCC has a heavy workload (3) transmitter makers would be "hard pressed" to start color TV production because of heavy demands for uhf and vhf black-and-white transmitters, and (4) production of color sets would require many more manufacturing facilities.

He anticipates sale of about 6½ million TV sets this year.

MARY LOUISE MARSHALL

Stuffed 'em With Marshwood Stuffing

BETTENDORF AND DAVENPORT IN IOWA

ROCK ISLAND MOLINE AND EAST MOLINE IN ILLINOIS

Dad's Cookie Company—makers of popular brand of breads and cookies — also make Marshwood's Sage & Onion Stuffing, a dressing for poultry. To promote this product, they bought two participations on the WOC "Shopping With Mary Louise Marshall" program the week before Thanksgiving—the week before Christmas—the week before New Year's Day.

Before Thanksgiving, sold more than 2,000 packages of Marshwood—retail price 35¢ a pkg. Then came the deluge. Firm head Lawrence Kohler says: "Mary L made demand for Marshwood stuffing so big that our route men dreaded going out on their routes; they knew they couldn't supply retailers' wants. Most of our workers came back at night to help us prepare and package this stuffing. Even then we couldn't catch up with demand. We haven't yet been able to figure out how many packages we sold but we can tell you this—*sales were terrific.*"

If you are interested in "terrific sales" in the Quint-City area, ask your nearest F & P man about the "Shopping With Mary Louise Marshall" . . . it's a real sales-winner.

RAHALL STATIONS

degree phase angle requirement for vertical sync is "20 times as tough an assignment as five degrees for color phase in the compatible color system."

J. G. Reddeck of RCA Labs. delivered a paper prepared with H. C. Gronberg, NBC, explaining how color TV signals can be transmitted to a network via coaxial cable circuits of limited bandwidth. The solution, he said, is to separate the video signal into two parts at the transmitting end, using a low pass filter which collects mostly luminance and a band pass filter which collects the higher frequencies, mostly chrominance. The higher frequencies are heterodyned down to frequencies which can pass through the 2.7 mc band width of the present coaxial cable circuits, he explained. The process is reversed at the receiving terminal end of the cable, he said.

Quality 'Good'

Quality of pictures transmitted this way is "surprisingly good" and suffers only when it is compared to pictures transmitted from city to city by broad band microwave relays. He reported AT&T has a wideband coaxial cable in the works which will make it no longer necessary to condense the color signal.

Dr. A. N. Goldsmith, consulting engineer, served as chairman of the afternoon session at which the color TV papers were presented. It concluded with a paper on the problems Illinois Bell Telephone Co. faced in providing facilities to radio and TV stations and networks to cover the national political conventions held in Chicago last summer.

Uhf was the subject of a Tuesday morning AIEE session, with I. J. Kaar, General Electric Co., presiding. E. W. Allen Jr., FCC, outlined overall TV allocation plan which integrates uhf and vhf into a nationwide system of TV service, accommodating some 600 vhf and some 1400 uhf stations.

Cost of a uhf station with 200 kw ERP and a 500-foot guyed tower was placed at somewhere between $235,000 and $300,000 by Dana Pratt, RCA Victor Div. After a detailed description of RCA equipment for uhf telecasting, Mr. Pratt gave a cost breakdown as follows: transmitter, $135,000; antenna, $12,000; transmission lines, $6,000; guyed tower, $30,000; input and monitoring equipment, etc., $17,000, or a total of $200,000 with no studio equipment. Mr. Pratt estimated this at $35,000 as a minimum with no provision for live programming, but more likely to be $100,000 with normal studio equipment for live as well as film and network programming. He estimated transmitter operation costs as running around $25,000 a year.

WHUM-TV Equipment Shipped by General Electric

GENERAL Electric Co., Syracuse, N. Y., announced last week that it has shipped transmitting equipment to WHUM-TV Reading, Pa.

Station will operate on uhf Ch. 61. Its primary service area is expected to extend over a 62-mile radius of the transmitter site. Telecasts will be viewed by some 800,000 families in eastern Pennsylvania, parts of New Jersey, Delaware and Maryland.

Station was sent the first GE production model 12 kw uhf transmitter and a new type antenna, which will be installed immediately, according to Humboldt J. Greig, general manager of WHUM-TV. The CBS affiliated station expects to be on the air with a test pattern by the end of this month.

New TV Filter Is Developed by Sola

DEVELOPMENT of a filter that will eliminate spurious radiations by television receivers and transmitters has been reported to FCC Chairman Paul A. Walker by Raoul du Chatellier of Sola Electric Co., Chicago. Spurious radiation problem is receiving close FCC and industry attention [B•T, Jan 12].

Mr. Du Chatellier suggested the FCC Chairman inform RTMA that the Sola Electric Co. engineer is willing to give a demonstration of the device in Chicago at any time. He has filed for a patent under No. 619-218.

TV Set Sales in New Markets

THE TELEVISION industry will sell three sets in every pre-thaw market for each one sold in a new TV market in 1953, according to Ross D. Siragusa, president of the Admiral Corp., Chicago. Mr. Siragusa, speaking to 850 Admiral distributors and their employers in Chicago last Thursday, estimated that new market sales will total only 1½ million sets this year.

The 67 markets on the air before the FCC freeze-lift will account for the great share of set sales, he predicted, adding that opening of new markets has been overemphasized as a factor in sales estimates.

The Admiral president said 1952 sales were the second highest in the company's history, preceded only by the 1950 record of $230 million. He anticipates sales of $225 million this year, exclusive of defense and foreign production which are included in the 1950 figure.

— PROGRAMS & PROMOTION

KONO BOOKLET

PICTURE promotion in booklet form has been released by KONO San Antonio plugging station's thorough farm and ranch coverage. Candid shots of Blake McCreless, station's farm and ranch director, in a number of different locations serve to illustrate the station's point. Copy also features letters from satisfied sponsors who "know that Blake is quite a guy."

WOMEN'S PROGRAMMING

DAILY show called *Housewives' Jackpot* is being aired by WAMS Wilmington, Del., and station reports that "in the short space of three months it has already found its place in the local listening area." Designed to appeal to the housewife, a special product is featured every day. On each program, a phone call is made by Tim Crow, m.c., who questions the lady of the house about the product the show is highlighting that particular day. Correct answers win cash awards.

SATURATION CAMPAIGN

ANOTHER saturation campaign of public service programs was started by WHAS Louisville on Jan. 14. Station has scheduled the entire *Jeffersonian Heritage* series of 13 shows between Jan. 14-31. WHAS reports it is conducting an extensive promotion campaign to win listeners for this series. Public and private schools are cooperating to bring the programs to the attention of parents, teachers and students in the area.

MARCH TELECASTING PROMOTED

FIRST in a series of "Progress Reports" on WCOV-TV Montgomery, Ala., has been sent out to TV distributors and dealers. Report brings the reader up to date on construction of the TV station, which will be affiliated with DuMont and CBS. Station is also making use of bus cards, taxi signs, window cards and radio spots to inform people that the TV outlet hopes to be on the air in March.

'AMERICA'S COMPOSERS'

IN COOPERATION with the American Society of Composers, Authors & Publishers, NBC will present a weekly radio program entitled *America's Composers,* starting Monday, Feb. 2. Broadcasts will be made from the Eastman School of Music, Rochester, and will feature the Eastman School Symphony Orchestra and the Eastman School Wind Ensemble.

'LIVING ROOM' EDUCATION

REGULAR college course in psychology is being telecast over WOI-TV Ames, owned-and-operated station of Iowa State Teachers College, to some 100 "living room" students who will receive college credit if they submit required written work and pass examinations. The regular class on campus is taught in the TV studios.

COURTROOM BROADCAST

FIRST West Virginia broadcast from a federal courtroom was made recently by WCHS Charleston when the station aired a 90-minute naturalization of 16 new American citizens. Station believes that this is the first program of its type ever broadcast in the state. Broadcast was narrated by Harry Brawley, station's public affairs director.

EDUCATIONAL

Byrd Sees No Need For Educational TV

U. of Maryland president praises WBAL-TV Baltimore for its aid during a closed circuit surgery demonstration. He declares such cooperation obviates the necessity for an educational channel in the state.

DECLARATION that he sees no need for a television channel in Maryland came from Dr. H. C. (Curly) Byrd, president of the U. of Maryland, on Jan. 15.

Dr. Byrd made his statement during a luncheon held in conjunction with a day-long closed circuit demonstration of surgery and medical information staged at the University Hospital. He took his stand on educational television channels while thanking WBAL-TV Baltimore for providing cameras and technical equipment for the demonstration.

Stations Can Do Job

"As long as there are stations like WBAL-TV providing the facilities and fine technical staffs to help the university fulfill its dream of bringing education into the home, I see no need for, nor would I back, an educational television channel," said Dr. Byrd.

FCC has reserved uhf Ch. 24 for educational TV in Baltimore.

Walker Warns Educators: 'You Have Only 4 Months'

A WARNING to aspirants for educational TV channels that they must act promptly in obtaining TV grants and building stations was sounded by FCC Chairman Paul A. Walker last Wednesday in New York.

Addressing a seminar of the Joint Committee on Educational Television at the St. Regis Hotel, Mr. Walker chided educators for "vague" hopes of continuing the blanket educational TV reservations beyond the June 2, 1953, deadline set by the FCC: "You have only four months," he said.

Other tactics employed by lethargic or timorous prospective educational TV applicants, Mr. Walker said, are arguments in favor of letting commercial TV stations do the educational job, waiting until "the perfect time when money will grow on bushes and all this can be accomplished with nary a headache for anyone," and in worrying over whether the educational stations will come under political control.

Graduates Honored

THE Philco Corp. has presented $25,000 to Drexel Institute of Technology in recognition of the "outstanding contributions" made by Drexel graduates to the company. The money will go toward Drexel's $5 million building fund. Drexel has assigned 445 students to Philco since 1922 under its co-operative plan integrating classroom work and practical industrial experience.

N. Y. State Educational TV Report Due Feb. 10

CONCLUDING session of three open hearings on the 10-station educational TV network proposed by the New York State Board of Regents was held in Albany Wednesday under the auspices of the temporary state commission on the use of television for educational purposes. Previous hearings were held in Buffalo on Jan. 7 and in New York on Jan. 14-15 [B•T, Jan. 12, 19].

Dewey Commission

The commission, established by Gov. Thomas E. Dewey to explore the subject of educational TV, will review the material it has collected and make a report of its findings to the state legislature. Feb. 10 is the current deadline for that report, but Henry V. Poor, counsel to the commission, told BROADCASTING • TELECASTING on Thursday that a bill is pending to extend the date to Feb. 28.

The regents estimate it would cost $350,000 to construct and $250,000 a year to operate each station. Under an FCC ruling, definite plans must be forwarded by June 25 to be assured of 10 uhf channels reserved for the state.

KFMB-TV Given Recognition For Educational TV Work

RECOGNITION of the role of KFMB-TV San Diego, Calif., in educational TV experiments is given by the San Diego City Schools in its annual report for 1951-52.

Noting that "educational possibilities of television are unlimited" and its use exploratory, the report claims that because of the station's cooperation, the schools "have been able to take an important place of leadership in experimenting with this new medium of communication."

Started Last Spring

A TV plan, submitted to the local Board of Education after a year's planning, went into effect last spring. Teachers served as program directors for each series of 18 programs over a six-week period, and direct classroom instruction became a reality. TV set distributors loaned out receivers for classroom use through arrangements with the San Diego County Bureau of Home Appliances.

Emerson Grant Committee

A THREE-MAN committee will pass on all applications made by educational institutions for participation in the $100,000 educational TV grant to be made by the Emerson Radio & Phonograph Corp., Benjamin Abrams, president of the company, announced last Wednesday.

The committee will be Dr. James G. McDonald, former Ambassador to Israel; Dr. Leonard Carmichael, secretary of the Smithsonian Institution, and Dr. Orestes H. Caldwell, former FCC Commissioner and editorial director of Caldwell-Clements Inc.

Mr. Abrams said grants of $10,000 each to 10 educational TV stations would not be made until evidence proves the stations are on the air. He hoped that all 10 grants would be made in the first half of 1953.

MICROWAVE RELAYS SPROUTING

TV transmission still is relatively new in Cuba, but progress is reported by Goar Mestre of Circuito CMQ. One 7-hop system has been completed, with Havana as focal point.

TV RELAY facilities have been extended in Latin America with the addition of a 7-hop Philco microwave system and new programming by television transmitters of Circuito CMQ, S. A., Radiocentro, Havana.

Cost of the first series of seven relay stations is approximately $480,000 and 12 other microwave installations are planned at an estimated cost of $700,000, according to Goar Mestre, Circuito CMQ director general.

CUBA

Mr. Mestre reported that Circuito CMQ christened the first relay with telecasts of ballgames from Havana down to Ch. 5 in Santa Clara, some 170 miles away. Other games and Havana programs have been carried to the Ch. 9 transmitter in Matanzas and Santa Clara.

Philco Relay

The Philco initial relay system was installed by Circuito CMQ without aid of American technicians. When completed, the circuit will boast three audio channels with standby equipment and one video channel. Multiplexing equipment is on order.

The objective, Mr. Mestre told BROADCASTING • TELECASTING, is to continue the circuit another 330 miles to Santiago de Cuba with the additional 12 microwave relays. Ball game telecasts were launched Jan. 2 and implemented with other program fare Jan. 17, he added.

Circuito CMQ's CMBF-TV on Ch. 7 is expected to take the air early in February. Installation has been completed for three months, with the exception of the tower which was delivered the past fortnight. A 5 kw transmitter will be located in Radiocentro.

Another station not identified with Circuito CMQ is also expected to take the air in the near future on Ch. 2.

The Circuito CMQ executive predicted that, on the basis of current reports, Havana will have five video outlets on the air which, together with five interior stations, will give Cuba a total of 10 transmitters in all.

Good Reaction

Sound quality and image of the ball game transmissions were excellent, Mr. Mestre reported, adding that reaction of key officials was greater than anticipated. There are upward of 100,000 TV receivers in Cuba at present.

Philco engineers checked the microwave relay system two days after baseball transmissions started. Mr. Mestre added that, to the best of his knowledge, the Philco relay was the first to be put into operation last Jan. 2.

CONGRATULATIONS go to Bill Rea (r), owner-manager of CKNW New Westminster, B. C., from Dr. N. A. McKenzie, president of U. of British Columbia, upon the establishment of $1,000 TV scholarship by CKNW, for a graduating U. of B. C. commerce student to attend the summer TV course at Northwestern U., Chicago.

AT&T Extends Network Service Over Border

EXTENSION of network television service from the U. S. to Canada last Monday was announced by AT&T's Long Lines Dept. CBLT (TV) Toronto has been linked to U. S. network facilities of AT&T at Buffalo by a 66-mile radio-relay route which crosses Lake Erie.

Programs are beamed from a microwave antenna atop the Franklin St. telephone building in Buffalo to a radio-relay station at Fonthill, Ont., according to AT&T. Two transmitting antennas are used on the tower to relay programs across the lake to Toronto.

CANADA

AT&T pointed out that construction is underway on 12 microwave towers east of Toronto for interconnection of CBST (TV) Montreal to the U. S. network. This link is expected to be completed this spring, AT&T said. In the meantime, the Canadian Broadcasting Corp. plans to telecast U. S. programs in Montreal by kinescope.

Construction Begun

AT&T also announced the company's television facilities have been extended to WFMJ-TV and WKBN-TV, both at Youngstown. Announcement said network programs are beamed from a station on the New York-Chicago radio-relay system and carried to the new stations via newly-installed microwave channels.

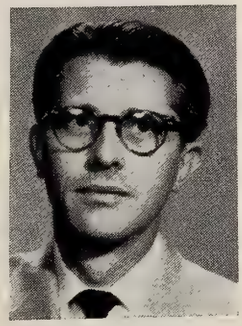
With the addition of the two TV channels at Youngstown, AT&T noted that network programs presently are available to 118 TV stations in 74 cities in the U. S.

Ottawa TV Seen by June 2

FIRST Ottawa TV station may be ready in time to telecast the coronation of Queen Elizabeth II June 2. The station will use only microwaved programs from Toronto and Montreal. No studios are planned soon, but a mobile unit at the transmitter probably will take care of telecasting important special events.

CANADA

Haiti to Have TV Outlet



FIRST television station in Haiti will be started by Richard Widmaier, director of 4VRW, Radio Haiti, according to Richard Eaton, head of the seven United Broadcasting Co. stations in the mid-Atlantic states. The station will be the only video operation in Haiti, according to Mr. Eaton, who has just returned from a trip to the West Indies.

HAITI

Mexican TV Originations In San Diego Requested

Asking FCC approval of a plan to originate programs in San Diego, former American radio-TV executive Alvin George Flanagan would program over XETV (TV) Tijuana, Mex., to U. S.-Mexico surrounding area.

AN AMERICAN radio-TV executive last week filed application with FCC for approval to originate programs in San Diego for XETV (TV) in nearby Tijuana, Mexico—programs designed for San Diego-Tijuana and Southern California.

Mr. Flanagan

The Mexican station's Grade A contour blankets San Diego, reaches 40 miles from Tijuana to the edge of Escondido, Calif., and slices through the middle of Encinitas on the California coast.

XETV, operating noon to midnight on vhf Ch. 6 with effective radiated power of 38 kw visual, is under license to Radio y Television S.A., a Romulo O'Farrill-Emilio Azcarraga interest. XETV's national representative in the U. S. is Edward Petry & Co.

The applicant is Alvin George Flanagan, former program manager for the ABC-TV Western Division. He has contracted with XETV, as an independent program packager and producer as well as time sales broker, to supply live shows from San Diego via microwave relay. These programs would comprise 30% of the regular XETV schedule.

XETV proposes to install all facilities in San Diego and bear all production and operating costs. The station will pay Mr. Flanagan $300 weekly for gross sales up to $30,000 per week with with added commission of 1% for excess over $30,000 and 1½% for excess over $60,000.

MEXICO

Line Charges

Microwave relay facilities of the Pacific Telephone & Telegraph Corp. are to be used. Monthly line charges would not exceed $1,200, according to present estimates.

Details of the contract and programming plans were contained in the FCC application Form 308, requesting permission "to locate, maintain or use studios or apparatus for production of programs to be transmitted to foreign radio stations." It was filed by Washington radio-TV attorney Norman E. Jorgensen.

The studios for the XETV programs are to be located at 4231 Park Blvd., San Diego, leased by the Tijuana station and fitted with XETV cameras and equipment.

According to the application, the programs to be supplied by Mr. Flanagan would consist of the following types: Entertainment 36.8%, religion 8.3%, agriculture 11.8%, education 15.8%, news 16.7%, discussion 7.9% and talks 2.7%.

Mr. Flanagan has been in radio and television 16 years. From 1936-38 he was radio director in the U. S. Office of Education. Mr. Flanagan joined Don Lee Broadcasting System's experimental TV station 6XAO as a director, moving in 1949 to KFMB-TV San Diego. He joined ABC-TV in 1951.

INDEPENDENTS HIT CONTROLS IN CAB BRIEF FILED WITH CBC

Aroused by CBC's tight-fisted control over network broadcasting, non-government independent stations are uniting under CAB in a battle that is familiar to the U. S. radio-TV industry. With TV new to Canada and strong U. S. competition, stations are expected to protest any CBC encroachment, lest a restrictive pattern be set.

NETWORK monopoly by the Canadian Broadcasting Corp. is the greatest stumbling block in the way of developing Canadian talent, the Canadian Assn. of Broadcasters stated in a brief to the CBC board of governors at Ottawa last Friday. Occasion was a public hearing on proposed new broadcasting regulations which call for definite percentages (from 30 to 48) of Canadian talent and Canadian origination in all programs broadcast by Canadian stations.

CANADA

The CAB brief charged that this "sets up a glittering general target designed to gain quick approval."

The CAB, representing 119 independent broadcast stations out of a total of 139 non-government stations in Canada, charged CBC with using impractical controls to cover up its own shortcomings in developing Canadian material.

Purpose and intent of the proposed control dealing with original Canadian production are generally misunderstood. Terms do not specify the use of talent, only material of "original Canadian production."

"The proposed controls," the brief points out, "establish absolute governmental power over all material published by broadcast in Canada. This power is reinforced by the absolute power of life and death over any broadcasting station and places an administrative tribunal, the CBC, in the position where it has the power to compete and to legislate, to act as prosecutor, judge, jury and executioner with no right of appeal."

The CAB asked for democratic regulation and court enforcement by independent judges with right of appeal to insure impartiality and correction of judicial error.

The CAB brief stated that the "proposed control [over Canadian content] reeks with the narrow and bigoted nationalism thought well dead and buried in the 20th century. If there is any merit in the proposed control, it should not be imposed by an administrative tribunal. It should be part of the law of the land and percentages in it applied to all forms of publication."

The CAB brief dealt in detail with various clauses of the proposed new regulations, and summarized public service performed by Canadian independent broadcasters and their development of Canadian talent and material.

Early Television Camera in Action, Philadelphia, January, 1932

WPTZ, PHILADELPHIA . . .

One of America's Great Television Stations, now in its 21st year on the air!

Yes, as far back as January, 1932, Philco and WPTZ—then known as W3XE—were active in television. In 1941, the year the FCC first granted commercial licenses to television stations, WPTZ began commercial operation.

Now, in January, 1953, WPTZ is still Philadelphia's First Television Station.

Down through the past twenty-one years people in Philadelphia knew about television, watched it over WPTZ. Most of today's set owners saw their first TV show on WPTZ. Their first fight . . . first ball game . . . first drama . . . first political convention.

Today, with its exclusive line-up of NBC stars and shows, its many high rated local programs, its strong hold on its viewing audience, there's little wonder that WPTZ is First in Philadelphia.

For complete details on WPTZ, give us a call here in Philadelphia, or see your nearest NBC Spot Sales representative.

In Philadelphia people watch WPTZ more than any other television station!*

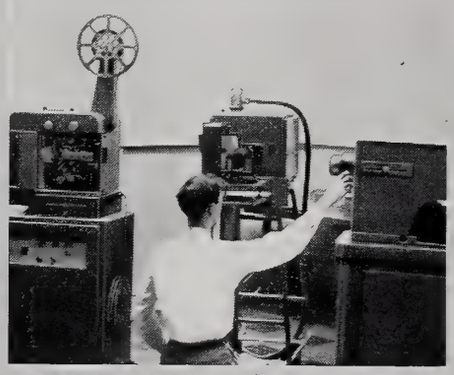
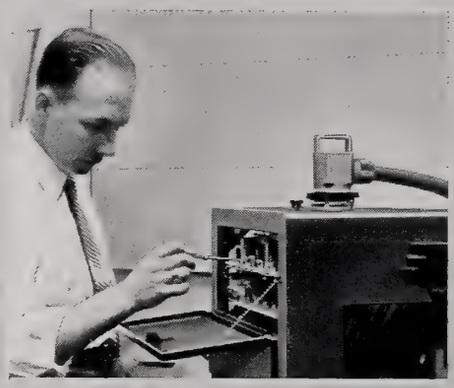
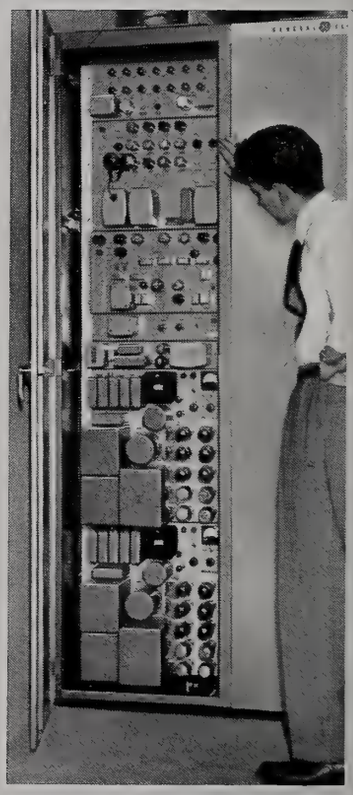
G-E Film Camera Channel



Improperly designed film camera channel



Compare G-E Film Camera Channel Performance



Complete Television Equipment for VHF and UHF

MORE DEPENDABLE! Automatic set-up control to maintain proper background without continual re-adjustment by operator.

MORE VERSATILE! Fits any TV system or projector. Outstanding new design delivers resolution and picture quality unsurpassed in the industry today!

MORE ECONOMICAL! New design reduces interconnections between units. Heat and microphonics at monitor are eliminated by removing all signal channel tubes from monitor console.

See a G-E Film Camera Channel in operation and you'll discover for yourself its stand-out performance over any other film camera channel on the market. It delivers a clear, sharp picture signal. High intensity projection type edge-lights greatly reduce shading and hard-on-the-eyes edge-flare. The film camera channel is the heart of your station's operation... nearly all your money-making commercials depend on its top performance. Insist on a G-E Film Camera Channel! Write for complete information to *General Electric Co., Section 213-26, Electronics Park, Syracuse, N. Y.*

GENERAL ELECTRIC

In last week's issue, Martin Stone, producer of "Howdy Doody," "Author Meets the Critics" and other programs, pleaded the case for live television which, he wrote, was "to plead the cause of television itself." Here is the second part of this two-part series on the film vs. live controversy.

the case for FILMED television

By John L. Sinn

FILMED television has certainly justified the high expectations held for it by so many people a few years ago.

And why is filmed television so important and still growing in importance? Because film is technically, artistically and economically indigenous to television.

Two Sundays ago over WNBT (TV) New York the latest Ziv TV program, *Favorite Story,* premiered with a dramatization of Tolstoy's "How Much Land Does a Man Need." It's a great story.

The exciting climax shows the farmer, half-crazed with lust for land, running madly across fields and up and down hills because he has been promised for himself all the land he can cover in one day. Tolstoy's answer to the title is "six feet" because the peasant kills himself through exhaustion after running unceasingly from sunrise to sunset.

Obviously only film could tell this story if quality and realism are to be maintained.

Location Shooting

In the making of *Favorite Story,* we have sent our star, Adolphe Menjou, and a full production crew into the desert, the mountains, the seashore, even as far as Europe, to film some scenes and plays for the series —not because we couldn't have provided proper sets or process shots in the studio, but because it just seemed more desirable and creatively more honest to shoot on the actual locations called for in the original stories. This is how film gives scope and breadth to TV drama and lets fresh air into its stories.

In addition to its unlimited scope, there are other good reasons why so many fine and important performers and writers swear allegiance to film: Its freedom from stopwatch phobia, its capability of capturing creativeness at its most desirable and rarest level, its ease of performance, the delicate and wonderful illusions it can create, the intellectual freedom it provides and its precious preservation of the unrepeatable.

If television is to grow as an art form, it must have many facets of expression—it must relay news and special events, portray drama and comedy, teach, amuse and inspire. But of all these, a good case for live television can only be made for news and special events—all the rest can be done better on film. And is there anyone who will claim that television's coverage of daily news has more than scratched the surface? Political conventions, inaugurations, hearings, yes—for these, live television should not be replaced. But for all other television, films provide a more artistic and yet a more practical medium.

But even in the field of news and special events film plays an important part by repeating the event for those who were unable to watch it live and also by preserving it. Otherwise, this great medium, this electronic marvel, has no more permanence than the tales and fables passed on by prehistoric father to his hairy son.

One of the tragedies of live television, both from an artistic and commercial standpoint, is its short life. One performance and all that's left is the script and the memories of those who saw it. All the work and creating and effort, gone up the chimney, like a puff of smoke. But what about those who missed it? That they should not be deprived of seeing it is proved by the fact that filmed series, on second and third runs, often score higher ratings than on the first showing.

You might even say that filmed television drama is more natural than live because while performing for the film camera rather than the live camera, actors are not beset by and haunted by that old devil, stopwatch, that keeps ticking inexorably on, replacing freedom and sweep of interpretation with the inescapable thought, "I must be on time!" On live TV, an actor cannot allow himself a little deeper or broader reading of a line than he gave in rehearsal, or a new motion or gesture or anything that might add even three seconds to the scene. There is no time for the director to allow the camera to stay longer on a scene than it is scheduled for; no time for anything except that which has been measured out like a gridiron with a white stripe every 10 yards and a gun fired every 15 minutes.

IT'S hard to gallop a horse through a studio. Ziv shot this scene from "How Much Land Does a Man Need" on location, to obtain the realism Mr. Sinn says only film can provide.

To refer again to "How Much Land Does a Man Need," one scene is set at sunrise. The time of day is very important to the story and must be immediately recognizable. Because we did not have to compromise with rear-screen projection or dubious sub-

stitutes of other sorts, we shot the scene at sunrise and the results have been highly praised by critics.

On film it is possible to create a mood and capture it forever. Filmed television permits, even invites and inspires, a calm and ease of creation and performance.

On film, producers can create great illusions. Because of film's great freedom, audiences can be transported out of the humdrum and routine by being shown plays that, again, could not be done live.

Television is too big a medium, with too great a potential, with too important a mission in entertainment, business and culture, to limp along on one leg.

On the economic side, film is equally important. Television will never be all-network. With film—and *only* with film—hundreds of stations and thousands of advertising agencies and sponsors will be able to secure high quality programming written by top writers and featuring top performers. For these stations, agencies and sponsors, film is an economic must. Without it, television is only for a handful of the nation's largest advertisers. Obviously, the welfare of the television industry demands full participation at the local and regional levels as well.

ABOUT THE AUTHOR

Mr. Sinn has been president of Ziv Television Programs Inc. for five years. Before that he was executive vice president of Frederic W. Ziv Co., producers and distributors of transcribed radio shows. Among Ziv TV productions are *Your TV Theatre, The Cisco Kid, Sports Album, Yesterday's Newsreel, The Unexpected, Boston Blackie,* in addition to *Favorite Story,* which is described in the article.

From a technical standpoint it's just a matter of how much trouble you are willing to go to to produce high-quality film. Audiences don't know or care whether they're watching such film or live TV. After all, the basic yardstick is that a program either holds the excited interest—or even just the interest—of the audience, or it fails of purpose.

The play's the thing or the script's the thing. However you say it, the requirement is entertainment or stimulation or education or inspiration or whatever you are trying to do with the minds and feelings of the audience.

Sometimes it'll be done live, sometimes on film. But there are writers, actors, skilled technicians, advertising agencies, stations and sponsors who will contribute to the ever-growing miracle that is television only through the medium of film.

How Norge increases its dealers' sales with . . .

breakfast at benson's

"IT'S Saturday morning in Lansing and Norge invites you to *Breakfast at Benson's.*"

This familiar greeting, heard on WJIM Lansing, ushers in a half-hour breakfast-club program which has been building Norge sales ever since the first week it was put on the air.

Similar formats have worked equally well in five other Michigan cities. *Breakfast at Harry's* on WTCM Traverse City for Harry's Service Center there; *Breakfast at Gee's* on WHTC Holland for Gee's Electric Co.; *Breakfast at Comstock's* on WLAV Grand Rapids for Comstock's; *Breakfast at Wally's* on WMTV Manistee for Wally's Radio, *Breakfast at Lyle's* on WATT Cadillac for Lyle Smith Appliances.

An audience-participation program, this type of show draws capacity "studio" audiences from wherever it is aired, in addition to its multitudinous radio listeners, it is noted.

An indication of the program's selling power may be found in the fact that Benson's and the Norge distributors have just signed a 52-week contract with WJIM.

Benson's is one of Lansing's newer businesses but also one of its largest, being a five-story shopping center. WJIM airs the show from Benson's appliance department. Co-sponsored by Norge, the show promotes only that firm's appliances.

Mailing Lists

The store benefits both by having new shoppers, who are attracted by radio, come to the premises Saturdays, and by obtaining a mailing list from cards that breakfast clubbers fill out.

Before each broadcast, the dealer clears the center of his display floor and sets up tables on which coffee and doughnuts are served. He places the Norge appliances he is featuring near microphones for prominence.

During the half hour prior to air time, visitors are welcomed by the dealer and asked to register on a perforated card. These cards supply the dealer with the potential customer's name, address and the age of the visitor's electric appliances.

The half-hour show is built around audience participation in gags, skits, chatter, prize contests and other entertainment.

WJIM brings the radio audience, as well as the "studio" audience, into the act. This is accomplished by making listeners eligible for some of the prizes. For example, one game has a studio guest pitted against a phone-participant.

Another stunt used is to reward the first radio listeners to come into the store and correctly repeat the Norge slogan of that day. If no one in the studio has the correct answer to a particular question, the competition often is opened to the radio audience.

Harold F. Gross, president, WJIM-AM-TV, recalled that "during July and August, usually considered 'dog months' radio-advertising-wise, the show was new and going through its trial period.

"Yet it was highly successful and never failed to draw capacity crowds," Mr. Gross said. "As the fall season came on, the program's popularity was well-established."

Breakfast Is Served

For WJIM, audience enthusiasm is built by Howard Finch, m. c., and his co-entertainer, Earl Parchman, during the half-hour warm-up period. Breakfast is served during this time by a local restaurant in exchange for a spot announcement during the show.

Prizes, contributed by Benson's, range from cook books to orchids to electric mixers.

As many as 18 prizes per show are awarded by the show's producer and C. Wayne Wright, WJIM account executive.

After each broadcast, dealers analyze the registration cards for follow-through promotion. They can deduce from the age or lack of appliances listed, the product in which the registrant may be most interested.

The dealer mails a "Norge Bonus Bond" to each registrant. This bond, good for 30 days, contains three coupons, bearing different amounts to be applied toward purchases of Norge appliances.

Archie Rotan, manager and principal stockholder of Benson's, enthusiastically attests that the radio program has increased appliance sales tremendously.

Distributors Own Shows

In each city, the distributor owns the show and has 52-week option on it. If a dealer drops out, the distributor is able to offer the program to another dealer in the same territory.

The radio station supplies the announcer and m. c. and cooperates with the dealer and distributor in advertising the program.

Mr. Gross feels that this is another instance where a local radio show produces a selling-impact unduplicated by the national program. He thinks other radio broadcasters might well take note.

For an NBC documentary . . .
the production excellence of a

TV Film a la Kling

Kling studios

*CHICAGO • 601 North Fairbanks Court
HOLLYWOOD • 6650 Sunset Boulevard
NEW YORK • affiliated with Thompson Associates
40 East 51st Street
DETROIT • 1928 Guardian Building

WHEN the National Broadcasting Company undertakes a filmed television documentary series, you can be sure it will be done *right*. NBC made sure by assigning the production of its current half-hour film on Frank Lloyd Wright to Kling Studios.

Kling set designers recreated the architect's study on the sound stage in Kling's Chicago studio, using a photomural made by Kling's technicians at Wright's Taliesin home. While interior shooting was in progress, other Kling crews were filming location shots in Wisconsin and Arizona. Assignments were timetable-controlled so that all processing, cutting and editing of film could be accomplished in quick order at Kling's Chicago studio.

Why not insure the success of *your* television show the way NBC does? Kling serves many of the country's outstanding advertisers with TV film shows and commercials . . . economically produced in our Chicago and Hollywood studios with the modern multi-camera technique.

Kling in Hollywood offers you the artistry, star casting, sets and unlimited facilities of the world's film center, including award-winning animation by our new division, Ray Patin Productions.

Add to this, a highly skilled permanent staff of writers, directors and technicians, and you see why Kling gives you the best in *advertising knowmanship plus Hollywood showmanship.*

Nobody has noticed it, except the happy people who own and run them, but independent radio stations, as a group, are better off today than they were before television. As good an example as any of a go-getting independent station is WITH Baltimore, a 250 watter that keeps right on making money against tough TV and radio competition.

THOSE

IN THE troubled recent years of radio, one positive development has passed largely unnoticed amid the negative reports of declining audiences, advertiser concern over radio values and rate reductions by the national networks.

That fact is that today the independent radio stations, as a group, are better off than they were before television came along.

Since the beginning of 1948, the number of independent stations has increased more than 50%, the number of network affiliates around 3%. The total revenue taken in by both classes of stations has decreased about 2%.

It would seem, on the surface, that these figures indicate declining revenue for both independent and affiliated stations, with the independents, having grown so in numbers, taking the bigger dive. The dollar figures, however, deny the percentages. Network affiliates indeed are taking in less than they did in 1948, but the independents are taking in more.

Official revenue statistics of the FCC, 1948 through 1951, show that in 1948 628 independent stations had total revenue of $67,-731,226 and 1,073 network affiliates had $240,355,155. In 1951, revenue was $108,-042,458 for 954 independents and $234,-601,396 for 1,109 affiliates.*

The downward trend for affiliates and upward trend for independents are more graphically expressed in terms of averages per station, year by year. The following figures were arrived at by dividing total revenue of each of the two classes by the number of stations in each class that year.

In 1948, the average-per-station revenue was $107,852 for independents, $224,002 for affiliates.

In 1949, it was $109,110 for independents, $211,631 for affiliates.

In 1950, it was $112,223 for independents, $208,096 for affiliates.

In 1951, it was $113,252 for independents, $211,543 for affiliates.

The steadily ascending average-per-station revenue for independents has been achieved despite a far more rapidly rising curve of station population.

There were 628 independents in 1948, 803 in 1949, 876 in 1950 and 954 in 1951.

Network affiliate population has not changed much: 1,073 in 1948, 1,074 in 1949, 1,130 in 1950 and 1,109 in 1951.

What obviously happened to the network affiliates was that they were accustomed to operate with a substantial percentage of their total revenue coming from their networks. When network volume dipped and network rate reductions were imposed, they were unable to adjust their revenue from spot and local sources to overcome the loss in network revenue.

The independents, having no history of dependence upon network revenue, went on collecting the rewards of spot and local volumes which continued to increase while national advertisers were growing bearish on network investments.

FCC figures through 1950* show that independents, as a group, made between 78% and 81% of their total time sales to local advertisers, almost all the rest to national and regional spot advertisers, and a smattering to special network deals.

It is the local advertisers who have annually increased their spending on radio far more than national and regional advertisers in recent years. It is, therefore, the independent station that has profited.

Of all the independent stations in the country, a few may take in a bigger gross, some may be more razzle-dazzle, but none can be said to have gotten more out of less than WITH Baltimore.

WITH matches its pipsqueak 250 w (1230 kc) against 1 to 50 kw competition and comes out of the fray with gross time sales that look like this (for fiscal years, Oct. 1-Sept. 30):

1948: $744,968.
1949: $788,025.
1950: $759,670.
1951: $746,246.
1952: $806,652.

The sag in revenue in 1950-51 is not excused by the sudden rise of television. In those years Thomas Garland Tinsley II, president, and Robert Campbell (Jake) Embry, vice president and commercial manager, admit they became so preoccupied with collateral activities, including the operation of the Baltimore Bullets professional basketball team, that they failed to keep their hands on the hypodermic needle they usually make sure is stuck in WITH. The upward swing in sales in 1952 eloquently marks the point at which they relinquished their interest in the Bullets and got back to the station.

THOMAS TINSLEY

ROBERT C. EMBRY

The team that makes WITH tick

Tinsley-Embry Team

Like most bustling enterprises, WITH takes its energetic character from the two men at the top. Mr. Tinsley had already made a successful career as a radio time salesman, including one successful stretch at the improbable function of being a station representative in Baltimore, when he put WITH on the air on March 1, 1941.

Mr. Embry was drafted from WBAL Baltimore, where he had been a general sales representative, in 1943. The Tinsley-Embry team since then has been as indomitable a combination as any in radio.

Since the early days of WITH, the station has adhered to an around-the-clock format of music (mostly recorded or transcribed), news on the hour and sports.

Most of the musical programming avoids extremes. Symphonies get the cold shoulder. Hot jazz is permitted only in the 10 p.m.-1 a.m. period when WITH programs for the 300,000 Negro population in its coverage

FCC reports are complete only through 1951, and official figures for 1952 will not be available until fall of 1953.

FCC figures since 1950 do not break down classes of time sales between affiliated and unaffiliated station groups.

RICHES IN THE INDIES

area and from 1:30-2:30 a.m. when a special jazz classics show is aired. The rest of the time, WITH plays music that anybody can hum or at least tap a foot to.

WITH keeps 25,000 records and transcriptions in its library. The record supply is maintained by an economical arrangement with a local music store. When the station first went on the air, it made a deal with a small music store to provide it with records in exchange for plugs on the air.

The music store has now grown to be the biggest in the city. It still provides WITH with all its records, but the station has drawn ahead in the accounting. The store now buys time, in addition to that which it receives as payment for its records.

The 10 p.m.-1 a.m. jazz show is conducted by Maurice "Hot Rod" Hulburt Jr., a Negro disc jockey celebrated in the South before he joined WITH last year.

Sponsor Talent

The 1:30-2:30 p.m. period that also carries jazz from time to time features an important WITH advertiser. Less than five years ago, an enterprising WITH salesman sold $80 worth of spot announcements to a restauranteur named Harley whose establishment at that time consisted of a counter and six stools. Harley's specialized in the "submarine sandwich," an astonishing creation composed of salami and other meats, onions, a secret sauce and a small loaf of French bread.

The physical changes in Harley's plant have been slight since that time. Financially, however, the investment in radio has been worthwhile. Harley's now does $160,000 business a year—all of it carry-out. By restricting his trade to the transient, Harley was able to do away with seating fixtures altogether and thus cut his capitalization by six stools.

Harley sponsors one-third of WITH's all-night show and frequently appears on the air himself, to describe records which he selects from his large private collection of jazz masterpieces.

Harley's and the music store that supplies WITH with records are two of about 200 local advertisers now using WITH. The gamut of local businesses is represented.

Aside from more commonplace inducements, WITH offers local advertisers a special "strip rate" that, in Mr. Embry's words, gives them "the frequency they need to get results at a price they can afford."

The strip rate is done up in three basic packages, each differing in the frequency per week. Take a quarter-hour program as an example. A local advertiser may buy such a segment three times a week for $85 (time and talent), five times a week for $127 and six times a week for $154.50, in Class A time. The one-time rate for time alone on such a period is $80.

The strip rate is at least partly responsible for the claim that WITH now has more local advertisers on its station than any two other Baltimore stations combined. It has been more or less constant for WITH to get 90% of its revenue from local sources and the other 10% from national spot.

One physical advantage that WITH enjoys over independents in most other markets is that its 250 w signal pretty well covers the entire Baltimore trading area which is uniquely compact. In a 15-mile radius of WITH's transmitter are some 1,300,000 people. The city has been described by Mr. Embry as a "sort of an island of population."

But the happy circumstance that matches the Baltimore trading area to the coverage pattern of a 250w transmitter which was inexpensive to build and relatively easy to maintain is only a fraction of explanation for the station's fancy figures. A bigger explanation can be found in its personnel and operational policies.

WITH functions with a payroll of 48 including Messrs. Tinsley and Embry. It has nine staff announcers, all of whom are entitled to talent fees and whose weekly incomes run from $115 for the newest-comer to about $300 a week for an old hand.

Its six salesmen (not including Mr. Embry) are paid 10% commission on their net sales. With billings what they are at WITH, the salesmen have a chance to earn substantial incomes.

Thirteen engineers and technicians are on the payroll. The 14 other employes not accounted for above perform various administrative and clerical duties.

WITH won't let a copywriter in the door. It insists that advertisers either prepare their own commercials or have agencies prepare them. The station figures that it eliminates costly overhead by refusing to touch copy assignments, and of course, being situated in a large city where numerous agencies exist, it can always find an agency for an advertiser that is without one.

It follows in practice what it advises its own clients to do: All WITH advertising, publicity and promotion is handled by an agency, The Joseph Katz Co. The Katz people see that around Baltimore it is next to impossible to ignore WITH.

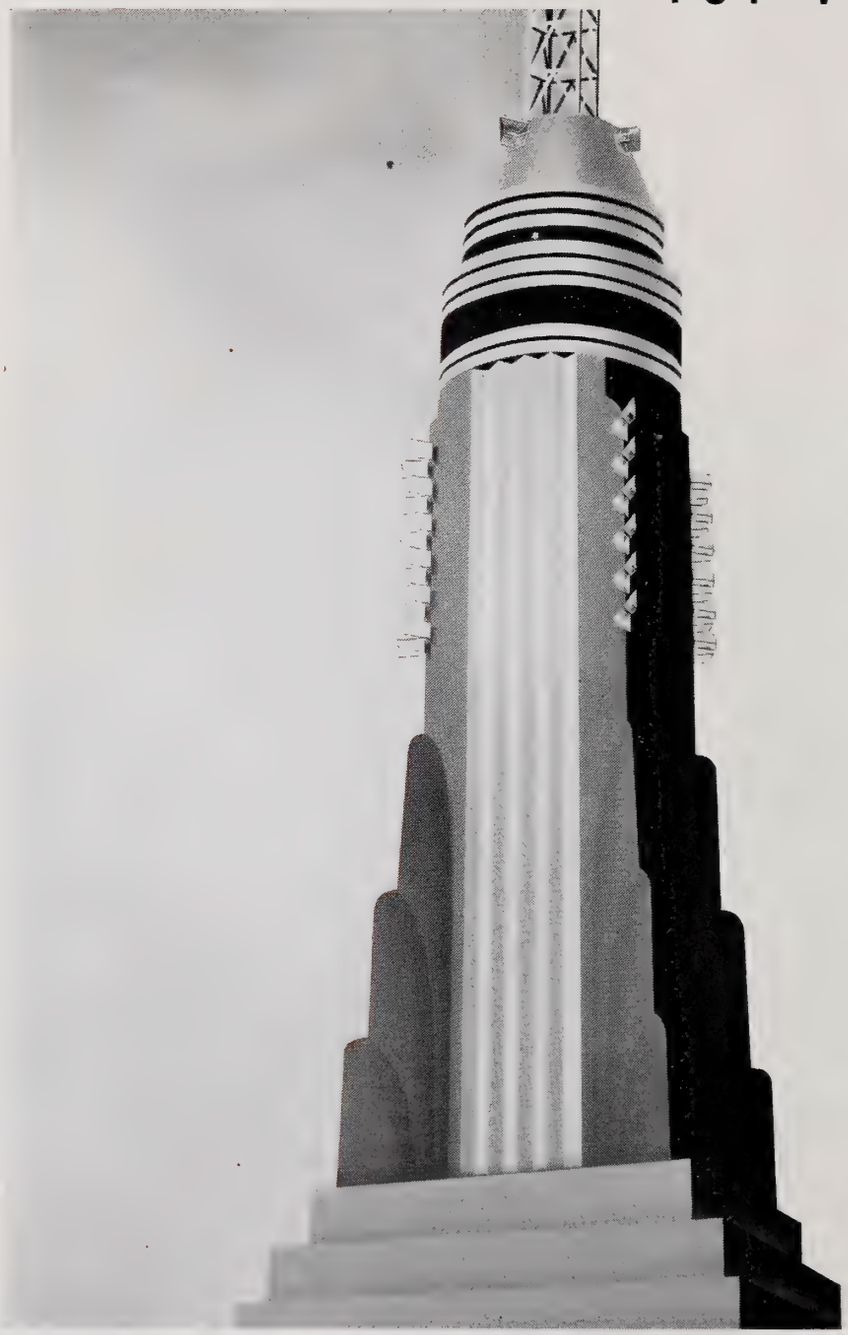
At the moment WITH promotion includes panel advertisements on the sides of 350 buses and streetcars, newspaper schedules, several billboards, trailers in 20 theatres, small gifts delivered at the rate of 500 a month by the Welcome Wagons that visit newcomers in the city, and matchbooks distributed at the rate of 4 million a year.

STORY OF AN AFFILIATE

An illuminating peek into the reasons why network affiliates have been hit harder than independents is presented here. This is the report for a recent month's business by an important affiliate of an important network.

In that month the station carried 37 hours and 23 minutes of local commercial programming which brought in an average per-hour revenue of $436.86.

It carried 156 hours and 17 minutes of national spot for an average per-hour revenue of $402.57.



It carried 211 hours and 15 minutes of network commercial time for an average per-hour revenue of $86.22.

Put another way, the category of business that brought the least revenue per hour occupied more than 50% of all commercial time carried by the station.

ANDREW

"SKEW"* ANTENNA

for VHF and UHF television

The ANDREW "Skew" Antenna is the *only* antenna which provides a circular radiation pattern from antenna elements placed around a supporting structure which is larger than a half wave-length on a side! With the "Skew" Antenna, it is possible to mount a multiplicity of TV antennas on the sides of tall buildings, on the sides of existing towers — even towers which also support a standard antenna on top. The economy offered by a joint operation of this type is obvious.

At present, the "Skew" Antenna is custom built for each installation and consequently general performance specifications cannot be delineated. However, ANDREW engineers will be glad to discuss its application to specific situations.

*Patents applied for

ANDREW four element "Skew" Antenna on the conical end of the mooring mast of the Empire State building, used as auxiliary by WJZ-TV. Lower on the mooring mast, artist's sketch shows the 48 element ANDREW "Skew" Antenna to be installed for WATV.

HOW TO FINANCE TV STATIONS

There's plenty of venture capital available to finance television stations, but to pry it loose is not an easy job. Here an expert suggests how investors and telecasters can get together.

By Dr. Henry H. Buba

IN THE 1930s, an initial stock issue of about $20,000, subscribed to and not always paid for by members of a family or a group of interested local citizens, was sufficient to obtain charter, franchise, license, plant, equipment and working capital to start operations of a medium sized local radio station. In those days, investor and businessmen got together through personal acquaintance and mutual interest to plan and build up a lucrative business in this promising and wonderful venture called Radio.

As we know now, the venture kept its promises, it paid off; its aggregate together with networks, set and station manufacturer, communication and other services developed into the giant: THE RADIO INDUSTRY.

The local radio station was and is of an ideal investment size for a close corporation, for an owner-management operation, with the advantages of fairly informal financial procedures, of easily adjustable tax positions, whereby the doubly taxed dividends can be substituted by management fees and other means, and where the growth of the net worth can, if desired, ultimately be turned into a capital gain.

Required Capital

In the year 1953, an initial stock issue of at least $300,000, subscribed and fully paid for, is required to start the operations of a medium-sized local television station, and another $100,000 would be necessary to provide it with adequate working capital to get over the first two lean years. This means a capitalization of at least $400,000 on a long-term investment basis from two to five years.

It is obvious that only a few prospective television station founders can ask members of their families or their neighbors and friends to stand by with such sums, even though there is no doubt that this new venture—TELEVISION—promises enormous returns.

Where is the money to come from?

When we examine the TV license applications filed with the FCC, we find that a large percentage is submitted by the owners of radio stations. That means that the local radio stations, especially the larger ones, were able to build up enough funds (despite Section 102 of the Revenue Code, which penalizes the excessive accumulation of surplus) and to obtain sufficient personal credit standing to finance the new enterprise without curtailing the current radio station operations.

Other funds are coming from newspaper publishers and networks, and out of resources accumulated by owners or corporations related to the entertainment and advertising fields. Besides, there are the possibilities of obtaining cash through mortgages on TV station premises, installment financing of equipment by the manufacturer, and out of current bank loans on personal credit and holdings, which, together, might provide temporary help to start TV operations on a dangerously thin cash basis with a high interest burden.

We know now that an established and well-run TV station can expect, conservatively a capital return of 20% and more (before taxes) after it has gotten over its infant ailments. The TV station's break-even point is fairly fixed, it does not go up materially with higher billings, so that the 20% profit margin can be increased considerably through additional sales.

With such a magnificent background of financial experience figures, and with today's record volume of liquid assets owned by individuals, who hold about $160 billion in cash, bank deposits and government securities compared to $45 billion before World War II, it would be strange, indeed, if venture capital were not to try very hard to get in at the ground floor to finance the coming 1,200 or so TV stations.

First Considerations

But before venture captial beats its path to the future TV station, we ought to consider certain points along the route:

1. The future telecaster, a creative individualist by nature and profession, is quite often reared in the thought that he can run a half million or a million dollar enterprise as a close corporation, as a family affair, with simple financing procedures and informal dealings, even though the operation itself will be run with vigorous efficiency. His idea and ideal is to borrow sufficient money through mortgage, personal credit, long-term notes, etc., at a fixed percentage, and to keep the voting stock for himself and his close associates. But if he wants to secure and needs venture capital, he will have to change this attitude.

Venture capital will flow easiest into a market that is open to direct profit sharing, into a market that is well-explained, advertised, and conservatively appraised through audits and market research, into a market that is properly governed by corporate stock owner rules and Securities & Exchange Commission regulations.

As to these rules and regulations, they are strict as to ownership, profit sharing, participation in assets and additional stock issues, but they leave ample room for the founder or founders to obtain reasonable and workable arrangements to prevent undue interference in their operations and

ABOUT THE AUTHOR

Henry Buba is president of The Henry Buba Co., New York, which specializes in management services for radio and TV stations (program audits, program consulting, general financing, etc.). He is a veteran of the financial, managerial and market research fields, both as economist, statistician and budget manager for C. E. Hooper Inc. for five years and, before that, as senior auditor for R. G. Rankin & Co. with assignments to Bristol-Myers, International Business Machines, Sears, Roebuck, Woolworth, New York Trust Co., Manufacturers Trust and various investment houses. A CAP, he also holds MA and PhD degrees in economics and market research.

dividend policies by the cash providing absentee investor and "outsider."

This is not the place to go into the possible variations of classes of corporate stock most desirable for a local television station. Such arrangements are best worked out from case to case, where the intentions of the participating parties are known.

The future telecaster, who is going into the money market for funds, will have to pay a price, his independence will be curtailed, his responsibilities enlarged. He should submit to this fact, he should be willing to pay this price, not only because the ultimate results will be worth it, but because he has plenty of company; all expanding and dynamic business went that way, and local television is going to be Big Business.

TV Looks Good

2. What is the experienced investor's attitude toward local TV stations, the big or small investor, who will go into oil, railroads, real estate, anything that is supposedly good, the investor who is resourceful, both in money and judgment, who sees his broker in New York, Chicago or San Francisco with the ever repeated greetings, "what's good"? Well, local television looks very good. Whereupon they, the broker and the investors, examine the situation. They come up with the following preliminary findings:

Item: The local TV station's prosperity depends on its management and on the local market conditions and position to a much greater degree than generally experienced in other industries, because the station's merchandise is program and programming, i. e. intangible values and services, which disappear in thin air, as far as the investor is concerned, immediately after production.

Item: The owner-management of a TV station is licensed by the FCC for one year. We know that for all practical purposes the FCC license is unlimited. However, the wording of the regulation raises a big question-mark in the mind of the investor, especially when he is confronted with the complete and formidable array of FCC regulations governing the station's operations.

FCC Cramps Venture

Item: The investor can now invest in five stations and thereby spread his risk. He would like to spread it even further, over ten stations or twenty. He would like to have his broker arrange for an investment participation instrument covering many markets, specifically applying to investments in local TV stations, as it has been set up through equipment trusts, etc., in other industries. The FCC regulations for TV stations, patterned after radio station regulations, do not seem to have taken into account the much higher initial investment needs, and have not—so far—provided for reasonable easements to satisfy such needs.

Item: Although the general financial picture of the local TV stations is excellent, investment management as well as TV station management has had too little experience to answer all the questions generally asked by the experienced investor.

So much about the prospective investor and his preliminary attitude.

3. The big brokerage houses, which manage the issuance and sale of shares in established corporations, are not equipped to handle a comparatively small issue of one million dollars or less, unless it is presented and vouched for by people well known and experienced in banking and industry.

Generally, these houses are unfamiliar with radio as well as television station problems, and would decline to attempt to float an issue under the present regulations. However, they would be interested in a participation issue, either in stocks or bonds, covering many local TV stations (as referred to above) through a trust instrument or any other device satisfactory to the FCC and the stations. The feasibility of such a device is certainly not out of question, but will require study—TV day is still young.

Smaller investment houses will undertake the floating of a stock issue of a local TV station for a fee ranging from 20 to 30% with no guarantee for complete sale. This may appear to be an excessively high charge, representing up to $300,000 on a million dollar issue, but if we consider what enormous premiums are paid now for good TV stations, it might not be so much for the telecaster-in-a-hurry.

Banks, mutual savings banks as well as commercial banks, are, of course, unable to provide long-term investment money to local TV stations, except where such loans can be secured by first mortgages on buildings, marketable securities, etc.

4. What keeps the investor and his agencies, the broker, the securities expert, the investment counselor away from the local TV station investment market? It is not lack of money. There is plenty. It is not lack of proven financial success on the part of the established stations.

We have touched on a few obstacles: Some FCC regulations, a widely scattered market of comparatively small units, the service nature of the TV station business, its newness, its inexperience, the seemingly unknown quantity of management and location.

What appears to present part of the distance between investor and investee is their mutual non-acquaintanceship. There is today no tradition of fellowship between the two, not only because television is new, but because local radio, big elder sister to local television, had little occasion—as we have seen—to establish such relationship. However, the time is near when the surplus funds and credits, now used in the founding of television stations, will be exhausted and other money sources will have to be tapped.

The distance between the two will have to be overcome by mutual approach.

The investment agencies will have to become familiar with TV station problems and earning potentials, coldly appraised by the experts; and the telecaster will have to acquaint himself with the usages of finance.

The intangible of the TV business, as it now appears to the prospective investor, will have to be converted into the tangible, as it is known and daily treated by the experienced telecaster.

Make TV Tangible

The lines along which this conversion ought to move are well-tried and briefly these:

(a) Survey the locality of the new station and its market together with the socio-economic status of its population. Investigate the competitive position as station and as advertising medium. List prospective time purchasers and desirable network affiliation, if any. Investigate the local market as to its varying program tastes and its general daily activity routine.

(b) List the desired engineering facilities, signal coverage, fixed assets, buildings, their location, etc. In this connection, there is a close relationship between studio space, camera facilities, talent and material availability, and the projected programming policy.

(c) Describe the management, which is the daily producer of the intangible: The program, the station's merchandise. Such management must be selected not only on the basis of its judgments in entertainment and telecasting production values, but also on the merits of administrative ability. (We mentioned before a working capital of $100,000 for the first two years. It can vanish within months under faulty management.) With the constant changes in performers, vehicles and methods of presentation, it is management that must maintain efficiently a constant flow of simple entertainment, information, amusement and local public service, without elaborate devices and costly talent ingredients.

Investor Needs

The investor will need skilled and objective aid in screening the prospective telecaster and his management, aid that is qualified to appraise managerial acumen and judge on proposed general programming policies.

(d) Prepare a pro-forma balance sheet and estimated profit and loss statement for the first two years together with an amortization schedule of bonded or other indebtedness and a tentative statement on dividend planning.

Such presentation of facts and estimates is the most effective approach to the outside investor or his agent. It will put him on familiar ground and, at the same time, drive home to the enterprising telecaster the prospects and problems he faces.

Bergen Bonanza

ALTHOUGH his appeals were aired by radio exclusively, 60% of 1952 Christmas gifts to Edgar Bergen's "Operation Santa Claus" project came from the nation's top 10 television cities [B•T, Dec. 29, 1952], CBS Radio officials reported last week. Aside from the heavy volume from TV markets, gifts during this drive totaled 45,000 pounds—an increase of more than 40% over the previous year's total, Edward F. Lethen, network director of sales extension, noted. As a clue to the strong response from TV markets, he pointed out that "in the 18 top TV cities, *nighttime* radio listening has increased 17% in the last year."

Two of the many questions answered by the Dr. Forest L. Whan survey of the Boston Trade & Distribution Area:

HOW MANY TV STATIONS CAN NEW ENGLANDERS REGULARLY GET WITH GOOD, CLEAR PICTURES?

2 stations	76.7%
3 stations	14.3
1 station	8.4
4 or more stations	0.1

(Whan survey, page 55)

. . and which TV station do New Englanders prefer, as indicated by "share of audience," "listened to most," and "heard regularly"? The following table covers daytime viewing (the report gives the nighttime score also).

Station	Share of Audience	Listened to Most	Heard Regularly
WBZ-TV	52.2%	54.8%	64.6%
Station B	33.8	32.5	57.3
Station C	9.9	8.7	14.6
Station D	3.5	3.8	2.8
Station E	0.6	0.2	0.2

(Whan survey, page 57)

SELLING IN NEW ENGLAND?

If so, you need the Dr. Whan radio-television audience survey

In this advertisement we've condensed material from part of two pages of the Whan report. *Part of two pages only!* All 70 pages are equally fact crammed, ready for easy interpretation and application to marketing plans. With the Whan report at your elbow you don't guess—you *know!* It lights up a great trading area as never before. If you don't have a copy, get in touch with WBZ-TV, or with NBC Spot Sales.

Principals include President **Joseph Patrick Wilkins**, general manager of KFBB. (BPCT-1195.) City priority status: Gr. A-2, No. 108. Granted Jan. 15.

Fargo, N. D.—WDAY Inc. (WDAY). Granted vhf Ch. 6 (82-88 mc); ERP 70 kw visual, 35 kw

Coverage that counts . . . .

As Hawaiian net fishermen know, it's the greatest coverage of the right spot that brings in the biggest haul. And, when you select WREC to cover the $2 Billion Memphis Market, your net profits go up because ONE schedule gets both the Rural and Metropolitan listeners. The latest Standard Audit and Measurement Report and Hooper Ratings will show you why WREC holds the greatest audience and completely covers the 78-county area. Ask your Katz man.

For top performance . . . specify Continental

◀ Phasing Control and Power Division equipment for two element 5 KW array offers simplified operation. Units also may be housed in cabinets similarly styled to Continental transmitter equipment.

Phasing Control and Power ▶ Division Equipment for 5 KW operation with a four element antenna system. Deluxe cabinet design matches Continental transmitter equipment.

◀ Coupling equipment for 5 KW operation. Breadboard arrangement of components on metal panel facilitates installation on wall of the antenna tuning house.

Weatherproof antenna coupling unit for 5 KW directional operation. ▶

Continental

DIRECTIONAL ANTENNA EQUIPMENT ...via Graybar

Directional antenna equipment custom-designed and engineered to meet *your own particular needs* — that's what you get when you specify Continental.

Continental engineers have designed and built equipment ranging in capacity from 250 watts up to the world's most powerful. You can be sure of circuit designs that are selected for maximum stability and long-term reliability . . . components that are designed for operation at double the rated capacity of the equipment.

Your Graybar Broadcast Equipment Representative will be glad to give you specifications and prices on the complete line of Continental directional antenna units and transmitters . . . as well as on any of your other TV and broadcast requirements.

Make it a point to call today for full particulars. *Graybar Electric Company, Inc. Executive offices: Graybar Building, 420 Lexington Avenue, New York 17, N. Y.* 316-11

FOR THE RECORD

New AM Stations . . .

Actions by FCC

Indianola, Miss. — Central Delta Bcstg. Co. Granted 1380 kc, 500 w daytime, antenna height 200 ft.; engineering condition. Estimated construction cost $10,760, first year operating cost $24,000, revenue $36,000. Filed April 9, 1952; amended Sept. 22 and Nov. 21, 1952. (BP-8458.) Granted Jan. 15, 1953.

Indianola, Miss.—W. W. Chapman. Granted 900 kc, 250 w daytime, antenna height 250 ft.; engineering condition. Estimated construction cost $12,475, first year operating cost $36,000, revenue $46,000. **W. W. Chapman,** sole owner of grantee, is manager and 50% owner of *Indianola Enterprise* and owner of *Sunflower Tocsin.* Filed June 17, 1952. (BP-8521.) Granted Jan. 15, 1953.

Coudersport, Pa.—Farm & Home Bcstg. Co. Granted 600 kc, 500 w daytime, antenna height 300 ft.; engineering condition. (Comr. Eugene Merrill did not participate; Comrs. E. M. Webster and Frieda Hennock dissented.) Estimated construction cost $7,232, estimated first year operating cost $30,000, revenue $45,000. (Applicant purchased equipment of now-deleted radio station owned by Canisteo Radio Corp., Hornell, N. Y., for consideration of $4,732.) Principal stockholder is **Cary H. Simpson,** general manager and partner of WKBI St. Marys, Pa. There are 23 other stockholders, all with minority interests. Filed Jan. 17, 1952. (BP-8374.) Granted Jan. 15, 1953.

Emporium, Pa. — Elk-Cameron Bcstg. Co. Granted 1340 kc, 100 w fulltime, antenna height 150 ft. (Comrs. Frieda Hennock and E. M. Webster dissented.) Estimated construction cost $7,478, first year operating cost $16,000, revenue $24,000. Grantee is licensee of WKBI St. Marys, Pa. Filed Oct. 5, 1951. (BP-8265.) Granted Jan. 15, 1953.

Existing AM Stations . . .

Actions by FCC

KGKO Dallas, Tex.—Lakewood Bcstg. Co. Commission en banc (Comr. Frieda Hennock did not participate) adopted memorandum opinion and order *denying* joint petition of WFAA Dallas (A. H. Belo Corp.) and WBAP Fort Worth (Carter Publications Inc.) which requested that application of KGKO Dallas for license be designated for hearing or, in the alternative, that it be granted subject to condition that KGKO should satisfy all legitimate complaints of image interference to other AM stations operating in the area. Commission *granted* KGKO program test authority and license. Memorandum opinion and order Jan. 19.

KVAL Brownsville, Tex.—T. Frank Smith. Granted request for cancellation of license and deletion of call letters. (BL-4646.) Action Jan. 19.

Existing FM Stations . . .

Actions by FCC

KSWI-FM Council Bluffs, Iowa — Nonpareil Bcstg. Co. Granted request to cancel license and delete FM station. (BRH-564.) Action Jan. 19.

WJAR-FM Providence, R. I.—The Outlet Co. Granted request to cancel license and delete FM station, and also delete mod. CP. (BRH-574, BPH-1730.) Action Jan. 19.

WBZA-FM Springfield, Mass., Westinghouse Radio Stations Inc. — On petition, waived sec. 3.205 of rules, which requires that majority of station's programs originate from main studio, in order to permit WBZA-FM to continue duplicating AM programs of affiliate station WBZA, in Springfield, which operates synchroneously with WBZ Boston; and modified its license accordingly. Comr. Bartley dissented with following statement: "With the considerable number of other FM signals (6) reaching one of the top FM markets in the country, it appears to me inappropriate that a waiver of rules be authorized. Certainly a waiver is not necessary to maintain FM service in this area where there are several substitutes should Westinghouse desire to cease operation rather than operate a Springfield FM station."

Ownership Changes . . .

Actions by FCC

WNER Live Oak, Fla.—Live Oak Bcstg. Co. Granted assignment of license from John A. Boling to **Norman O. Protsman** for $40.000. Mr. Protsman is general manager of WNER. (BAL 1484.) Granted Jan. 15.

WMAN Mansfield, Ohio—Richland Inc. Granted consent to Ruth Rubin, Executrix of Monroe F. Rubin Estate, to transfer control to **Ruth Rubin,**

et al., heirs. No monetary consideration. (BTC-1431.) Granted Jan. 15.

KRCT Baytown, Tex.—Bay Bcstg. Co. Granted consent to W. B. Bates, et al., to transfer control to **Frank W. Sharp** (who acquires 55% interest) and **W. D. Christmas** (who acquires 45% interest) for $29,980. Mr. Sharp owns construction firm in Houston, Tex., and Mr. Christmas is furniture dealer in Houston. (BTC-1421.) Granted Jan. 15.

Hearing Cases . . .

Actions by FCC

Wichita Beacon Bcstg. Co., Wichita, Kan.—Commission denied petition for reconsideration of Commission's memorandum opinion and order of Nov. 5, 1952, which removed from hearing docket and returned to processing line petitioner's application for new TV station on uhf Ch. 16. (BPCT-973.) Comr. Walker dissented. Memorandum opinion and order Jan. 19.

WBZ Boston, Mass. (Westinghouse Radio Stations Inc.), and WJZ New York (American Bcstg. Co.) re KOB Albuquerque, N. M. (Albuquerque Bcstg. Co.)—Commission *granted* petition for rehearing filed by WBZ Boston insofar as it requests that phrase "the availability of other primary and secondary service to such areas and populations" in issues designated in memorandum opinion and order of Nov. 3, 1952 (which designated for hearing application of KOB Albuquerque for extension of special service authorization for KOB to operate on 770 kc, 50 kw day, 25 kw night [BSSA-275]), be declared not to contemplate receipt of evidence relating to network affiliation, and *denied* petition in all other respects. Commission *denied* motion filed by WJZ New York to clarify, change and enlarge issues in this proceeding. (Docket 10336.) Comr. E. M. Webster declined to participate and stated, "I am not in a position to participate as I am still of the opinion that KOB should be returned to its regularly licesened assignment of 1030 kc." Memorandum opinion and order Jan. 19.

KHIT Lampasas, Tex.—Lampasas Bcstg. Corp. Commission granted, in part, petitions filed by KHIT to the extent that petitioner requests reconsideration by Commission of action last May 28, 1952, designating for hearing application for renewal of license, and removed application from hearing docket to be examined concurrently with pending application for transfer of control. (Docket 10205; BR-2057.) Memorandum opinion and order Jan. 19.

New Petitions . . .

January 15

WJVA South Bend, Ind., St. Joseph Valley Bcstg. Corp. (renewal of license, Docket 9692, BR-1377; transfer of control, Docket 10065, BTC-897)—Chief of FCC Broadcast Bureau filed exceptions to initial decision of examiner issued Dec. 19, 1952, which recommended renewal of license and approval of transfer.

Atlantic City Bcstg. Co., Atlantic City, N. J., et al. (Docket 10119, BP-8090; new AM, 1490 kc)—Comments by Chief of FCC Broadcast Bureau concerning petition of Jan. 9 by Garden State Bcstg. Co. to reopen record to corroborate testimony [B•T, Jan. 19].

January 16

Mt. Hood Radio & Television Bcstg. Corp. (KOIN) and Portland Bcstrs. Inc. (KGW), Portland, Ore. (Dockets 10316, 9136; BPCT-1029 and 431; new TV, Ch. 6)—Petition filed by Mt. Hood opposing and requesting denial of petition by Pioneer which asked rehearing of FCC ruling of Dec. 17, 1952, allowing Mt. Hood to amend its application [B•T, Dec. 22, 1952].

WJR The Goodwill Station Inc., Flint, Mich., et al. (Docket 10268, BPCT-967; new TV, Ch. 12)—Joint petition by Trebit Corp. and W. S. Butterfield Theatres Inc. for stay of taking further testimony in hearing, set today (Jan. 26), until at least one week after Commission's action on petitions for review of examiner's action of Jan. 14 granting WJR petition to amend. Petitions for review filed Jan. 19 by Trebit and Butterfield.

Port Arthur College (KPAC) and Smith Radio Co., Port Arthur, Tex. (Dockets 10285 and 10352, BPCT-839 and 1013; new TV, Ch. 4)—Smith Radio requests oral argument before Commission en banc on its Jan. 2 petition for review of order by examiner denying acceptance of certain depositions [B•T, Jan. 19]. KPAC on Jan. 19 filed reply to Jan. 7 supplement of Smith Radio Co. to its Jan. 2 petition for review. Petition also filed Jan. 19 by Jefferson Amusement Co. (BPCT-1440) opposing Jan. 5 petition by KPAC and Jan. 7 petition by Smith Radio which both seek dismissal of Jefferson application. Jefferson wishes to be consolidated in hearing.

WGAL-TV and Peoples Bcstg. Co. (WLAN), Lancaster, Pa. (Dockets 10366 and 10365, BPCT-910 and 654; new TV, Ch. 8)—Motion by Peoples to enlarge and change issues in comparative hearing set by FCC.

January 19

Docket 10345; Amendment of Part 4 of FCC rules governing TV auxiliary broadcast stations—Comments filed by NARTB, NBC and Raytheon Mfg. Co. Deadline for filing comments Jan. 19; replies, Jan. 29.

Sparton Bcstg. Co., Parma, Mich.—Petition to amend Sec. 3.606 of rules to add vhf Ch. 10 at Parma. Waiver of Sec. 3.609 requested.

WBKZ-TV Battle Creek, Mich., Booth Radio & Television Stations Inc.—Reply by WBKZ-TV opposing petition of Michigan Bcstg. Co., permittee of WBCK-TV Battle Creek, which asked revocation of assignment of call of WBKZ-TV to Booth Radio. Booth explained its WBKZ-TV call was granted first and has been widely publicized.

Sunflower Television Co., et al., Wichita, Kan. (Docket 10258, BPCT-677; new TV, vhf Ch. 10)—Petition by Sunflower to amend its application to show slight changes in costs.

Radio Wisconsin Inc. (WISC) and Badger Television Co. (WIBA), Madison, Wis. (BPCT-410 and 1472; new TV, Ch. 3)—Motion by Badger to dismiss Jan. 13 petition of Radio Wisconsin which asked FCC to dismiss earlier petition of Badger requesting Commission to (1) dismiss Ch. 3 application of Radio Wisconsin or (2) issue rule to Radio Wisconsin to show cause why it should not elect to drop its appeal in D. C. Court of Appeals or withdraw Ch. 3 application.

January 21

WLIN Wausau, Wis.—Reply filed by WSAU Wausau to Jan. 8 petition of WLIN requesting dismissal of Jan. 2 protest of WSAU to Dec. 4, 1952, action by FCC granting without hearing a CP to WLIN to move from Merrill, Wis., to Wausau and increase power to 5 kw, operating fulltime on 550 kc. WSAU contends it is party in interest and asks FCC to set WLIN move for hearing.
